AUGUST.

Administration Report.

Reviewing the — of the Karur Municipal Council for 1897-98.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following paper :—

From M.R.Ry. V. SUBBA RAO Avargal, B.A., Chairman, Municipal Council, Karúr, to the Secretary to Government, Local and Municipal Department (through the Revenue Officer of the Division, Coimbatore), dated 10th June 1898, No. 8.

I have the honour to submit the annual report on the working of the Karúr Municipality for the year 1897–98. The usual statements accompany.

I.—Constitution of the Council.

2. The council held 28 meetings as against 31 in the previous year and no meeting was adjourned for want of a quorum. The average attendance of the councillors shows an improvement, having been 6·14 against 5·51 in 1896–97. The terms of four councillors expired during the year, of whom three were re-nominated, including the Chairman. From the 9th January to 1st February 1898, the date of my re-appointment, the Division officer was the Chairman. By the transfer of the Tahsildar, an official seat was vacated, which was filled up by his successor in office. All the councillors are nominated. Under G.O., No. 2260 M., dated 15th October 1897, the town has been granted the privilege of electing four councillors, but the system has yet to be brought into force.

II.—Repairs.

3. Excluding the opening balance of Rs. 4,559–9–11, the total receipts amounted to Rs. 19,471–13–4, showing an advance of Rs. 1,624–4–6 over the previous year. The incidence of taxation per head of the population was with tolls Re. 1–0–1 and without tolls As. 9–10.

4. *Tax on Buildings—Collections.*—Rs. 4,509–1–0 as against Rs. 4,466–12–6. The net current demand was Rs. 4,592–15–0, or Rs. 140–4–6 more than in the previous year—an improvement which is due to a few new buildings including the taluk cutcherry. The town has extended to the west and the number of houses has risen from 2,071 to 2,226, including bazaars attached to houses which have been numbered separately for purposes of taxation. As much as 97·19 per cent. of the current year's demand was collected. The balance of Rs. 128–9–6 in statement IV-A includes the sum of Rs. 77–5–6 assessed on the new taluk cutcherry buildings, the payment of which was delayed by the Revenue Department pending the consideration of a claim for a proportionate reduction in the tax on account of the buildings having been completed and occupied only in December 1897. Excluding this sum, which has since been realised, the balance that remained uncollected for the year was Rs. 51–4–0. Of the arrears of the previous years, Rs. 45–9–0 were collected and Rs. 14–10–0 were written off as irrecoverable, leaving a balance of Rs. 14–2–6 relating to the last two previous years.

5. *Land Tax—Collections.*—Rs. 485–5–3 against Rs. 484–4–0. The demand for the year as finally settled was Rs. 472–12–3, being less than in the previous year by Rs. 3–8–9 owing to a few vacant sites having been utilized for new houses. The amount that remained uncollected in the current demand was Rs. 4–13–6 and under arrears of previous years Rs. 4–0–6. The amounts written off as irrecoverable both in the current and in the arrears demands were Rs. 6–8–0.

6. Coercive processes for the collection of taxes were issued in 204 cases, but p[illegible]rty was actually distrained only in five instances; three persons were prosecuted u[illegible] section 103 for non-payment.

7. The taxes on carts and animals showed improvement, the former from Rupees 826 to Rs. 842 and the latter from Rs. 477 to Rs. 489–4–0. The increase under animals is due to enhanced rates for horses under the amended Act. The tax on vehicles has fallen by Rs. 4, which calls for no remark.

8. *Tolls Collections.*—Rs. 4,197–11–0 against Rs. 4,037–9–3. The toll-gates were leased out for the unusually high sum of Rs. 6,205 against Rs. 5,899 in 1896–97, and the entire amount was collected within the year. A sum of Rs. 2,076–1–8 was paid to the district board as their share. The request made to Government for the reduction of the contribution from one third to a fourth of the receipts was not sanctioned (*vide* G.O., Mis. No. 1155 M., dated 10th May 1897).

9. *Ferry Rents.*—Ferry rents rose from Rs. 584–14–0 to Rs. 676–13–4. The revenue from this source is fluctuating from year to year, the gains in a year on account of floods during the festive seasons inducing the contractors to bid for larger sums and the losses resulting in a fall in the succeeding year. Under Act II of 1888 a sum of Rs. 65 was collected from a circus party and a theatrical proprietor.

10. *Produce of Lands and Gardens.*—Rs. 82–12–6 against Rs. 41–6–4. The cocoanut trees in the Dindigul, Nicholsonpet and Ambalagara streets were leased out for a larger sum which accounts for the increase.

11. *The sale-proceeds of street-refuse, night-soil, &c.*—Rs. 136–7–6 against Rupees 165–8–3. The fall of nearly Rs. 30 is due to the experiment of selling the rubbish in lots and by cart-loads as suggested in G.O., No. 1404 M., dated 20th August 1896, instead of letting it to a farmer for a fixed amount as in previous years. The rubbish is in great demand only in wet villages, where plantain gardens exist, and I find from the sales effected that nearly all the purchasers came from the villages of Vangal and Nerúr, which are at a distance of seven miles from the town. As nearly a third part of the sweepings remained unsold at the close of the year, I expect an increase in the year 1898–99. The night-soil depot fetched a small sum of Rs. 10 against Rs. 5 in the previous year. Its advantages as manure are beginning to be understood, but as yet only one or two ryots have come forward to purchase it. I expect that in course of time this item will improve and the objections which ryots generally feel to its use will gradually disappear.

12. *Fees from Educational Institutions.*—Rs. 2,857–5–9 against Rs. 2,520–5–3. There has been a steady increase under this head from year to year since 1894–95. The high and primary schools have been making satisfactory advance in their strength. The opening of the fifth form in the high school last January has contributed to the increase to the extent of Rs. 102.

13. *Income from Markets.*—Rs. 811–10–5 against Rs. 845–11–6. The fall is due to the butchers' stalls having been let out for Rs. 152 instead of Rs. 260 in the previous year. The establishment of a meat-shop beyond the municipal limits close to the town brought down the rent for want of competition.

14. *Income from Slaughter-house.*—Rs. 250–1–6 against Rs. 362–5–0. The fall is due to the practice of a few butchers slaughtering animals outside the town limits for the meat-shop mentioned above. The recent extension of the municipal limits is calculated to put down this evil.

15. *Distraint and Warrant Fees.*—Rs. 25–6–0 against Rs. 4–4–0. The provision in the amended Act that separate fees should be levied for distraints and warrants has resulted in the increase.

16. *Cart-stand Fees.*—Rs. 506–15–7 against Rs. 402–1–1. The municipal cart-stand was leased out for a larger sum than in the previous year owing to a keen competition among bidders.

17. *Fines under Municipal and other Acts.*—Rs. 297 against Rs. 218–12–0. The advance shows that the Bench Magistrates have paid attention to my remarks in the last administration report about the inadequacy of the fines imposed.

18. *Contributions from Government.*—Rs. 560–15–6 against Rs. 282–6–3. [illegible] increase is accounted for by the rise in the grants paid by Government on acco[illegible]

the schools owing to the appointment of a drawing master and the supply of furniture to his class and to the school generally, which has improved in strength. A sum of Rs. 32 was received from Government on account of a latrine built for the schools. The nomination of an L.T. as headmaster resulted in an increase in the salary grant from a fourth to a third of the salary of the appointment.

19. *Contributions from Local Boards on account of Hospitals.*—Rs. 1,249–6–3 against Rs. 1,061–4–9. The rise is due to the higher salary to which the civil apothecary became entitled during the year and to certain improvements to the hospital buildings.

20. *Private Scavenging Fees.*—Rs. 327–2–0 against Rs. 255–8–0. The demand under this head rose from Rs. 255–11–0 to Rs. 328–4–0 as the number of houses brought under the system advanced from 210 to 242. Of the total number of houses in the town, 420 are shops attached to dwelling houses, 150 are huts belonging to the Paracheri and to the Pallars and 1,176 houses have no privies, the occupants resorting to public latrines. Only 480 houses have private latrines capable of being brought under the system, and of these as many as 315 are now served by the municipality.

21. Under other items appears a sum of Rs. 500 forming a portion of the amount of a decree obtained in respect of misappropriated sums.

22. The demand under all heads except conservancy receipts and market rents showed an improvement and except under house and land taxes, more than 97 per cent. of which was collected, there remained no arrears to be collected. The arrears shown in statement IV-B submitted with the administration report for 1896–97 against tolls, market rents, &c., have been removed from the statement as they form the subject of claims under a decree obtained against a former Chairman and are also recoverable from the security furnished by the late manager. They have been included under assets in the note to statement II.

III.—CHARGES.

23. The total expenditure for the year was Rs. 22,391–13–11 against Rupees 17,152–5–3; the major portion of the increase was under Grant 1 on account of the construction of an iron latrine of the type design, additional sheds to the weekly and daily markets and a building to the high school.

24. *Grant 1, Public Works.*—Rs. 6,326–11–2 against Rs. 2,687–12–1. The amount expended on Communications—New and Repairs—was Rs. 2,251–15–6, being more than 53 per cent. of the revenue from tolls. The construction of stone revetments on road sides in Sreenivasapuram-Dindigul road and other streets form the new works which cost Rs. 995–12–1. Twelve streets underwent repairs at an expenditure of Rs. 1,256–3–5. The outlay on new buildings was Rs. 3,087–13–1. The growing strength of the high school, the opening of the fifth form and the establishment of a drawing class rendered it absolutely necessary to construct an additional building at an expenditure of Rs. 1,234–7–10. Some of the forms are accommodated yet in thatched sheds and a further extension has become necessary. The other new buildings were a tiled shed floored with Cuddapah slabs in the weekly market—hitherto a mere open enclosure—and an extension to the daily vegetable market costing Rupees 686–3–0 and an iron-covered latrine with eighteen seats of the type design at a cost of Rs. 903–14–5 in Melvaduga street. Three additional latrines for public use have also been provided. They are simple mud-wall enclosures and will be converted into pucka constructions as soon as funds permit. The sanction of the Sanitary Board has been obtained for works costing more than Rs. 200. The hospital buildings were repaired at a cost of Rs. 139–9–8.

