× in G.O. 1997 M / 28-11-95 (B)

FOR ORDERS.

In para 3 (c) of his notes× on the inspection of the Srirangam Municipality, the Deputy Sanitary Commissioner, observing that the water-supply of the town was most unsatisfactory, suggested the desirability of introducing a scheme for the water-supply of the town from the Cauvery. As the waterworks of Trichinopoly were then under construction, he stated that the wells constructed for them might probably be sufficient to supply Srirangam also, and that, in case they were not, a separate system might be established for the latter town from the same source. The Municipal Council was in favour of undertaking a water-supply scheme, provided the usual concession of a grant and loan were made by Government, and the Collector of Trichinopoly remarked that if the wells that would supply Tri-

[illegible] of the Municipality [illegible]
would draw up a [illegible]

chinopoly could be made available for Srirangam, the cost would be greatly reduced. The Sanitary Engineer was thereupon requested to state whether the present wells for the water-supply of Trichinopoly can be utilized for Srirangam also and, if so, what will be the approximate cost of a water-supply scheme for the latter town. The Sanitary Engineer then submitted two alternative schemes for the water-supply of Srirangam, both being extensions of the Trichinopoly works. One of these was estimated to cost Rs 116896 and consisted in laying pipes to the town across the bed of the river from the Trichinopoly pumping station, while according to the other, which was estimated to cost Rs 119246, pipes had to be carried over the Cauvery bridge from the main which supplies the Trichinopoly town at a point marked A in the plan*. Mr. Jones strongly recommended the adoption of the latter scheme, but he was then unable to state whether the number of wells in the Cauvery, which had been constructed for the Trichinopoly scheme, would

be sufficient to meet the increased demand on account of Srirangam also. He therefore provided, in the estimates of each of the two schemes above referred to, for the construction of an additional well in case it was required. He also proposed that, like other participators in the Trichinopoly water-supply scheme, the Srirangam Municipality should contribute towards the cost of the headworks and of pumping, in proportion to the quantity of water supplied to it, and stated that if the Government made the usual grant of 50 per cent of the cost of the scheme the annual charge on account of sinking fund and interest on the remaining half, which will have to be borrowed, and the maintenance cost of the works after they have been carried out, including the contribution to the Trichinopoly Municipality, will amount to about Rs 5938. These figures were only approximate and, in the incomplete state of the Trichinopoly works, he thought it useless to enter into further details; but he stated that, if his proposals above referred to were approved and the scheme considered to be within the means of the Municipality, he would draw up a

The Municipal Council of Srirangam to which these proposals of the Sanitary Engineer were referred for remarks, resolved on the recommendation of the Collector of Trichinopoly that the question of supplying the town with water from the Trichinopoly waterworks should be considered after the latter town had been supplied for some months during the next dry season, as the Engineers would then be in a better position to decide whether the existing headworks and wells are sufficient for both towns.

2. In submitting the revised estimate for the Trichinopoly water-works, however, the Sanitary Engineer stated that a good opportunity for testing the yield of the wells offered itself during the dry season of 1896, as the water in the Cauvery bed then sank much lower than on any previous occasion and that in his opinion the headworks would be sufficient for both Trichinopoly and Srirangam, but that an additional well would be required for _each_ of these towns. He further observed that, if Srirangam entered the Trichinopoly Scheme, the proportionate cost of the works to each participator in it would be materially altered and that no

required from any of them on account of the increase in the revised estimate submitted by him. He therefore requested that an early decision might be arrived at in regard to Srirangam. The Government then called on the Municipal Council to expedite its remarks called for in G. O. No. 938 M dated 6th June 1896. The Council again resolved in November 1896 to carry out the second of the schemes proposed by Mr. Jones but as the Municipal Council of Trichinopoly, which was consulted by it in the matter, has after some protracted correspondence replied to say that the question should lie over until some experience has been gained of the sufficiency of the supply to that town, it requests instructions as to how it should proceed in the matter. The Collector, through whom the paper has now been submitted to Government, considers that the objections of the Trichinopoly Municipal Council to share the water with Srirangam do not seem to be well-founded and that if the Sanitary Engineer thinks that the headworks are sufficie t it i very desirable hat the pipewater should be exc-

FOR ORDERS.

H.M.:

There is no chance of a grant this year. But there does not seem to be any need for a further reference to Mr Jones on the point of sufficiency. He has already reported in his letter[x] of 11 June 1896 (in G.O. 10/10/96 No 1731 M) that after the experience of a year in which the Kaveri was abnormally low, he saw no reason to delay longer the settlement of the question of supplying Srirangam with water from the Trichy. works.

