MUNICIPAL OFFICE

RAJAHMUNDRY.

DATE —

Extract from the Proceedings of the Municipal Council,
Rajahmundry dated — 7-11-95

1347. READ. Chairman's [⊗]minis proposing certain
rules for the alteration of cesspools.

⊗
is here with
enclosed.

Resolution No 1347 dated 7-11-95

The proposals of the Chairman as amended,
about the construction of cesspools are
approved, and notice will be given to
the persons who have now cesspools to
alter them according to the directions
contained therein within 3 months.

Memo.

The Cesspools are in a miserable condition as we all know. Their condition in the rainy season is very bad and the water overflowing from them causes much damage to the roads. The rain water is allowed to flow into the cesspool, and all this is let out into the street. The inside of the cesspools also requires cleaning at least once every week. I would therefore propose that the following directions be given to the cesspool owners to make the necessary alterations under section 214 of the Act.

1. Rain water should not be allowed to flow into the cesspool. A separate passage must be provided for the discharge of rain water into the street.
2. The cesspools must be constructed so as to hold all the sewage water in the house, as it is proposed to remove the.

The water only once a day. The cesspools must have walls on all sides to a height of not less than 6 inches from the topmost point of the drain that fills the cesspool. No wall of the cesspool should have any hole.

3. The depth of the cesspool from the topmost point of the feeding drain should not be more than 2 feet.

4. A closely fitting cistern made of zinc should be placed in the cesspool so that all the sewage water flows into it and cannot soak into the ground on the sides. The cesspools should be so constructed that the zinc receptacles could be removed from outside.

This condition is not absolutely necessary, but they must be so constructed that the sewage water would not soak into the ground on the sides, and that they can be easily cleaned from outside.

5. Sewage water should never be stored inside the house or in the yard, but the cesspools should be so constructed as to hold all the sewage water.

6. Once every week at least, the cesspool and the cistern will be washed by the Municipal agency with clear water and for that purpose the owners should supply good water.

7. The opening into the street from which they will be cleaned, should have a moveable cover.

22nd July 1895.

MUNICIPAL OFFICE, RAJAHMUNDRY

No 444

DATED. 28-4-1896.

From

M. K. Jala Durgaprasadarayod. garu
The Chairman, Municipal Council,

Rajahmundry.

To

The Chief Secretary to Government

Local & Municipal Department

MADRAS.

Through the Sub-Collector Godavery.

Sir,

With reference to paragraph 3 (4) of G.O. No 1443 M. dated 24-10-95, I have the honor to state that the Council resolved on 8-11-94 to classify the cesspools under three classes, and raised the rates as a tentative measure till the 31st March 1895. The cesspools have been accordingly classified and taxed, those that fall in the first class being taxed at Rs 4 a month or 48 Rs a year, those in the 2nd class at Rs 2 a month or Rs 24 a year, and those in the 3rd class at Rs 1 a month or Rs 12 a year. To ensure the correctness of the classification, the Sanitary Inspector was directed to have the quantity of water baled

baled out from each cesspool, ^{ascertained} ~~measured~~
for a pretty long period, and submit a
report, which he did. All the papers connected
with the cesspools were taken by Mr. A. Tate
the then Ex-officio Chairman, for disposing of
the question but he did not return them to
the office on his transfer from the place though
a letter and 2 telegrams were sent to him.

2. After I took charge in June 1895, the Council passed certain rules according to which the cesspools were required to be constructed or altered (Copy enclosed) with the object, among others, of easily ascertaining the quantity of water to be baled out, and notice was given to the owners to make the necessary alterations in their cesspools by 1st April 1896. These alterations have not yet been made, and so soon as these rules shall be enforced the Council will be in a position to ascertain accurately and fix the tax each cesspool is to pay, in order that there may be no loss to the Council on that

that account. The rates fixed under the Council's resolution dated 8-11-1894 above referred to are still being levied, and the cesspool owners have been already complaining that these rates are heavy. These rates ranging from Rs 12 to Rs 48 a year are no doubt heavy, and any provision of these rates by raising them is sure to be felt as a great hardship by these people who are mostly men of ordinary means.

I have the honor to be,

Sir,

Your most obedient servant.
 Rufus Spensderoyden.