The construction of the Car street drain so as to carry away the sewage from the Bazaar street into a garden which has been turned into a small sewage farm and the Melvaduga street minor drains involved an expenditure of Rs. 426–4–3. Improvements to the night-soil depot under instructions from the Sanitary Commissioner were made at a cost of Rs. 53–9–0. The acquisition of a place for the Ambalagara street latrine on payment of Rs. 136–4–0 and a slight increase of expenditure over the estimate in building the Melvaduga street latrine account for the excess of expenditure over the sanctioned allotments by Rs. 166–11–2.

25. *Grant 2, Education.*—Rs. 4,562–12–10 against Rs. 3,679–14–10. The total expenditure on account of education exceeded the outlay in the previous year by Rs. 882–14–0. The establishment of a drawing class with a master on Rs. 20, the appointment of two additional teachers to the municipal primary school on Rs. 10 each, an increase in the salary paid to the headmaster of the high school from Rs. 50 to Rs. 60, the opening of the fifth form with a teacher on Rs. 50 and a rise in the result grants paid by the municipality from Rs. 258–4–0 in 1896–97 to Rs. 348–12–0 account for the increase in the total outlay.

The strength of the high school has continued to advance, the number of boys having risen from 103 to 132. The opening of the fifth form is calculated to improve it still further. The average attendance improved from 77 to 111. Of 14 boys sent up for the Lower Secondary examination, 8 passed, 6 obtaining complete certificates and 2 of them in the first class. The tone and discipline of the school were reported to be satisfactory by the Inspector of Schools, Western Circle, in his last tabular inspection report. The financial condition was sound, the receipts having exceeded the expenditure by Rs. 164–11–4.

The municipal primary school showed an improvement in strength from 260 to 280. Two additional hands were entertained as the number of boys both in the first and in the second standards was found too large for a single teacher. The number of aided primary schools rose from 7 to 9 and the number of trained teachers has increased by two, while that of the unpassed teachers has fallen from 14 to 8. The results of the examination in all the standards except the infant are reported to be satisfactory. The net expenditure on education was Rs. 1,288–7–7 against Rs. 961–3–4 in the previous year, the whole of which amount was spent on primary education The total number of boys under instruction in the town rose from 660 to 771. Provision has been made in the budget for the year 1898–99 for training two teachers of the aided primary schools. The municipality continued to pay two scholarships to Non-Christian boys in the Wesleyan Mission Industrial school.

26. *Grant 3, Sanitation and Medical Services.*—Rs. 8,255–14–7 against Rupees 7,829–13–5.

27. *The Hospital and Dispensary.*—The charges under the establishment have risen from Rs. 2,014–12–10 to Rs. 2,192–8–2, owing mainly to the increase in the salary paid to the civil apothecary in charge of the main hospital. The number of patients shows a decline from 11,887 to 10,529 in the main hospital and from 14,207 to 11,344 in the female dispensary. The decline is explained in the reports herewith submitted by the apothecaries concerned, but the explanation is not admitted to be satisfactory by the District Medical Officer. The suggestion to erect a shed for contagious diseases outside the town has not been carried out as the council has not been able to find a suitable place within an easy distance from the town owing to the lands in the vicinity of Karúr being under irrigation and any site chosen close to the town will remain damp during the greater part of the year. The best available ground will be selected after consultation with the District Medical and Sanitary Officer when he next visits the town. The suggestions of the apothecaries in regard to an additional servant, &c., will be considered when the next budget is prepared. It would be useful if they are made in December in separate communications instead of being mentioned in the annual reports. The midwife has shown better work; the number of cases of labour attended by her was 102 against 80 in the previous year, being a fourth of the number of births in the town. The female apothecary attended 14 cases, of which 12 were difficult. The dispensary for women and children is now located in a portion of the Government chattram. As the old taluk cutcherry building has since been transferred by the Government to the municipality for use as a rest-house, arrangement will be made to make the whole of the chattram available for the use of the dispensary. The total charges on account of medical aid have amounted to Rs. 3,546–14–8 against Rs. 3,475–7–9 in the year 1896–97.

28. *Vaccination.*—The total number of operations was 501, of which 417 were successful. The large number of failures was due to the inferior quality of the glycerine vaccine paste supplied from the district depot. The use of the lanoline

the schools owing to the appointment of a drawing master and the supply of furniture to his class and to the school generally, which has improved in strength. A sum of Rs. 32 was received from Government on account of a latrine built for the schools. The nomination of an L.T. as headmaster resulted in an increase in the salary grant from a fourth to a third of the salary of the appointment.

19. *Contributions from Local Boards on account of Hospitals.*—Rs. 1,249–6–3 against Rs. 1,061–4–9. The rise is due to the higher salary to which the civil apothecary became entitled during the year and to certain improvements to the hospital buildings.

20. *Private Scavenging Fees.*—Rs. 327–2–0 against Rs. 255–8–0. The demand under this head rose from Rs. 255–11–0 to Rs. 328–4–0 as the number of houses brought under the system advanced from 210 to 242. Of the total number of houses in the town, 420 are shops attached to dwelling houses, 150 are huts belonging to the Paracheri and to the Pallars and 1,176 houses have no privies, the occupants resorting to public latrines. Only 480 houses have private latrines capable of being brought under the system, and of these as many as 315 are now served by the municipality.

21. Under other items appears a sum of Rs. 500 forming a portion of the amount of a decree obtained in respect of misappropriated sums.

22. The demand under all heads except conservancy receipts and market rents showed an improvement and except under house and land taxes, more than 97 per cent. of which was collected, there remained no arrears to be collected. The arrears shown in statement IV-B submitted with the administration report for 1896–97 against tolls, market rents, &c., have been removed from the statement as they form the subject of claims under a decree obtained against a former Chairman and are also recoverable from the security furnished by the late manager. They have been included under assets in the note to statement II.

III.—CHARGES.

23. The total expenditure for the year was Rs. 22,391–13–11 against Rupees 17,152–5–3; the major portion of the increase was under Grant 1 on account of the construction of an iron latrine of the type design, additional sheds to the weekly and daily markets and a building to the high school.

24. *Grant 1, Public Works.*—Rs. 6,326–11–2 against Rs. 2,687–12–1. The amount expended on Communications—New and Repairs—was Rs. 2,251–15–6, being more than 53 per cent. of the revenue from tolls. The construction of stone revetments on road sides in Sreenivasapuram-Dindigul road and other streets form the new works which cost Rs. 995–12–1. Twelve streets underwent repairs at an expenditure of Rs. 1,256–3–5. The outlay on new buildings was Rs. 3,087–13–1. The growing strength of the high school, the opening of the fifth form and the establishment of a drawing class rendered it absolutely necessary to construct an additional building at an expenditure of Rs. 1,234–7–10. Some of the forms are accommodated yet in thatched sheds and a further extension has become necessary. The other new buildings were a tiled shed floored with Cuddapah slabs in the weekly market—hitherto a mere open enclosure—and an extension to the daily vegetable market costing Rupees 686–3–0 and an iron-covered latrine with eighteen seats of the type design at a cost of Rs. 903–14–5 in Melvaduga street. Three additional latrines for public use have also been provided. They are simple mud-wall enclosures and will be converted into pucka constructions as soon as funds permit. The sanction of the Sanitary Board has been obtained for works costing more than Rs. 200. The hospital buildings were repaired at a cost of Rs. 139–9–8.

The construction of the Car street drain so as to carry away the sewage from the Bazaar street into a garden which has been turned into a small sewage farm and the Melvaduga street minor drains involved an expenditure of Rs. 426–4–3. Improvements to the night-soil depot under instructions from the Sanitary Commissioner were made at a cost of Rs. 53–9–0. The acquisition of a place for the Ambalagara street latrine on payment of Rs. 136–4–0 and a slight increase of expenditure over the estimate in building the Melvaduga street latrine account for the excess of expenditure over the sanctioned allotments by Rs. 166–11–2.

25. *Grant 2, Education.*—Rs. 4,562–12–10 against Rs. 3,679–14–10. The total expenditure on account of education exceeded the outlay in the previous year by Rs. 882–14–0. The establishment of a drawing class with a master on Rs. 20, the appointment of two additional teachers to the municipal primary school on Rs. 10 each, an increase in the salary paid to the headmaster of the high school from Rs. 50 to Rs. 60, the opening of the fifth form with a teacher on Rs. 50 and a rise in the result grants paid by the municipality from Rs. 258–4–0 in 1896–97 to Rs. 348–12–0 account for the increase in the total outlay.

The strength of the high school has continued to advance, the number of boys having risen from 103 to 132. The opening of the fifth form is calculated to improve it still further. The average attendance improved from 77 to 111. Of 14 boys sent up for the Lower Secondary examination, 8 passed, 6 obtaining complete certificates and 2 of them in the first class. The tone and discipline of the school were reported to be satisfactory by the Inspector of Schools, Western Circle, in his last tabular inspection report. The financial condition was sound, the receipts having exceeded the expenditure by Rs. 164–11–4.

The municipal primary school showed an improvement in strength from 260 to 280. Two additional hands were entertained as the number of boys both in the first and in the second standards was found too large for a single teacher. The number of aided primary schools rose from 7 to 9 and the number of trained teachers has increased by two, while that of the unpassed teachers has fallen from 14 to 8. The results of the examination in all the standards except the infant are reported to be satisfactory. The net expenditure on education was Rs. 1,288–7–7 against Rs. 961–3–4 in the previous year, the whole of which amount was spent on primary education The total number of boys under instruction in the town rose from 660 to 771. Provision has been made in the budget for the year 1898–99 for training two teachers of the aided primary schools. The municipality continued to pay two scholarships to Non-Christian boys in the Wesleyan Mission Industrial school.

26. *Grant 3, Sanitation and Medical Services.*—Rs. 8,255–14–7 against Rupees 7,829–13–5.

