Letter No C. 66, dated 15 November 189
from the Executive Engineer, Kurnool
Division to the Suptg. Engineer, III Cir
Bellary.

With reference to your
Endorsement No. 1966, on G.O. No. 22740
of 13.9.95, I have the honour to state
that I inspected the Patha Cuddapah
tank, and find that nothing can be
done in the way of preparation of
estimates for the irrigation channels
from the end of the Patha Cuddapah
Channel until the water in the
tank goes down.

In this connection, I offer the
following remarks:-

The present revenue of the tank is
Rs. 11,613 made up of Rs. 9,200 under
1st Crop and Rs. 2,413 under 2nd Crop.
It is certain that if the tank is
abandoned, the canal would not
supply this 2nd Crop, and the Canal
Sub-divisional officer thinks that
there would be much difficulty
at times in supplying the first. In
this

this opinion, I do not concur, if the Patha Cuddapah Channel is put into good order which it is not at present.

If, however, a tank of decent capacity could be formed with F.S.L. at 6' 0" below the existing one, I would strongly recommend it in the interest of irrigation.

It does not appear to me that this would prejudice the idea of sanitary improvement. The average lowest level of the town of Cuddapah is +412.0. There is only one small spot in the town occupied by pariahs, the level of which is 403.0, and this might be vacated.

The F.S.L. of the tank would be 406.5 if cut down 6' 0" as I suggest. I do not altogether understand the advantage of abandoning the Patha Cuddapah tank, with its F.S.L. +412.5 if the dougala tank is retained. This latter is nearer the town than the former and its F.S.L. is +442.5.

Letter

Letter No. 2662, dated 21 November 1896, from the Supty. Engineer, III Circle, to the Chief Engineer for Irrigation, Madras.

In forwarding herewith letter No. C. 66 dated 15 instant, from the Exec. Engineer, Kurnool, I have the honour to request that you will inform me if you approve of his suggestion to lower F.S.L. of the Patha Cuddapah Tank by 6'. I consider that in the cause of sanitation it would probably be better to abandon it altogether as proposed by the Sanitary Board but a loss of revenue of Rs. 2,413 is a serious consideration. I would call attention to the fact mentioned in the last para of Executive Engineer's letter, viz. that there is the Dougala Tank, closer to the town and water at F.S.L. 30 feet higher than that of the Patha Cuddapah. The object of abandoning the latter while retaining the former is not apparent.

Memorandum

Memorandum No. ^{III}/_{49 C.D.} d/2 Decr:
1895, from the Chief Engineer for Irrigation,
to the Suptg. Engineer, ^{III} Circle.

With reference to letter No.
2662, dated 21 November 1895, from the
Suptg. Engineer, ^{III} Circle, the undersigned
has the honour to inform him that the
subject may be investigated, and the
results placed before the Sanitary
Board. If it be found that, by lower-
ing the F.S.L. of the tank, sufficient
water can still be stored in it to
mature a second crop, the proposal
would have the support of the Chief
Engineer for Irrigation.

Letter No 4019, dated 26 March 1896,
from the Suptg. Engineer, ^{III} Circle,
to the Chief Engineer for Irrigation, Madras.

With reference to your Memo-
randum, No. ^{III}/_{49 C.D.} of 2 December 1895,
I have the honour to report that, on
inspection of the Pattha Cuddapah Tank,
I came to the conclusion that lowering
its

its F.S.L. would be a half measure
very much opposed to the interests
of the town of Cuddapah, whose
natural drainage outlet would
still be blocked. I have therefore
not thought it necessary to delay
the matter by a further reference
to the Sanitary Board.

Memorandum, No. ^{III}/_{15 C.D.} d/2 April
1896, from the Chief Engineer for Irrigation
to the Suptg. Engineer, ^{III} Circle.

With reference to letter No.
4019, dated 26 March 1896, from the
Suptg. Engineer, ^{III} Circle, the under-
signed has the honour to say that
no orders can be passed on his letter
until the reference suggested in this
office Memo. No. ^{III}/_{49 C.D.} d/2 December 1895
has been made.

P. W. Secretariat.

1896

PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following

Note by the Chief Engineer for Irrigation, No. — I. dated 27 April 1896

With reference to No. 1227 W. dated 7 April 1896, the undersigned has the honour to forward the marginally noted correspondence from which it will be seen that the Superintending Engineer, III Circle, has been directed to investigate a proposal to lower the F. S. L. of the Patha Cuddapah tank instead of abandoning it and to place the matter before the Sanitary Board. The Supty. Engineer is apparently forgetting the loss of crop and these facts have not apparently been placed before Government when G.O. No. 1227 W. dated 7 April was issued.

Order thereon:— No. 1550 W. dt 19th May 1896
communicated

No. C. 66 dt 15.11.95 from the Engr. Engineer, Kurum.
