GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ —the following papers :—

From M.R.Ry. K. SESHACHALAPATI GARU, B.A., Chairman, Municipal Council, Cocanada, to the Chief Secretary to Government (through the Divisional Officer, and Collector, Gódávari), dated 25th December 1895, No. 1071.

I have the honour to submit herewith, for the approval of Government, the revised estimate of receipts and expenditure for the current year and the budget estimate for the next, as passed by the council at its meeting held on the 14th instant.

REVISED ESTIMATE.

2. The total receipts for the current year, including the opening balance, are now estimated at Rs. 57,950 against Rs. 50,560 entered in the original budget. The increase of Rs. 7,390 is due to the variations under the several items as noted below :—

	Increase.	Decrease.
	RS.	RS.
1. Opening balance	2,340	..
2. Tax on arts	2,000	..
3. Tax on lands	300	..
4. Rent of lands	60	..
5. Sale-proceeds of lands	50	..
6. Produce of gardens	10	..
7. Sale-proceeds of old materials	70	..
8. Do. of night-soil and street sweepings ..	10	..
9. Fees from educational institutions	350	..
10. Income from markets	..	220
11. *g* (4) Other fees	20	..
12. Fines under Municipal and other Acts	800	..
13. Normal stipends	40	..
14. *c* (5) (3) Other purposes (private contributions) ..	140	..
15. Private scavenging	1,140	..
16. Refunds of expenditure of past years	160	..
17. Fee for numbering carts	40	..
18. *b* (6) (4), Other items	80	..
	7,610	220
Net increase ..	7,390	

Except in the case of markets (item 10), there is no decrease whatever in any item. As in the last year, the right of collecting fees at the Cocanada and Jagannaikpur markets was sold by auction and resulted in a loss of Rs. 220 compared with last year. The council has since resolved upon repairing all the existing market buildings,

extending one of them to provide suitable accommodation for the meat market and raising the level of the compound. A sum of Rs. 1,300 has been allotted for the purpose as will be shown further on. It is expected that the revenue from markets will materially increase during the next year.

Increase—Item 1.—The actual closing balance of last year, which is the opening balance for the current year, exceeded the budget estimate by Rs. 2,337–13–1, which was due to better collections and the short expenditure of last year, as explained in paragraph 6 of the administration report.

Item 2, *Tax on Arts.*—The list of assessees has been thoroughly revised and several companies working through commission agents have been added thereto. Though it is still doubtful how many of these companies claim exemption, the council trusts that there will be an increase of Rs. 2,000 over the sum of Rs. 5,500 originally budgeted.

Item 3, *Tax on Lands.*—On account of the land tax imposed on the railway line, the revenue under this head is expected to come up to Rs. 800 in the current year against Rs. 500 already budgeted.

Item 4, *Rent of Land.*—On account of the cultivation of the old night-soil depôt in Jagannaikpur, the rent realized for the vacant municipal ground there rose from Rs. 20 to Rs. 44 this year. To this and to the recovery of some arrears of past years is due the expected increase of Rs. 60 under this head.

Item 5.—A small piece (86 square yards) of detached site near Foster road was lately sold for Rs. 43.

Item 6.—At the suggestion of the Sanitary Commissioner, a small vegetable and flower garden has been opened to the east of old Cocanada. It can be extended on two sides, so as to cover a total area of about two acres, before the end of this official year. A large heap of seasoned manure (street rubbish) in the possession of the council, for which no adequate price has been offered by any body in spite of repeated efforts, is being utilized to reclaim low insanitary grounds on both sides of the garden. When extended, the garden adjoins the Sea Custom road and will be within three furlongs of Port station. The garden will show to the local public the manural value of the rubbish, and will also effect a material improvement in the sanitary condition, of this part of the town. A sum of Rs. 8–11–9 has already been realized by the sale of vegetables in the garden. Though much cannot be expected from it in the current year, it is hoped that it will be a source of profit in future.

Item 7.—Rs. 120 is expected to be realized by the sale of the old materials against Rs. 50 budgeted. Empty oil-cans and inoculated calves are fetching a better price this year than usual.

Item 8.—As reported in paragraph 17 of my administration report, the night-soil of the whole town and the street sweepings of Jagannaikpur (5th and 6th wards) are deposited in the inam land of Datla Suriyanarayanaraju. Besides bearing the cost of earth-work for a road to the new depôt, the inamdar and his tenant (A. Subha Ram) have offered to pay Rs. 5 to the municipality in the current year, as the value of the manure, to rise to Rs. 12 by annual increments in due course. Rs. 3–2–0 has already been realized from the sale of some manure. By way of round figure a sum of Rs. 10 has been entered in the budget.

Item 9, *Fees from Educational Institutions.*—On account of the increased strength in the several schools, and on account of the proposed establishment of a lower secondary school in Jagannaikpur from the latter part of January next, a sum of Rs. 650 is expected to be realized on account of the school-fees.

Item 11.—On account of the comparatively large number of applications for copies, a sum of Rs. 21–8–0 has already been collected as search and copying fees. The total collections in the year under this head are expected to be Rs. 30 against Rs. 10 originally budgeted.

Item 12.—*Fines under Municipal and other Acts.*—On account of the adjustment of fines of last year, amounting to Rs. 366–10–0, in favour of the municipality, in the current year, and on account of the larger number of prosecutions instituted in the current year, the revenue from this source can be safely estimated at Rs. 1,200 against Rs. 400 originally budgeted.

Item 13, *Normal Stipends.*—Four teachers of the primary schools have been sent for training this year at Rajahmundry, instead of two last year. The actual contribution from Provincial funds on their account towards stipends will be about Rs. 108, or in round figure Rs. 110.

Item 14, *Other Purposes* (*Private Contributions, Rs.* 140).—For a fresh water drain and cistern near Ramesem road, a private individual has offered to contribute half the cost, Rs. 140. The offer has been accepted.

Item 15, *Private Scavenging.*—The efforts for the extension of the private scavenging system, adverted to in paragraph 25 of my letter No. 339, dated 18th June 1895 (administration report), have not been relaxed. The number of private latrines under municipal control is 803 now, against 306 on 1st April and against 580 on the 18th June last, when I despatched my administration report. The receipts under this head are estimated to amount to Rs. 1,840 against Rs. 700 entered in the original budget.

Item 16, *Refunds of expenditure of past year, Rs.* 160.—Under G.O., No. 1707, Local and Municipal, dated 13th July 1891, all girls' schools, which had before been maintained by the municipal council, were taken up under direct management of Government from 1st April 1891. The charge of the two Muhammadan girls' schools in this town was not actually taken by the sub-assistant inspector of Muhammadan girls' schools till 1st October 1893. The cost of their upkeep in 1891–92 was at the time finally debited to the municipality, while that for 1892–93 and the first half of 1893–94 was shown as "an advance recoverable." The Director of Public Instruction has sanctioned Rs. 150 per annum in part payment of the cost of maintenance during the interval. The recovery on account of 1891–92, as well as Rs. 10 recovered from a trained schoolmaster for leaving our service, before the expiry of the prescribed term, is shown under this head.

Item 17.—The system of charging a fee of one anna for numbering each cart licensed, which was begun last year, has been regularly continued this year. The receipts on this account will be Rs. 50 against Rs. 10 entered in the original budget.

Item 18, *Other Items.*—Under instructions from Government (Memorandum No. 1402, dated 7th October 1895), the fee for home vaccination has been transferred to this "head," which also includes the sale-proceeds of the carcasses of stray pigs killed under section 230 of Act IV of 1894. The receipts on the latter account have already exceeded Rs. 60, which mainly account for the increase of Rs. 80 under this head. The increase in the vaccination fees will also be about Rs. 20.

Expenditure.

3. The total expenditure for the current year, excluding the closing balance of Rs. 1,100, is now estimated to amount to Rs. 56,850 against Rs. 47,410 entered in the budget. The increase of Rs. 9,410 is due to the variations under the several grants as noted below:—

	Increase.	Decrease.
	Rs.	Rs.
Grant I	9,120	..
„ II	320	..
„ III	..	340
„ IV	490	..
„ V	..	190
Refunds of other than current collections	40	..
Total ..	9,970	530
Net increase ..	9,440	

4. *Grant I, Public Works.*—The several alterations in the allotments, which resulted in an increase of Rs. 9,120, are enumerated and explained below :—

	Increase.	Decrease.
	RS.	RS.
I. New Works—		
(*a*) Communications	..	120
(*b*) Buildings	1,500	..
(*c*) Water-supply	460	..
II. Repairs—		
(*a*) Communications	6,233	..
(*b*) Buildings	380	..
(*c*) Drainage	220	..
Establishment	50	..
(*d*) Water-supply .. { Repairing channels	600	..
{ Cleaning tanks	150	..
(*e*) Tools and Plant	20	..
(*f*) Contribution to Local Boards	..	370
Total ..	9,610	490
Net increase ..	9,120	

5. *New Works—(a) Communications, Decrease, Rs.* 120.—A sum of Rs. 500 was originally allotted for the construction of a road to the night-soil depôt. The earth-work of the road, costing about Rs. 100, having been executed by the owner of the night-soil depôt, as mentioned in paragraph 2 *supra*, the cost of metalling and gravelling it does not exceed Rs. 250. Provision has been made for constructing six new culverts at a cost of Rs. 130. The total expenditure under this head will thus be Rs. 380 only against Rs. 500 originally budgeted.