27. *The Hospital and Dispensary.*—The charges under the establishment have risen from Rs. 2,014–12–10 to Rs. 2,192–8–2, owing mainly to the increase in the salary paid to the civil apothecary in charge of the main hospital. The number of patients shows a decline from 11,887 to 10,529 in the main hospital and from 14,207 to 11,344 in the female dispensary. The decline is explained in the reports herewith submitted by the apothecaries concerned, but the explanation is not admitted to be satisfactory by the District Medical Officer. The suggestion to erect a shed for contagious diseases outside the town has not been carried out as the council has not been able to find a suitable place within an easy distance from the town owing to the lands in the vicinity of Karúr being under irrigation and any site chosen close to the town will remain damp during the greater part of the year. The best available ground will be selected after consultation with the District Medical and Sanitary Officer when he next visits the town. The suggestions of the apothecaries in regard to an additional servant, &c., will be considered when the next budget is prepared. It would be useful if they are made in December in separate communications instead of being mentioned in the annual reports. The midwife has shown better work; the number of cases of labour attended by her was 102 against 80 in the previous year, being a fourth of the number of births in the town. The female apothecary attended 14 cases, of which 12 were difficult. The dispensary for women and children is now located in a portion of the Government chattram. As the old taluk cutcherry building has since been transferred by the Government to the municipality for use as a rest-house, arrangement will be made to make the whole of the chattram available for the use of the dispensary. The total charges on account of medical aid have amounted to Rs. 3,546–14–8 against Rs. 3,475–7–9 in the year 1896–97.

28. *Vaccination.*—The total number of operations was 501, of which 417 were successful. The large number of failures was due to the inferior quality of the glycerine vaccine paste supplied from the district depot. The use of the [illegible]line

paste in the current year is expected to show better results. Under infantile vaccination the number successfully vaccinated was 282 against 342 in the previous year. The vaccinator attributes this fall chiefly to the quality of the vaccine paste. There were 78 cases of re-vaccination. As usual a thorough search was made from house to house and an enumeration taken of all unprotected children which resulted in the vaccination of 98 children in two days. The municipal council has fixed a minimum of 38 for the vaccinator for each month, seeing that the total births in a year come to about 400 and has ruled that for every case falling short of the minimum a fine of one anna should be imposed. The number of persons prosecuted for failure to have their children vaccinated was 8. The average cost of vaccination per case rose to As. 7–6 from As. 6–2 in the previous year owing to a large number of operations having proved unsuccessful.

29. *Vital Statistics.*—The number of births was 404 against 386 and was 37·6 per mille of the population. The number of deaths was 320 against 515 in 1896–97 when cholera of a virulent type carried away 146 persons. The putting up of notice boards in important parts of the town, warning people that failure to give information will result in prosecutions has had some good effect. The number of persons prosecuted and convicted for omitting to give information of births was 8 and of deaths 4. To improve the registration of deaths, it is proposed to have sheds erected near the burial and burning grounds for licensed Vettians to live in and to have the deaths noted at the time of the burial or cremation.

30. *Sanitation.*—The total expenditure on conservancy and sanitation was Rs. 4,255–4–4 against Rs. 3,911–0–11 in the previous year and represents 21·85 per cent. of the total revenue. Except under establishment charges, where difficulty of securing scavengers explains the savings, the allotments were fully utilized. Three additional public latrines were constructed for the use of the people in places where they were most required, bringing up their number to 14 for a town with a population of 10,750. The number of cess-pits or well latrines has been considerably reduced and only fifty remain yet to be closed. Periodical inspection of backyards and prosecution under section 221 have improved the sanitary condition of houses. Notices were issued to 25 persons to keep their premises clean and 20 were prosecuted. The construction of a drain to carry off the sewage from the bazaar and Car streets and the formation of a sewage farm on a small scale have resulted in keeping a very insanitary part of the town clean. Cholera in a sporadic form appeared in the months of February and March 1898 and is responsible for 28 deaths. The objectionable burial grounds on the river banks have been closed under the orders of Government, Mis. No. 1900 M., dated 30th August 1897, and the site chosen by the council for cremation purposes has been approved of by the District Medical and Sanitary Officer, and an application for its acquisition has been made. Measures will be taken to prevent the burning of dead bodies in the river bed after the land is acquired. The several suggestions made by the Sanitary Commissioner in his notes of the inspection of the town embodied in G.O., No. 2036 M., dated 27th November 1896, have nearly all of them been carried out. The closure of the Muhammadan burial grounds after a selection of a proper place outside the town for the purpose and the erection of a shed for contagious diseases alone remain to be done.

31. *Private Scavenging.*—The number of houses brought under this system has advanced to 242 and there has been a steady improvement in it from year to year. The number of houses now served is 315 forming more than 65 per cent. of the houses which have accommodation for privies. The system was worked at a profit of The 6–5. The residents of as many as 1,176 houses resort to public latrines in the bazaar, of which three more of them were built during the year.

32. *Grant 4.*—The increase of Rs. 98–14–5 under lighting contingencies is due to 14 additional stone lamp-posts and lanterns having been provided during the year, which brings up the total number of lamps to 140.

33. *Grant 5.*—Rs. 1,544–10–1 against Rs. 1,214–8–3. The supply of furniture to the office and the costs incurred in re-numbering houses in the town and putting up boards containing names of streets account for the increase under this grant.

34. The municipal limits have been extended so as to include the Pallar's village of Balambapuram, the insanitary condition of which was a source of danger to public health in times of epidemics. There has also been an extension to the west in which direction the town is progressing.

IV.—Closing Balance.

35. The year closed with a balance of Rs. 1,639–9–4, excluding the deposit balance.

36. A copy of the resolution of the municipal council approving the report is submitted.

—

Enclosures.

Concise Annual Report on the working of the Municipal Hospital, Karúr, for the year 1897–98.

Public Health.—The public health was, on the whole, satisfactory throughout the year under report. Malarial fevers and eye-diseases prevailed to a smaller extent during the year. Cholera broke out about the end of the year. There were 47 cases with 28 deaths in the town. It first appeared in the villages around Karúr and then gradually spread into the town. Instructions given out in Standing Order No. 54 of 15th August 1895 were fully carried out under the personal supervision of the Municipal Chairman M.R.Ry. V. Subba Rao Avargal, B.A.

2. *Vital Statistics.*—There were 320 deaths in the town during the year; of these 89 were children under one year of age. The largest number of deaths comes under fevers, bowel-complaints and cholera. The total number of births registered during the year was 404.

3. *Sanitation.*—The drinking water is chiefly obtained from the river Amarávati. There are some draw wells set apart for drinking purposes only. They are kept in good condition, but the water in most of these wells is brackish. There are 14 public latrines in the town. They are freely used by the people. There is no proper system of drainage in the town. In some houses, the house sewage is run into the backyards and is used in irrigating trees, and in others the house sewage is allowed to run into the street drain, where it stagnates for want of a regular system of drainage. There are no cess-pools in the town. The dead bodies are still burnt in the bed of the river. A new burning ground will be opened at an early date. The sanitary condition of the town is fair.

4. *Vaccination.*—Vaccination is compulsory in this town. Five hundred and one cases were vaccinated during the year against 558 in the previous year. Of these, 98 cases were from calf-to-arm and 403 cases from glycerine paste. Of the former 91 per cent. were successful, and of the latter 81 per cent. were successful. Three hundred and forty cases were under one year of age. There were 78 cases of re-vaccination. The first-class vaccinator K. Sabapathy Pillai is in charge and has been doing his duties satisfactorily.

5. *Hospital.*—(*a*) In the main building, there are two wards—one male and one female—accommodating six patients in all. There is a small detached ward for [illegible]ing-in cases. There is a shed for bed-ridden cases and a shed for contagious cases. The hospital compound. The contagious shed must be removed outside the hospital compound, as it is very close to the main buildings.

(*b*) Main buildings and out-houses require minor repairs.

(*c*) The furniture is in a fair condition, and a galvanized bath tub is required for the hospital.

(*d*) The District Medical and Sanitary Officer, Coimbatore, has inspected the hospital during the year, and his recommendations, except the removal of the cholera shed, have been attended to by the council; and steps are also being taken by the council to acquire a suitable piece of ground for the cholera shed.

(*e*) The tabular statement given below shows the number treated as compared with the previous years:—

Years.	In-door.	Out-door.	Total.
1893–94	70	15,951	16,021
1894–95	93	15,801	15,894
1895–96	55	11,407	11,462
1896–97	65	11,822	11,887
1897–98	53	10,476	10,529

The decrease under in-patients is due to the less prevalence of cholera and malarial fevers during the year as compared with the previous year. The fall under out-patients is due to a great fall in admissions under malarial fevers and eye-diseases.

(*f*) There were five deaths among in-patients during the year—two died from injuries, one from malarial fever, one from anæmia and one from cholera.

(*g*) Seven hundred and twenty-seven operations were performed during the year with no deaths.

(*h*) The establishment is sufficient and efficient.

(*i*) No midwife is attached to the hospital, as a midwife is attached to the female dispensary in the town.

(*j*) The hospital compound is small. The contagious shed must be removed from the hospital compound to some convenient place.

Karúr,
19*th April* 1898. (Signed)
Civil Apothecary.

No. 2108.

Forwarded to the Chairman, Municipal Council, Karúr. No satisfactory reason is given for the decrease in the out-patients.

Coimbatore,
23*rd May* 1898. (Signed) D. SIMPSON, Surg.-Capt.,
Ag. Dist. Medl. and Sanitary Officer.

Concise Annual Report of the Female Dispensary, Karúr, for the year 1897–98.

Hospitals and Dispensaries.—(*a*) The dispensary is a portion of the municipal chattram and consists of three rooms. The accommodation is insufficient at present to make special arrangements for attending to gosha patients separately, but will be ample when the whole building is obtained for use as the dispensary.

(*b*) The portion of the building used as the dispensary is in fairly good order.

(*c*) The furniture is in good order except the small dispensary almirah, which requires some repairs and two shelves with separate locks.

(*d*) The District Surgeon at his last inspection has recommended that the whole chattram be given up to be used as dispensary, and this is expected to be done shortly.

(*e*) No money has been recovered from patients for medicines.

