SUBJECT

Transferring letter from the Superintending Engineer, 1st Circle, stating that the construction of a masonry wall and a platform alongside the salt creek from the Tower clock to the Foster Road junction, Cocanada will supply a long-felt want and will be a decided improvement to the locality.

His **Order** H. M.

No. 1058 M. md 3-5-97

1/5/97

The arrangements proposed by the Municipal Council are ~~approved~~ sanctioned; but the work should not be commenced before the plans and estimates are approved by the Superintending Engineer.

2. The Chairman's first letter should, if it was meant to be treated as urgent, have been marked urgent on the docket, as required in G.O. No. 596 L. dated 1st April 1895.

Agreement

Whereas in accordance with the resolutions of the Godavari Port Conservancy Board and the Municipal Council of Cocanada, it is resolved to construct a masonry wall from bridge pier, near the Clock Tower, to the stone groyne at the junction of Foster road, with Pagoda road, alongside the Salt water canal and improve the site between the wall and Ramakrishnayya road, the Municipal Council having acquired the right of using the site thus reclaimed and improved in such manner as it might deem fit.

I do hereby agree to construct the said work and make it over to the Municipality after its completion on the following terms and conditions.

1. I shall construct the masonry wall from the Bridge abutment pier to the groyne at the Foster road junction, in accordance with the accompanying plan and specification subject to the approval

5/1548 96

Sir,

I have the honor to report the following case for the information of Government and for such orders as it may be pleased to issue in the matter.

2. The Samalcota and Cocanada irrigation canals meet here, above the iron girder Bridge, and are connected with the sea, by the Salt creek. The river boats scarcely go down the bridge, but stay above it, on the northern side of

iron roofed shed of 90 by 15 feet, somewhere on the platform, costing about Rs 2000/- may be of considerable use during the rainy season and pecuniarily advantageous, but the construction of it may be postponed for the present.

5. To allot Rs 6000/- out of our ordinary revenues for this purpose is almost impossible, at present, as there is a good deal (more) to be done for roads) and by way of latrines. To borrow money for the improvements of the boat-stand is evidently undesirable, when the question of the water scheme itself is pending before Government, and when the market building in Jagannaikpur destroyed by fire on 22nd May 1896 remains to be rebuilt yet.

6. Mr. K. Basivireddigaru, a merchant here has a choultry in Samalcota, and is trying to provide an endowment for its future maintenance. In addition to other landed property he offers to invest Rs 6000/- in the

construction of the wall and platform, now in question, on condition of having $\frac{1}{4}$ of the annual profits, after deducting the cost of establishment, to be entertained for collection of the fees there, for the support of his choultry. He also offers to see the work completed before 1st April next. He does not want a return of the principal so long as the work is under control of the Municipality — but he wants to have his Rs. 6000/- back, when the Port Conservancy Board resumes the site with the work thereon. The latter has already offered to repay the actual cost, subject to a maximum of Rs 5000/-, in case of resumption and may perhaps be induced to pay the actual cost, whatever it may amount to. Without spending anything for the construction of the wall and platform, the Municipal Council will, if Basivireddygaru's offer is accepted, realize 3/4 of the profits, accruing therefrom, from 1897-98, inclusive, till the resumption of the work by the Port Conservancy Board
