Local & Munl. (1898) Department.

Ref. on Current No. 1050 of 98.

Forwarded - The proposal has the sanction of the Sanitary Engineer. But it occurs to me that the risk of entrusting the machinery to drivers on 45 & 25 is a very serious one. The Superintendent will not be always on the spot, & if an accident happens during his absence the machinery may be wrecked before his return. It seems to me that the control of the out door staff should be ~~with~~ a duty quite separate from the control of the machinery, which should claim the Order undivided attention of a well paid mechanic.

The inevitable writer has at last found a place in the Estab^t; though the work has hitherto been done without him. He will certainly not be wanted if the Mechanician is put in charge, as I have just - I have been in camp for the past 3 weeks & have had no opportunity of discussing these proposals (which only reached me to day) with the Chairman. As he has gone on 10 days leave, I forward these papers without delay.

MUNICIPAL OFFICE,
TRICHINOPOLY 3rd May 1898.

No. 27

FROM,

Surgeon R. C. J. W. O'Hara

CHAIRMAN,
Municipal Council.

LOCAL & MUNICIPAL DEPT.
TRICHINOPOLY.
CURRENT No. 1633 M

TO,

The Chief Secretary to Government,
Local and Municipal Department,
FORT ST. GEORGE.

Through the Dy. Collector of Trichinopoly.

SIR,

I have the honor to submit for the orders of the Government a Resolution of the Municipal Council passed at its meeting held on the 30th of April regarding the reorganization of the water works establishment.

The overseer who was lately employed on Rs 60+15 has left the Municipal Service, and the Council has taken the opportunity to revise the staffs employed for the water works with the object of providing one superintendent to control both the pumping stations and the distribution of the town supply. At present, Head Driver Mr. De Melles is in charge of the two pumping stations and is paid Rs 110 per mensem. It is proposed to raise his pay to Rs 135 per mensem and to give him general control over the out door staff engaged to look after the pipe-lines and fountains. He will have under him an Inspector of the pipes and fittings on a salary of Rs 25 per mensem, and a writer on Rs 10. The post of overseer on Rs 75 will be done away with, and the two liver-cooks now employed on Rs 12 each

will be replaced by one turn-cock on Rs 15 per
mensem. The staff in the main pumping station
will be strengthened by the appointment of a Head
Driver on Rs 45, a second Driver on Rs 25, and a Head
stoker on Rs 15, instead of the Assistant Drivers on Rs 40
and a stoker on Rs 25 ^{as} at present. Recent experience
has shown that it is very desirable that the entire
management of the engines and supervision of pipe
distribution should be entrusted to a competent
superintendent. The Sanitary Engineer and other
inspecting officers have notified their approval
of the proposal and of the qualifications of the officer
selected as "Water Works Superintendent". And seeing
that the rearrangement will be conducive to
greater efficiency, the Council trusts that the
Government will be pleased to accord its sanction.
The additional expenditure incurred by the
revision is only one rupee per mensem.

I have the honor to be
Sir

Your most obedient servant

M. M. M. M.
Chairman

Local & Munl. (1898) Department.

GOVERNMENT OF MADRAS.

OFFICE OF SANITARY ENGINEER,

Fort St. George, 23rd May 1898.

Despd 23rd May 1898

From

J. A. JONES, Esq., MEM. INST. C.E., F.R.S.E.,

SANITARY ENGINEER TO GOVERNMENT.

To

LOCAL & MUNICIPAL DEPT.
CURRENT No. 1776/k

The Secretary to Government,

Local and Municipal Department.

SIR,

In reply to reference No. 592 of 19th. May 1898, I have the honor to state that while I concurred with the Chairman in the advisability of having a Superintendent for the whole of the water works, none of the other details of the proposal were mentioned. I am still of opinion that great benefit will result in having a qualified Superintendent for the water works who will have the whole works under his control. I think he should be stationed at the Head Works and make his inspection thence daily. There has been friction at times in the past owing to divided control, because the opening & closing of valves, increase & reduction of discharge was in the hands of a person unaware of the state of affairs at the pumping station and as to whether it could meet demands made on it from time to time. It is a necessity that there should be one person in complete control & I am certain it will tend to economy when this arrangement is introduced. Whether the salary proposed will secure Mr. Demello's services permanently is a question, because although his salary will be increased from Rs 110 to Rs 135 he will

Sanitary Engineer to Govt.

will of necessity have to provide a pony for his inspection; this will swallow up the increase given him and is a matter for the Council to further consider.

2. I am moreover not in favor of placing the Main Pumping Station in the hands of such men as those intended whose services could not be permanently retained for the salaries proposed. At Tanjore Pumping Station the two drivers are paid Rs 100 and Rs 50 respectively but if my proposal is accepted that the Superintendent should reside at the Pumping Station I think salaries of Rs 60 and Rs 50 would be sufficient to ensure men of sufficient attainments, though certificated men cannot be secured for that amount nor for less than Rs 100.

3. In view that the Sub Pumping Station would be under constant supervision of the Superintendent and seeing that the responsibilities there are less than at the Head Station I would alter the salary of the Head driver there to Rs 40 and the second I would increase to Rs 30. I consider that, as the two drivers of a station are equally in charge when on duty at separate times, their pay should not differ by a very large amount.

4. With such arrangements it might be possible to do away with the head stoker at the main station & have two stokers on Rs 15 each per month and a reduction of one cleaner at this station might also be effected.

5. The cost of the staff would then work out as follows, if the writer is included, and I should think in Water Works of the size and importance of Trichinopoly such an appointment is desirable; there seems no reason for retaining two head turncocks; one, as proposed, at Rs 15 should be sufficient.

Staff as proposed by Sanitary Engineer.