(*f*) The number of patients treated during the year 1897–98 was 11,344 (4,437 women and 6,907 children) with an average daily attendance of 75·28 against 14,207 treated in the previous year with an average daily attendance of 95·5.

(*g*) There are no in-patients maintained.

(*h*) The number of operations performed was 304. Of these, 269 were cured, 33 relieved and 2 died.

(*i*) The establishment consists of a compounder, midwife and water-woman. The midwife is often called away in the mornings to attend labour cases. It is then difficult for the only remaining female servant to manage all the surgical cases. It would be well if the services of another servant be obtained.

(*j*) The midwife attended to 102 cases of labour during the year (98 in the town and 4 in the surrounding villages). Fourteen cases of labour were conducted by the female apothecary, twelve of these being difficult and two natural.

(*k*) There has been a marked fall in the attendance during the year under report. This must be attributed to better health amongst the people and less prevalence of eye-diseases in particular.

Respectable patients of all classes continue to attend the hospital as before, and I am certain the institution is appreciated in spite of the fall in the attendance.

Karúr,
15*th April* 1898. (Signed) A. W. WATSON,
Female Apothecary.

No. 2107.

Forwarded to the Chairman, Municipal Council, Karúr.

Coimbatore,
23*rd May* 1898. (Signed) D. SIMPSON, Surg.-Capt.,
Ag. Dist. Medl. and Sanitary Officer.

Submitted to the Collector of Coimbatore. The report shows good work in most branches of administration; the roads are in good order.

16*th June* 1898. (Signed) R. RAMACHANDRA ROW,
Deputy Collector.

Dis. No. 1799, Rev.

Forwarded.

2. The average attendance of councillors during the year 1897–98 slightly improved, and G.O., No. 859 M., dated 10th April 1897, appears to have had some effect. It may be pointed out that the Sub-Collector is an absentee member and can attend only occasionally. There was a slight decline in the number of meetings held by the council as compared with that in the preceding year.

3. Almost all the items of receipts showed increases over the preceding year. The collections under tax on buildings and lands up to 31st March 1898 were 97 and 98 per cent., respectively, of the current demand and are excellent. Although the arrear balances of these taxes outstanding on the 31st March 1898 were only Rupees 14–2–6 and Rs. 4–0–6, still these sums form 19 and 14 per cent. of the arrear demands and relate to the year before 1896–97. They should be realized in full without delay or written off the accounts, if irrecoverable.

4. Tolls fetched a larger sum than 1896–97, and it is satisfactory to note that there was no outstanding balance under that item as well as the items "Produce of cocoanut topes and lands," "Sale of street refuse, &c.," "Market rents," "Slaughter house," "Cart-stand fees" and "Private scavenging fees."

5. The income from the sale of street refuse, &c., fell below the actuals of the previous year, the reason for which is explained by the Chairman. It is encouraging to find that the use of night-soil as manure is beginning to be understood, and I hope with the Chairman that this source of revenue will develop in course of time.

6. A steady and progressive improvement is observed in the income from educational institutions and private scavenging system. The demand under the latter head rose to Rs. 328 and the system yielded a profit of Rs. 42.

7. The total expenditure for the year under report was Rs. 5,240 more than in 1896–97, and the greater portion of the increse was under Grant 1. The items of works on which the charges were incurred are detailed by the Chairman.

8. Although the outlay on the Town Roads—New Works and Repairs—formed 53 per cent. of the net toll receipts, the percentage thereof spent on the *maintenance* of road was about 30 only; nevertheless the roads are stated by the Revenue Division officer to be in good order and this is my recollection also. I do not think mud-wall latrines are a good investment. It is preferable to use corrugated iron.

9. The increase in the expenditure under Grant 2 is explained by the Chairman. The opening of the fifth form in the high school, the addition of two schools to the number aided under primary schools and the improvement in the strength of the schools show that a good deal of attention is paid to education.

(*e*) The tabular statement given below shows the number treated as compared with the previous years :—

Years.	In-door.	Out-door.	Total.
1893–94	70	15,951	16,021
1894–95	93	15,801	15,894
1895–96	55	11,407	11,462
1896–97	65	11,822	11,887
1897–98	53	10,476	10,529

The decrease under in-patients is due to the less prevalence of cholera and malarial fevers during the year as compared with the previous year. The fall under out-patients is due to a great fall in admissions under malarial fevers and eye-diseases.

(*f*) There were five deaths among in-patients during the year—two died from injuries, one from malarial fever, one from anæmia and one from cholera.

(*g*) Seven hundred and twenty-seven operations were performed during the year with no deaths.

(*h*) The establishment is sufficient and efficient.

(*i*) No midwife is attached to the hospital, as a midwife is attached to the female dispensary in the town.

Dis. No. 1799, Rev.

Forwarded.

2. The average attendance of councillors during the year 1897–98 slightly improved, and G.O., No. 859 M., dated 10th April 1897, appears to have had some effect. It may be pointed out that the Sub-Collector is an absentee member and can attend only occasionally. There was a slight decline in the number of meetings held by the council as compared with that in the preceding year.

3. Almost all the items of receipts showed increases over the preceding year. The collections under tax on buildings and lands up to 31st March 1898 were 97 and 98 per cent., respectively, of the current demand and are excellent. Although the arrear balances of these taxes outstanding on the 31st March 1898 were only Rupees 14–2–6 and Rs. 4–0–6, still these sums form 19 and 14 per cent. of the arrear demands and relate to the year before 1896–97. They should be realized in full without delay or written off the accounts, if irrecoverable.

4. Tolls fetched a larger sum than 1896–97, and it is satisfactory to note that there was no outstanding balance under that item as well as the items " Produce of cocoanut topes and lands," " Sale of street refuse, &c.," " Market rents," " Slaughter house," " Cart-stand fees " and " Private scavenging fees."

5. The income from the sale of street refuse, &c., fell below the actuals of the previous year, the reason for which is explained by the Chairman. It is encouraging to find that the use of night-soil as manure is beginning to be understood, and I hope with the Chairman that this source of revenue will develop in course of time.

6. A steady and progressive improvement is observed in the income from educational institutions and private scavenging system. The demand under the latter head rose to Rs. 328 and the system yielded a profit of Rs. 42.

7. The total expenditure for the year under report was Rs. 5,240 more than in 1896–97, and the greater portion of the increse was under Grant 1. The items of works on which the charges were incurred are detailed by the Chairman.

8. Although the outlay on the Town Roads—New Works and Repairs—formed 53 per cent. of the net toll receipts, the percentage thereof spent on the *maintenance* of road was about 30 only ; nevertheless the roads are stated by the Revenue Division officer to be in good order and this is my recollection also. I do not think mud-wall latrines are a good investment. It is preferable to use corrugated iron.

9. The increase in the expenditure under Grant 2 is explained by the Chairman. The opening of the fifth form in the high school, the addition of two schools to the number aided under primary schools and the improvement in the strength of the schools show that a good deal of attention is paid to education.

10. There was a decrease in the number of patients treated at the main hospital and at the female dispensary as compared with the preceding year, and the explanation of the apothecaries concerned is considered by the District Medical and Sanitary Officer as unsatisfactory.

11. Under vaccination the results did not compare favourably with 1896–97, the total number of operations performed being 501 against 558 in the previous year and the number of successful cases being 417 against 521. The number of cases of successful infantile vaccination was also only 282 or 69 per cent. of the total births registered against 342 in 1896–97. Consequently vaccination per case rose by Annas 1–4. The Chairman states that the fall in the number of successful cases is attributed by the vaccinator to the inferior quality of the vaccine paste. This is a matter which is occupying the attention of the District Medical and Sanitary Officer.

12. The ratios of births and deaths registered were 37 and 29 per mille of the town population against 36 and 48, respectively. The fall in the death ratio is accounted for by the absence of cholera in an epidemic form during the year of report, the deaths from this disease amounting to only 28 as against 146 in 1896–97. The proposal to erect sheds near the burial and burning grounds in order to improve the registration of deaths is a good one and is likely to be attended with better results than have been obtained hitherto.

13. Attention seems to have been paid to improving the sanitation of the town and to the removal of the defects pointed out to the council from time to time by inspecting officers of the Sanitary department. Still a suitable burning ground has not yet been provided, though the necessary steps to this end have been taken by the Chairman and the Government has in its order Mis. No. 879 (L. and M.), dated 6th May 1898, sanctioned the acquisition of land for the purpose.

14. In checking the accounts in this office, the following mistakes have been discovered, viz. :—

(*a*) *Page* 14 *of the Accounts.*—Particulars as to the total mileage of roads in the municipality and as to that under maintenance are not given in column 5 of Statement-II A, Part II, as required.

(*b*) *Page* 18.—The totals of columns 2 and 3 of Statement II-B are not entered.

(*c*) *Page* 21.—It is not understood how the salaries of the medical subordinate and the compounder came to be entered as Rs. 1,456 and Rs. 132, respectively, even if calculated at different rates, *i.e.*, at a lower rate up to and at higher rate from August and July 1897.

(*d*) *Pages* 36 *and* 37.—The average cost per pupil is not given in column 23 of Statement V-A, nor is the net cost to the municipality entered in column 22 of the statement opposite "Grand total of Colleges and Schools" appearing on page 39. The total expenditure given in column 21 of the same statement does not agree with the amounts shown in Statements II and II-A, Parts I and II.

(*e*) The number of houses served by the private scavenging agency is only 242 as per paragraph 20 of the Chairman's report and Statement XI and not 315 as stated in the penultimate line of the same paragraph, nor 240 as entered in paragraph 31 of the report.

(*f*) The items which show a falling off are not only conservancy receipts and market income as stated in paragraph 22 of the report, but also the income from slaughter-houses. There is still an uncollected arrear balance of Rs. 5 under "Ferry rent" relating presumably to 1895–96 and of Rs. 175 or almost 25 per cent. of the current demand of Rs. 702 under the same item for 1897–98.

(*g*) Sanctioned allotments were exceeded in certain instances under Grant 1.

(*h*) The net expenditure on education appears to have been Rs. 1,228–7–7, not Rs. 1,144–7–7 as stated in paragraph 25 of the Chairman's report.

