C. SITARAMAYYA PANTULU GARU;

CHAIRMAN,

MUNICIPAL COUNCIL ELLORE.

To,

*The Chief Secretary to Government
Fort St. George
Madras*

Sir,

Through the Collector, Godavari.
With reference to G.O. No. 1478 M. dated
12th September 1895 regarding the Ellore Municipal
administration report for 1894-95, paragraph 3
Clause 3, I have the honor to state that to extend
the private scavenging system, the Councillors have
been requested and repeatedly reminded to take an
interest in the matter of improving the system and
were supplied with printed private scavenging
application forms for distribution to house holders
in their respective wards and to get their latrines
served under the system. The Municipal Councillors
have also been empowered under section 274 of the Act
to enter into and inspect all back yards, premises,
cesspools &c. and to report upon their unsanitary
condition to enable the Council to prosecute their
owners to secure proper sanitation. The sanitary
staff has also been warned to pay special atten-
tion to this matter.

2. The number of houses on the register up to date is 253 and 213 out of these paid their private scavenging fees and the amount so realized is Rs 396-13-11 against Rs 582-10-4 incurred in working the system. The remaining 40 are new applications recently received and are under enquiry as to their nature and classification. As soon as necessary information is obtained steps will be taken to recover from them the proper fees.

3. Thirty six prosecutions have already been instituted under section 221 of the Municipal Act for keeping dirty latrines and there is now another list of such latrines awaiting the sanction of the Council for prosecuting the owners.

4. I regret to remark that the number of houses under Private Scavenging would have been much larger but for the removal of the Sub Court from Ellore in January last and with it a large establishment, a number of followers and numerous clients population and the constant strikes of the Municipal scavengers. Whenever strict enforcement of the private Scavenging System was tried, the fact being that they are also privately doing this work. The recent floods have also much damaged many houses. In spite of these disadvantages, I am glad to find that the loss to the Municipality under private scavenging system is much

The number of houses in 1894-95 was 186 against 213 now and the expenditure in 1894-95 was Rs 486-9-10 against Rs 582-10-4

much less than previous years and the number of houses has also much increased, as would be seen from the marginally noted figures. I am sure that in course of time the system will well succeed and become self-supporting. I request therefore that Government will be pleased in these circumstances, to suspend its opinion as to the working of the Private Scavenging System in this Municipality and to extend by three months the time already granted to enable the Council to show more satisfactory results.

I have the honor to be
Sir,
Your most obedient servant

C. S. Ramayya
Chairman.

2. This report is nearly a month late in spite of the strict orders conveyed in para 3 (3) of the G.O. under reply.
3. It will be seen that the stimulus applied by Government has had some effect though the result is not so good as might have been expected. This instance shows how much the Municipality requires in the way of pressure from without to get it to perform its duties properly. At the same time I must admit that Ellore has been very unfortunate this year in having suffered serious damage from inundation and that the Council have much difficulty in controlling its scavenging establishment. There are all imported and are prone to strike on small provocation. It is also not to their interests that this system of private

private scavenging should be extended
as this deprives them of the fees they were
getting in addition to their fixed pay
for clearing the latrines of private persons.

4. If this Council would provide its
scavengers with a site on which they could
build decent huts, they might be less prone
to strike as that would entail ejectment.
If also they could be given some small
extra remuneration for each house served
on a fixed number, it might have a good
effect and make them too anxious to
extend the system.

Misc. order No. 719 h 1-5-96

The progress made by the private scavenging service cannot be regarded as ~~at all~~ satisfactory. The Chairman's report, however, shows that the municipal council is devoting increased attention to this matter, and in consideration of this fact and of the circumstances explained in para. 3 of the Collector's endorsement, the Government will defer, for the present, taking the action proposed in the last paragraph of its order No. 1478. M. dated 12th September 1895. The municipal council, should, however, see that the improvement which has begun is sustained.

2. The Collector's suggestions in para. 4 of his endorsement will be commended to the municipal council, for careful consideration.

3. The delay of nearly one month in the submission of this report should have been explained.

* From the fact that the expenditure still exceeds the receipts, it is evident that either the scavenging establishment is too large or that the scale of fees levied is too low. This question should be carefully considered & rectified if possible.
