(It seems extremely improbable
that the case was Plague).

Very improbable, I think - that
the case is shown that - our observa- reported the death
tion scheme is working well.
of a suspected plague
case imported from
Bangalore.

*Malabar Collectors Office
Calicut 6th October 1898*

From

*J. C. Parsons Esq.
As Collector of
Malabar*

To

*The Secretary to Government
Local & Home Department*

Sir,

*I have the honor to submit
herewith copy of remarks of the
District Medical & Sanitary Officer
at Palghat Chairman's letter no 3620
dated 30 September last and its en-
closure (copies enclosed) regarding the
death of one Chinmian Avari who
arrived at Palghat from Bangalore on
the 27th inst.*

*This is a case of suspected plague
imported from Bangalore.*

*I have the honor to be,
Sir,
Yours most obedt Servt.*

J. C. Parsons

*Asst. Collector
Calicut*

No 362.

Municipal Office

Palghat 30 September 1898.

To

The Collector of Malabar

Calicut

Sir,

I have the honor to inform you that one Chinnian Aari, who arrived at the Brazier's street, Palghat from Bangalore on the 27th instant, and who appeared before the Hospital Assistant on plague duty till yesterday (at 9.40 A.M.) in a healthy condition, died suddenly this day at about 2 P.M. The Civil Apothecary, the Senior Medical Officer in the Station was at once deputed to inspect the corpse and he reports that there is no reason to suspect it to be a case of plague. I however arranged to have the clothes surrounding the corpse to be saturated with perchloride of mercury solution and the body burnt this evening. The whole house has been disinfected the useless rags have been burnt.

The

the water of the well has been
hauling

2. They also mention that,
with the deceased, ten persons also
arrived from Bangalore on the
27th instant & the same street
and all of them are being kept
under the strictest observation.

3. Copies of correspondence with the
Civil Apothecary are herewith sub-
mitted.

Yours &c.

Dr. J. Chinnaswami Pillay
Chairman

I forwarded the District
Medical & Sanitary Officer for perusal
and favour of return.

Dr. V. Rajagopalachari
Collector
4.10.30

Returned.

A post mortem examination
has not appear to have been made
and I fear that the case at
Palgat was a true case of plague,
probably of the septic or pneumonic

type. I have never heard of anyone
dying from inflammation of the
testicle & scrotum in 28 hours. I
have therefore insisted on all the
other men who arrived with the
deceased being placed in the Segre-
gation sheds & have asked the
Chairman to wire to me if there
should be any other case of sudden
death among arrivals from infected
localities - or at least to insist on
a post mortem examination being
made by the Civil Apothecary.

Dr. J. F. Hackett Wilkins.

No 3614

Hospital Assistant -

K. Bhavani Rao reports that one of the persons who arrived at Salghat from Bangalore on the 27th instant and who appeared before him last, yesterday at 9.40 A.M. in a healthy condition, seems to have died this afternoon. The civil apothecary is requested to inspect the corpse at once and report whether it is a case of Plague. It is requested that the report may be submitted at once as a telegram must be sent on to the Collector if it is a case of Plague.