(*i*) The increase under lighting contingencies is found to be Rs. 98–14–5 and not Rs. 98–8–5 as entered in paragraph 32 of the report.

(Signed) P. THEENADAYALU,
for *Acting Collector.*

COIMBATORE,
28*th June* 1898.

ORDER—No. 1402 M., dated 11th August 1898.

The receipts and charges of the Karúr Municipality for 1897–98 are compared below with the budget and revised estimates for the year and the actuals of 1896–97 :—

—	Actuals, 1896–97.	Budget estimate, 1897–98.	Revised estimate, 1897–98.	Actuals 1897–98.

Balance	4,560	1,040	1,520	1,639

2. The number of meetings held by the municipal council was 28 against 31 in 1896–97. The average attendance of non-official members improved and was fair, but that of officials declined again and was indifferent. The Collector will call the attention of the latter to G.O., No. 859 M., dated 10th April 1897.

3. *Receipts.*—(1) Owing to the assessment of a few new buildings, including the taluk cutcherry, the net current demand under the tax on houses showed an increase of Rs. 140; but the demand under the tax on lands remained almost stationary. The collections under these heads continued to be on the whole satisfactory. The municipal council's attention is, however, drawn to the Collector's remarks in paragraph 3 of his endorsement.

(2) There was an increase in the receipts under tolls, ferry rents, school and cart-stand fees, fines, grants from Government, contributions from local boards and miscellaneous—other items, but a decline under slaughter-house fees, which is explained in paragraph 14 of the Chairman's report.

(3) The number of houses served by the private scavenging agency again rose from 210 to 242, and the fees collected, which amounted to Rs. 327 against Rs. 256 in the previous year, more than covered the cost of the service. The Government trusts that the efforts made to extend this system will not be relaxed until all the private latrines in the town are brought under the control of the municipal agency.

4. *Expenditure*—(1) *Public Works.*—An additional building for the Municipal High School was constructed at a cost of Rs. 1,234, an iron latrine of the type-design was erected for Rs. 904, and a sum of Rs. 532 was spent in putting up a tiled shed with Cuddapah slab flooring in the weekly market. The total expenditure on communications amounted to Rs. 2,252 or 54·2 per cent. of the net municipal revenue from tolls, and the Revenue Divisional Officer reports that the town roads were maintained in good order. The attention of the municipal council is, however, drawn to the remarks of the Collector in paragraph 8 of his endorsement regarding the small proportion of the net municipal income from tolls spent on the *maintenance* of roads and the inexpediency of constructing mud-wall latrines.

(2) *Education.*—The net expenditure on primary education was Rs. 1,393, while secondary education was worked at a profit of Rs. 164 to the municipal council. Thus the total net expenditure on education amounted to Rs. 1,229 or 11·4 per cent. of the receipts from taxation. As in the previous year, the municipal council maintained a high school and a primary school on the salary system. The attendance at these institutions improved and the results of the public examinations continued to be fair. The municipal council also aided nine primary schools with result grants against seven in 1896–97. Owing to the increase in the number of aided schools, the attendance at these institutions also showed an improvement. The results of the grant examinations continued to be good and the allotment for result grants was fully utilized. It is satisfactory to note that the number of boys under instruction in the municipal and aided schools rose from 660 to 771 or nearly the whole of the male population of school-going age in the town.

(3) *Medical Relief.*—The number of in-patients treated at the municipal hospital fell from 65 to 53, and that of out-patients from 11,822 to 10,476. The decline in the latter case is attributed by the civil apothecary to the less prevalence of malarial fevers and eye diseases; but this explanation is considered by the District Medical and Sanitary Officer as unsatisfactory. The number of patients treated at the dispensary for women and children also fell by 2,863, and the explanation of this decline furnished in the female apothecary's report, viz., better health and less prevalence of eye diseases, cannot be considered as adequate. The midwife employed by the municipal council attended 102 cases of labour against 80 in the previous year—a satisfactory advance. In addition to this, the female apothecary attended fourteen cases of labour or one more than in 1896–97.

(4) *Vaccination and Vital Statistics.*—The total number of vaccine operations performed during the year fell from 558 to 501 and owing to the inferior lymph supplied from the district depot, the quality of the work also greatly deteriorated, the percentage of reported success being 83·2 against 93·4 in the previous year, and

the cost of each successful operation thus rose from As. 6–2 to As. 7–8. Infantile vaccination also showed a retrogression, the total number of children under one year successfully vaccinated being 282 or 26·2 per mille of the population against 31·8 per mille in 1896–97 and a registered birth-rate of 37·6 per mille. This subject, therefore, demands the special attention of the council.

The number of births registered rose from 386 to 404; but that of deaths fell from 515 to 320, the decline being attributed to the absence of cholera in the town. The returns in both cases, however, cannot be regarded as accurate, the rates recorded being much below the normal. The council's attention is drawn to the instructions issued in the latter part of paragraph 2 of G.O., No. 926 M., dated 17th May 1898, regarding the registration of vital statistics.

(5) *Sanitation.*—More than 13 per cent. of the allotment under this head was allowed to lapse for the reason stated in paragraph 30 of the Chairman's report, but the expenditure amounted to Rs. 4,255, or 21·9 per cent. of the current receipts. The Government is glad to observe, from paragraph 30 of the Chairman's report and paragraph 13 of the Collector's endorsement, that some attention was paid to the sanitation of the town; but paragraph 3 of the civil apothecary's report shows that much remains to be done and the council should exert itself to remedy the defects pointed out by him.

5. *General Remarks.*—The year closed with a balance of Rs. 1,639 or 8·4 per cent. of the current receipts.

The administration of the municipality during the year under review continued to be tolerably efficient; but medical relief, vaccination and registration of vital statistics demand increased attention.

AUGUST.

Administration Report.

Reviewing the — of the Karur Municipal Council for 1897-98.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following paper :—

From M.R.Ry. V. SUBBA RAO Avargal, B.A., Chairman, Municipal Council, Karúr, to the Secretary to Government, Local and Municipal Department (through the Revenue Officer of the Division, Coimbatore), dated 10th June 1898, No. 8.

I have the honour to submit the annual report on the working of the Karúr Municipality for the year 1897–98. The usual statements accompany.

I.—Constitution of the Council.

2. The council held 28 meetings as against 31 in the previous year and no meeting was adjourned for want of a quorum. The average attendance of the councillors shows an improvement, having been 6·14 against 5·51 in 1896–97. The terms of four councillors expired during the year, of whom three were re-nominated, including the Chairman. From the 9th January to 1st February 1898, the date of my re-appointment, the Division officer was the Chairman. By the transfer of the Tahsildar, an official seat was vacated, which was filled up by his successor in office. All the councillors are nominated. Under G.O., No. 2260 M., dated 15th October 1897, the town has been granted the privilege of electing four councillors, but the system has yet to be brought into force.

II.—Repairs.

3. Excluding the opening balance of Rs. 4,559–9–11, the total receipts amounted to Rs. 19,471–13–4, showing an advance of Rs. 1,624–4–6 over the previous year. The incidence of taxation per head of the population was with tolls Re. 1–0–1 and without tolls As. 9–10.

4. *Tax on Buildings—Collections.*—Rs. 4,509–1–0 as against Rs. 4,466–12–6. The net current demand was Rs. 4,592–15–0, or Rs. 140–4–6 more than in the previous year—an improvement which is due to a few new buildings including the taluk cutcherry. The town has extended to the west and the number of houses has risen from 2,071 to 2,226, including bazaars attached to houses which have been numbered separately for purposes of taxation. As much as 97·19 per cent. of the current year's demand was collected. The balance of Rs. 128–9–6 in statement IV-A includes the sum of Rs. 77–5–6 assessed on the new taluk cutcherry buildings, the payment of which was delayed by the Revenue Department pending the consideration of a claim for a proportionate reduction in the tax on account of the buildings having been completed and occupied only in December 1897. Excluding this sum, which has since been realised, the balance that remained uncollected for the year was Rs. 51–4–0. Of the arrears of the previous years, Rs. 45–9–0 were collected and Rs. 14–10–0 were written off as irrecoverable, leaving a balance of Rs. 14–2–6 relating to the last two previous years.

5. *Land Tax—Collections.*—Rs. 485–5–3 against Rs. 484–4–0. The demand for the year as finally settled was Rs. 472–12–3, being less than in the previous year by Rs. 3–8–9 owing to a few vacant sites having been utilized for new houses. The amount that remained uncollected in the current demand was Rs. 4–13–6 and under arrears of previous years Rs. 4–0–6. The amounts written off as irrecoverable both in the current and in the arrears demands were Rs. 6–8–0.

6. Coercive processes for the collection of taxes were issued in 204 cases, but property was actually distrained only in five instances; three persons were prosecuted under section 103 for non-payment.

7. The taxes on carts and animals showed improvement, the former from Rupees 826 to Rs. 842 and the latter from Rs. 477 to Rs. 489–4–0. The increase under animals is due to enhanced rates for horses under the amended Act. The tax on vehicles has fallen by Rs. 4, which calls for no remark.

8. *Tolls Collections.*—Rs. 4,197–11–0 against Rs. 4,037–9–3. The toll-gates were leased out for the unusually high sum of Rs. 6,205 against Rs. 5,899 in 1896–97, and the entire amount was collected within the year. A sum of Rs. 2,076–1–8 was paid to the district board as their share. The request made to Government for the reduction of the contribution from one third to a fourth of the receipts was not sanctioned (*vide* G.O., Mis. No. 1155 M., dated 10th May 1897).

9. *Ferry Rents.*—Ferry rents rose from Rs. 584–14–0 to Rs. 676–13–4. The revenue from this source is fluctuating from year to year, the gains in a year on account of floods during the festive seasons inducing the contractors to bid for larger sums and the losses resulting in a fall in the succeeding year. Under Act II of 1888 a sum of Rs. 65 was collected from a circus party and a theatrical proprietor.

10. *Produce of Lands and Gardens.*—Rs. 82–12–6 against Rs. 41–6–4. The cocoanut trees in the Dindigul, Nicholsonpet and Ambalagara streets were leased out for a larger sum which accounts for the increase.

