Head Assistant

COLLECTOR'S OFFICE,

Dated, 3rd October 1898.

CAMP Haidipur.

ENCLOSURE

FROM

N. Macnichel Esq.,

By Head Assistant COLLECTOR OF

Benar.

TO

THE

Collector of Benar.

SIR,

I have the honour to report on the Plague case discovered yesterday (Sunday) 2. The Tahsildar's report to you which I have just seen contains most of the information available. I learnt from the Station-master that the patient came from Bottonpet, Bangalore, close to where the first plague case in Bangalore occurred. All the persons in number who were found to have been in attendance on her at Haidipur have been removed to observation sheds.

3. I had holes made in the roof of the house, where the girl was found, to let in air and light. The floor and walls have been disinfected as described by the Tahsildar. No rats were found about the house.

4. The patient's temperature was about 105°.

I beg to submit report on a case of Plague imported from Bangalore. The patient is a girl aged about 15 belonging to the Janapa caste. She arrived here by the noon train of 29th September 1898 from Bangalore with her father, mother, sister, and two brothers. A passport for the 6 members of the family was given by the Railway Sanitation Doctor. They appeared for inspection before the Local Board on 30th September and it was found that she was in a semi comatose condition.

usual. I went my morning rounds
and requested the Sanitary Inspector and
the Hospital assistant to insist on every
person mentioned in the passports re-
ceived appearing for observation per-
-suadably and to take steps to find out
the persons who have not appeared.
The non appearance of the Plague
patient and the other man yesterday
morning was mentioned and steps
were taken to find them out. The Hospital
assistant having been informed by the
relations of the 2 persons that they
went that morning to a village called
Palikunta four miles east of Hindupur
on the Lepatchi Road. I sent a peon with
a Laked to the Reddi to find out the
travellers and produce them before me
at 11 A.M.

dark places where they were
were further mapped.
The Compounder of the Hospital and
a Caste man of the patient. At 1 PM
the Hospital assistant came to me with
information that the other man was
found and that the girl (Plague
Patient) was hidden away somewhere.
Immediately I proceeded to the Janaba
Petta with the Hospital assistant
the Sanitary Inspector and the Inspector
of Police, and on enquiring of a Janaba
woman who was in an advanced state
of pregnancy she informed us that the
girl we wanted was lying ill in
house adjoining her's. Her information
proved correct and when we procured
the presence of the native nurse it was
2 PM and on examining her temperature
it was found to be 104.2 degrees; she
was also in a Semi Comatose condition.

on the right groin. Information was
 then sent to the Doctor and nurse at
 the Ry Station who also pronounced
 the patient to be suffering from
 Plague. She was then taken to the
 plague camp with her father and
 two other who were in attendance on her.
 The relations who had travelled
 with her and the occupants of the
 adjoining houses who might be
 considered to have had anything to
 do with her were also sent to the suspect
 camp for observation and isolation.

Append in the margin a sketch of the
 place where the patient was found and
 the houses whose occupants have been
 segregated. The plague patient was
 found in house no 2. The woman in house
 gave information. The inmates of

dark places to the
 segregate, after I scrapped
 woman and the woman in the advanced
 state of pregnancy referred to above. Houses
 5 & 6 are Prayer house and shed.

3. The following measures were
 adopted for disinfection of the in-
 fected house.

i. A punchayet consisting of 2
 Comaties and 2 brahmins and the
 Reddy of Hindupar were convened, an inventory of the moveable property
 in the house was made. One list of all
 old clothes, bed, grains, oils roofing
 that were exposed amounting in all to a
 value of Rs 75-0-0 was made and all the
 above articles were burnt another list
 of valuable clothes, vessels, document
 and jewels that were in closed receptacles
 was made and these were disinfected
 with lotion of Perchloride of mercury
 and acid Hydrochloric 1-1000 a

one a section of
no house the thatched roofing attached
to house no: 2 & 8 were pulled down
and burnt. The walls and flooring
of house no: 2 were scraped to a
depth of 3 inches and burnt.

4. After removal of the patient to
the shed her temperature fell to 102°
and she was in a less Comatose condition.

The European nurse was in attendance
for her all the night and this morning
the temperature fell to 100° . The inmates
of the sheds were all provided with date
mats, Charpoy and Cumbles.

5. The Head Assistant Collector
arrived by mail train and inspected
the camp, the patient and the infected
locality. He caused the roofing of
house no 2 also to be removed so as
allow sun light to play in all
dark

dark places within the house. The
floorings were further scrapped
and disinfected as described above,
and the scraped matter burnt -
between Cowdung fuels sprinkled
over with Kerosine oil.

I have re
