Recommendations of the Sub Committee
on the disposal of Sewage.

North I.

1. Solaiappa Bundaly Street: The extra filter
which the Committee wanted ^{to recommend} for this has
already been constructed & is sufficient.

2. Chukkrapany Square: We recommend that
the sewage of the houses be conveyed by
sewer drains and filtered and the filtrate
be sent to the North Branch Channel or where
possible and desirable to be used to irrigate a
garden.

The owners of houses in Chukkrapany
each street eastern row to construct a drain
in their backyards and carry the sewage to the
drain proposed in the Chukkrapany Square
Scheme.

3. Kamatchy Jany Street: The people to tunnel
their backyards so as to allow the rain water to
flow away by the existing drain, each party to
cut the portion of the drain within his back-
yard or pay for it to be done by the Municipality.
In Kamatchy Jany South side and Kame-
kella Street, Street drains to be constructed and
the sewage and rain water to be taken to North

Branch Channel after filtration.
to Dabees Square: It is proposed that a drain
to be constructed by the owners between the
backyards running west to east and to carry
the sewage after filtration by the side of Dabees
East Street into the old Selpammanallan Chan-
nel the necessary ground for this only to be
purchased.

The sewage of Dabees West Street to be taken by a
drain in the backyards of the houses into the
above proposed drain after filtration.

The owners of houses in Dabees East Street
and Pillaiyakovil Street to be asked to
level their backyards and prevent stagnation
and to construct family filters and let
the filtrate into the above said Channel.

The owners of houses in Pachaiappa Bimdalay
Street on both sides to level their backyards
to prevent stagnation and construct family
filters where necessary.

North II. The Scheme already proposed to be
carried out for Syengar Street Kattinjir has
been sanctioned.

South II (a). Ramaswamy Kovil Duraiswamy:
Instead of the proposed Scheme being carried
out the following to be done: -

The

The sewage of houses in Kumbeswara South
Street, Duraimkara Street and Kumbeswara
Samsodiy Dray to be incorporated with that
of houses in Ramaswamy Kovil Street and
the sewage to be into the Central Branch Channel
after filtration. The present untidied Chan-
nel from the Arasalar to the Duraimakham
Tank being made its Supply Channel and
the connection between the Central Branch
Channel and the Tank being cut off.
A good part of the Pattinam Street drainage
and Eda Street drainage to be connected
with the above.

6. The proposal to employ Carts for sewage
removal is not recommended owing to
prohibitive cost and to the difficulty to
make people contribute sufficiently to pay
for the upkeep of the Carts and to the fact
that sewage filters are to be used in general
and rendering Carts unnecessary.

To Read the recommendations of the Sub-
Committee on the disposal of the town
sewage.

Resolved that the same be adopted -
with the addition that the old -
Pepperimalaloot Channel be lined
with concrete in places where it is
likely to contaminate wells by soaking.

MUNICIPAL COUNCILORS' OFFICE

KUMBAKONAM 15th June 1898.

FROM

J. S. Sivasamy, Mayor, Chuegal.

TO

The Secretary to the
Local & Municipal Department
The Sub-collector & The Collector of Tanjore.

SIR,

With reference to the remarks contained in
Para 3 of G. O. No. 565, dated 14.3.98, I have the
honour to submit that our double filter with
Incessant reservoir at the Solayappa Dundaly Street
and 25 private filters in different parts of the
town have been constructed as also a row of 7
filters with a sewage farm therefor at Chue-
Krasimamangal South Street. This farm is en-
closed by a railing with Eucalypta plants and
plantain trees in the middle to absorb the water
and with turf on the lands. The cost of the
Solayappa Dundaly Street filter and the sewage
farm so was borne by the Municipality. They
are all working and contribute greatly to im-
prove the existing evils; but the opinion can
be given conclusively now, as the scheme is in
its infant stage.

Yrs

1
2/89M/98

If, in fact, with the approval of specialists, it
may be developed greatly, if needed, by resorting
to certain measures.

A drain with filter at Kottaiyur and
another at the Kaimaram, Temple Street
being constructed. The question of cleansing
cesspools was referred to a subcommittee
whose recommendations and the resolution
of the Council thereon are herewith submitted.

I have the honour to be

Sir,

your obedient servant

L. Srinawamy Aiyar
