Dated	14-9-	1891.

Not to be folded or roughly handled

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper:—

From M.R.Ry. R. GOVINDA ROW NAIDU, Garu, Chairman, Municipal Council, Cuddapah, to the Chief Secretary to Government (through the Collector of Cuddapah), dated 16th July 1891, No. 747.

I have the honour to submit the administration report of this Municipality for 1890–91, together with prescribed statements.

CONSTITUTION OF THE MUNICIPAL COUNCIL.

2. The sanctioned number of councillors for this Municipality is 16, of whom 12 are elected and 4 nominated, including the *ex-officio* Chairman. The actual number that existed on the 31st March 1891 was 16, viz., 12 elected and 4 nominated.

3. There occurred only one vacancy among the elected councillors, and it was filled uncontested.

4. Twenty-nine meetings were called, and in 3 of these no business was transacted for want of quorum.

5. The attendance of the councillors was satisfactory during the year, the average attendance being 9.

6. The total number of registered voters at the close of the year was 474 in all the six wards into which the town is divided for electoral purposes.

RECEIPTS.

7. The receipts amounted to Rs. 58,413-11-6, including the opening balance of Rs. 4,483-0-10 and Provincial contribution of Rs. 8,000 towards the water-supply project. The actual collections amounted to Rs. 45,930-10-8 against the revised estimate of Rs. 46,195.

8. *Tax on Buildings.*—The receipts amounted to Rs. 10,157-1-10, including the arrear collection of Rs. 927-1-2. Of the final demand, Rs. 9,286-13-8, the collections amounted to Rs. 9,230-0-8, leaving a small balance of Rs. 56-13-0. The decrease of Rs. 1,083 under the revised estimate of Rs. 11,230 was owing to some of the new buildings under construction, and improvements to some, not having been completed during the year as was anticipated.

9. The assessment was fixed on the gross annual rent value of the buildings in general without reference to the value of buildings, and the maximum rate of 7½ per cent. was levied in this town. Though the register of houses was revised two years ago, yet the Council have considered it necessary to revise it again within the current year, and a special sub-committee has been appointed for the purpose to find out if the reductions in the house-tax within the last two years have the proper sanctions and are justifiable, and also to consider if the assessment is capable of any further increase.

10. *Tax on Lands.*—The collections amounted to Rs. 277-5-3, including an arrear of Rs. 164-1-0, against the revised estimate of Rs. 340. The decrease was due to the transfer of wet to dry crops. The register was revised in the year under report. The assessment was fixed for every acre of dry land on an estimate of the annual rental at Rs. 3-8-0. The total extent of lands assessed was 645 acres 55 cents dry.

11. *Water-tax on Buildings and Lands.*—Of the final demand, Rs. 2,493–4–8, the collections amounted to Rs. 2,464–6–8, including an arrear of Rs. 289–12–8, against the revised estimate of Rs. 2,600. The decrease was proportionate to the decrease of house-tax, for the reasons assigned under paragraph 8.

12. *Tax on Arts.*—The receipts amounted to Rs. 3,543–8–0 against the revised estimate of Rs. 4,000. The decrease was due to reduction of taxes amounting to Rs. 254. In reference to both the house and profession taxes, I beg to submit that, owing to several unattested alterations and erasures in the registers, I had reasons to suspect that several reductions had been made within the last year or two without proper sanction or justifying cause, and the Council, therefore, appointed a sub-committee to closely scrutinize the registers and make a report. Their report is awaited, and I shall submit a further report in the matter of the reductions under these heads if they are such as to be brought to the notice of the Government. At present I am unable to adduce special reasons for short assessment, having taken charge of the Municipality only a few months ago.

13. *Tax on Vehicles, Animals and Carts.*—The estimated revenue amounted to Rs. 2,200, of which Rs. 2,027 was collected. The decrease was mainly due to single-bullock carts hitherto used by the inhabitants for carrying water from Boogga and other wells having been done away with after the introduction of pipe water into the town.

14. *Licenses.*—The collection amounted to Rs. 14 against the revised estimate of Rs. 60. The Government having sanctioned, in their order, Mis. No. 998 M., dated 1st instant, the levy of license fees for offensive and dangerous trades under section 188 of Act IV of 1884, the Council anticipate a large revenue under this head during the current year.

15. *Contribution from Provincial Funds.*—Rs. 8,000 were received from Government for the completion of water-supply project during the year.

16. *Contribution from Local Funds.*—Rs. 2,000 were received, as usual, from the District Board on account of hospitals and dispensaries. As the expenditure has been increased on account of medicines purchased for last year owing to the prevalence of fevers, influenza and other diseases, there is an excess expenditure of Rs. 2,273–5–11. The Council find it difficult in the state of their finances to meet this increasing expenditure, and they should, therefore, look to the Board for their further aid during the current year.

17. *Education.*—Rs. 1,942–1–7 were received on account of net cost of the high school department against the estimate of Rs. 3,070. The decrease was partly due to the first assistant having been transferred temporarily and a substitute appointed on a reduced rate of salary, and partly due to the number of hours spent in the middle school department by the teachers of the high school department.

18. *Licenses under Public Resort Act.*—A sum of Rs. 125 was received during the year for licenses issued for dramatic performances.

19. *Tolls.*—The collection of tolls at the nine municipal gates was let on contract, as usual, and the amount realized was Rs. 11,250.

20. *Coercive Process.*—Appendix A to Statement IV-A and IV-B shows the extent to which measures were taken for collection of taxes. The total number of warrants issued was only 57. In 21 cases, the taxes were collected after prosecution, and in 6 after distraint.

	Rs.	A.	P.
Establishment	120	0	0
Public Works	293	15	0
Total ..	413	15	0

21. *Market.*—The only market in this town, viz., the municipal market, was let on contract for Rs. 3,660, and the full amount was realized. The net receipts of the market after deducting charges on account of establishment and public works, as detailed in the margin, amounted to Rs. 3,246–1–0.

22. *School Fees.*—The amount realized was Rs. 2,326–15–6 against the revised estimate of Rs. 2,100. There was a decrease of Rs. 800 compared with the previous year. This is due to the falling off in strength of the high school.

23. *Rent of other Buildings.*—The revenue under this head amounted to Rupees 1,179–4–8, against the estimate of Rs. 1,125, as detailed below :—

	Rs.	A.	P.
(1) Slaughter-houses	750	6	6
(2) Travellers' bungalow	252	6	0
(3) Rent of Municipal magazine	5	0	0
(4) Fees from cart-stand	171	8	2
Total ..	1,179	4	8

24. *Fines.*—The receipts and the estimate amounted to Rs. 222–10–6 and Rs. 250, respectively :—

	Rs.	A.	P.
Police fines	109	9	6
Municipal fines	111	1	0
Distraint fees	2	0	0
Total ..	222	10	6

25. *Private Scavengering Fees.*—The receipts amounted to Rs. 573–15–6. The number of houses served by the private scavengering agency was 512. This system has been improved since last year. It is, however, capable of further improvement, and I hope to give my attention to this shortly.