(*b*) *Buildings.*—In the budget, provision was made for constructing an incinerator, on Silchar model, at a cost of Rs. 500. After some correspondence with the Sanitary Commissioner, it was resolved by the council to have an incinerator of Robert's patent costing about Rs. 1,200, as soon as funds permitted, instead of getting the far less efficacious, though cheaper, one of the Silchar model. Even the best incinerator, recommended by the Sanitary Commissioner, does not profess to be capable of effectively destroying the rubbish of a population of over 10,000 souls, whereas the population of this municipality according to the last census was 40,553. The Silchar incinerator, according to the Sanitary Commissioner, cannot be expected to deal with the rubbish of a population of even 2,000 or 3,000 (*vide* his letter No. 419, dated 1st March 1895). The town cannot, therefore, be well served by less than four incinerators of Robert's patent or less than about fifteen of the Silchar model. It has not been possible to allot a reasonable sum for a proper incinerator in the current year, or in the next, owing to urgent demands for other purposes. The matter will not be lost sight of, whenever funds can be spared for it.

Instead of having a single pukka latrine, costing about Rs. 1,000, as provided for in the budget, it has been now decided to have two for Rs. 1,600. They will be constructed in a peta, to be newly opened for Toorpu people before long. The tatties enclosing some of the temporary public latrines are frequently giving way to rain and wind. It is now intended to have enclosures of galvanized corrugated iron sheets for two latrines in this year at a cost of Rs. 300, which is now provided.

In compliance with the suggestion of the Sanitary Commissioner a sum of Rs. 1,100 has been provided for constructing a cement floored stall of 240 by 9 feet, at the Cocanada market, for location of the meat shops. The work has already been commenced.

The total value of buildings, now provided for is thus Rs. 3,000 against Rs. 1,500 originally budgeted.

(*c*) *Water-supply.*—During the year two fresh water cisterns fed by canal water have been constructed, for the use of Malas and Madigas, near Narasimham road in Jagannaikpur. Ten wells with pot rings have also been constructed in

different localities—six for the use of caste people and four for Panchamas. Out of these ten, seven were constructed in the hottest part of the year, on the borders of the tank beds, when the supply in the tanks was apprehended to be undrinkable. A fresh water drain and cistern near Ramesem road and a well near Rechupeta have yet to be constructed. The total expenditure under this head will be about Rs. 560 against the allotment of Rs. 100 in the original budget.

6. *Repairs—(a) Communications.*—Considering the bad state of some of the roads, and the adverse remarks made regarding them, the council has had to provide the largest amount possible for their upkeep and restoration. The utmost that could be allotted for repairs to roads in 1895–96 is Rs. 9,230 against the original estimate of Rs. 3,000.

The Commercial and Sullivan's roads running along the Cocanada canal (the Beach road referred to in the divisional officer's endorsement on my administration report), and the Sea Custom road leading from old Cocanada to the Port station, have been taken up for reconstruction with metal and gravel at a cost of Rs. 6,430 as shown below :—

	RS.
Sullivan's road	2,200
Sea Custom „	2,250
Commercial „	1,980
Total ..	6,430

Narasimham and covered drain roads lying to the west of Jagannaikpur have been widened by earth-work at a cost of Rs. 290. The main iron girder bridge between Cocanada and Jagannaikpur will be painted and repaired at a cost of Rs. 470, as suggested by the Executive Engineer, Gódávari Eastern Division, who inspected it at my request. The rest of the present allotment covers the cost of general repairs.

(*b*) *Buildings.*—The allotments made in the original budget for repairing the hospital buildings and the temporary latrines have remained unaltered. The allotment for repairs to pukka latrines has been raised from Rs. 100 to Rs. 300, and fresh provision has been made for repairing the existing market buildings at a cost of Rs. 200, and for raising a platform around the clock tower at a cost of Rs. 30. The allotment of Rs. 50 for repairing the existing ruined crude incinerators has been eliminated as they are found entirely unsuited for the purpose intended. The total net sum now allotted under this head is Rs. 1,480 against Rs. 1,100 in the original budget.

(*c*) *Drainage.*—On account of the excavation of drainage and road side channels on a larger scale than expected, and on account of an increase of nearly Rs. 70 in the cost of the self-acting shutters, the expenditure under this head is now estimated to exceed the original allotment by Rs. 220. A special toti for cleaning the main sewer has also been employed from June 1895 under G.O., Mis. No. 1263 M., dated 3rd August 1895.

(*d*) *Water-supply—Repairing Channels and Drains.*—Besides the usual petty repairs to the several fresh water drains, the main masonry drains in Jagannaikpur and Cocanada, as well as the drain in Patrivari street, were opened for silt clearance, and repaired at a total cost of Rs. 406–2–6.

Under G.O., Mis. No. 1218 M., dated 29th July 1895, Rs. 180 was paid to the Executive Engineer, Gódávari Eastern Division, on account of water supplied to the Raja's tank during the three years ending 1895–96.

During the rains of August 1895 a buffalo accidentally fell into the Cocanada canal at Kovvur just above the sluice commanding water-supply to Jagannaikpur and died. On account of the presence of water the carcass entered the sluice and obstructed it water tight. It had to be removed by raising a cross bund and cutting the body to pieces. The removal cost Rs. 25, out of which a moiety was borne by the Public Works department and the rest by the municipality. These three items account for the increase of Rs. 600 in expenditure under this head.

Cleaning Tanks.—The removal of moss in six drinking-water tanks and a bathing tank, including connected repairs, actually cost Rs. 207–7–0 up to the end of November last. To prevent the spread of a fast-growing variety of moss near the bunds, some more expenditure is unavoidable before the end of the current official year. Rs. 250 is budgeted now against the original estimate of Rs. 100.

(*e*) *Tools and Plant.*—As road repairs are now going on on a larger scale than usual, the expenditure under this head is estimated to exceed the original allotment of Rs. 50 by at least Rs. 20.

(*f*) *Bridge Contribution.*—On account of the repairs to the iron girder bridge, between Cocanada and Jagannaikpur, executed in 1891, the district board have all along claimed Rs. 14,700 as our share ($\frac{3}{4}$) of the expenditure. The figure was accepted and a sum of Rs. 10,000 was paid up to the end of the last year. It has since been ascertained, with the approval of the district board, that setting off the cost of the materials of the temporary bridge and of the tools and plant, the municipal share of the total expenditure was only Rs. 11,521–9–7. The council had consequently to pay Rs. 1,521–9–7 only to the district board in full satisfaction of all claims on account of the repairs of the bridge against Rs. 2,000 originally budgeted for part payment.

Under an agreement with the district board, sanctioned in G.O., Mis. No. 1377 M., dated 23rd August 1895, the council has to contribute Rs. 100 per annum to the district board on account of the maintenance and repairs to the Robertson's bridge lying to the west of Jagannaikpur, along which passes a girder leading fresh water to Jagannaikpur. A provision has been made for this payment.

7. *Grant II.*—The increase of Rs. 320 under this grant is due to the variations explained below :—

	Increase.	Decrease.
	Rs.	Rs.
(1) Stipends to normal students	70	..
(2) Municipal schools on salary system { Establishment ..	120	..
{ Contingencies ..	510	..
(3) Municipal schools on salary-result system—fixed payments	120	..
(4) Municipal schools on salary-result system—contingent expenditure	..	370
(5) Salary grants	..	30
(6) Result grants	..	100
	820	500
Net increase ..	320	

(1) The extra cost in the normal stipends is due to the deputation of four teachers for normal training instead of two originally intended. The necessity for getting a larger number of teachers trained was admitted by Government in its review (G.O., No. 1660 M., dated 16th October 1895) of my administration report.

(2) *Municipal Schools on Salary System.*—All the educational authorities from the Assistant Inspector of Schools, Second Division, to the Director of Public Instruction, proposed to have a Lower Secondary school in Jagannaikpur. As reported in paragraph 33 of my administration report, Jagannaikpur is, on an average, about a mile and-a-half from the Pithápuram Raja's College. In the interests of the school-going children of the Lower Secondary department the council has decided to open a school of that standard in Jagannaikpur with the staff proposed by the educational officers. The school terms commence in the latter part of January and not with the official year. The council therefore prefers to open the school from 16th January 1896 instead of from 1st April and has made the necessary provision for the establishment for January and February and for the necessary contingencies in the revised budget (Rs. 120 + 510).