11 *The sale-proceeds of street-refuse, night-soil, &c.*—Rs. 136–7–6 against Rupees 165–8–3. The fall of nearly Rs. 30 is due to the experiment of selling the rubbish in lots and by cart-loads as suggested in G.O., No. 1404 M., dated 20th August 1896, instead of letting it to a farmer for a fixed amount as in previous years. The rubbish is in great demand only in wet villages, where plantain gardens exist, and I find from the sales effected that nearly all the purchasers came from the villages of Vangal and Nerúr, which are at a distance of seven miles from the town. As nearly a third part of the sweepings remained unsold at the close of the year, I expect an increase in the year 1898–99. The night-soil depot fetched a small sum of Rs. 10 against Rs. 5 in the previous year. Its advantages as manure are beginning to be understood, but as yet only one or two ryots have come forward to purchase it. I expect that in course of time this item will improve and the objections which ryots generally feel to its use will gradually disappear.

12. *Fees from Educational Institutions.*—Rs. 2,857–5–9 against Rs. 2,520–5–3. There has been a steady increase under this head from year to year since 1894–95. The high and primary schools have been making satisfactory advance in their strength. The opening of the fifth form in the high school last January has contributed to the increase to the extent of Rs. 102.

13. *Income from Markets.*—Rs. 811–10–5 against Rs. 845–11–6. The fall is due to the butchers' stalls having been let out for Rs. 152 instead of Rs. 260 in the previous year. The establishment of a meat-shop beyond the municipal limits close to the town brought down the rent for want of competition.

14. *Income from Slaughter-house.*—Rs. 250–1–6 against Rs. 362–5–0. The fall is due to the practice of a few butchers slaughtering animals outside the town limits for the meat-shop mentioned above. The recent extension of the municipal limits is calculated to put down this evil.

15. *Distraint and Warrant Fees.*—Rs. 25–6–0 against Rs. 4–4–0. The provision in the amended Act that separate fees should be levied for distraints and warrants has resulted in the increase.

16. *Cart-stand Fees.*—Rs. 506–15–7 against Rs. 402–1–1. The municipal cart-stand was leased out for a larger sum than in the previous year owing to a keen competition among bidders.

17. *Fines under Municipal and other Acts.*—Rs. 297 against Rs. 218–12–0. The advance shows that the Bench Magistrates have paid attention to my remarks in the last administration report about the inadequacy of the fines imposed.

18. *Contributions from Government.*—Rs. 560–15–6 against Rs. 282–6–3. The increase is accounted for by the rise in the grants paid by Government on account of

the schools owing to the appointment of a drawing master and the supply of furniture to his class and to the school generally, which has improved in strength. A sum of Rs. 32 was received from Government on account of a latrine built for the schools. The nomination of an L.T. as headmaster resulted in an increase in the salary grant from a fourth to a third of the salary of the appointment.

19. *Contributions from Local Boards on account of Hospitals.*—Rs. 1,249–6–3 against Rs. 1,061–4–9. The rise is due to the higher salary to which the civil apothecary became entitled during the year and to certain improvements to the hospital buildings.

20. *Private Scavenging Fees.*—Rs. 327–2–0 against Rs. 255–8–0. The demand under this head rose from Rs. 255–11–0 to Rs. 328–4–0 as the number of houses brought under the system advanced from 210 to 242. Of the total number of houses in the town, 420 are shops attached to dwelling houses, 150 are huts belonging to the Paracheri and to the Pallars and 1,176 houses have no privies, the occupants resorting to public latrines. Only 480 houses have private latrines capable of being brought under the system, and of these as many as 315 are now served by the municipality.

21. Under other items appears a sum of Rs. 500 forming a portion of the amount of a decree obtained in respect of misappropriated sums.

22. The demand under all heads except conservancy receipts and market rents showed an improvement and except under house and land taxes, more than 97 per cent. of which was collected, there remained no arrears to be collected. The arrears shown in statement IV-B submitted with the administration report for 1896–97 against tolls, market rents, &c., have been removed from the statement as they form the subject of claims under a decree obtained against a former Chairman and are also recoverable from the security furnished by the late manager. They have been included under assets in the note to statement II.

III.—CHARGES.

23. The total expenditure for the year was Rs. 22,391–13–11 against Rupees 17,152–5–3; the major portion of the increase was under Grant 1 on account of the construction of an iron latrine of the type design, additional sheds to the weekly and daily markets and a building to the high school.

24. *Grant 1, Public Works.*—Rs. 6,326–11–2 against Rs 2,687–12–1. The amount expended on Communications—New and Repairs—was Rs. 2,251–15–6, being more than 53 per cent. of the revenue from tolls. The construction of stone revetments on road sides in Sreenivasapuram-Dindigul road and other streets form the new works which cost Rs. 995–12–1. Twelve streets underwent repairs at an expenditure of Rs. 1,256–3–5. The outlay on new buildings was Rs. 3,087–13–1. The growing strength of the high school, the opening of the fifth form and the establishment of a drawing class rendered it absolutely necessary to construct an additional building at an expenditure of Rs. 1,234–7–10. Some of the forms are accommodated yet in thatched sheds and a further extension has become necessary. The other new buildings were a tiled shed floored with Cuddapah slabs in the weekly market—hitherto a mere open enclosure—and an extension to the daily vegetable market costing Rupees 686–3–0 and an iron-covered latrine with eighteen seats of the type design at a cost of Rs. 903–14–5 in Melvaduga street. Three additional latrines for public use have also been provided. They are simple mud-wall enclosures and will be converted into pucka constructions as soon as funds permit. The sanction of the Sanitary Board has been obtained for works costing more than Rs. 200. The hospital buildings were repaired at a cost of Rs. 139–9–8.

The construction of the Car street drain so as to carry away the sewage from the Bazaar street into a garden which has been turned into a small sewage farm and the Melvaduga street minor drains involved an expenditure of Rs. 426–4–3. Improvements to the night-soil depot under instructions from the Sanitary Commissioner were made at a cost of Rs. 53–9–0. The acquisition of a place for the Ambalagara street latrine on payment of Rs. 136–4–0 and a slight increase of expenditure over the in thate in building the Melvaduga street latrine account for the excess of expenditure over the sanctioned allotments by Rs. 166–11–2.

25. *Grant 2, Education.*—Rs. 4,562–12–10 against Rs. 3,679–14–10. The total expenditure on account of education exceeded the outlay in the previous year by Rs. 882–14–0. The establishment of a drawing class with a master on Rs. 20, the appointment of two additional teachers to the municipal primary school on Rs. 10 each, an increase in the salary paid to the headmaster of the high school from Rs. 50 to Rs. 60, the opening of the fifth form with a teacher on Rs. 50 and a rise in the result grants paid by the municipality from Rs. 258–4–0 in 1896–97 to Rs. 348–12–0 account for the increase in the total outlay.

The strength of the high school has continued to advance, the number of boys having risen from 103 to 132. The opening of the fifth form is calculated to improve it still further. The average attendance improved from 77 to 111. Of 14 boys sent up for the Lower Secondary examination, 8 passed, 6 obtaining complete certificates and 2 of them in the first class. The tone and discipline of the school were reported to be satisfactory by the Inspector of Schools, Western Circle, in his last tabular inspection report. The financial condition was sound, the receipts having exceeded the expenditure by Rs. 164–11–4.

The municipal primary school showed an improvement in strength from 260 to 280. Two additional hands were entertained as the number of boys both in the first and in the second standards was found too large for a single teacher. The number of aided primary schools rose from 7 to 9 and the number of trained teachers has increased by two, while that of the unpassed teachers has fallen from 14 to 8. The results of the examination in all the standards except the infant are reported to be satisfactory. The net expenditure on education was Rs. 1,288–7–7 against Rs. 961–3–4 in the previous year, the whole of which amount was spent on primary education The total number of boys under instruction in the town rose from 660 to 771. Provision has been made in the budget for the year 1898–99 for training two teachers of the aided primary schools. The municipality continued to pay two scholarships to Non-Christian boys in the Wesleyan Mission Industrial school.

26. *Grant 3, Sanitation and Medical Services.*—Rs. 8,255–14–7 against Rupees 7,829–13–5.

27. *The Hospital and Dispensary.*—The charges under the establishment have risen from Rs. 2,014–12–10 to Rs. 2,192–8–2, owing mainly to the increase in the salary paid to the civil apothecary in charge of the main hospital. The number of patients shows a decline from 11,887 to 10,529 in the main hospital and from 14,207 to 11,344 in the female dispensary. The decline is explained in the reports herewith submitted by the apothecaries concerned, but the explanation is not admitted to be satisfactory by the District Medical Officer. The suggestion to erect a shed for contagious diseases outside the town has not been carried out as the council has not been able to find a suitable place within an easy distance from the town owing to the lands in the vicinity of Karur being under irrigation and any site chosen close to the town will remain damp during the greater part of the year. The best available ground will be selected after consultation with the District Medical and Sanitary Officer when he next visits the town. The suggestions of the apothecaries in regard to an additional servant, &c., will be considered when the next budget is prepared. It would be useful if they are made in December in separate communications instead of being mentioned in the annual reports. The midwife has shown better work; the number of cases of labour attended by her was 102 against 80 in the previous year, being a fourth of the number of births in the town. The female apothecary attended 14 cases, of which 12 were difficult. The dispensary for women and children is now located in a portion of the Government chattram. As the old taluk cutcherry building has since been transferred by the Government to the municipality for use as a rest-house, arrangement will be made to make the whole of the chattram available for the use of the dispensary. The total charges on account of medical aid have amounted to Rs. 3,546–14–8 against Rs. 3,475–7–9 in the year 1896–97.