26. *Endowments.*—The receipts under this amounted to Rs. 566–6–6, against the estimate of Rs. 540, as detailed below :—

	Rs.	A.	P.
Sale of medicines	90	11	6
Interest on the funded capital of the dispensary	475	11	0
Total ..	566	6	6

27. *Miscellaneous.*—The receipts amounted to Rs. 3,311–2–0, against the estimate of Rs. 1,070, as detailed below :—

	Rs.	A.	P.	Rs.	A.	P.
Conservancy and road-cleaning				415	8	0
Avenues				76	8	0
Sale-proceeds of old materials				86	12	6
Refund from expenditure of previous years				4	4	0
Miscellaneous—						
Postage due recovered	1	3	0			
Value of Municipal Act	1	1	0			
Refund after purchasing Government securities	44	0	7			
Batta from Court	1	0	0			
Fee for extract from animal, &c., registers ..	1	12	0			
Recovery of cost incurred in a suit regarding Muhammadan burial-ground	43	5	3			
Interest on Smith's Prize Endowment Fund .	72	0	0			
Value of disinfecting powder	37	0	0			
Value of hospital tender form	3	0	0			
Interest on toll revenue recovered from the contractor for failure to pay kists in time..	58	9	6			
Interest on market revenue recovered from the contractor for failure to pay kists in time..	4	10	9			
Refund of stipend by a teacher resigned ..	201	13	4			
Subscriptions and donations made by private parties for water-works	2,258	10	1	2,728	1	6
Total ..				3,311	2	0

28. With reference to the last item, viz., Rs. 2,258–10–1, of receipts under Miscellaneous referred to, I beg to state as follows :—

(1) Immediately after the water-supply project was brought to completion, several respectable residents of Cuddapah town applied to the then Chairman, Mr. C. Raghava Row, for introduction of pipe-water into their houses and for building fountains at various places at their cost for the benefit of several sections of the public. Written applications exist in all the cases except in one or two, but in the majority of cases, the transactions seem to have been carried on without resort to any writing. Regular estimates were not furnished to the parties as to the cost of the works desired by them to be executed, and consequently lump sums were obtained, probably on a rough estimate orally intimated by the water-works overseer or some other person concerned with the business. Receipts were not granted to the parties, but chalans received to show the amount paid. As a result of this procedure, in some cases amounts over the requirements and in others short of the requirements, seem to have been collected, and the amount kept, as it were, like a common fund and the works executed. The total amount collected from private individuals for this purpose for the whole year amounts to Rs. 4,761–11–6. Of this amount, Rs. 3,227–1–2 were collected up to 19th December 1890, and Rs. 1,534–10–4 from 5th January 1891 to 31st March 1891. The accounts relating to the collections up to 19th December 1890, as said above, are in a most confused state and do not very much deserve the name of accounts. These amounts were not at any time credited to the regular Municipal cash book, nor were the moneys remitted to the Government treasury as they ought to have been, and it could not be said for certain where they had been kept. There is a rough account book kept separately in a few sheets of paper stitched which was balanced on 19th December 1890, and the balance on hand according to this account book (Rs. 723–15–9) was for the first time remitted to the Government treasury on the 5th January 1891—Mr. Raghava Row, the former Chairman, having gone on leave on the 22nd December 1890. Since the 5th January 1891 regular estimates were furnished to the parties, amounts received in accordance with the estimates and immediately credited in the cash book and remitted to the Government treasury. The sums thus received and treated in this manner since 5th January 1891 amount to Rs. 1,534–10–4, which added to the sum of Rs. 723–15–9 remitted on 5th January 1891 as the balance in hand of private contributions, makes up the total sum of Rs. 2,258–10–1 above alluded to. The amounts collected over and above the sum of Rs. 723–15–9—viz., Rs. 2,503–1–5—prior to 5th January 1891, has not been shown in this report, as in the first place they were never treated like public money not brought into the cash book, nor remitted to the treasury, and lastly what accounts there remain about them are in a most confused state.

(2) I regret to state that the most unfortunate portion of the accounts of the year under report is with reference to these transactions. The manager is not able to give any satisfactory explanation for dealing with people's money in this extraordinary fashion, and as the Deputy Collector—Chairman Mr. Raghava Row, who was then in charge of the office—has been transferred from this place, the Council are not now in a position to fully understand the transactions, nor the reason for the procedure followed, except through the intervention of Government. The Council appointed a sub-committee to examine these accounts as far as possible, and their report on the subject was recently received. But in the state of things I have detailed above, I find it an extremely difficult business to balance the receipt and expenditure for each individual with any degree of accuracy. However, it appears that in some cases contributors paid more than what was actually required and in others less, and in the latter cases the deficit seems to have been met either from Municipal funds or from the surplus of other individuals—a procedure which the Council have considered irregular. They have accordingly passed a resolution that any surplus amount due to individuals should be refunded, and amounts spent for Municipal funds on account of private works recovered.

(3) The accounts require further check and scrutiny before the above resolution, which is plain justice, could be carried out. I shall report the result of the examination fully when it is completed.

29. *Opening Balance*—

	Rs.	A.	P.
Municipal fund	3,009	9	8
Water-tax fund	1,473	7	2
Total ..	4,483	0	10

Expenditure.

30. The total expenditure amounted to Rs. 56,933–12–0 against the estimate of Rs. 58,110, the main item being water-works.

31. *Grant I, Public Works.*—The total expenditure on public works amounted to Rs. 20,757–4–5 against the estimate of Rs. 20,130.

32. *Tolls and Road Charges.*—The revenue from tolls amounted to Rs. 11,250. On account of water-supply project and payment of interest of Rs. 2,940 a year on the loan raised for its execution, the Council were unable to spend more sum than Rs. 4,238–9–6 during the year. There was no expenditure during the year on toll-gates.

33. *New Works—Communications.*—Rs. 883 were spent for the construction of ten new culverts in places crossing the side-drains, on main roads and streets, as they were particularly needed for the convenience and safety of the public.

34. *Buildings.*—Rs. 293–15–9 were spent on account of tatty doors to market stalls and flooring the same with slabs.

35. *Water-supply.*—Rs. 14,725–14–1 were spent for the completion of the Boogga water-project. Including this sum, the total amount of expenditure on this project was Rs. 96,384–14–11. This sum of money was met from the following sources :—

	Rs.	A.	P.
Provincial contribution	48,000	0	0
Loan	43,168	12	0
Municipal fund	5,216	2	11
Total ..	96,384	14	11

36. *Repairs—Communications.*—Rs. 3,355–9–6 were spent on repairs of roads. In all 13 roads and streets to the length of 4 miles 2 furlongs 57 yards were metalled and remetalled during the year. All the roads and streets were well maintained so far as the funds permitted. The streets and some of the main roads are subject to damages during the rains for want of proper drains.

37. *Buildings.*—Rs. 392–6–7 were spent on repairs to buildings.

38. *Travellers' Bungalow.*—(1) A sum of Rs. 200–14–1 was spent for plastering the roofing, floors, walls, side verandahs, bath-rooms and compound walls. This building is located on the main road leading to the railway station, and is maintained in good condition. Crockeries and necessary furniture are supplied for the use of travellers.

