PUBLIC WORKS DEPARTMENT

LOCAL & MUNICIPAL DEPT.
CURRENT No. 1793 M
Jotacamund Dated 2 May 1898.

The undersigned has the honour to point out that work at the Vizagapatam Water Works is much hampered (1) by the fact that Mr. Willock, the Collector and guardian of the Vizianagaram Samasthanam, objects to the completion of the tank bund until the question of compensation for garden lands lying under it, and now irrigated by the water which will be impounded, is settled, and threatens an injunction if the gap now remaining in the bund is closed.

(2) To the want of sufficient provision in the estimate for compensation for villages to be removed from the catchment of the tank, and to the want of any definite understanding with the Zemindari officials whether the villages can be moved.

2. It is understood that on both these points, the Sanitary Engineer, Mr. Jones, made arrangements of which no record can be found with the late Maharajah, and that a settlement would be arrived at by him on Mr. Willock's return from leave.

3. Until something clear and definite has been decided on both these points, it is very doubtful whether the construction of the Water Works should be allowed to proceed, and a very early report on the whole subject should be called for from the Sanitary Engineer.

A. Russell
Under Secretary to Government.

No. /042

GOVERNMENT OF MADRAS.

OFFICE OF SANITARY ENGINEER,

Fort St. George, 3rd. June 1898.

From

J. A. JONES, Esq., MEM. INST. C.E., F.R.S.E.,

SANITARY ENGINEER TO GOVERNMENT,

To

The Secretary to Government,

Local & Municipal Department.

SIR,

In reply to P.W.D. Memo No.329 D dated the 21st.May 1898 forwarded with your No.664 dated 1st.June 1898 I have the honor to point out that the Vizagapatam scheme was prepared during my absence on furlough though I had arranged details of the scheme before leaving.

2. The points now under reference were never discussed by me with the late Maharajah and as a matter of fact I was not aware that water from the catchment was used for irrigation.I have communicated with Mr.Ellis who prepared the scheme but he states that he knows nothing of the matter in question.

3. As to the compensation for & the removal of the villages above the tank bund it was presumed that the land and villages would be acquired under the provisions of the Land Acquisition Act.The amounts entered in the estimate (1) For land (Rs 3494) (2) For removal of villages (Rs 2500) were obtained by communication with the Municipal Chairman who was asked to furnish an estimate of the amount required for the purpose and did so in January 1895,his figures were entered-I am unable to say where he obtained the information; the practice is now to obtain such information from the Revenue authorities.

4. The irrigation under the tank cannot amount to very much & it appears to me that it would be quite possible to pass down the stream from the tank during the hot weather by means of the scour pipe from the tunnel under the bund an amount equal to what was derived from the stream; in the monsoon months the tank will probably overflow and it will be advantageous then to do so.

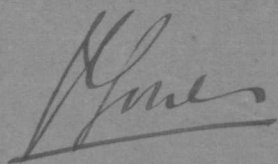

5. In any case the proper plan to pursue would seem to be, in regard to this latter matter, to meet Mr. Willock, who has now returned, ~~and~~ the land & villages above the tank bund being acquired in the usual manner—I am, of course, not aware how it has been ascertained that the compensation for the land is insufficient, but this is only one of those questions on which there will always be a difference of opinion and can be definitely settled only on recourse to the usual courts & the work on that account need not be delayed, if the land is acquired in the usual manner.

6. I would point out that if extra funds are required there should be a large saving available on pipes (say Rs 20,000) if pipes are got at the rate they can be bought at now in the open market; now that exchange is so favorable, pipes should not cost more than Rs 100 per ton whereas the rates in the estimate are Rs 125 to Rs 127.

I have the honor to be,

Sir,

Your most obedient servant,

Sanitary Engineer to Government.