(3) *Municipal Schools on Salary-result System—Fixed Payments.*—The increase of Rs. 120 under this head is due to the entertainment of two additional temporary teachers on Rs. 6 each in Cocanada and Suriyaraopeta schools and to the opening of a Panchama night school with a teacher on Rs. 5.

(4) *Municipal Salary-result Schools—Contingencies.*—As the opening of a Lower Secondary school in Jagannaikpur involves a heavy contingent expenditure (Rs. 510) for furniture and books, and as the Primary school in Frazerpeta, which lies within three furlongs of the Linton's Primary school attached to the Pithápuram Raja's College is resolved to be closed from the beginning of the next official year, it seems unnecessary to have a large stock of additional furniture for Primary schools at present. The contingent expenditure on account of salary-result schools is therefore estimated to fall short of the original allotment of Rs. 900 by Rs. 370.

(5) *Salary Grants, decrease Rs.* 30.—In the last budget the council proposed to withdraw the usual grant paid to the Lower Secondary department of the Pithápuram Raja's College, but the reason for so doing was not explained. The Director of Public Instruction objected to the proposed withdrawal. The Government accepted the Director's view and inserted a provision of Rs. 450 under this head in the budget. The Lower Secondary department is unquestionably self-supporting as will be seen from the Director's letter, No. 11149, dated 18th October 1895, and from paragraph 33 of my administration report. The Assistant Inspector proposes to utilize the whole grant under this head for other purposes and evidently means that it should be withheld altogether in the current year. According to the last budget review, the usual grant-in-aid has been paid to the Lower Secondary department of the College up to date. If it should be continued at the present rate till the end of this official year, the expenditure under this head would be Rs. 420 against Rs. 450 originally budgeted.

(6) *Result Grants, decrease Rs.* 100.—Considering the actual expenditure of Rs. 282 in the last year on account of the results grants, the council does not expect that the current year's expenditure will be more than Rs. 350. The Government has also suggested that the grants should be withheld wholly or partially in the case of untrained teachers.

8. *Grant III—Sanitary and Medical Service.*—The following variations occur under this grant resulting in a net decrease of Rs. 340 :—

	Increase.	Decrease.
	Rs.	Rs.
(1) Hospital establishment	..	70
(2) Contribution for Medical College	130	..
(3) Registration of births and deaths establishment ..	80	..
(4) Conservancy establishment	..	180
(5) Do. other charges	..	950
(6) Private scavenging establishment	540	..
(7) Do. contingencies	30	..
(8) Contingencies (road-watering)	80	..
	860	1,200
Net decrease ..	340	

(1) The decrease of Rs. 70 in the first item is due to the non-entertainment of the additional third-class hospital assistant newly sanctioned till 1st June 1895 and to fines and savings. The pay of one of the compounders has been raised from Rs. 9 to Rs. 12 under G.O., No. 1677 L., dated 11th September 1888, from November 1895.

(2) A sum of Rs. 220 was paid as contribution to the Medical College last year against Rs. 90 before, according to the requisition of the Accountant-General. He said that the amount was fixed with reference to the actual expenditure of last year. The same amount is therefore now provided in the revised budget.

(3) The increase of Rs. 80 under this head is due to the re-entertainment of two sub-registrars on Rs. 7 each from 1st September 1895. The desirability of re-employing them was explained in paragraph 40 of my last administration report.

(4) *Conservancy Establishment, decrease Rs.* 180.—The decrease is wholly due to fines and stoppages of pay and to occasional vacancies in the grade of toties. Though the number of pukka latrine toties was reduced in the year from 31 to 26, the pay of the rest and of the street-sweepers was raised from Rs. 4½ to Rs 5 under G.O., Mis. No. 1263 M., dated 3rd August 1895. The re-adjustment of the establishment involved an extra cost of Rs. 8–4–0 a month.

(5) *Conservancy—Other Charges.*—The decrease of Rs. 950 under this head is accounted for as shown below :—

	Rs.
No land has been acquired on payment of compensation for the night-soil depôt, though a sum of Rs. 1,000 was provided for compensation in the original budget. Other arrangements have been made for the depôt as already explained in paragraph 2 (8) ..	1,000
No dust-carts have been purchased, as the present system of employing rented carts is found more economical in the present financial condition of the municipality	500
Savings ..	1,500

This sum (Rs. 530) is now provided to close the Chakala tank in Jagannaikpur in compliance with the recommendations of the Sanitary Commissioner (G.O., No. 866 M., dated 20th May 1895). The net decrease due to these three causes is Rs. 970. The rest is due to no special cause.

(6) and (7) *Private Scavenging Establishment—Contingencies, increase Rs.* 540.—The number of private latrines having increased since the submission of the last budget from 292 to 803, the number of toties had to be increased from 16 to 27. The average number of latrines served by each toty is nearly 30 now, whereas it was only 20 up to last year. Two peons are employed for supervision of these latrines. The extra cost under this head is due to the entertainment of additional toties and peons which is unavoidable. A contingent expenditure of Rs. 30 in getting the necessary printed forms is also necessary, though no provision was made for it before. So far as can be seen at present, the system will give a net profit of not less than Rs. 310 to the municipality in this year. The main credit of effecting a material improvement in this direction is due to K. Sattayya, Conservancy Overseer, Cocanada.

(8) *Road-watering Contingencies.*—A sum of Rs. 180 is now provided under this head against Rs. 100 in the original budget. On account of the heavy traffic on most of the important roads, frequent watering of the roads is very desirable. I should have liked to make a better allotment under this head, if possible.

9. *Grant IV—Lighting and Miscellaneous.*—The increase of Rs. 490 under this grant is the net result of the following variations :—

	Increase.	Decrease.
	Rs.	Rs.
(1) Market contingencies	250	..
(2) Slaughter-house contingencies	10	..
(3) Choultry contingencies	..	50
(4) Public garden, purchase of seeds and repair of well ..	70	..
(5) Repairs to fire engine	110	..
(6) Printing	100	..
	540	50
Net increase ..	490	

(1) *Market Contingencies.*—The increase of Rs. 250 is mainly due to the payment of ground-rent at Rs. 75 per annum for the temple site used as meat market in Cocanada for the past three years also in the current year. On account of misunderstandings among the trustees, the rent was not claimed in the past three years. The assessment due to Government for the market sites at Rs. 10 an acre is the only other charge under this head. The Jagannaikpur market has been in use as such for a very long time. Even before the construction of the present building, about twenty years ago, the site was used as a fish market. The Cocanada market buildings were constructed in 1886–87 on the site of an old ruined washerman's tank closed for the purpose. Holding that the property in the old market of Jagannaikpur and in the ruined pond of Cocanada vested in the municipality under section 25 of Act IV of 1884, the council claimed exemption from payment of assessment, but for want of even a general notification transferring markets and ownerless ponds within municipality to the various councils, the claim was rejected.

Though the actual net expenditure under "Market contingencies" is only Rupees 313–12–0, a sum of Rs. 350 is now provided, as Rs. 340–11–0 has already been spent for the purpose. The refund of the extra charge made by the jamabandi officer of fasli 1304 has been ordered by the Collector and will, on receipt, be set off against the expenditure in the administration report.

(2) *Slaughter-house Contingencies—Rs.* 10.—Some contingent expenditure on account of buckets or brooms is unavoidable.

(3) *Choultry Contingencies.*—Provision was originally made for water-pandals in the Collector's office, in the Sea Customs office and in the Municipal office for the whole year. So far as the Municipal office is concerned, I can manage without a water-pandal for six months, covering the rainy season and winter. Even for the other pandals, payments are to be made only for eleven months in this year. A saving of Rs. 12–8–0 is due to the latter cause and Rs. 40 to the former.

(4) *Public Garden.*—As stated in paragraph 2 (6), a small municipal garden has been opened in the current year. A sum of Rs. 50 out of Rs. 70 now provided is intended to be the cost of filling up and reclaiming a low pit of about an acre adjoining it. The conservancy carts are also utilized for this purpose when required for no other. No expenditure for reclamation of site will be necessary in future.

(5) *Repairs to Fire-engine—Increase Rs.* 110.—To meet the cost of repairs to the fire-engine and its appurtenances and that of a new hose, as suggested by Mr. Basket, the Marine (Port Board's) Engineer, a sum of nearly Rs. 150 will be required against Rs. 40 entered in the original budget.

(6) *Printing.*—The increase of Rs. 100 is due to the payment of a bill received in 1894–95 after its close.

