Read letter No 967 of 1896 dt 26-3-96 from the Sanitary Engineer to Government, Madras, in reply to this

this office letter no 31 of 17th instant, informing Mah, if there are any Savings out of the estimate, a 3" Iron pipe will be laid in Raja street at a cost of about Rs 1120.

Resolved Mah the Sanitary Engineer be requested Mah, if the Savings cannot reach the laying of large sized pipe through Raja street, the smaller pipe proposed may be laid and the Council will provide the necessary funds out of the Closing balance of 1896—97.

Municipal
Chairman

Minute

In looking over the plan connected with the Water-Supply Scheme and inspecting the route through which the main pipes are to be laid, it is observed that they are carried through the town so as to bring all the houses within certain distance from them. The pipes are laid, no doubt, to serve all parts of the town. But there are one or two points which seem not to have been considered. When the routes were adopted, for instance, instead of carrying the line of pipes to Punjuped through the South Mada Street of the Ekambareswara temple, it would have been well if it was taken through the Linigappan Street which is of an equal distance, being exactly parallel to the 1st mentioned Street. Linigappan Street as may be seen from the plan and as may be evident to the resident Councillors, has two rows of houses and so three times as populous as the Southern Mada street which has only a single row of houses; thus the change of the route will serve an infinitely large number of inhabitants, and it will not involve any additional cost.

2. Again the main line touching at the South end of the Ekambareswara Sannathi Street, goes through that street which is again sparingly populated and the Raja street which runs exactly parallel to it is touched at three points

points from the back street. The raja street it is well known is a very important street through which all the festive and marriage processions pass and sometimes halt. A large congregation of people collect together to witness fire works or wait to see the processions pass during the 4 or 5 annual festivals, of which the Vinayagar festival is the chiefest attracting as large a crowd as 20,000 or so on the principal days.

It is a great pity that the main pipe does not pass through this most important street which is more thickly peopled than the back street through which the main passes.

The Sanitary Engineer, Mr Jones when I had the pleasure of seeing on the subject and explaining personally, concurred with me in the utility of the suggestions made and so far promised to alter the line as suggested in the para I and to lay a smaller pipe at least through the Raja Street out of the savings which he expects may be effected or on a small additional charge if there be no savings. I therefore venture to think that if these suggestions be put before the Councillors and officially carried to the notice of the Sanitary Engineer through the proper channel we may get the defects remedied. I therefore put these

Suggestions

Suggestions on paper that they may have due attention.

— Minute from Councillor M. R. Ry. C. Venkata Subbaiyar avgl. for altering the position of some of the water pipes proposed to be laid in Big Kanchi in connection with water supply scheme.

The proposal for altering the course of the main pipe that it may pass through Luigappan Street instead of South mada street of Ekambareswaran temple and laying a pipe along the Raja Street, are recommended for adoption the reasons assigned seem to the Council to be weighty. The probable Cost may not be very much and may be

Confidently

confidently expected to be made up by the favourable rate of exchange if not by general savings.

To

The Chairman.
Municipal Council
Conjeveram

Sir

With reference to your No. 310 of the 17th instant, I have the honor to inform you that the extra Cost incurred in laying the main pipe via Puttery Raja streets will be Rs 2,847 because the size of certain other main has to be increased. The Cost of the change to Lingapa street from South Madah Street will be only Rs 22 and can be carried out. The first item is very heavy; it would be better to leave matters as they stand, and bye & bye if there are any savings lay a 3" main in Raja Street. The Cost of this would be Rs 1120 and would serve the same purpose

2. An early reply is requested as pipe tenders will be received on the 15th April and schedule must be altered.

M. R. Ry. N. Venkatapathi Nayudu Garu.
CHAIRMAN MUNICIPAL COUNCIL,
CONJEEVERAM

To

THE Chief Secretary
to Government. Madras.
thro': the Sub-Collector and the Collector.
of Chingleput.

SIR,

* Letter to Sanitary Engineer No. 31 dated 19th March 1896 with two enclosures.
Sanitary Engineer's letter No. 967 dated 26th March 96.
Letter to Sanitary Engineer No. 255 Dy dated 31st March 1896.
Sanitary Engineer's letter No. 1064 dated 8th April 1896.

In forwarding herewith Copies of the marginally noted * correspondence between the Sanitary Engineer and this office, I have the honor to solicit the Sanction of Government to the proposal of the Municipal Council of laying a main pipe in Rajah street which is not provided in the water supply scheme sanctioned for this town.

2. As this street is of much importance from the fact of its being thickly peopled and as a very large concourse of people from all parts resort to it during the festivals and other processions the wants of the people cannot be adequately met with by supply of water through the means of an ordinary pipe, the Council, in consultation with the Sanitary Engineer to Government, deemed it desirable to lay a 3" main pipe, the Cost of which is estimated at Rs 1120 and in case this Cost could not be met with from the Savings out of the original estimate for the water works, the Council is prepared to meet the Same out of the closing balance for 1896-97.

3. An application for allotment of funds for the Same

is

is herewith submitted.

4. A Copy of the resolution of the Council ~~is annexed~~.
dated 20th March 1896 is also enclosed.
