CURRENT No. 1115

PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following:-

Letter from the Superintending Engineer III Circle, No.
4017 dated 26th March 1896:-

In continuation of this Office No. 3166 of 16-1-96, I have
the honor to inform you that I inspected the Patha Cuddapah
tank on 10th instant, my visit having been delayed by causes
beyond my control.

2. I agree with the Sanitary Board that the presence
of this tank right across the natural drainage outlet of the
town of Cuddapah must abnormally raise the subsoil water in
the latter, and that its removal is likely to improve the
health of the town.

3. I have, therefore, given orders for the necessary
plans and estimates to be prepared, and I hope they will be
ready by the end of April, in time to admit of their being
carried out before next monsoon.

4. The matter has been delayed owing to the alterna-
tive proposals referred to in para 3 of my No. 3166 of 16-1-96
which I consider, on inspection, to be untenable, but the esti-
mates could not have been prepared with accuracy so long as
the tank was full of water, (which it is still in the inter-
ests of 2nd crop irrigation) so, if ^{the} estimates are now submit-
ted speedily, the delay will have done no harm.

Order thereon: No 1227 W. of 7 April 1896

Communicated to the Local and Municipal Department
in continuation of G.O. No. 413 W., dated 1st February 1896.

2. The plans and estimates promised by the Suptg.
Engineer

Engineer should be submitted through the Chief Engineer for Irrigation.