28. *Vaccination.*—The total number of operations was 501, of which 417 were successful. The large number of failures was due to the inferior quality of the glycerine vaccine paste supplied from the district depot. The use of the lanoline

(*e*) The tabular statement given below shows the number treated as compared with the previous years :—

Years.	In-door.	Out-door.	Total.
1893-94	70	15,951	16,021
1894-95	93	15,801	15,894
1895-96	55	11,407	11,462
1896-97	65	11,822	11,887
1897-98	53	10,476	10,529

The decrease under in-patients is due to the less prevalence of cholera and malarial fevers during the year as compared with the previous year. The fall under out-patients is due to a great fall in admissions under malarial fevers and eye-diseases.

(*f*) There were five deaths among in-patients during the year—two died from injuries, one from malarial fever, one from anæmia and one from cholera.

(*g*) Seven hundred and twenty-seven operations were performed during the year with no deaths.

(*h*) The establishment is sufficient and efficient.

(*i*) No midwife is attached to the hospital, as a midwife is attached to the female dispensary in the town.

(*j*) The hospital compound is small. The contagious shed must be removed from the hospital compound to some convenient place.

KARÚR,
19*th April* 1898. (Signed)
Civil Apothecary.

No. 2108.

Forwarded to the Chairman, Municipal Council, Karúr. No satisfactory reason is given for the decrease in the out-patients.

COIMBATORE,
23*rd May* 1898. (Signed) D. SIMPSON, Surg.-Capt.,
Ag. Dist. Medl. and Sanitary Officer.

CONCISE Annual Report of the Female Dispensary, Karúr, for the year 1897–98.

Hospitals and Dispensaries.—(*a*) The dispensary is a portion of the municipal chattram and consists of three rooms. The accommodation is insufficient at present to make special arrangements for attending to gosha patients separately, but will be ample when the whole building is obtained for use as the dispensary.

(*b*) The portion of the building used as the dispensary is in fairly good order.

(*c*) The furniture is in good order except the small dispensary almirah, which requires some repairs and two shelves with separate locks.

(*d*) The District Surgeon at his last inspection has recommended that the whole chattram be given up to be used as dispensary, and this is expected to be done shortly.

(*e*) No money has been recovered from patients for medicines.

(*f*) The number of patients treated during the year 1897–98 was 11,344 (4,437 women and 6,907 children) with an average daily attendance of 75·28 against 14,207 treated in the previous year with an average daily attendance of 95·5.

(*g*) There are no in-patients maintained.

(*h*) The number of operations performed was 304. Of these, 269 were cured, 33 relieved and 2 died.

(*i*) The establishment consists of a compounder, midwife and water-woman. The midwife is often called away in the mornings to attend labour cases. It is then difficult for the only remaining female servant to manage all the surgical cases. It would be well if the services of another servant be obtained.

(*j*) The midwife attended to 102 cases of labour during the year (98 in the town and 4 in the surrounding villages). Fourteen cases of labour were conducted by the female apothecary, twelve of these being difficult and two natural.

(*k*) There has been a marked fall in the attendance during the year under report. This must be attributed to better health amongst the people and less prevalence of eye-diseases in particular.

Respectable patients of all classes continue to attend the hospital as before, and I am certain the institution is appreciated in spite of the fall in the attendance.

KARÚR,
15*th April* 1898. (Signed) A. W. WATSON,
Female Apothecary.

No. 2107.

Forwarded to the Chairman, Municipal Council, Karúr.

COIMBATORE,
23*rd May* 1898. (Signed) D. SIMPSON, Surg.-Capt.,
Ag. Dist. Medl. and Sanitary Officer.

Submitted to the Collector of Coimbatore. The report shows good work in most branches of administration ; the roads are in good order.

16*th June* 1898. (Signed) R. RAMACHANDRA ROW,
Deputy Collector.

Dis. No. 1799, Rev.

Forwarded.

2. The average attendance of councillors during the year 1897–98 slightly improved, and G.O., No. 859 M., dated 10th April 1897, appears to have had some effect. It may be pointed out that the Sub-Collector is an absentee member and can attend only occasionally. There was a slight decline in the number of meetings held by the council as compared with that in the preceding year.

3. Almost all the items of receipts showed increases over the preceding year. The collections under tax on buildings and lands up to 31st March 1898 were 97 and 98 per cent., respectively, of the current demand and are excellent. Although the arrear balances of these taxes outstanding on the 31st March 1898 were only Rupees 14–2–6 and Rs. 4–0–6, still these sums form 19 and 14 per cent. of the arrear demands and relate to the year before 1896–97. They should be realized in full without delay or written off the accounts, if irrecoverable.

4. Tolls fetched a larger sum than 1896–97, and it is satisfactory to note that there was no outstanding balance under that item as well as the items " Produce of cocoanut topes and lands," " Sale of street refuse, &c.," " Market rents," " Slaughter house," " Cart-stand fees " and " Private scavenging fees."

5. The income from the sale of street refuse, &c., fell below the actuals of the previous year, the reason for which is explained by the Chairman. It is encouraging to find that the use of night-soil as manure is beginning to be understood, and I hope with the Chairman that this source of revenue will develop in course of time.

6. A steady and progressive improvement is observed in the income from educational institutions and private scavenging system. The demand under the latter head rose to Rs. 328 and the system yielded a profit of Rs. 42.

7. The total expenditure for the year under report was Rs. 5,240 more than in 1896–97, and the greater portion of the increse was under Grant 1. The items of works on which the charges were incurred are detailed by the Chairman.

8. Although the outlay on the Town Roads—New Works and Repairs—formed 53 per cent. of the net toll receipts, the percentage thereof spent on the *maintenance* of road was about 30 only ; nevertheless the roads are stated by the Revenue Division officer to be in good order and this is my recollection also. I do not think mud-wall latrines are a good investment. It is preferable to use corrugated iron.

9. The increase in the expenditure under Grant 2 is explained by the Chairman. The opening of the fifth form in the high school, the addition of two schools to the number aided under primary schools and the improvement in the strength of the schools show that a good deal of attention is paid to education.

10. There was a decrease in the number of patients treated at the main hospital and at the female dispensary as compared with the preceding year, and the explanation of the apothecaries concerned is considered by the District Medical and Sanitary Officer as unsatisfactory.

11. Under vaccination the results did not compare favourably with 1896–97, the total number of operations performed being 501 against 558 in the previous year and the number of successful cases being 417 against 521. The number of cases of successful infantile vaccination was also only 282 or 69 per cent. of the total births registered against 342 in 1896–97. Consequently vaccination per case rose by Annas 1–4. The Chairman states that the fall in the number of successful cases is attributed by the vaccinator to the inferior quality of the vaccine paste. This is a matter which is occupying the attention of the District Medical and Sanitary Officer.

12. The ratios of births and deaths registered were 37 and 29 per mille of the town population against 36 and 4[illegible], respectively. The fall in the death ratio is accounted for by the absence of cholera in an epidemic form during the year of report, the deaths from this disease amounting to only 28 as against 146 in 1896–97. The proposal to erect sheds near the burial and burning grounds in order to improve the registration of deaths is a good one and is likely to be attended with better results than have been obtained hitherto.

13. Attention seems to have been paid to improving the sanitation of the town and to the removal of the defects pointed out to the council from time to time by inspecting officers of the Sanitary department. Still a suitable burning ground has not yet been provided, though the necessary steps to this end have been taken by the Chairman and the Government has in its order Mis. No. 879 (L. and M.), dated 6th May 1898, sanctioned the acquisition of land for the purpose.

14. In checking the accounts in this office, the following mistakes have been discovered, viz. :—

(*a*) *Page* 14 *of the Accounts.*— Particulars as to the total mileage of roads in the municipality and as to that under maintenance are not given in column 5 of Statement-II A, Part II, as required.

(*b*) *Page* 18.—The totals of columns 2 and 3 of Statement II-B are not entered.

(*c*) *Page* 21.—It is not understood how the salaries of the medical subordinate and the compounder came to be entered as Rs. 1,456 and Rs. 132, respectively, even if calculated at different rates, *i.e.*, at a lower rate up to and at higher rate from August and July 1897.

(*d*) *Pages* 36 *and* 37.—The average cost per pupil is not given in column 23 of Statement V-A, nor is the net cost to the municipality entered in column 22 of the statement opposite "Grand total of Colleges and Schools" appearing on page 39. The total expenditure given in column 21 of the same statement does not agree with the amounts shown in Statements II and II-A, Parts I and II.

(*e*) The number of houses served by the private scavenging agency is only 242 as per paragraph 20 of the Chairman's report and Statement XI and not 315 as stated in the penultimate line of the same paragraph, nor 240 as entered in paragraph 31 of the report.

(*f*) The items which show a falling off are not only conservancy receipts and market income as stated in paragraph 22 of the report, but also the income from slaughter-houses. There is still an uncollected arrear balance of Rs. 5 under "Ferry rent" relating presumably to 1895–96 and of Rs. 175 or almost 25 per cent. of the current demand of Rs. 702 under the same item for 1897–98.

(*g*) Sanctioned allotments were exceeded in certain instances under Grant 1.

(*h*) The net expenditure on education appears to have been Rs. 1,228–7–7, not Rs. 1,144–7–7 as stated in paragraph 25 of the Chairman's report.

(*i*) The increase under lighting contingencies is found to be Rs. 98–14–5 and not Rs. 98–8–5 as entered in paragraph 32 of the report.

COIMBATORE,
28*th June* 1898.

(Signed) P. THEENADAYALU,
for *Acting Collector.*

ORDER—No. 1402 M., dated 11th August 1898.

The receipts and charges of the Karúr Municipality for 1897–98 are compared below with the budget and revised estimates for the year and the actuals of 1896–97 :—

—	Actuals, 1896–97.	Budget estimate, 1897–98.	Revised estimate, 1897–98.	Actuals, 1897–98.

Advances Recoverable	52	..	..	6
Refunds	50	..	..	5
Grand Total ..	17,152	20,550	23,450	22,392
Balance	4,560	1,040	1,520	1,639

10. There was a decrease in the number of patients treated at the main hospital and at the female dispensary as compared with the preceding year, and the explanation of the apothecaries concerned is considered by the District Medical and Sanitary Officer as unsatisfactory.