(2) Rs. 191–8–6 were spent for repairing slaughter-houses, hospital assistant's quarters, latrines and urinals as detailed below :—

	Rs.	A.	P.
Slaughter-houses	80	14	0
Hospital assistant's quarters	92	8	2
Latrines	51	10	5
Urinals	16	7	11
Total ..	191	8	6

39. *Drainage.*—Rs. 324–15–0 were spent during the monsoons for cutting side channels for prevention of stagnation of rain-water in the town.

40. *Establishment.*—The cost of establishment maintained for these works amounted to Rs. 592–11–0, besides Rs. 610–11–10 for establishment specially employed

for water-supply project, making in all Rs. 1,203-6-10. The establishment consists of one overseer on Rs. 30, one maistry on Rs. 15 and one peon on Rs. 6.

41. *Tools, Plant and Contingencies.*—Rs. 176-7-3 were spent for purchase of tools, &c., for all the public works of this Municipality.

42. *Grant II, Education.*—The expenditure on education amounted to Rupees 7,779-7-8, as detailed below, against the estimate of Rs. 7,920 :—

	RS.	A.	P.
Municipal schools—			
On Salary system—			
Establishment ..	6,413	8	5
Contingencies ..	423	15	9
On Salary-results system—			
Establishment ..	290	11	5
Contingencies ..	140	0	0
Results grants ..	472	8	9
Pay of Municipal inspectors ..	38	11	4
Total ..	7,779	7	8

The Muhammadan salary-results school did not earn any grant during the year, for the inspecting officer visited this school on his tour of inspection before the completion of term for examination of results grants. The Municipality maintained one high school and one primary school for Hindus and Muhammadans at a cost of Rs. 7,268-3-7. The proportion of expenditure incurred on account of the different departments of these schools, and the progress of education therein, are explained in the accompanying Statement V-A and V-B. The percentage of expenditure on the high and middle school departments are Rs. 32 and 40, against Rs. 5 and 11, respectively, in 1888-89. This abnormal rise is owing to the diminished collection from school fees and Government contribution.

43. *Results Grants.*—Results grants were paid at maximum rates to all the elementary schools examined and passed during the year. Rs. 472-8-9 were spent under this item against Rs. 300 of last year.

44. *Inspection.*—The head master of the primary school was allowed a sum of Rs. 5 per mensem for inspection of elementary schools. But, as ordered by Government, a separate inspecting schoolmaster on Rs. 15 was solely appointed during the current year for this purpose. He is a Matriculate. As there is no one available to act for him, the Council are unable to send him to Madras to undergo training. The Council expect better results during the current year under the present system of placing the elementary schools under the supervision of a special inspecting officer.

45. *Grant III (Sanitation and Medical Services), Hospitals and Dispensaries.*—The expenditure amounted to Rs. 6,053-9-8, against an estimate of Rs. 7,616, as detailed below :—

	RS.	A.	P.
Establishment ..	2,768	1	9
Medicine and supplies ..	1,366	14	4
Diet of patients ..	1,046	8	9
Sundries and contingencies ..	872	0	10
Total ..	6,053	9	8

The working of the dispensary is explained in the accompanying report of the District Surgeon. Irrespective of the above expenditure, a sum of Rs. 92-8-2 was spent for the repairs to hospital assistant's quarters and other buildings attached to the dispensary.

46. *Vaccination.*—The cost of the establishment and contingencies amounted to Rs. 363-10-8 against the estimate of Rs. 290. The pay of the vaccinator is Rs. 15. The number of cases vaccinated during the year under report was 808, of which 754 were successful, 46 unsuccessful, and 8 unknown. The number of vaccine operations performed on children under one year of age was 275, of which 272 were successful,

2 unsuccessful, and 1 unknown. The results of cases of vaccination performed with different kinds of lymph are as shown below :—

Description.	Number vaccinated.	Successful.	Unsuccessful.	Unknown.	Cost of each successful case.
					RS. A. P.
Animal lymph ..	398	378	13	7	
,, scabs ..	8	6	2	..	
Arm-to-arm ..	308	282	25	1	
Buffaloe calf ..	94	88	6	..	
Total ..	808	754	46	8	0 7 9

The excess expenditure of Rs. 184-1-8, against the estimate of Rs. 80, under contingencies, was due to the introduction of animal vaccination. The number of cases reported to the Magistrate was 72. The number of vaccine operations performed independently by medical subordinates, and the results, are explained in paragraph 9 of the District Surgeon's report.

47. *Vital Statistics.*—A separate registrar was appointed on Rs. 15 solely for this purpose. The expenditure amounted to Rs. 181-12-4 against the estimate of Rs. 190. The result of registration during the year, as compared with that of the previous year, is shown below. Population according to the census of 1881 and 1891 is 18,982 and 17,121, respectively :—

	1889-90.	1890-91.
Births ..	534	247
Deaths—		
Cholera ..	4	77
Small-pox ..	6	10
Fever ..	263	359
Bowel-complaints, dysentery and diarrhœa ..	36	33
Suicides ..	1	..
Bodily injuries ..	2	6
Accidental deaths ..	5	2
Snake bites ..	..	..
Killed by wild beasts ..	..	..
All other causes ..	278	268
	595	755

The number of prosecutions instituted during the year was 26, as detailed below :—

For burials in prohibited Muhammadan burial-grounds ..	19
,, failure to register births. ..	7
Total ..	26

48. *Conservancy.*—The expenditure on account of establishment, contingencies, repairs of carts and for sanitary service amounted to Rs. 6,997-12-7, as particularised below :—

	RS.	A.	P.
Establishment ..	4,303	3	7
Contingencies ..	191	12	11
Repair of carts ..	372	12	6
Sanitary service ..	2,129	15	7
Total ..	6,997	12	7

The establishment consists of one inspector on Rs. 25, one on Rs. 15, 6 peons on Rs. 6 each, 29 male and 28 female scavengers. There are 31 latrines, of which 24

are pucka-built, 6 are of mud, and one is brick-walled. The number of carts employed was 12 for street sweepings and 4 for night-soil, besides 1 iron hand-cart and one cask-cart for removing urine. The street sweepings were removed and deposited in pits dug up for the purpose about 4 furlongs off the town, and sold by public auction.

49. *Private Scavengering.*—The cost of establishment and contingencies amounted to Rs. 898–7–7 against the estimate of Rs. 914 :—

	Rs.	A.	P.
Establishment	854	3	11
Contingencies	44	3	8

The establishment consists of two inspectors, who are called assistant inspectors, on Rs. 12 each, and 13 toties on Rs. 4 each. The number of private latrines cleaned by municipal toties was 512. The system worked satisfactorily during the year. As the receipts under this head did not cover the cost of establishment and contingencies, the Council have raised the rate of fees for the current year from 6 to 8 pies per head per mensem, and the same has been sanctioned by Government.

