Lo

Август 1862

See

Sir,
I have the honour to report
on the Plague case discovered yesterday
(Sunday)

2. The Tabularis report to you which I have just seen contains most of the information available. I learnt from the Station Master that the patient came from Cotton Puss Bangalore close to where the first Plogue cases in Bangalore occurred. All the persons 14 in number who were found to have been in attendance on her at Hindupur have been removed to observation sheds.

3. I had holes made in the roof of

of the house, where the girl was found to let in air & light. The floor and walls have been disinfected as described by the Tahsildar. No rats were found about the house.

4- The patient's temperature was about 105° when I left the Plague camp this evening and her recovery is considered very unlikely by the Doctor.

I have &c