-x in reply to G.O. 938 M. 26/6/96

(para 12 of letter of 19 May 96 in G.O. ibid)

M.C. may be told that in the face of Mr Jones' report there is no reason to delay or to hesitate in accepting the Srirangam project as part of the Trichy. Scheme

But there is the monetary difficulty. Even if Govt. gave a grant of 50% of the cost of the Srirangam project, that Mty wd. have to ~~hav~~ provide for an annual charge, on acct. of repayt. of loan & maintce., of some R5000 or R6000 and[x] it is doubtful if they cd. do so. In any case Govt. cannot at present make the proposed grant.

S.L. 20/6/97

H.M.
28/6/97

-x An 8% water tax imposed under the new Act wd bring in some R11000 or R12000 & provide apparently for the repayt. of a loan equal in amt. to the whole expenditure: but ~~[illegible]~~ it seems doubtful if so heavy a tax cd be imposed in addition to existing taxation. On this point however the Mty. might be asked to report: & whether a loan cd be raised in the open market. The total income exclusive of opening bal. budgeted for 97/98 was [illegible] 280 G.O. 2/3/97). S.L.

It may be that on
the face of [illegible]
there is no chance of
adding the [illegible] and
accepting the [illegible]
project as part of the
Trichy's scheme
But there is the [illegible]
difficulty [illegible] of
[illegible] a grant of [illegible] to
the cost of the [illegible]
project, that [illegible] have

No. 295.

Municipal Councillors office
Srirangam 22nd August 1896

From

The Chairman,
Municipal Council,
Srirangam.

To

The Chairman,
Municipal Council,
Trichinopoly.

Sir,

Chairman's remarks on para 3 (c) of the upper notes in $\frac{1997 \text{ M}}{28\text{-}11\text{-}95}$

The Municipality of Srirangam addressed the Government on the subject of introducing a water supply scheme to this town.

On this, the Government directed the Sanitary Engineer to prepare an estimate which was accordingly done. He suggested two means by which a water supply may be arranged for Srirangam. viz—

i By carrying pipes across the river from the present Trichinopoly Pumping Station.

ii By carrying pipes over the Cauvery bridge from the turning point of the west

west Chinthamani road.

The Council resolved to adopt the latter means for reasons stated in the Sanitary Engineer's letter to Government.

Thereon this resolution was communicated to the Sanitary Engineer and he was requested to prepare a complete estimate to have a full supply of water to Srirangam, keeping in view the intention of your Council to extend the water scheme to Puttore, Tennore and Woriyur.

The Sanitary Engineer to Government replied that he could not frame a detailed estimate until the order of Government requesting him to do so, is received, and that a preliminary measure is the obtaining of the permission of your Council to the proposed scheme. On this, the Council at its meeting held on the 8th Instant, has resolved to address your Council and the Government.

I request you therefore to place the same before the Council and obtain the necessary

necessary sanction.

A copy of the letter of the Sanitary Engineer to Government is herewith sent for your information.

Local and Municipal Department
Through the Collector of
Trichinopoly

Sir,

With reference to the Ag Assistant Secretary's Endorsement No. $\frac{268}{27.2.96}$ on the letter of the Sanitary Engineer to Government, No. $\frac{407}{10.2.96}$ addressed to the Chief Secretary to Government, and with reference to G.O. No. 1731 M, dated 10th Octobe 1896, I have the honor to inform you that, a per advice of the Sanitary Engineer in his letter No. $\frac{2245}{21.7.96}$ in reply to my No. $\frac{213}{17.7.96}$ (Copies herein enclosed),

Cur No. 519 M of 96
Inf O - $\frac{938 M}{6-6-96}$

addressed

addressed the Chairman of the Trichinopoly Municipal Council in my letter No. 295/22.8.96 (copy enclosed), requesting him to obtain the permission of that Council for the extension of the water supply scheme to Srirangam in the manner suggested by the Sanitary Engineer to Government in the references above mentioned.

The Chairman of the Trichinopoly Council replied that the Council was not in a position to give its consent to the Srirangam connection till the pipe service of Trichinopoly town is completed.

I again addressed the Trichinopoly Council in my No. 559/17.11.96 (copy enclosed) requesting it to be pleased to reconsider its former resolution for the reasons stated therein.

The Chairman of Trichinopoly Council replied that the Council desired the question

question to lie over till they have had the experience of the sufficiency of water supply to Trichinopoly town. This was placed before the Council at its meeting held on the 27th February 1897; and it had resolved as follows:—

"The Council regrets that it is not in a position to decide what it should do in face of the resolution of Trichinopoly Municipal Council; and the Chairman is requested to forward all the connected papers to Government for its information and for its guiding the Council".

Under the circumstances, I request you will be pleased to give instructions in the matter.

The Sanitary Engineer's letter to Government, No. 407/10.2.96 referred to the Council for remarks is herewith returned.
