Office of the District Medical Officer
Tampore 1900

From

Surgeon Lt Col W. H. Lee.

District Medical Officer
Tampore

The Chairman

Municipal Council

Tampore.

Sir,

I have the honor to bring to your notice that the following defects and shortcomings demand early attention:-

1. The insufficient number of carts for the removal of sweepings as well as their improper pattern, and the inferior quality of the bullocks for drawing the same, with the result that large accumulations of rubbish are left undisturbed and unremoved for long periods of time.
2. The condition of the main drains in the Fort has already been dealt with by me. The silt from these should

nt.

should be regularly removed and promptly conveyed away. Cesspots should not be allowed.

3.

The Condition of the public latrines is unsatisfactory, and notices are not posted to single latrines or groups of adjacent latrines which are not therefore kept in a sufficiently clean condition so that people who would otherwise use them are thereby deterred from doing so. Many of the night soil carts are not of recent pattern and the cattle employed to draw them are old, and infirm, and semi-starved to judge from their miserable condition.

The surroundings of latrines are often very offensive, being extensively defiled.

4.

The unsanitary condition of the rubbish and night soil depots through the neglect of the Municipal Employees to see to the proper disposal of the refuse, and the burial of faecal matter in trenches. Supervision of the public slaughter house is similarly neglected. A special

Sub-Inspector might be placed in charge of these for instance the market and slaughter house could be put in charge of one Sub-Inspector and another in charge of the Depots, provided the latter could not be conveniently supervised by the Ward Sub-Inspectors. This arrangement should be feasible if the Sub-Inspectors were relieved of all work in connexion with tax collection.

5. The Sanitary Staff should be placed in subordination to the Chief Inspector instead of each man being as at present an independent entity responsible only to the Chairman.

The Chief Inspector should also have the services of a Municipal peon placed at his disposal.

6.

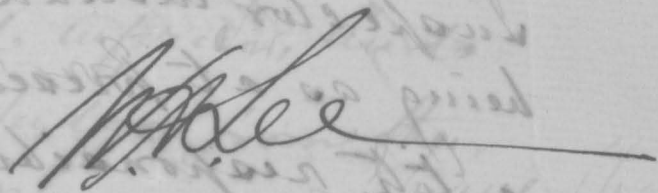

It is ordered that each Ward Sub-Inspector shall be thoroughly acquainted with his ward, he should be a resident therein, and should moreover be the Sub-registrar of births and deaths in the ward.

receiving

receiving a remuneration of one
anna for each birth or death reported
by him and being subject to a fine of
two annas for each death or birth in
his ward which he shall have failed
to report.

I have the honor to be

decided on, may be dealt with in your revenue
its Sanitary portion.

I would especially invite your attention
to the Circumstance that the Chief Sanitary
Inspector has no adequate authority or control
over the Subordinate Sanitary Staff, the latter
on their independent initiative recommending
prosecutions, &c - a power which in such hands
obviously affords scope for extortion and abuse,
and causes Sanitary rules and regulations to be
detested by the people.

I have the honor to be