10. *Grant V.*—The decrease of Rs. 190 in this grant is due to the following variations :—

	Increase	Decrease.
	Rs.	Rs.
(1) General establishment	60	..
(2) Collection do.	10	..
(3) Tolls do.	..	260
	70	260
Net decrease ..	190	

(1) The increase of Rs. 60 in the cost of general establishment is due to the entertainment of a temporary record clerk for six months at Rs. 10 per mensem sanctioned in G.O., Mis. No. 985 M., dated 17th June 1895.

(2) The increase of Rs. 10 in the salaries of the collection establishment is due to the increase of Rs. 5 per mensem in the pay of three bill-collectors sanctioned in G.O., Mis. No. 985 M., dated 17th June 1895. Effect was given to the order from July 1895. The rest of the extra cost is met by fines and savings.

(3) *Tolls Establishment—Decrease Rs.* 260.—Owing to the collapse of the Yeleru bridge, the collection of tolls at the old gate No. I is practically suspended. Out of the original establishment costing Rs. 25 per mensem, one gumastah on Rs. 7 was alone retained for preventive work in this year. There was thus a saving at Rs. 18 per mensem or Rs. 216 in all on this account. The rest of the decrease is due to fines and savings.

The refunds of other than current collections are estimated to amount to Rs. 40 in this year.

Closing Balance.—The year is thus expected to close with a balance of Rs. 1,100. In this connection I may mention that the receipts under house-tax are now estimated by the council at Rs. 20,000 only in spite of the assurance given to Government in its Resolution, dated 26th October 1895, to effect an increase of Rs. 6,000 under this head over the actuals of 1894–95. Deducting the land-tax on

the railway line and salt-pans, amounting to Rs. 580, which was wrongly viewed as part of house-tax on that day, the provision under "House-tax" ought, according to that Resolution, dated 26th October 1895, to have been at least Rs. 21,200. If this amount were inserted, the closing balance would have been Rs. 2,300.

BUDGET ESTIMATE FOR 1896–97.

Receipts.

11. The receipts for 1896–97, including the opening balance of Rs. 1,100, are estimated at Rs. 66,080 against the revised estimate of Rs. 57,950 for 1895–96. The increase of Rs. 8,130 is due to the following changes:—

	Increase.	Decrease.
	RS.	RS.
(1) Opening balance	..	2,340
(2) Tax on lands	200	..
(3) Vehicles with springs	400	..
(4) Sale-proceeds of lands	7,950	..
(5) Produce of garden	40	..
(6) Fees from educational institutions	950	..
(7) Income from markets	420	..
(8) Do. from slaughter-house	100	..
(9) Provincial grant for normal stipends	..	40
(10) Do. for municipal schools on account of girls	..	20
(11) Do. for gymnastic and drawing instructors	160	..
(12) Contribution for supplying water to railway tanks [5-(*a*) Other purposes]	50	..
(13) Other private contributions [5-(*c*) Other purposes]	..	140
(14) Private scavenging	560	..
(15) Refunds of expenditure of past years	..	160
	10,830	2,700
Net increase ..	8,130	

Item 1.—The comparatively small opening balance of Rs. 1,100 for next year is due, among other causes, to unexpected expenditure on "Communications" in the current year.

Item 2—*Tax on Lands.*—With a view to taxing all vacant sites in the town, whether productive or unproductive, the council raised the current year's estimate of Rs. 800 under this head by Rs. 200 for the next.

Item 3—*Tax on Vehicles with Springs.*—There are instances in the town of several vehicles with springs, which are in good repair and in every way fit for use, escaping taxation under section 78, clause V of Act IV of 1884 for non-user. The council believes that such carriages cannot but be used on some occasions or other, and that exemption can be safely made only in the case of vehicles really out of repair and unfit for use. With this view the council raised the current year's estimate of Rs. 800 under this head by Rs. 400.

Item 4—*Sale-proceeds of Lands.*—As reported in my letter, No. 840, dated 2nd November 1895, the old cart-stand, which was municipal property, has been taken up by Government for constructing the Town Magistrate's and Tahsildar's offices. The cost of the site at the market value, with additional allowance 15 per cent. payable under the Land Acquisition Act, is entered under this head.

Item 5—*Produce of Public Gardens.*—The municipal garden lately opened is expected to yield a profit of Rs. 50 next year against the revised estimate of Rs. 10 in the current year.

Item 6—*Fees from Educational Institutions.*—As stated in paragraph 7 (2) a Lower Secondary school will be opened in Jagannaikpur from the latter part of January next and school-fees will be levied therein, and in the Primary school attached thereto at the rates (*a*) fixed in the fee notification.

	Per annum. RS.
(*a*) Third form ..	22
Second „ ..	18
First „ ..	14
Fourth standard	9
Third standard ..	4 8 0
Second „ ..	3 0 0
First „ ..	1 8 0
Infant „ ..	0 12 0

In the primary schools (*b*) at Suriyaraopeta and Cocanada, each of which will be strengthened by the appointment of a good English teacher, school-fees will be raised to some extent. The existing rate of fees will continue in the old Cocanada school. The Muhammadan schools, the Panchama school and all night schools, may, in the opinion of the Council, be entirely free for the present. On account of the opening of the Lower Secondary school and the increase of school-fees in the most important primary schools, the council expects to realize a sum of Rs. 1,600 from fees against Rs. 650 entered in the revised estimate for the current year.

	RS. A. P.
(*b*) First and Infant standards as above.	
Second standard	2 4 0
Third „	3 0 0
Fourth „	4 8 0

Item 7—*Income from Markets.*—Owing to the extension and repair of the market buildings, the rental is expected to rise by Rs. 420 at the next sales.

Item 8—*Slaughter-house.*—The butcher who is the contractor of the slaughter-house is evidently interested in keeping down its annual rental. The sum of Rs. 3,220 spent on the slaughter-house must be taken as a very bad investment, if it costs about Rs. 100 for maintenance and fetches only about Rs. 150 per annum, a net profit of only Rs. 50. Intending to keep it under departmental management, should the next auction sale fetch less than Rs. 250, against the present rental of Rs. 151, the council budgeted Rs. 250 under this head.

Items 9, 10 *and* 11.—The Director of Public Instruction proposes to contribute Rs. 70 towards normal stipends, Rs. 40 towards the gymnastic instructor's pay and Rs. 125 towards instruction in drawing. His figures with necessary alterations in the latter case for the sake of a round figure are adopted.

Item 12—5 (*a*) *Other Purposes—Contribution for supplying water to railway tanks.*—The council thinks that the charge of Rs. 100 now made for supplying water to the railway tanks is too inadequate, considering the excavation of a second tank by the railway department and the cost involved in repairing the supply channels from time to time. It is therefore resolved to raise the claim by Rs. 50.

Item 13—5 (*c*) *Other Purposes—Private Contributions—Decrease, Rs.* 140.—Except the contributions offered for the introduction of the Sanitary Engineer's water scheme, there are at present no offers whatever from private individuals. Pending the sanction of Government for the water scheme, no credit is taken for the contributions promised for that purpose.

Item 14—*Private Scavenging—Increase, Rs.* 560.—The receipts are calculated with reference to the present number of latrines under control of the council 803 or rather 800.

Item 15—*Refunds of expenditure of past years—Decrease, Rs.* 160.—It is not at present known whether any money will be received under this head.

Expenditure.

12. The receipts for the ensuing year, together with the opening balance are estimated at Rs. 66,080, of which a sum of Rs. 2,040 is set apart as closing balance, and the rest Rs. 64,040 is allotted for expenditure under the several grants as shown below. The latter includes Rs. 1,600, the cholera reserve ordered by Government in G.O., No. 1028 M., dated 26th June 1895, which is merged in Grant III.

		Rs.
Grant I	.. ..	15,310
„ II	.. ..	5,860
„ III	.. ..	22,570
„ IV	.. ..	3,920
„ V	.. ..	7,600
Sinking fund for water scheme	.. ..	8,250
Interest payable to district board on account of the cost of Yeleru bridge	.. ..	450
Gratuities	.. ..	80
	Total ..	64,040

13. *Grant I, Public Works.*—A sum of Rs. 15,310 is allotted for expenditure under this grant next year as shown below against Rs. 19,360, entered in the revised estimate of the current year. Rs. 8,250 is also set apart on account of the Sinking fund and the full year's interest for the whole amount proposed to be borrowed for the execution of the Sanitary Engineer's water scheme (*vide* my letter, No. 776, dated 22nd October 1895). If the whole sum cannot be spent and the works almost completed before the close of 1896–97, and if the Government orders the expenditure on the works of the Provincial grant and the locally subscribed money before the loan is advanced, a greater portion of the sum allotted for the Sinking fund will be available for expenditure on communications under Grant I. The present allotment under this grant is exclusive of Rs. 450, the whole year's interest on Rs. 10,000 allotted by the district board for reconstruction of the Yeleru bridge on behalf of the municipality.