50. *Cholera.*—The expenditure amounted to Rs. 212–12–9 against the estimate of Rs. 198. The number of deaths on account of this disease was 77.

51. *Contribution to Provincial and Local Funds.*—Rs. 12 were paid for Cutlers' establishment against the estimate of Rs. 20. But no contribution was paid during the year on account of Medical College, Sanitary Inspection, Medical Reserve Staff and Vaccination, as the demand was made after the closing of the accounts for the year. Rs. 247 were since paid.

52. *Grant IV, Lighting.*—The cost of establishment and contingencies amounted to Rs. 1,523–3–8 against the estimate of Rs. 1,440. The increase was due to purchase of chimneys and burners and increase in price of kerosine oil. The number of municipal lights in the town on the 31st March 1891 was 170. There were five lamplighters on Rs. 6 each. Lights were kept for 15 days, *i.e.*, commencing from the 5th day after full moon to the 5th day after new moon. It was considered expedient to have lights throughout the month during the dark hours of nights and to have uniform chimneys and burners throughout the town. The Council have thought that this arrangement is quite necessary for the safety of the public, and resolved to carry it out during the current year.

53. *Market and Slaughter-houses.*—The establishment and contingencies amounted to Rs. 616–2–10, against Rs. 640, as detailed below :—

	Establishment.			Contingencies.		
	Rs.	A.	P.	Rs.	A.	P.
Market	120	0	0	..	..	
Slaughter-houses	396	0	0	100	2	10
Total ..	516	0	0	100	2	10

54. *Avenues.*—The cost of establishment and contingencies amounted to Rupees 140–15–7 against the estimate of Rs. 116. The number of trees and plants on 31st March 1891 was 915 and 93, respectively, the greater number being tamarind and margosa trees.

55. *Water-works.*—The establishment consists of overseer on Rs. 40 and one peon on Rs. 6. The total cost of establishment and contingencies amounted to Rupees 1,512–14–1 against the estimate of Rs. 1,540. The contingencies mainly form to hire of bulls employed for baling water from the well.

56. *Travellers' Bungalow.*—The establishment consists of one maty on Rs. 7 and one waterwoman on Rs. 3. The expenditure amounted to Rs. 164–13–8 against the estimate of Rs. 164. Besides the above, a sum of Rs. 200–14–1 was spent on the buildings.

57. *Miscellaneous.*—A sum of Rs. 1,889–13–8 was distributed for other miscellaneous purposes as noted below.

	Rs.	A.	P.	Rs.	A.	P.
Printing				468	15	3
Kist on municipal land				12	2	10
Killing dogs				29	5	0
Tin tickets				36	9	3
Process fees				18	14	0
Pay of tom-tom beater				24	0	0
Refund of magisterial fine				10	0	0
Pay of cart-stand establishment	22	13	11			
Do. do. contingencies	12	8	0			
				35	5	11
Premium paid for purchase of Government promissory notes for water-works sinking fund				44	4	9
Vakil fees paid in a civil suit regarding Muhammadan burial-ground				15	13	10
Value of pipes, stop-cocks, &c., purchased for private houses' services of water-works				1,104	8	8
Census charges				17	14	2
Smith's prize				72	0	0
Total ..				1,889	13	8

A sum of Rs. 72, being the interest on the Smith's prize fund, was received during the year as shown in the receipt side, and expended according to the terms of the endowment in awarding prizes to the best boys of the first three classes of the high school.

58. *Grant V, Supervision and Management.*—The cost of establishment and contingencies under the different heads amounted to Rs. 2,853–2–10, against the estimate of Rs. 3,230, as detailed below :—

	Rs.	A.	P
Office establishment	1,449	5	4
Collection establishment	672	0	0
Contingencies	731	13	6
Total ..	2,853	2	10

The decrease was chiefly under Contribution to Government on account of the controlling establishment, the demand not having been made before the close of the year. The establishment consists of one manager on Rs. 60, one writer on Rs. 25, one accountant on Rs. 10, three peons on Rs. 7 each, and one sweeper on Rs. 5, and one shroff on Rs. 20 and three bill collectors on Rs. 12 each under collection establishment. A sum of Rs. 540 was paid on account of office and school rent. The office and primary school are located in one private building situated in the heart of the town.

59. *Repayment of Debts.*—Rs. 2,000 was paid towards the sinking fund of water-works loan, and this sum was invested in Government securities, and promissory notes were purchased paying a premium of Rs. 44–4–9. These, as well as those already purchased for Rs. 4,000, are in the safe custody of the Accountant-General.

60. *Interest.*—Interest was fully paid to the debenture holders on water-works loan. Rs. 2,940 were paid during the year.

Closing Balance.

61. The balance amounted to Rs. 1,479–15–6 as detailed below :—

	Rs.	A.	P.
Municipal fund	325	14	1
Subscriptions and payments made by parties for private water works	1,154	1	5
Total ..	1,479	15	6

62. *Note to Statement No. II-A—Funded Capital of the Dispensary.*—The funded capital of the dispensary was Rs. 11,000; Rs. 1,278, being the debt due by the Municipality towards the fund, were repaid in 1888–89. This sum was sent, for purchase of Government promissory notes, to the Accountant-General, who purchased notes for Rs. 1,200 paying a premium of Rs. 33–15–5, and returned the balance, Rs. 44–0–7. Hence the funded capital is shown as Rs. 12,200. The above sum of Rs. 44–0–7 will be spent on repairs to hospital buildings or disposed of in such other manner as the Government may deem proper.

63. *General Administration.*—Mr. C. Raghava Row Pantulu Garu, Deputy Collector and Chairman, was in charge of the office untill the 22nd December 1890, and went on privilege leave on that date, when he handed over charge to one of the Municipal councillors, Mr. M. W. Elliot, who was in charge of it until the 5th February 1891. He delivered over charge of the Municipality to me, when my name was gazetted as Deputy Collector and Divisional Magistrate in place of Mr. Raghava Row. I continued to hold the office as *ex-officio* Chairman until the 11th March 1891, when I was elected to the chair.

64. The annual statements of the Sub-Assistant Inspector are herewith submitted. The correct entries have been noted in red ink in the statements and in the margin of the report of the District Surgeon.

65. I regret that this report was delayed till now, as I was otherwise engaged as a divisional officer for a few days, and as it needed some time for me to look into the details and working of the Municipality.

Enclosure.

Administration Report of the Municipal Dispensary, Cuddapah, for the year 1890–91.

The public health of the town during the year has been comparatively better than the previous one. Cholera made its appearance in the town and its suburbs on the 28th June 1890, and subsided on the 22nd August; there were altogether 139 attacks with 68 deaths. On the appearance of the outbreak, all possible measures were adopted to prevent the further spread of the disease, all the houses were whitewashed, latrines kept clean, and McDougall's powder and other disinfectants were freely used. Tar and green wood were freely burnt in the streets of the affected localities. The inhabitants were advised by beat of tom-tom to keep their houses and premises clean, and were also advised to boil and filter the drinking-water before use, and not to eat unripe fruits, stale mutton, fish and vegetables.

