GOVERNMENT OF MADRAS.

SANITARY BOARD OFFICE.

Proceedings of the Sanitary Board, No. 278 S., dated 27th November 1896.

READ—the following paper :—

Note by the Sanitary Commissioner, No. 435 S.B., dated 13th October 1896.

Resolution—

In paragraph 63 of the Madras Sanitary Report for 1894, the Sanitary Commissioner suggested that it would be advisable for the Sanitary Board "to be required to determine in what towns the introduction of water-supply and drainage would, with reference to water carriage, be likely to demand subsequent modifications of methods of conservancy, so that in the rest the complete conservancy of night-soil might be at once insisted upon."

2. This proposal received the approval of Government in G.O., No. 1177 L., dated 8th July 1895.

3. In their Proceedings of the 12th March 1896, No. 4/S.B.P., the Sanitary Board recorded the opinion that, "having regard to the distance of time at which it is likely the towns of this Presidency will be provided with complete sewerage systems, modifications of the existing methods of conservancy in favour of water carriage need not at present be considered, except as to Ootacamund and Cuddapah."

4. Thereupon the Government in G.O., No. 627 L., dated 31st March 1896, requested the Sanitary Board "to submit a statement showing the plant requisite for ensuring the complete conservancy of night-soil in each Municipality, except Ootacamund and Cuddapah, and also its probable cost." The Board was further directed, in preparing the statement, to show the plant required and also that already existing.

5. The Sanitary Commissioner with his endorsement No. 435 S.B., dated 13th October 1896, submits a statement showing the staff and night-soil carts now employed in each Municipality (in some Municipalities there seem to be no conservancy carting arrangements at all), and assumes that "it will now be possible for the Sanitary Board to deal with the question."

6. It is not clear to the Board how the information now supplied will enable it to estimate the plant requisite for ensuring the "complete conservancy" of night-soil in each Municipality, and the probable cost.

7. The requisition of the Government seems to the Board to involve the elaboration of a complete conservancy scheme for each Municipality. This being so, the proposals should originate, not with the Sanitary Board, but with Municipalities concerned, and be submitted through the Sanitary Commissioner and the Sanitary Engineer for their remarks in each case; and only after this has been done, will the intervention of the Sanitary Board be effectual.

8. The Chairman of each Municipality, excepting Cuddapah and Ootacamund, will accordingly be requested to furnish the Board with a statement in the following form, and to add any remarks and suggestions which the Municipal Councils may wish to offer :—

Municipalities.	Population.	Present conservancy arrangements.			Proposed conservancy arrangements.			Remarks.
		Number of night-soil carts.	Number of toties employed in public and private latrines.	Cost per annum.	Number and description of plant.	Number of toties for public and private latrines.	Cost per annum.
