Pumping Station

No. 97.

Tanjore 29 March 1896

To,
The Chairman
Municipal Council
Tanjore

Sir,

I have the honor to inform you that the water in the pump well at stopping last night was only 6 feet 3 inches and at starting this morning there was only 10 feet 4 inches. The dept of water at starting yesterday morning was 11 feet, so that I think there will be about 5. feet or less at stopping to day. The water seems to decrease by a foot every day and I find difficulty in working the Engine with low water. It is very essential that something be done for a further supply of water to the filter bed till such time as a fresh may come down the river. This is very important and I would wish to consult you on the matter at your earliest convenience.

To

The Chairman
Municipal Council
Tanjore.

Sir,

I have the honor to request that you will be good enough to order that the weekly pumping Statements be sent to me as soon as received. Those for week ending 14th March are only this day to hand.

2. It is understood that the water has gone down to 10 ft in the Engine well, it might be advisable to request the Executive Engineer to let down a small supply for a few days.

To,

The Chairman
Municipal Council
Tanjore

Sir.

In continuation of my letter No. 97 of 29-3-96 regarding the failure of water in the filter bed, I have the honor to inform you that should nothing be done in time for a further supply to the same, there may be an entire failure in the course of a week as the water is decreasing by a foot daily. I would propose that the Executive Engineer D. P. W. be applied to, to allow a quantity of water down the Vennar say every third night for about 10 or 12 hours, If this cannot be done a channel should be cut above the filter bed (up stream) to about 500 yards or so by about 4 or 5 feet broad by 4 feet in depth. I have no doubt that this will increase the supply and prevent a complete failure - The depth of water in the suction well at 6-30 P.M. to day was only 5. feet and most probably the engines will have to be stopped before the usual hour of 8 P.M.

SIR,

I have the honor to submit for the information of Government Copies of the following letters received by me in connection with the water works at Tanjore.

(1) Letter from the Sanitary Engineer to Government dated 27 March 1896 No. 984

(2) Letters dated 29-3-96 and 29-3-96 Nos 97 & 99 from the Head Driver Tanjore Water-works.

2. I may add that I have written to the Sanitary Engineer for advice in the matter and that I have acted on his suggestion and written to the Executive Engineer Tanjore to let a small quantity of water down the Vennar for a few days.
