Enclosure.

Sir,

With reference to correspondence ending with your letter No. 149^M dated 18th July 1897, I have the honour to state that I fail to see any reason for your regarding cholera that has occurred within the Municipality of Calicut as "sporadic." I would further invite your attention to the fact that no such subtle distinction—without, be it said, material difference in practice so far as extra-endemic area of cholera is concerned is referred to in the Rules laid down for guidance, in G.O. No. 1536M dated 9th September 1896. If you have not already, subsequent to this month's mortality of 152 and 2 attacks, changed your opinion on the subject of the desirability of taking early action, I would again ask your attention to the subject.

2 I would point out that since I first corresponded with you as to the desirability of requiring efficient action for the rep

of cholera in the town of Calicut, the mortality from this preventible cause has been as follows:-

Monthwar	attacks	deaths	Remark
November 1896	-	-	
December "	44	38	The date of first
January 1897	175	144	outbreak of
February "	42	29	cholera is the
March "	75	41	8 th December 96
April "	49	32	
May "	85	48	
June "	80	51	
July	275	152	• up to 19 th July 1897
Total	825	535	

I have the honour to be

Sir

Your most obedient servant

(Signed) W. G. King.
