Tungabhadra Inspection Station.

Sanctioning certain additional staff for the plague inspection station at Tungabhadra.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From the Medical Officer in charge of Tungabhadra Inspection Station, to the Collector of Bellary, dated 27th June 1898, No. 269.

Referring to your letter, dated 25th June 1898, Reference on C. No. 695 P., I have the honour to send you herewith a statement explaining the different items.

ENCLOSURE.

List showing the additional establishment asked for by the Medical officer in charge of the Tungabhadra inspection station.

—	Present number.	Additional number asked for by the Medical officer.	Total.	Medical officer's explanation.	Collector's opinion.
1	2	3	4	5	6
Compounder.	..	1	1	The services of a compounder may be entertained when plague cases are admitted or when many sick persons are kept under observation.	Not required at present.
Waterman.	1	1	2	One already engaged and one more was asked for for the plague sheds. There is one waterman working in the disinfecting sheds and with the number of persons detained he has all the work that one can do. If a plague case is admitted and if this man is taken away there, in the absence of another, there will be no waterman for disinfecting sheds. It will be very difficult just then to find a man to take his place. If another is now entertained he may be, for the present, utilized for European observation sheds.	One water-woman may be sanctioned for females.
Water cart with bullock and driver.	..	1	1	This was asked for as the wells are not completed. As the wells are to be fitted with pumps and as both the camps are to be supplied with cisterns the cart would not be required if another waterman is entertained, who can flush the cemented floor of buildings using the water in the cisterns.	Most necessary until the wells are complete with pumps, tanks, &c., and has been sanctioned in anticipation of the orders of Government.

—	Present number.	Additional number asked for by the Medical officer.	Total	Medical officer's explanation.	Collector's opinion.
1	2	3	4	5	6
Male ward attendant.	..	2	2	Two are asked for, one for disinfecting shed and the other for European observation shed. The ward attendant is required to attend on the persons disinfected, to see that they efficiently wash themselves, to take charge of Government clothes and to attend upon passengers that may be detained for sickness. Europeans generally travel without any attendants and there is no person here who could attend on them especially if they are ill and it was found very difficult to get an attendant on the occasion of the illness and death of a European passenger.	One is required.
Female ward attendant.	..	2	2	A native female ward attendant is required to attend to the disinfection of females and to remain with them at night when there are no male relations with them, and to attend on them when they are ill. The female ward attendant for the European observation shed is required for the same purpose.	One is required and has been sanctioned in anticipation of the orders of Government. * In the Medical officer's indent it was erroneously shown that one female ward attendant had been sanctioned by Government.
Cook.	..	+ 1 for Natives.	1 for Europeans and Eurasians.	There is already one entertained for the native observation shed and one more with a cook's maty is asked for for the European observation shed. There were 13 Europeans detained since the opening of this camp and none of them had any attendants or convenience for cooking, &c.; a cook with a cook's maty is essentially necessary.	† Was omitted to be shown in the Medical officer's indent. Sanctioned in anticipation of the orders of Government as the Medical officer represented that the Europeans and Eurasians detained had as a rule no servants.
Cook's maty.	..	1 for Europeans and Eurasians.	1		Do.
Dhoby	..	1	1	One thousand one hundred and two native passengers have been detained since the opening of this camp. Hitherto disinfection of clothes has been done by immersing them in antiseptic solution and on an average 184 clothes are washed per diem. He has also to take charge of and wash Government clothes given to passengers when theirs are being disinfected and dried and his services will be required even when the disinfecting engine is working, to put in, to take out and dry clothes of passengers detained and to wash Government clothes.	Required, but the pay Rs. 15 proposed is exorbitant.
Sweepers	..	2	2	Two sweepers are asked for. The male and female toti may be entertained when any case of plague is admitted, if their services could be obtained immediately on emergency arising.	One may be sanctioned for cleaning out the various sheds and removing dirty water from the cisterns attached to the bathing platforms.
Toties	..	2	2	One male and one female toti work in the camp, but they are quite inadequate to cope with the work. They have to attend to latrines, sweep the extensive camp and clear the cisterns of water and to attend to the conservancy of staff quarters.	Not required at present.

Submitted to Government, Local and Municipal Department, with reference to G.O., Mis. No. 568 P., dated 11th June 1898, for favour of early orders.

4 No. 695 P., 19TH JULY 1898.

ORDER—No. 695 P., dated 19th July 1898.

As recommended by the Collector, the following additional staff is sanctioned for the plague inspection station at Tungabhadra :—

- (1) One water-woman.
- (2) One water cart with bullock and driver (until wells are complete with pumps, &c.).
- (3) One male ward attendant.
- (4) One female ward attendant.
- (5) One cook.
- (6) One cook's maty.
- (7) One dhoby.
- (8) One sweeper.

2. The Collector will settle the pay in each case.
