Dr. J. W. G. Myler, M.D.
 N^o 405
 26.8.98

Dr. J. W. G. Myler, M.D.
 District Medical and Sanitary Officer,
 Cuddapah

To The Collector of Cuddapah.

Sir, I have the honour to report that of the two men now under observation in our Segregation Camp, one is now quite free from fever. The other, an elderly man, ill-fed, is suffering from Broncho-Pneumonia. For the last three days (from the 21st) his temperature ranged from 102° to 103.8°, and during the last two days, it has been gradually coming down being 102° in the evening and 100° in the morning.

His expectoration is highly purulent, and there are numerous rales with patches of Bronchial breathing with impairment of resonance over both bases. He is exceedingly weak and he is on a general expectorant and stimulating treatment.

Every

Every antiseptic precaution, both as regards himself and surroundings, is still being rigidly maintained.

The enlarged glands in his right groin have undergone no change, from which I conclude that they have been chronically enlarged for some time.

From the facts that the man has been ill-fed, is somewhat better today, and seems likely to recover, we may, in my opinion, exclude "pneumonic" plague.

I have etc.

Signed / J. W. Gleaton Myles & Co.