Details under Grant I—		Rs.
(1) New Works—		
(*a*) Communications	.. ..	1,200
(*b*) Buildings	.. ..	8,000
(*c*) Temporary latrines	.. ..	400
(2) Repairs—		
(*a*) Communications	.. ..	3,600

(*d*) Water-supply ..	{ Works 400 / Establishment 540 }	940
(3) Establishment	.. ..	240
(4) Tools and plant	.. ..	50
(5) Contributions to local boards on account of Robertson's bridge.		100
	Total ..	15,310

The details of the proposed works are given in Statement II-A. Some of the important proposals are however noted below.

14. (1) *New Work.*—(*a*) Rs. 1,000 is allotted for disbursement on account of the new canal road in Jaganaikpur. As reported in my letter, No. 840, dated 2nd November 1895, M.R.Ry. M. Sarva Nayudu Garu, a municipal councillor, and M.R.Ry. K. Basivi Reddi Garu, a merchant, have offered to bear the whole cost of the road, Rs. 2,000, and to receive payment from the municipality without interest, in two equal instalments, in December 1896, and in December 1897. The road work is going on under the supervision of the municipal executive and is expected to be completed in this official year. The rest of the allotment under this minor head is for the construction of a small junction road in Sooryaraopeta.

(*b*) *Buildings.*—The amount of compensation expected to be received from Government on account of the old cart-stand is proposed to be utilised for constructing or purchasing a building for location of this office. The necessity for such an action was explained in my letter, No. 840, dated 2nd November 1895.

(*c*) *Temporary latrine.*—At present most of our temporary latrines are nothing more than tatty enclosures, requiring frequent renewal and repairs. It is propsed to substitute enclosures of galvanized corrugated iron sheets in their stead so far as possible. Two such latrines are now provided for for next year.

15 (2) *Repairs—Communications.*—Bridge road, church square road, bank road and Foster road will be taken up for repairs next year as shown in Statement II-A. General repairs to other roads (patch work) will also be executed as usual.

16. *Grant II.*—The expenditure under this head is estimated at Rs. 5,860 for 1896–97, against the revised estimate of Rs. 4,770 for the current year. The increase of Rs. 1,090 is due to the variations noted below :—

		Increase. Rs.	Decrease. Rs.
(1)	Stipends to normal students	..	30
(2)	Municipal schools on salary system establishment ..	840	..
(3)	Do. do. contingencies ..	..	160
(4)	Do. on salary-result system (*a*) fixed payments	540	..
(5)	Municipal schools on salary-result system, contingencies.	120	..
(6)	Salary grants	..	320
(7)	Results grants	100	..
	Total ..	1,600	510
	Net increase ..	1,090	

(1) *Stipends to Normal Students.*—In the current year, four teachers of the municipal salary-result schools are under training at the Rajahmundry College, while a provision is made for only three next year. As there are still several untrained teachers in the municipal and result schools in the town, the council considered it desirable to depute three teachers for training, instead of two, proposed by the educational authorities.

(2) *Municipal Schools on Salary System Establishment, increase Rs.* 840.—The pay of the establishment employed in the Lower Secondary school, Jagannaikpur, will be drawn for twelve months in the next year, whereas it will be drawn only for a month and a half in this year.

(3) *Municipal Schools on Salary System—Contingencies, decrease Rs.* 160.—In the revised budget, a provision of Rs. 500, besides house-rent and other fixed contingencies, has been made for the purchase of benches (Rs. 160), tables (Rs. 48), black-boards (Rs. 48), chairs (Rs. 16), stools (Rs. 4), an almyrah (Rs. 30), maps (Rs. 60), class-books (Rs. 32), and a small library of reference books (Rs. 100), which will all be necessary for the opening of the Lower Secondary school. For the next year, provision is made for gymnastic apparatus (Rs. 200), for improving the library (Rs. 50) and for the fixed contingencies (Rs. 100). The decrease in the next year's estimate is the result of unusual expenditure occasioned by the new institution of the Lower Secondary school in this year.

The gymnasium attached to the Lower Secondary school will, it may be noted, be useful for all the primary schools in Jagannaikpur.

(4) *Municipal Schools on Salary-Result System—(a) Fixed payments, increase Rs.* 540.—Unlike in the rural parts of the district, English teaching is essential in the Primary schools of this town. Students here have generally to be prepared for higher English education, and are not expected to treat a pass in the Primary School examination as the highest goal of their ambition. Very much by way of English education cannot be expected of teachers of the primary grade drawing Rs. 5 to 8 per mensem. The council has therefore resolved to place the two most flourishing Primary schools in Cocanada and Suriyaraopeta under Matriculates on Rs. 15 per mensem besides a moiety of the result grant earned by their work. In these schools which have a strength of about 100 pupils, it is considered desirable to have four teachers, including the headmaster. The lowest pay of schoolmasters in the municipality is now fixed at Rs. 6 instead of Rs. 5, as the latter amount is considered too inadequate for a schoolmaster.

The Primary school in Frazerpeta which is within three furlongs of the Lynton's Primary school, attached to the Pithápuram Raja's College, will be abolished from 1st April next, while the old Cocanada school which has a strength of about 50 only, will be worked with the existing two teachers for the present.

The changes referred to involve an extra cost of Rs. 540 per annum, part of which will be met by the extra school-fees, due to increase of rates in the Cocanada and Suriyaraopeta schools.

(5) *Municipal Schools on Salary System—Contingencies, increase Rs.* 120.—The present allotment of Rs. 650 under this head for next year includes a provision of Rs. 100 for gymnastic apparatus for Cocanada Primary schools, besides the ordinary fixed contingencies and unforeseen charges.

(6) *Salary Grants.*—The decrease of Rs. 320 under this head is due to the partial withdrawal of the grant from the Lower Secondary department of the Pithápuram Raja's College at the suggestion of the Director of Public Instruction.

(7) *Results Grants, increase Rs.* 100.—A sum of Rs. 450 is provided for next year under this head as in the last year's budget, though the revised estimate is only Rs. 350. The Assistant Inspector's estimate of Rs. 500 under this head seems a little too high.

The total net expenditure proposed to be incurred on education in the next year will be Rs. 4,030, which will be 11 per cent. of the revenue from taxes and market rents, excluding tolls, and 9·5 per cent. including tolls.

17. *Grant III—Sanitation and Medical Services.*—A provision of Rs. 22,570 is made under this grant, against the revised estimate of Rs. 20,620. The variations resulting in an increase of Rs. 1,950 are specified below:—

	Increase.	Decrease.
	Rs.	Rs.
(1) Hospitals and dispensaries establishment	110	..
(2) Cutlers' establishment	..	10
(3) Vaccination establishment	40	..
(4) Registration of births and deaths establishment	100	..
(5) Conservancy establishment	180	..
(6) (5-*a*-2) Other charges	..	360
(7) (5-*b*-1) Private scavenging establishment	280	..
(8) (5-*c*) Cholera charges	1,510	..
(9) (5-*d*) Road-watering contingencies	70	..
Total ..	2,320	370

(1) *Hospital Establishment.*—The increase of Rs. 110 in the cost of the hospital establishment is due to the provision made for payment of the salary of the new third-class hospital assistant for twelve months in the next year against only nine in this year, and for payment of the increased rate of pay to one compounder for twelve months in the next against only four in this year.

(2) *Cutlers' Establishment, decrease Rs.* 10.—Under G.O., No. 97 L., dated 18th January 1895, no contribution to the Provincial funds on account of the cutlers' establishment is necessary hereafter.

(3) *Vaccination Establishment, increase Rs.* 40.—The increase of Rs. 40 in the cost of the vaccination establishment is due to the increase of the probationary vaccinator's pay from Rs. 6 to Rs. 8, to the increase of calf watcher's pay from Rs. 4–8–0 to Rs. 5 and to the increase of grass-cutter's and calf-shaver's remuneration from Re. 1 and As. 8, respectively, to Rs. 1–8–0 and Re. 1 per mensem. These additions are all made in consultation with the Civil Surgeon here.

18. (4) *Registration of Births and Deaths Establishment, increase Rs.* 100.—The increase of Rs. 100 in the cost of the registration establishment is due to the proposed increase of the registrar's pay from Rs. 10 to Rs. 11 and to that of the two sub-registrars from Rs. 7 to Rs. 8 and to the employment of the latter all through the next year instead of only for seven months in this year.

19. (5) (5-*a*-1) *Conservancy Establishment, increase Rs.* 180.—The increase of Rs. 180 under this head is due to the proposed entertainment of two additional street sweepers for service in the new extensions of the town, and to the increase of the Cocanada overseer's pay by Rs. 5, in consideration of his excellent services in improving the private scavenging system and of the additional work required of him hereafter. The pay of the peon in charge of the first ward, which is the biggest of all the wards, will be raised to Rs. 8, as an incentive to continued good work. T. Sukalal, the conservancy overseer of Jagannaikpur and one of the earliest employés of this municipality, is, from his dimness of sight and old age, considered unfit for further service beyond the end of this year. He will be discharged from 1st April next, and his place will not be refilled, as one sanitary inspector and one overseer are considered enough to supervise the work of the subordinate staff, and to look after the sanitation of the town. The net savings resulting from the last two modifications will be Rupees 121. The possible deductions on account of fines and stoppages are estimated at much less than usual and the difference covers the savings above referred to.

