SANITARY BOARD OFFICE.

PROCEEDINGS OF THE SANITARY BOARD, No. 3438, DATED 14th April 1897.

Read the following:—

Letter from the Chairman, Municipal Council, Adoni,
No. 266, dated 20th March 1897.
Endorsement thereon by the Ag. Collector of Bellary No.
525, dated 28th March 1897.
Endorsement in the Local and Municipal Department
No. 464, dated 6th April 1897.

Resolution

With the endorsement read above, the Government
refers for the remarks of the Sanitary Board an extract
from the Proceedings of the Municipal Council, Adoni, in
which the Council takes exception to the remarks of
the Sanitary Engineer in regard to the filtration of the
town water supply. The Council suggests that an
officer of the Sanitary Engineering Department be
deputed at once, at the cost of the Municipality, to
demonstrate the proper method of working the filters
and to report on the proposal for providing a
supply when the present tank gets low.

2. The Sanitary Board understands that the
Assistant Sanitary Engineer has already personally
supervised the filtration arrangements, and the
Board is of opinion, therefore, that no useful object
would be gained by his doing so again. The Board
advises that Mr Jones should himself take an early

opportunity of demonstrating on the spot what he considers should be done. He can take the same opportunity to draw up proposals for providing supply of water when the present supply fails.

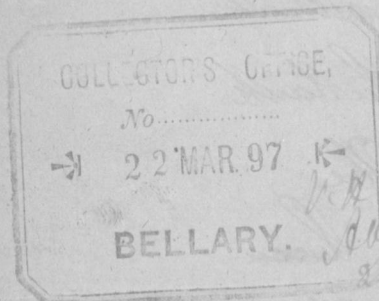

3. It is observed that the Collector states that the Sanitary Commissioner advises that the tank should be emptied and the silt cleared. The Chairman has, the Collector further states, been requested to have an estimate for this work prepared and sanctioned at once, in order that the work may be opened as a famine relief work. These proposals have the Sanitary Board's approval.

DESPATCHED
22 MAR 97

Order No 525
15/4/97

Forwarded.
On a reference from this office, the Sanitary Commissioner advises that the tank should be emptied and the silt cleared. The Chairman has been requested to have an estimate for this work prepared and sanctioned at once in order that the work may be opened as a famine relief work. As the road work in Adoni is very nearly finished, early orders of Government on this matter are solicited.

Extract from the Proceedings of the Adoni Municipal Council passed at their meeting held on Friday the 19th March 1897

1. Read G.O. No. 230 M, Dated 16th February 1897, Communicating with remarks to the Municipal Councils of Madras, Trichinopoly and Adoni, for early attention, Sanitary Engineer's inspection notes on the water works of those towns.

Read also Collector's letter Ref on G.O. No. 528 of 14th March 1897, requesting to be favoured with the remarks of the Council upon the inspection notes on the Adoni water works - recorded in the aforesaid G.O. -

The Council feels that the remark of the Sanitary Engineer that the late had supply - has been due entirely to carelessness in regard to filtration is undeserved. The Assistant Sanitary Engineer was here for three days in January and personally supervised the filtration, but with really no good results. Since then the Municipal Overseer has been carefully carrying out the personal instructions given by the Assistant Engineer and the written instructions subsequently received from the Sanitary Engineer (which

2
80235

(which, it is observed very considerably, from the printed instructions originally supplied), and yet the filtration has not been effective at all. Under these circumstances the Council has no alternative but to request the Government to order at once the deputation at the cost of the Council, of an officer belonging to the Sanitary Engineering Department to practically show the proper method of working the filters so as to ensure a pure supply of water to the town. With reference to the suggestion no. 2 of the Sanitary Engineer that the Council should at once consider proposals for maintaining a supply, when the present supply fails, the Council thinks that the officer deputed to work the filters may also be instructed to devise a practical scheme for securing the object in view.

1430 Nov 1897

Extract from the proceedings of the Municipal Council
held at the meeting held on 14th Nov 1897
The 14th Nov 1897
The Council has received from the Sanitary Engineer a report dated 10th Nov 1897, in which he states that the filters are not working properly and that the water is not pure. The Council has considered this report and has decided to request the Government to order at once the deputation at the cost of the Council, of an officer belonging to the Sanitary Engineering Department to practically show the proper method of working the filters so as to ensure a pure supply of water to the town. With reference to the suggestion no. 2 of the Sanitary Engineer that the Council should at once consider proposals for maintaining a supply, when the present supply fails, the Council thinks that the officer deputed to work the filters may also be instructed to devise a practical scheme for securing the object in view.

(which it is desired to be considered) from
 the printed instructions (especially in the
 part the filtration has not been effected at all.
 Since these circumstances the Council has no
 alternative but to request the Government to
 make at once the filtration at the cost of the
 Council of an officer belonging to the sanitary
 engineering department to practically show
 the proper method of working the filter so as
 to ensure a pure supply of water to the town.
 With reference to the suggestion no. 2 of the
 Sanitary Engineer that the Council should at
 once employ persons for maintaining
 supply when the present supply fails,
 the Council think that the officer engaged
 to work the filter may also be instructed to
 clean a practical system for securing the
 object in view.