A medical subordinate was specially deputed with requisite medicines and medical comforts to do cholera duty. The disease, however, prevailed in spite of the said measures and gradually subsided after the people were prevented from using the Bugga channel water.

Malarial fevers prevailed during the year as usual. There were 11,997 cases, showing an increase of 909 over the preceding year. The mortality was amongst the people that neglected timely medical treatment. Influenza, which broke out in the month of March 1889, ceased to prevail in the earlier part of May 1890; there were altogether 373 attacks with only a few deaths. The stoppage of wet cultivation in the town has not as yet done much good towards the prevention of fever, but it is hoped that its beneficial effects will be experienced in course of time.

The branch dispensary that was opened on the 23rd December 1889, owing to the unusually great prevalence of fever, was closed on the 31st May 1890, as the daily attendance in that institution began to fall. The total number of admissions in these 2 months was 715.

2. This institution is well attended by all classes of people, some coming from distant parts of the district.

3. The institution is supported by the Municipal funds with a contribution of Rs. 2,000 annually by the Local Fund Board.

4. It is visited occasionally by the civil authorities as well as by Municipal councillors. Subjects connected with the dispensary are disposed of at the general meetings at the Municipal Office.

5. The institution is under the charge of Acting District Surgeon A. J. O'Hara, and during his absence on inspection in the district the Assistant Surgeon is in charge.

6. During the year, 19,992 out-patients and 450 in-patients were treated, showing an increase of 1,463 out and a decrease of 38 in patients compared with the preceding year.

7. The most prevailing diseases during the year were malarial fevers, influenza, cholera, rheumatic affections, sore eyes, chest affections and bowel-complaints.

8. There were 33 major and 350 minor operations performed during the year, showing an increase of 3 and 115, respectively, over the preceding year. Except the following, others need no particular mention in this report:—

(1) Two cases amputation of penis for cancer—Both relieved.
(2) Two cases of cancer of right breast—Both relieved.
(3) One case amputation of left leg middle third for caries—Cured.
(4) One case amputation of left leg middle third for sloughing ulcer attended with caries—Remaining.
(5) One case of amputation of the third and fourth toe of the right leg for sloughing ulcer attended with caries—Remaining.
(6) Three cases of amputation of right leg lower third for mycetoma—Two cured and one remaining.
(7) One case of amputation of right upper arm at the upper third for fracture of right forearm with mortification—Cured.
(8) One case of amputation of right foot for mycetoma—Remaining.
(9) One case of compound fracture of head with depressed bone, in which the operation of trephining and elevation of the depressed bone was performed—Died.
(10) One case of amputation of left leg lower third for caries—Died.
(11) One case of amputation of left leg at upper third for caries—Cured.
(12) One case of cancer of right eye—Relieved.
(13) One case of removal of cancer from left little finger—Relieved.
(14) One case of amputation of left leg lower third for mycetoma of the left foot—Cured.
(15) One case of amputation of the right upper arm at upper third for mycetoma of right forearm—Cured.
(16) One case of incision and perforation of an imperforate anus—Cured.
(17) One case of osteoma of second toe removed by operation—Cured.
(18) One case of removal of urinary calculus—Cured.
(19) Two cases of craniotomy for laborious labour, narrowness of the passages—Both relieved.
(20) Two cases of craniotomy for laborious labour, from diminutive pelvis—Both relieved.
(21) One case of craniotomy for laborious labour, from rigidity of the os uteri—Died.
(22) Three cases delivery by version for atony of the uterus—All relieved.
(23) Three cases of delivery by forceps for atony of the uterus—Two relieved and one djed.

9. The dispensary medical subordinates vaccinated 131 persons during the year, of which 94 were successful, 23 unsuccessful, and 14 unknown.

10. *Conservancy.*—The establishment consists of two sanitary inspectors, one on Rs. 25 and the other 15; 6 peons on Rs. 6 each; 29 sweepers on Rs. 6 each; 29 * female scavengers on Rs. 4 each. There are 4 closed wooden box-carts for removing night-soil and one closed cask for removing urine, 12 country carts provided with bamboo baskets are in use at present to remove the street sweepings. Provision is made to replace these by open box-carts.

* 28 female scavengers.

Private Scavengering.—Establishment consists of 2 assistant inspectors on Rs. 12 each; 2 toties on Rs. 4 each; 11 female scavengers at Rs. 4 each. Number of houses in the town is 4,839; number of houses having private scavengering, 522.†

† 512.

Population as per last census—

Males	9,576
Females	9,406
Total ..	18,982

Average number of houses conserved by each scavenger 40.

Latrines.—There are 31 latrines, of which 24 are pucka-built and 5 mudwalled and one brick-walled.‡ The dry-earth system is adopted. They are kept clean and freely used by the people. All these latrines contain separate partitions for males and females.

‡ Six mud-walled and one brick-walled.

Dustbins.—There are 173, of which 7 are moveable iron dust-bins and the rest are made of 4 slabs.

Manure Depot.—The latrine and street sweepings are collected and deposited outside the town in pits dug for the purpose and are disposed of by public auction once a year.

Drainage.—There are no proper constructed drains in the town, but some shallow ditches are dug on either sides of the roads to carry off the surface water during rains.

Roads.—Are maintained in a fair order, but great damages are done to them during the rains from want of proper side-channels.

House Drainage.—The house drainage is let into cesspits constructed in the backyards of each house which is cleared out occasionally. These cesspits contain loose stones and are covered by slabs.

Water-supply.—Is good and abundant. Water is brought by means of iron pipes from the Bhooga springs about 4 miles distant and freely supplied to the town. The Chemical Examiner has pronounced the water to be very good. Besides this source there are several wells of good drinking-water in the town, but they are not being used since the introduction of the pipe water.

Water Project.—The Bhooga water-works project was completed according to the original scheme. It is also proposed to extend it to other parts of the town which are not at present supplied. There are at present 32 public and 48 private taps in use.

General Remarks.—The prevalence of influenza, malarial fevers and the outbreak of cholera during the year have affected the health of the inhabitants a great deal. The want of sufficient rain in both monsoons was felt, and in consequence the prices of grains have risen. Total rainfall registered during the year at the observatory was 30·12 inches. Forty-one cases of labour were attended by the Eurasian midwife and 19 by the native nurse.

Cuddapah,
22*nd June* 1891.

(Signed) C. P. GANAPATHI,
for *Acting District Surgeon.*

Submitted for orders.

(Signed)

21*st July* 1891.

Forwarded. One peculiar feature of the report is the way the late Chairman managed—or rather mismanaged—the money subscribed for the water-works; there is a strong feeling about it in the town.

Another feature is the fact of the deaths exceeding the births by nearly 500 in this town of a population of a little over 17,000. At this rate the question of removing the head-quarters of the district from Cuddapah would soon be solved. The death-rate is near 41 per mille.

Vontimitta,
21*st July* 1891.

(Signed) O. WOLFE-MURRAY,
Acting Collector.

Order—dated 14th September 1891, No. 1475 M., Local and Municipal.