(6) (5-*a*-2) *Conservancy—Other charges, decrease Rs.* 360.—At present there are seven conservancy carts working in Cocanada and four in Jaganaikpur. The latter are considered by the ward councillors and by myself to be too inadequate for prompt removal of the street rubbish. Provision is now made for hiring another cart at Rs. 12–8–0 per mensem for the purpose. In the current year Rs. 540 is provided for filling up the Clakala tank in Jaganaikpur on sanitary grounds, but no such provision is at present made for the next. The net result of these changes is a decrease of Rs. 390. The further difference of Rs. 30 is due to the hire of some of the carts being occasionally debited to Grant I on account of their employment in conveying road materials to the scene of repairs.

(7) *Private Scavenging Establishment, increase Rs.* 280.—The increase of Rs. 280 is due to the employment of the twenty-seven toties and two peons, working at present, all through the next year, for cleaning and supervising over 800 latrines already under control of the council. In the current year, there were no peons for some months and the number of toties varied from 14 to 27.

(8) (5-*e*) *Cholera Charges.*—Under G.O., No. 1028 M., dated 26th June 1895, a sum of Rs. 1,640 is set apart as "Cholera reserve" at Rs. 1,000 for every 25,000 of population, whatever remains out of it will merge into the closing balance.

(9) *Road watering.*—A sum of Rs. 250 is entered to meet the cost of road watering during the next year, against Rs. 180 in the revised budget. No possible allotment can be too much for this purpose.

20. *Grant IV—Lighting and Miscellaneous.*—The total expenditure under this grant is estimated at Rs. 3,920, against the revised estimate of Rs. 4,450. The decrease is due to the following variations:—

	Decrease.
	Rs.
(1) Market contingencies	260
(2) Choultry contingencies	130
(3) Public garden, purchase of seeds, &c.	40
(4) (*e*) Other charges (v) other items	100
	530

(1) *Market Contingencies, decrease Rs.* 260.—The only items payable as market contingencies are, (1) the rent of Rs. 75 to the trustees of Nukalamma's temple; and (2) an assessment, Rs. 13–12–0, to Government. These are entered in the budget for next year. The circumstances under which a larger amount had to be entered in the revised estimate for this year are explained already in paragraph 9 (1).

(2) *Choultry Contingencies, decrease Rs.* 130.—Under G.O., No. 1176 L., dated 25th June 1894, the cost of maintaining water pandals at the Collector's office and at the Sea Custom's office has been borne by the municipality in the current year. The council has ascertained that no such charge is made on municipal funds in Masulipatam or Vizagapatam. The water pandals in the Sub-Court and the

Munsif's Court and the one in the Pithápuram Raja's College, which are all frequented by large numbers of people or boys, are all maintained without aid from municipal funds. The council accordingly resolves to withdraw the grant for the water pandals in the Collector's and Sea-Custom's offices from April next. A provision of Rs. 40 is retained for having a water pandal at the municipal office in the hottest part of the year.

(3) *Public garden—Purchase of seeds, &c., decrease Rs.* 40.—After reclamation of all the neighbouring low ground, the expenditure on account of the garden will be comparatively little. A sum of Rs. 30 is however provided to meet the cost of plants or seeds that may have to be incurred in course of time.

(4) (9-*v*) *Other items.*—The decrease of Rs. 100 under this head is due to the expected completion of renumbering of houses in the current year.

21. *Grant V—Office Establishment, decrease Rs.* 10.—A sum of Rs. 7,600 is provided under this head against the revised estimate of Rs. 7,610. The variations resulting in a decrease of Rs. 10 are specified below :—

	Increase.	Decrease.
	RS.	RS.
(1) (*a*) Office establishment	..	20
(2) (*b*) Collection establishment	50	..
(3) Tolls establishment	..	30
(4) Tolls contingencies	..	10
Total ..	50	60
Net decrease ..	10	

(1) The decrease of Rs. 20 in the cost of the office establishment is due to the discharge of the temporary record clerk before the beginning of the next year, and to the increase of the third clerk's pay from Rs. 15 to Rs. 18 per mensem. The extra cost will be Rs. 33 and the savings Rs. 60.

(2) *Collection Establishment, increase Rs.* 50.—The bill collectors, to whom an increase of pay was sanctioned in G.O., Mis. No. 985 M., dated 17th June 1895, will draw pay at the increased rates all through the next year, instead of only for eight months in this year. Stoppages of pay due to short vacancies are not now taken into account in the estimate for next year.

(3) *Tolls Establishment, decrease Rs.* 30.—The decrease of Rs. 30 under this sub-head is due to the proposed abolition of gate No. 3, as the fees collected by the peon in charge scarcely cover his pay. As remarked in paragraph 14 of the administration report, there is no regular gate shed for No. III, and the peon's work has been only of a preventive character. The cart-stand gumastah and gumastah of gate No. I will be available for preventive work.

(4) *Tolls Contingencies, decrease Rs.* 10.—On account of the abolition of gate No. III, it is expected that there will be a saving of Rs. 10 in contingencies.

22. No provision is at present made for refunds of other than current collections. A sum of Rs. 80 is entered to provide for the payment of *gratuity* to T. Sukalal, conservancy overseer of Jaganaikpur, who will be discharged on 1st April next, after a service of over thirty years.

23. *Closing remarks.*—The year is expected to open with a balance of Rs. 1,100 and close with Rs. 2,040. The total receipts will be Rs. 64,980, including the extraordinary item of Rs. 8,000 (cost of the old cart-stand) recoverable from Government and Rs. 56,980, exclusive of it. The total expenditure will be Rs. 64,040, inclusive of Rs. 8,000, proposed to be utilised for an office building and Rs. 56,040, exclusive of it. Eliminating the extraordinary item of Rs. 8,000, proposed to be utilised for an office building, out of consideration, it will be observed that 13 per cent. of the total revenue is allotted for expenditure under Grant I proper, 14·7 per cent. for payment to Government as sinking fund for the proposed loan on account of water works and ·8 per cent. for payment to the District Board on account of interest for the money to be invested on Yeleru bridge in this year. Total expenditure on public works will thus be 28·5 per cent.

24. A copy of the council's resolution, sanctioning the revised estimate of the current year, and the budget estimate for the next, together with the prescribed statements and proposition statements, is enclosed.

Dis. No. 3813.

Submitted through the Collector.

(Signed) K. RUSTUM SING,
Deputy Collector.

31st December 1895.

Dis. No. 32-Eng.

Forwarded.

2. At its meeting of the 20th October last the council declared that the revision of the house-tax would result in an increase of Rs. 6,000 in revenue (*vide* letter of the chairman, No. 776, dated 22nd October 1895). It is not, therefore, intelligible why the council has now put the amount to be derived from this source at Rs. 20,000, which is an increase of only Rs. 4,158–12–3. Still less is it understood why and how the figure is to be raised by Rs. 1,000 when the council has to find funds for the water-supply scheme. If the tax is honestly and fairly assessed, as it presumably will be, by the council now, so long as the rate at which it is levied remains the same, the undersigned cannot understand on what principle it can be increased arbitrarily by Rs. 1,000 at any given moment. As it appears that the tax is capable of being increased by Rs. 1,000, this should be done now, and such increase not postponed. Indeed I cannot see how such postponement is to be effected.

3. The provision in the budget for roads comes only to Rs. 4,800 under both new works and repairs which cannot for a moment be considered an adequate allotment. I would therefore suggest that the income from house-tax should be raised to Rs. 21,000, and the allotment under "Repairs—Communications" increased from Rs. 3,600 to Rs. 4,600. Even then the council will not be spending the whole of its income from tolls (Rs. 6,000) on communications, and yet considering the expense of procuring material and the length of road to be maintained, I do not think it ought to spend any less. At the present moment the main road to the town station is in urgent want of repair and the extra provision of Rs. 1,000, I recommend, may well be ordered to be devoted to this work.

(Signed) V. A. BRODIE,
Collector.

9th January 1896.

From Surgeon-Lieutenant-Colonel W. G. KING, M.B., C.M., D.P.H., Sanitary Commissioner for Madras, to the Chief Secretary to Government, dated Debaguntla, 11th January 1896, No. 84-S.

Referring to the extracts from the Cocanada municipal budget for 1896–97, I have the honour to state that the provision therein made for vaccination and conservancy shows, in comparison with the current year's sanctioned grants, an increase, which is duly accounted for in the budget letter. The allotment for the latter purpose is about a fifth of the estimated receipts.