The receipts and charges of the Cuddapah Municipality for 1890–91 are compared below with the budget and revised estimates for the year and the actuals of 1889–90:—

—	Actuals, 1889–90.	Budget estimate, 1890–91.	Revised estimate, 1890–91.	Actuals, 1890–91.
Receipts.	Rs.	Rs.	Rs.	Rs.

The principal variations between the revised estimate and the actuals of 1890–91, except in the cases noted below, are explained in the Chairman's report:—

A. These variations have not been explained.
B. Decrease ascribed to the works provided for not having been completed during the year.
C. Decrease owing to the non-payment of the value of medicines purchased during the year.

2. The average attendance of the non-official members at the 26 meetings held by the Council showed a considerable improvement, as compared with the preceding year, but the official members, as pointed out in G.O., dated 19th November 1890, No. 1740 M., should be more regular in their attendance.

3. *Receipts.*—(1) The collections, both current and arrears, under the tax on buildings and the tax on arts, were extremely good and reflect much credit on the executive. Those under the tax on lands were not quite so satisfactory, but the revision of the land-tax registers during the year under review may account to some extent for this. The large decrease in the demand of the last-mentioned tax has been explained in paragraph 4 of the Chairman's letter embodied in G.O., dated 21st March 1891, No. 428 M., but the incidence is extremely low and should be inquired into. The result of the investigations, referred to in paragraphs 9 and 12 of the Chairman's report, is awaited; the fact that more than half of the houses in the town, according to the census of 1881, at present escape taxation, should be borne in mind when revising the house-tax registers. The public spirit displayed by the Council in instituting these inquiries is noted with approval. The excellent collections above referred to were effected with but little resort to coercive processes, and it is satisfactory to note that all the warrants issued were executed before the close of the year. The small balances left outstanding will, it is hoped, be promptly realized.

(2) There was a decrease under the taxes on vehicles with springs, carts and animals, tolls, police fines and markets, which is unsatisfactory as indicating either a decline in the prosperity of the town or else a laxity in the management of Municipal

affairs. It should be explained under what authority fees were levied under the Places of Public Resort Act, as appears to have been done.

(3) The extension of the private scavenging system is a matter of great importance, and it is hoped that the present Chairman will, as promised in paragraph 25 of his report, make every effort to carry this out. All fees levied for this service should be collected quarterly in advance. It is observed that only about 10 per cent. of the houses in the town enjoy the benefits of this service; steps should be taken to ensure that the compounds and latrines attached to the other houses are regularly cleaned either by private or municipal agency. In order to do this efficiently, the staff employed should be increased. The cesspools referred to by the Sanitary Commissioner in paragraph 3 of his inspection notes, communicated with G.O., dated 5th March 1891, No. 313 M., should also be regularly cleansed on the same system. The receipts from the sale of sweepings showed an increase during the year under review, but the amount still falls short of the average for all Municipalities in 1889–90. The arrangements made for the collection and disposal of the refuse of the town appear, therefore, to be capable of improvement.

(4) The facts reported in paragraph 28 of the Chairman's report are most unsatisfactory, but the subject will be dealt with separately on receipt of the further information promised in clause (3) of that paragraph.

4. *Expenditure—Public Works.*—The outlay on communications amounted to only 37·7 per cent. of the toll-revenue, this small proportion being, as in the previous year, allowed on account of the large expenditure on the water-supply project, which was very nearly completed. The works necessary to finish off the scheme in a successful manner will be undertaken on receipt of replies to G.O., dated 17th July 1891, No. 1125 M. The Divisional officer has not, as such, reported on the condition of the roads, but from the remarks of the Chairman and the Sanitary Commissioner in paragraph 2 of his inspection notes already alluded to, it would appear that they were, on the whole, in fair condition. The full amount provided for communications in the current year's budget should be expended without fail. The chief desideratum appears to be the construction of new culverts and side-drains.

5. *Education.*—The net expenditure under this head was Rs. 3,511, or 10·1 per cent. of the receipts from taxation and rents. The increase, as compared with the previous year, is satisfactory, but the large outlay on secondary education (Rs. 2,004) was not altogether desirable; primary education should have had much more attention. The inspecting schoolmaster, whose appointment was sanctioned in G.O., dated 15th October 1890, No. 1534 M., did not enter on his duties during the year under review; it is hoped that with his assistance the condition of education in this Municipality will be greatly improved. As regards Municipal schools, the statistics furnished for the year under review show little or no alteration as compared with 1889–90. The Council maintained a high school and a primary school on the salary system and a primary school for Muhammadans on the salary-results system. The cost of educating each pupil in the former institution was no less than Rs. 37–1–9, and unless the attendance can be very largely increased, it is clear that the present expensive staff must be reduced or the school abolished altogether. The results achieved at the Matriculation examination were discreditable, and those at the Lower Secondary examination far from satisfactory. The number of schools aided with results grants was 15 against 6 in the preceding year, and 94·4 per cent. of the allotment provided for this purpose was utilised. The attendance at these schools increased from 226 to 476, but only 238 pupils were presented for examination, of whom 197 passed. The number under instruction in the schools maintained and aided from Municipal funds amounted to 51·6 per cent. of the total male population of school-going age, against 27·8 per cent. in 1889-90. Taking all these facts together, the Municipal Council may be congratulated on the increased efficiency of their educational administration, though it cannot as yet be regarded as entirely successful.

6. *Medical Relief.*—There was a still further increase in the number of patients treated at the Municipal hospital and dispensary, and, as the season is stated to have been less unhealthy than its predecessor, this result would indicate that these institutions are becoming more popular. The temporary dispensary being no longer necessary, it was closed in May 1890. The work done by the midwife and the nurse

attached to the hospital was worse than in the preceding year, but it is hoped that, if the system of payment partly by results is strictly enforced in the manner indicated in G.O., dated 3rd August 1891, No. 1204 M., there will be a great improvement in the current year. Rules for the treatment of patients in the hospital have not yet been submitted for approval, as directed in paragraph 6 of G.O., dated 19th November 1890, No. 1740 M. These should now be expedited. The expenditure of the Council on this department was large; the question of increasing the contribution from Local Funds should be considered in consultation with the District Board, as observed in paragraph 18 of the Chairman's report.

7. *Vaccination and Vital Statistics.*—The number of operations performed by the municipal vaccinator was double of that in the preceding year and the percentage of success greater, but the Government is constrained to remark that the figures reported are still not what they should be in a town where compulsory vaccination has been in force since July 1886. The medical subordinate vaccinated 131 cases, which is satisfactory. It appears from the inspection notes of the Sanitary Commissioner communicated with G.O., dated 5th March 1891, No. 313 M., that the vaccinator was not, at the date of inspection, supplied with a copy of the registrar's list of births. The Chairman will report whether this has now been done, and whether the instructions issued in paragraph 7 of G.O., dated 19th November 1890, No. 1740 M., are being strictly complied with. The registration of deaths appears to have been carefully attended to, but the same cannot be said of the registration of births, which has apparently been very much neglected. The birth-rate reported is only 14·4 per mille, which shows that at least half, and probably more, of the children born, were not shown on the registers. The subject should receive very earnest attention at an early date, and steps should be taken to supervise the registrar's work more efficiently than at present.