2. The sanitary works proposed for execution under Grant I are of a trivial character, and are estimated to cost in the aggregate Rs. 1,420. No provision has been made for effecting any of the improvements suggested in my inspection notes printed in G.O., No. 866 M., dated 20th May 1895, although the attention of the council was specially directed to this matter by Government. I find, however, an allotment of Rs. 8,000 made under this grant for the construction of an office building. Although, with a fairly flourishing state of finance, such an expenditure would be legitimate in regard to the convenience of public work undertaken by the municipal council, I consider it, in the face of the evil sanitary condition of the town, unjustifiable. I would, therefore, advise that this proposal be disallowed and the funds thus set free be devoted towards inaugurating, as far as feasible, the sanitary measures advocated in the inspection notes above referred to.

3. The Chairman contends that one sanitary inspector and one conservancy overseer on Rs. 20 and Rs. 12, respectively, are enough to supervise the work of the subordinate staff *and* to look after the sanitation of a town of 40,553 inhabitants. I consider that one certificated chief sanitary inspector on Rs. 75 (to 100) *plus* Rs. 15 and two assistant sanitary inspectors on Rs. 25 (to 35) *plus* Rs. 7–8–0 each would be essential, if any real attempt were made to supervise the sanitary condition of the town.

4. Statement II-B does not detail the private scavengering staff employed by the municipality. I am, therefore, unable to say whether it is adequate for requirements.

From Surgeon-Major-General C. SIBTHORPE, F.R.C.P.I., Surgeon-General with the Government of Madras, to the Chief Secretary to Government, dated 12th February 1896, No. 105.

I have the honour to state that the provision made in Grant III of the budget estimate of the Cocanada Municipality for the year 1896–97 is sufficient and calls for no further remarks.

From the Hon'ble Mr. D. DUNCAN, M.A., D.Sc., Director of Public Instruction, to the Chief Secretary to Government, dated Madras, 8th January 1896, No. 81.

Referring to the budget estimate of the Cocanada Municipality for 1896–97, I have the honour to state that the allotments made under the several heads under Grant II may be accepted with an addition of Rs. 200 for building and furniture and other special grants to results schools and of Rs. 250 for the appointment of a drawing master (Rs. 220 for his salary for eleven months at Rs. 20 per mensem and Rs. 30 for materials) to teach this subject in the aided and municipal schools in the town.

2. Drawing is a subject the importance of which cannot be over-estimated, and it is absolutely necessary that provision should be made for imparting instruction in it. Credit may be taken for a half grant of Rs. 125 from Provincial funds subject to the provisions of the Grant-in-Aid Code. Even with the additions proposed above, the net expenditure on education will be Rs. 4,360 (6,310—1950), or less than 11 per cent. of the estimated income from taxation, markets and rents. The municipality will not be justified in not providing for the two items in question on the plea of want of funds as it did last year.

ORDER—No. 405 M., dated 11th March 1896.

The estimated receipts and charges of the Cocanada Municipality for 1896–97, as passed by Government, are compared below with the budget and revised estimates for the year 1895–96 and the actuals of 1894–95 :—

REVISED ESTIMATE FOR 1895–96.

2. The current receipts and charges are now estimated at Rs. 54,510 and Rupees 56,850, respectively, against Rs. 49,460 and Rs. 47,410 anticipated in the sanctioned budget. The increase in the receipts occurs chiefly under the tax on arts, fines under municipal and other Acts, and private scavenging fees, and that in the charges under Grant I. The collections under the tax on buildings and lands during the first eight months of the year were not at all satisfactory. The proposed allotments of Rs. 1,250,

Rs. 3,420 and Rs. 510, respectively, under Grant I, new works—buildings, repairs—communications, and Grant II (2-*b*), contingencies, are sanctioned. The opening of a lower secondary school at Jagannaikpur and of a Panchama night school with a teacher on Rs. 5, the entertainment of two temporary teachers on Rs. 6 each in the Cocanada and Suryaraopeta schools, the re-employment of the two sub-registrars on Rs. 7 each, the increase in the number of private scavengers from 22 to 27, and the reduction in the tolls establishment, referred to in paragraphs 7, 8 and 10 of the Chairman's letter, are approved.

BUDGET ESTIMATE FOR 1896–97.

3. *Receipts.*—The receipts for the ensuing year are put down at Rs. 64,980 against Rs. 54,510 in the revised estimate, the increase being mainly under sale-proceeds of lands and school-fees. From paragraph 2 of the Collector's endorsement, it appears that the revenue from the tax on buildings is under-estimated. The credit taken under this head will, therefore, be raised by Rs. 1,000, as suggested by him. Under section 119 of the District Municipalities Act, the sanction of Government is required for exempting from payment of fees the schools referred to in paragraph 11 of the Chairman's letter. He will be requested to submit the necessary application through the Director of Public Instruction.

4. *Charges.*—(1) The probable charges are entered as Rs. 64,040 against the revised estimate of Rs. 56,850, the increase under Grants II and III and repayment of debt being partly counterbalanced by a decline under Grants I and IV.

(2) *Grant I.*—The allotment for repairs—communications will be raised from Rs. 3,600 to Rs. 4,600, as recommended by the Collector in paragraph 3 of his endorsement. The Sanitary Commissioner's suggestions in paragraph 2 of his letter read above will be recommended to the attention of the municipal council.

(3) *Grant II.*—A sum of Rs. 200 will be provided for building and other grants to result schools as recommended by the Director. The alterations in the educational establishments, referred to in paragraph 16 of the Chairman's letter and shown in the proposition statement, are approved. With reference to Dr. Duncan's suggestion to appoint a drawing master, his attention will be drawn to the fact that provision has been made in the budget for one on Rs. 20 for municipal schools. The Chairman will, however, be requested to see that instruction in drawing is imparted to result schools also.

(4) *Grant III.*—The proposed abolition of the post of a sanitary overseer on Rs. 12, and the entertainment of two additional sweepers on Rs. 5 each, the increase of one rupee in the salary of one of the ward peons and the alterations in the vaccination establishment, proposed in paragraph 17 of the Chairman's letter, are sanctioned. The Government does not see the necessity of raising the salaries of the registration establishment, which has only just been strengthened, nor can the increase of Rs. 5 in the pay of the sanitary overseer be approved, as it does not appear that his qualifications entitle him to so large a salary. The municipal council's attention will be drawn to the Sanitary Commissioner's remarks in paragraph 3 of his letter and that of the Chairman to the omission pointed out in paragraph 4. According to the estimate, the council expects to make a profit of Rs. 590 under the private scavenging service; the service should not form a source of revenue, but should, as far as possible, be merely self-supporting. If necessary, therefore, the fees levied may be reduced or the surplus devoted to extending the service and improving it by increasing the special establishment, which seems to be at present inadequate.

(5) *Grant V.*—The increase of Rs. 3 in the salary of the third clerk of the Municipal office and the reduction in the tolls establishment, proposed in paragraph 21, are approved.

5. *Debt and closing balance.*—As it is not likely that any payment will have to be made in 1896–97 on account of the loan for the water-supply scheme, even should the scheme be sanctioned and the loan taken in that year, the provision of Rs. 8,250 made for repayment of debt will be struck out. This will render funds available for

expenditure on the various sanitary improvements recommended by the Sanitary Commissioner at his last inspection. The council will submit proposals accordingly at an early date.

6. The budget, as revised by Government, closes with a balance of Rs. 10,190, or 15·4 per cent. of the estimated receipts.

TESTIMONIALS

OF

Kalla China Sathayya.

Testimonials

OF

KALLA CHINA SATHAYYA.

MUNICIPAL OFFICE,

COCANADA, 20th *May* 1886.

KALLA CHINA SATHAYYA,

Overseer.

Has the charge of 6 Divisions including 6 pakka latrines in Cocanada besides new Malapally. He deserves credit in cleaning out the out skirts of the town by removing prickly pear, &c., bushes to a great extent having best command over the sweepers and toties. Has paid his utmost attention to the sanitary and other works entrusted to him. Is an intelligent and hard working Overseer,

(Signed) L. BEECH, —*Surgeon,-Major,*

Chairman.

I have known Mr. K. C. Sathayya on two occasions, when I was Civil Surgeon, Cocanada, I have always found him very energetic and painstaking, and when I had to make sanitary inspections found him very useful indeed.

(Signed) W. H. BROWNING,

Civil Surgeon.

Dated 15th *April* 1889.

I have known Kalla Sathayya, Municipal Sanitary Overseer, for about 7 years, and have always found him hard working and energetic and one that never shirks work. Among the sanitary staff, he is the only man that can be depended on.

(Signed) J. HADDEN,

Assistant Surgeon.

Dated 1st *March* 1891.

During the time I was Chairman of Cocanada Municipality, Kalla Sathayya, Municipal Sanitary Overseer, worked to my entire satisfaction. He was the only servant who was always found in every street attending to his duties with willingness. I have always found him hard working, obedient, and willing servant. He deserves promotion and encouragement.

(Signed) T. JAGANNATHAM,

Deputy Collector.

DHARMAVARAM,
Dated 24th *March* 1888.

I am very glad to be able to bear testimony to the intelligence, assiduity and honesty of the Overseer Kalla Sathayya. He has discharged his duties to my entire satisfaction. He has pointed out in time several defects in the works executed by the contractor to admit of their being reminded at once. The contractors certainly do not like him for his outspokeness and honesty. But if he continues to be as straight forward as he has been hitherto. I am sure he will even then approbation of his Superiors. I strongly recommend that his pay may be raised to that of his fellow Overseers and an additional divisions given him.

(Signed) A. SUBRAMAYYA,

Vice-President of the Cocanada Municipality.

Kalla China Sathayya, late Overseer of Cocanada, having distinguished himself by his zealous and punctual attendance to his duties, has been very lately promoted to his present appointment of Sanitary Inspector.

He minds more his duties rather than the formalities to be observed to those around him which did not please serve such man. During my term of office, and I am very well satisfied with his work.

In more than one instances he has turned up works in a very short time and with a little cash which the Council expected would occupy much time and entail heavy expense.

I have heard a good account of him from my predecessors who have also given him excellent certificates. I have every confidence that he will satisfy my successors also.

(Signed) T. L. NARISIMHAM,

Chairman, Municipal Council, Cocanada.

Dated 31st *August 1888.*

I am glad to bear testimony to the efficiency, honesty and good care with which Kalla Sathayya has always performed his duties as Overseer in my divison. He is an intelligent and hard working man, and I think strongly deserves promotion in his department.

(Signed) W. PHILIPS,

Municipal Councillor.

COCANADA,
Dated 1st *June* 1886

This is to certify that Kalla China Sathayya, during the 18 months I had charge of the Municipal works of Cocanada, served very satisfactorily. He was always attentive to orders and carried out the works entrusted to him with care. I believe him to be thoroughly honest and well deserving of advancement.

(Signed) R. S. HARRIS,

Supervisor.

Dated 17th *June* 1884.

This to certify that K. C. Sathayya, Sanitary Overseer, is known to me during my stay at Cocanada. He is an hard working and zealous Municipal servant. He is up to his work

(Signed) M. GOVNID PILLAY,

Officiating Assistant Inspector, of F. L. Accounts.

CAMP COCANADA,
10th *May* 1891.

K. C. Sathayya, Sanitary Overseer in this Municipality, gave me great satisfaction in the manner he conducted his duties for the past year. He is an intelligent, hard working man and cheerfully does any job entrusted to him even though it should not be in the course of his own department. It is with great pleasure I give him this testimonial.

(Signed) A. L. PATCH,—*Surgeon, Captain,*

Dated 24th March 1892. *Civil Surgeon, Cocanada.*

Sanitary Overseer, K. C. Sathayya of this Municipality, served under me for the two years, I have been Chairman, and gave me entire satisfaction. He is very hard working and trustworthy, he has great control over his staff, and very punctual to his duties He is a willing servant and does his best even when ordered to do work in other departments. He makes a good Sanitary Officer, and a valuable servant to the Council.

Dated 8th April 1892. (Signed) G. P. NORTON,

Chairman.

K. C. Sathayya, worked very well under me in the Municipality. He understands sanitation, and is always about the town, keeping every thing clean. He is always ready to do odd jobs, and is a very useful subordinate to every Chairman and Medical Officer.

(Signed) A. L. PATCH,—*Surgeon, Captain,*

Dated 26th April 1892. *Civil Surgeon, Cocanada.*

Kalla China Sathayya has been an Overseer of the Municipality, here for some years past. I have had many opportunities of testing his work and have found him to be very active, hard working, and always willing to work. At the last outbreak of cholera as also on former occasions I found him very useful as a Sanitary Inspector. He did good work under me when big fires broke out in the town.

COCANADA, } (Signed) N. VENKAYYA,

24th September 1892. } *2nd Class Magistrate.*

I have much pleasure to certify that K. China Sattayya, has been a Sanitary Overseer in the Cocanada Municipality, for a very long time past, and earned to good opinion of the various Chairmen under whom he worked. During my tenure of office as Officiating Chairman, from 9th April 1892 to 17th January 1893, he discharged his duties to my greatest satisfaction. I always found him to be very steady, well behaved and hard working. He is a very useful hand in the sanitary staff and takes great interest in the matter of sanitation.

During the outbreak of cholera in the town in June and July last, he worked with activity and energy.

When the Government in reviewing the administration report of the Municipality, for the last year, remarked on the very small number of private latrines under the Municipal agency, this Overseer, under my strict orders to get an increase worked cheerfully and acquitted himself with complete success by bringing no less than 116 additional private latrines in Cocanada proper under the Municipal agency within a short period of 15 days, the former number on the Regster being only 70 and odd, a fact which shows his zeal and ability.

He is quite fit for the higher post of Sanitary Inspector, and I will be glad to hear of his promotion soon.

COCANADA, } (Signed) A. SURYANARAYANA,

17th January 1893. } *Deputy Collector, and*

Officiating Chairman.

COCANADA,
11th July 1884.

On resigning the Municipal Commissionership of Cocanada, the Overseer in charge of the 4th and 5th Divisions, requests me to give him a testimonial. At his request I certify that this Overseer Sathayya. K. has discharged his duties to the satisfaction of his Superiors He was made Overseer from a peon This very fact speaks much in his favor. As far as his work was with me I was very well satisfied.

(Signed) K. RAYAPPA.

No. 2970.

Endorsement on petition presented by K. C. Sathayya, Overseer, Cocanada Municipality, on the 13th June 1890.

Sathayya is no doubt an energetic Overseer, and there is none in the Municipal service at present who is equally able. As I have already said

my former remarks were based on reports received, and I have never since heard any complaint of the sort against him. He is true to his master.

16th June 1890, (Signed) M. KRISTNAMOORTY,
for Officiating Chairman.

(True Copy)

MUNICIPAL Office,
Cocanada, 15th July 1890. (Signed) G. P. NORTON,
Chairman.

No. 792.

Endorsement on the report submitted by the Sanitary Overseer, Kalla China Sathayya, on the 20th February 1890, regarding the conviction by the Town Magistrate, Cocanada, of a theft case in which he was the prosecutor.

The energy and prompt action of the Overseer deserves notice.

(Signed) K. PERRAZU,
Chairman.
21st February 1890.

(True Copy)

MUNICIPAL OFFICE,
Cocanada, 24th February 1890. (Signed) K. PERRAZU,
Chairman.

Kalla China Sathayya, Municipal Overseer has worked hard and with zeal. He has detected and prosecuted most of the nuisance cases in the town, and has done much to improve the Sanitary condition of the place.

The Chairman,

Municipal Council,

Cocanada.

To

The Chief Secretary to Government

Local & Municipal Dept, Fort St George

Madras

Sir,

According to para 4 (4) of G. O. No.

405 M dated 11th March 1896, reviewing the

budget report of this Municipality for 1896-97,

I have the honor to represent that K. Chinna

Sattayya, Conservancy Overseer of Cocanada

was recommended for an increase of pay

from Rs 20 to Rs 25 - not on account of his special

educational qualifications, but for substantial

practical work turned out by him, during my

tenure of office, as Chairman, as well as

before. He is a hardworking man of 16 years'

experience and has very good control over

the cooties. In extending and popularizing

the private scavenging system to the extent

we did in 1895-96 (from 306 latrines to

800 and odd), in increasing the number of

latrines cleaned by each toky from 20 to 30 and in preventing an anticipated strike among the tokes when their private income fell on account of the extention of the system, he was of Considerable use to me. When on account of an increase in the fee charged at the Slaughter house the butchers threatened towards the end of March last, to close their shops, they were easily brought round in proper time by an arrangement, matured through K. China Sattegya, to have the meat shops opened by some others temporarily, on behalf of the Municipality.

2. Of course, he only did his duty, when he acted under my orders in these and other matters. As an incentive to hard and earnest work, I promised him to get an increase of pay if he turned out substantial work, specially in connexion with the extention of the Privata Scavenging System. This he did to my satisfaction.

3. There is a good deal more to be done in this direction. I request therefore that the Government will be pleased to sanction the increase of Rs 5, to the pay of Overseer K. China Sattegya and charge the extra Rs 5, if necessary to 'private Scavenging', in connection with which his services will surely be required for some time longer.

4. The question of improving the Special Staff of peons employed for Supervision of the private latrines will be considered by the Council at an early date.

5 A printed copy of the testimonials obtained by K. C. Sattegya is enclosed.