8. *Sanitation.*—The conservancy establishment employed cost Rs. 4,303, and, judging from the reports of the Sanitary Commissioner and the District Surgeon, appears to have worked fairly well. No expenditure seems to have been incurred on road-cleaning establishments; this should be explained. It is probable that the number of night-soil carts might be increased with advantage, considering the size of the town. The condition of the rubbish depôt should be improved and the accumulations sold more frequently, as the amount collected from a town of the size of Cuddapah must be large. The principal want of the Municipality appears to be a comprehensive drainage scheme, and the action proposed to be taken in this matter should be reported as soon as possible. The thorough cleansing of the cesspools and the extension of the private scavenging system to all parts of the town should, as pointed out above, be carried out in the meanwhile. The funds referred to in paragraph 62 of the Chairman's report may be disposed of as the Council may deem advisable, with reference to the objects of the institution to which they appertain.

9. *General Remarks.*—The balance at the close of the year was 3·8 per cent. of the current receipts. The statements furnished with the report have been prepared with insufficient care—a fact which formed the subject of remark last year—and it was not submitted until six weeks after the due date; the explanation of this contained in paragraph 65 is not satisfactory; the delay should not occur again. Except as regards the registration of births, the administration of municipal affairs showed a great improvement, and, although a good deal still remains to be done, the results achieved were decidedly creditable to the Chairman and councillors concerned.

* A private school taken under municipal management should be regarded as a school newly opened, and similarly a municipal school handed over to private management should be regarded as closed.

† Obtained by dividing the total of column 20 by column 8.

‡ Note.—*Colleges* are institutions containing F. A. and B. A. Classes.

Upper Secondary (High) Schools are schools containing 5th or 6th classes or both.

Lower Secondary (Middle) Schools are schools preparing for Standards V, VI and VII, or any one of them, or having 3rd, Lower 4th, and Upper 4th classes, or any one of them.

Upper Primary Schools are Schools preparing for Standard IV and having 2nd classes.

Lower Primary Schools are schools preparing for standards below the IVth and having classes below the 2nd,

statements I and II. Where sums due from Provincial Funds Local Funds, &c. are not paid within the year, the amounts should be shown in the remark column.

(d) The salary of a teacher employed in more than one department of a school (*e. g.*, in the Upper and Lower Secondary departments of a High School or in the Collegiate and High School departments of a College) should be divided in proportion to the time devoted to tution in each department. General charges such as servants and contingencies should be distributed in proportion to the average attendance in each department.

(e) Only sums which are debited to Grant II in Statement II should be shown in the expenditure column. But expenditure on school buildings which falls under Grant I may be shown in the remark column.

(f) Column 20 (net cost to municipality) will be obtained by substracting the figures in column 13 (total of receipts) from those in column 19 (total of expenditure). If the receipts should happen to exceed the expenditure, the surplus should be entered in this column in red ink and with a *minus* sign before it.

Instructions. Salary Grant

Instructions.

(a) Where a School contains one or more departments or classes (*e. g.*, Lower Secondary and Primary,) each of these should be shown as a separate school for the purpose of this return.

(b) Each Aided School should be shown by name in column 1.

(c) Column 11 is only to be filled up in the case of combined Schools.

(d) Grants paid from Municipal funds should alone appear in this statement.

(e) Columns 7—14 are not to be filled up for Salary Schools, nor column 15 for Results Schools.

Results Grant Schools.—The total of column 14 must correspond with Item 4, Grant II, in Statement II.

Combined Schools.—Column 10 in the case of Combined Schools will show the grant which the school would have earned if it had been a results grant school; column 11 will show the proportion of such grant (usually one-half the figure in column 10) which the school, under the combined system, is entitled to receive. Thus if the full grant earned (to be shown in column 10) be Rs. 200, the amount to be entered in column 11 will usually be Rs. 100. Columns 12, 13 and 14 will show the payments on account of results, while the amount paid to masters as stipends will be entered in column 15. The total of column 15 must correspond with Item 5 (*a*), Grant II, in Statement II, while the total of column 14 will correspond with Item 5 (*b*), Grant II, in Statement II.

Salary Schools.—The total of column 15 under this head must correspond with Item 3, Grant II, in Statement II.

(f) Where grants are not paid at maximum rates the percentage given should be stated in the remark column.

(g) Where grants-in-aid are given to *Upper Secondary* departments, this fact and the amount of each grant should be stated in the remark column.

1891 (Signed) S. Swaminathayya
Head office Sub. Assistant Inspector of Schools

Instructions.

(*a*) Where a School contains one or more departments or classes (*e. g.*, Lower Secondary and Primary,) each of these should be shown as a separate school for the purpose of this return.
(*b*) Each Aided School should be shown by name in column 1.
(*c*) Column 11 is only to be filled up in the case of combind Schools.
(*d*) Grants paid from Municipal funds should alone appear in this statement.
(*e*) Columns 7—14 are not to be filled up for Salary Schools, nor column 15 for Results Schools.
(*f*) *Results Grant Schools.*—The total of column 14 must correspond with Item 4, Grant II, in Statement II.
(*g*) *Combined Schools.*—Column 10 in the case of Combined Schools will show the grant which the school would have earned if it had been a results grant school; column 11 will show the proportion of such grant (usually one-half the figure in column 10) which the school, under the combined system, is entitled to receive. Thus if the full grant earned (to be shown in column 10) be Rs. 200, the amount to be entered in column 11 will usually be Rs. 100. Columns 12, 13 and 14 will show the payments actually made on account of results, while the amount paid to masters as stipends wil be entered in column 15. The total of column 15 must correspond with Item 5 (*a*), Grant II, in Statement II, while the total of column 14 will correspond with Item 5 (*b*).
(*h*) *Salary Grant Schools.*—The total of column 15 under this head must correspond with Item 3, Grant II, in Statement II.
(*i*) Where results grants are not paid at maximum rates, the percentage given should be stated in the remark column.
(*j*) If any grants-in-aid are given to *Upper Secondary* departments, this fact and the amount of each grant should be stated in the remark column.

Footnotes:

The principal variations between the Revised Estimate and the actuals of 1890-91, except in the cases noted below, are explained in the Chairman's report.

A. These variations have not been explained.

B. Decrease ascribed to the works provided for having not been completed during the year.

C. Decrease owing to the non-payment of the value of medicines purchased during the year.

2. The average attendance of the non-official members at the 26 meetings held by the Council shows a considerable improvement as compared with the preceding year, but the official members, as pointed out in G.O. dd 19.11.90 No. 1740 M, should be more regular in their attendance.

receipts.—(1) The collections both current & arrears under the tax on buildings & the tax on arts were extremely good & reflect much credit on the executive. Those under the tax on lands were not quite satisfactory, but the revision of the land-tax registers during the year under review may account, to some extent, for this. The large decrease in the demand of the last mentioned tax has been explained in para 4 of the Chairman's letter embodied in G.O. dt. 21.3.91. No. 428 M, but the incidence is extremely low & should be inquired into. The result of the investigations referred to in paras 9 & 12 of the Chairman's Report is awaited, & the fact that more than half of the houses in the town, according to the census of 1881, at present escape taxation should be borne in mind when revising the house-tax registers. The public spirit displayed by the Council in instituting these inquiries is noted with approval. The excellent collections above referred to were effected with but little resort to coercive processes & it is satisfactory to note that all the warrants issued were executed before the close of the year. The small balances left outstanding will, it is hoped, be realized promptly.

(2) There was a decrease under the taxes on vehicles with springs, carts & animals, tolls, & police fines & increase in markets, which is unsatisfactory as indicating either a decline in the prosperity of the town or else a laxity in the management of municipal affairs. It should be explained under what authority fees were levied under the Places of Public Resort Act as appears to have been done.

(3) The extension of the private scavenging system is a matter of great importance & it is hoped that the present Chairman will, as promised in para 25 of his report, make every effort to extend the system. All fees levied for this service should be collected quarterly in advance. It is observed that only about 10 per cent. of the houses in the town enjoy the benefits of this service,—steps should be taken because that the compounds & latrines attached to the other houses are regularly cleaned either by private or municipal agency, & the staff employed should be increased accordingly. In order to do this efficiently the cess-pools referred to by the Sanitary Commissioner in para 3 of his Inspection Notes communicated with G.O. dt. 5.3.91. No. 313 M should also be regularly cleaned on the same system. The receipts from the sale of sweepings show an increase during the year under review, but the amount still falls short of the average for all municipalities in 1889-90. The arrangements made for the collection & disposal appear, therefore, to be capable of improvement. (37) 48

(4) The facts reported in para 28 of the Chairman's report are most unsatisfactory, but the subject will be dealt with separately on receipt of the further information promised in clause (3) of the para.

4. Expenditure—Public Works.—The outlay on communications amounted to only 37.7 per cent. of the toll-revenue, this small proportion being as in the previous year, allowed on account of the large expenditure on the water-supply project which was very nearly completed. The works necessary to finish off the scheme in a successful manner will be undertaken on receipt of replies to G.O. dt. 17.9.91. No. 1125 M. The Divisional Officer has not, as such, reported on the condition of the roads, but from the remarks of the Chairman & the Sanitary Commissioner in para 2 of his Inspection Notes already alluded to, it would appear that they were, on the whole, in fair condition. The full amount provided in the current year's budget for communications should be expended without fail. The chief desiderata appear to be the construction of new culverts & side-drains.

5. Education.—The net expenditure under this head was Rs 8,511 or 10.1 per cent. of the receipts from taxation & rents. The increase, as compared with the previous year, is satisfactory, but the large outlay on secondary education (Rs 2,004) is not altogether desirable, primary education [illegible]. The inspecting schoolmaster, whose appointment was sanctioned in G.O. dt. 15.10.90. No. 1534 M, did not enter on his duties during the year under review; it is hoped that with his assistance the condition of education in this Municipality will be greatly improved. As regards Muhammadans the statistics furnished for the year under review show little or no alteration as compared with 1889-90. The Council maintained a high school & a primary school on the salary system & a primary school for Muhammadans on the salary-results system. The cost of educating each pupil in the former institution was up (as) that Rs 37-1-9 &

unless the attendance can be very largely increased, it is clear that the present expensive staff must be reduced or the school abolished altogether. The results achieved at the Matriculation examination were discreditable & those at the Middle School examination far from satisfactory. The number of schools aided with result grants was 15 against 6 in the preceding year & 94.4 per cent. of the allotment provided for this purpose was utilised. The attendance at these schools increased from 226 to 476 but only 238 were presented for examination of whom 194 passed. The number under instruction in the schools maintained & aided from Munl funds amounted to 81.6 per cent. of the total male population of school-going age, against 27.8 per cent. in 1899-90. Taking all these facts together, the Munl Council may be congratulated on the increased efficiency of their educational administration which cannot as yet be regarded as successful.

6. Medical Relief. — There was a still further increase in the number of patients treated at the Munl hospital & dispensary, as the season is stated to have been less unhealthy than its predecessor, this results indicates that these institutions are becoming more popular. The temporary dispensary was closed (being no longer necessary) in May 1890. The work done by the midwife & the nurse attached to the hospital was worse than in the preceding year, but it is hoped, that, if the system of payment partly by results is strictly enforced in the manner indicated in G.O. of 3.8.90. No. 1204 M, there will be a great improvement in the current year. Rules for the treatment of patients in the hospital have not yet been submitted for approval as directed in para 6. of G.O. of 19.11.90. No. 1740 M. These should now be expedited. The expenditure of the Council on this department was large; the question of increasing the contribution from local funds should be considered in consultation with the District Board as observed in para 18 of the Chairman's report.

7. Vaccination & Vital Statistics. — The number of operations performed by the municipal vaccinator was double of that in the preceding year & the percentage of success greater, but the work is some

considered to remark that the figures reported are still not what they should be in a town where compulsory vaccination has been in force since July 1886. The medical subordinate vaccinated 131 cases, which is satisfactory. It appears from the Inspection Notes of the Sanitary Commr communicated with G.O. of 6.3.90. No. 313 M that the vaccinator was not at the date of inspection supplied with a copy of the registrar's list of births. The Chairman will report whether this has now been done & whether the instructions issued in para 7 of G.O. of 19.11.90. No. 1740 M are being strictly complied with. The registration of deaths appears to have been carefully attended to, but the same cannot be said of the registration of births which has been seriously neglected. The birth-rate reported is only 14.4 per mille which shows that at least half & probably more of the children born were not shown on the registers. The subject should receive very earnest attention at an early date & steps taken to supervise the registrar's work more efficiently than at present.

8. Sanitation. — The conservancy establishment employed cost Rs 4,303 & judging from the reports of the Sanitary Commissioner & the District Surgeon appears to have worked fairly well. No expenditure seems to have been incurred on road-cleaning establishments; this should be explained. It is probable that the number of night-soil carts might be increased with advantage, considering the size of the town. The condition of the public depot should be improved & the accumulations sold more frequently, as the amount collected from a town of the size of Cuddapah must be large. The principal want of the town appears to be a comprehensive drainage scheme & the action proposed to be taken in this matter should be reported as soon as possible. The thorough cleansing of the cesspools & the extension of the private scavenging system to all parts of the town should, as pointed out above, be carried out in the meanwhile. The funds referred to in para 62 of the Chairman's report may be disposed of as the Council may deem advisable, with reference to the objects of the institutions to which they appertain

4. General Remarks. — The balance at the close of the year was 3·8 per cent of the current receipts. The statements furnished with the report have been prepared with insufficient care & it was not submitted until six weeks after the due date. The explanation of this contained in para 65 of the is not satisfactory, & the delay should not occur again. Except as regards the registration of births, the administration of municipal affairs shows a great improvement & although much is still to be done, the results achieved since are decidedly creditable to the Chairman & Councillors concerned.