11. Under vaccination the results did not compare favourably with 1896–97, the total number of operations performed being 501 against 558 in the previous year and the number of successful cases being 417 against 521. The number of cases of successful infantile vaccination was also only 282 or 69 per cent. of the total births registered against 342 in 1896–97. Consequently vaccination per case rose by Annas 1–4. The Chairman states that the fall in the number of successful cases is attributed by the vaccinator to the inferior quality of the vaccine paste. This is a matter which is occupying the attention of the District Medical and Sanitary Officer.

12. The ratios of births and deaths registered were 37 and 29 per mille of the town population against 36 and 4[illegible], respectively. The fall in the death ratio is accounted for by the absence of cholera in an epidemic form during the year of report, the deaths from this disease amounting to only 28 as against 146 in 1896–97. The proposal to erect sheds near the burial and burning grounds in order to improve the registration of deaths is a good one and is likely to be attended with better results than have been obtained hitherto.

13. Attention seems to have been paid to improving the sanitation of the town and to the removal of the defects pointed out to the council from time to time by inspecting officers of the Sanitary department. Still a suitable burning ground has not yet been provided, though the necessary steps to this end have been taken by the Chairman and the Government has in its order Mis. No. 879 (L. and M.), dated 6th May 1898, sanctioned the acquisition of land for the purpose.

14. In checking the accounts in this office, the following mistakes have been discovered, viz. :—

(*a*) *Page* 14 *of the Accounts.*—Particulars as to the total mileage of roads in the municipality and as to that under maintenance are not given in column 5 of Statement-II A, Part II, as required.

(*b*) *Page* 18.—The totals of columns 2 and 3 of Statement II-B are not entered.

(*c*) *Page* 21.—It is not understood how the salaries of the medical subordinate and the compounder came to be entered as Rs. 1,456 and Rs. 132, respectively, even if calculated at different rates, *i.e.*, at a lower rate up to and at higher rate from August and July 1897.

(*d*) *Pages* 36 *and* 37.—The average cost per pupil is not given in column 23 of Statement V-A, nor is the net cost to the municipality entered in column 22 of the statement opposite "Grand total of Colleges and Schools" appearing on page 39. The total expenditure given in column 21 of the same statement does not agree with the amounts shown in Statements II and II-A, Parts I and II.

(*e*) The number of houses served by the private scavenging agency is only 242 as per paragraph 20 of the Chairman's report and Statement XI and not 315 as stated in the penultimate line of the same paragraph, nor 240 as entered in paragraph 31 of the report.

(*f*) The items which show a falling off are not only conservancy receipts and market income as stated in paragraph 22 of the report, but also the income from slaughter-houses. There is still an uncollected arrear balance of Rs. 5 under "Ferry rent" relating presumably to 1895–96 and of Rs. 175 or almost 25 per cent. of the current demand of Rs. 702 under the same item for 1897–98.

(*g*) Sanctioned allotments were exceeded in certain instances under Grant 1.

(*h*) The net expenditure on education appears to have been Rs. 1,228–7–7, not Rs. 1,144–7–7 as stated in paragraph 25 of the Chairman's report.

(*i*) The increase under lighting contingencies is found to be Rs. 98–14–5 and not Rs. 98–8–5 as entered in paragraph 32 of the report.

2. The number of meetings held by the municipal council was 28 against 31 in 1896–97. The average attendance of non-official members improved and was fair, but that of officials declined again and was indifferent. The Collector will call the attention of the latter to G.O., No. 859 M., dated 10th April 1897.

3. *Receipts.*—(1) Owing to the assessment of a few new buildings, including the taluk cutcherry, the net current demand under the tax on houses showed an increase of Rs. 140, but the demand under the tax on lands remained almost stationary. The collections under these heads continued to be on the whole satisfactory. The municipal council's attention is, however, drawn to the Collector's remarks in paragraph 3 of his endorsement.

(2) There was an increase in the receipts under tolls, ferry rents, school and cart-stand fees, fines, grants from Government, contributions from local boards and miscellaneous—other items, but a decline under slaughter-house fees, which is explained in paragraph 14 of the Chairman's report.

(3) The number of houses served by the private scavenging agency again rose from 210 to 242, and the fees collected, which amounted to Rs. 327 against Rs. 256 in the previous year, more than covered the cost of the service. The Government trusts that the efforts made to extend this system will not be relaxed until all the private latrines in the town are brought under the control of the municipal agency.

4. *Expenditure*—(1) *Public Works.*—An additional building for the municipal high school was constructed at a cost of Rs. 1,234, an iron latrine of the type-design was erected for Rs. 904, and a sum of Rs. 532 was spent in putting up a tiled shed with Cuddapah slabs flooring in the weekly market. The total expenditure on communications amounted to Rs. 2,252 or 54·2 per cent. of the net municipal revenue from tolls, and the Revenue Divisional Officer reports that the town roads were maintained in good order. The attention of the municipal council is, however, drawn to the remarks of the Collector in paragraph 8 of his endorsement regarding the small proportion of the net municipal income from tolls spent on the *maintenance* of roads and the inexpediency of constructing mud-wall latrines.

(2) *Education.*—The net expenditure on primary education was Rs. 1,393, while secondary education was worked at a profit of Rs. 164 to the municipal council. Thus the total net expenditure on education amounted to Rs. 1,229 or 11·4 per cent. of the receipts from taxation. As in the previous year, the municipal council maintained a high school and a primary school on the salary system. The attendance at these institutions improved and the results of the public examinations continued to be fair. The municipal council also aided nine primary schools with result grants against seven in 1896–97. Owing to the increase in the number of aided schools, the attendance at these institutions also showed an improvement. The results of the grant examinations continued to be good and the allotment for result grants was fully utilized. It is satisfactory to note that the number of boys under instruction in the municipal and aided schools rose from 660 to 771 or nearly the whole of the male population of school-going age in the town.

(3) *Medical Relief.*—The number of in-patients treated at the municipal hospital fell from 65 to 53, and that of out-patients from 11,822 to 10,476. The decline in the latter case is attributed by the civil apothecary to the less prevalence of malarial fevers and eye diseases; but this explanation is considered by the District Medical and Sanitary Officer as unsatisfactory. The number of patients treated at the dispensary for women and children also fell by 2,863, and the explanation of this decline furnished in the female apothecary's report, viz., better health and less prevalence of eye diseases, cannot be considered as adequate. The midwife employed by the municipal council attended 102 cases of labour against 80 in the previous year—a satisfactory advance. In addition to this, the female apothecary attended fourteen cases of labour, or one more than in 1896–97.

(4) *Vaccination and Vital Statistics.*—The total number of vaccine operations performed during the year fell from 558 to 501 and owing to the inferior lymph supplied from the district depôt, the quality of the work also greatly deteriorated, the percentage of reported success being 83·2 against 93·4 in the previous year, and

the cost of each successful operation thus rose from As. 6–2 to As. 7–8. Infantile vaccination also showed retrogression, the total number of children under one year successfully vaccinated being 282 or 26·2 per mille of the population against 31·8 per mille in 1896–97 and a registered birth-rate of 37·6 per mille. This subject, therefore, demands the special attention of the council. The number of births registered rose from 386 to 404, but that of deaths fell from 515 to 320, the decline being attributed to the absence of cholera in the town. The returns in both cases, however, cannot be regarded as accurate, the rates recorded being much below the normal. The council's attention is drawn to the instructions issued on this subject in the latter part of paragraph 2 of G.O., No. 926 M., dated 17th May 1898, regarding the registration of vital statistics.

(5) *Sanitation.*—More than 13 per cent. of the allotment under this head was allowed to lapse for the reason stated in paragraph 30 of the Chairman's report, but the expenditure amounted to Rs. 4,255, or 21·9 per cent. of the current receipts. The Government is glad to observe from paragraph 30 of the Chairman's report and paragraph 13 of the Collector's endorsement that some attention was paid to the sanitation of the town, but paragraph 3 of the civil apothecary's report shows that much remains to be done and the council should exert itself to remedy the defects pointed by him.

5. *General Remarks.*—The year closed with a balance of Rs. 1,639 or 8·4 per cent. of the current receipts.

The administration of the municipality during the year under review continued to be tolerably efficient; but medical relief, vaccination and registration of vital statistics demand increased attention.

Kaffir mental administration Report 1857

No. M., JULY 1898.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From M.R.Ry. V. SUBBA ROW Avargal, B.A., Chairman, Municipal Council, Karúr, to the Secretary to Government, Local and Municipal Department (through the Revenue Officer of the Division, Coimbatore), dated 10th June 1898, No. 8.

I have the honour to submit the annual report on the working of the Karúr Municipality for the year 1897–98. The usual statements accompany.

I.—CONSTITUTION OF THE COUNCIL.

2. The council held 28 meetings as against 31 in the previous year and no meeting was adjourned for want of a quorum. The average attendance of the councillors shows an improvement, having been 6·14 against 5·51 in 1896–97. The terms of four councillors expired during the year, of whom three were re-nominated, including the Chairman. From the 9th January to 1st February 1898, the date of my re-appointment, the Division officer was the Chairman. By the transfer of the Tahsildar, an official seat was vacated, which was filled up by his successor in office. All the councillors are nominated. Under G.O., No. 2260 M., dated 15th October 1897, the town has been granted the privilege of electing four councillors, but the system has yet to be brought into force.

II.—REPAIRS.

3. Excluding the opening balance of Rs. 4,559–9–11, the total receipts amounted to Rs. 19,471–13–4, showing an advance of Rs. 1,624–4–6 over the previous year. The incidence of taxation per head of the population was with tolls Re. 1–0–1 and without tolls As. 9–10.

4. *Tax on Buildings—Collections.*—Rs. 4,509–1–0 as against Rs. 4,466–12–6. The net current demand was Rs. 4,592–15–0, or Rs. 140–4–6 more than in the previous year—an improvement which is due to a few new buildings including the taluk cutcherry. The town has extended to the west and the number of houses has risen from 2,071 to 2,226, including bazaars attached to houses which have been numbered separately for purposes of taxation. As much as 97·19 per cent. of the current year's demand was collected. The balance of Rs. 128–9–6 in statement IV-A includes the sum of Rs. 77–5–6 assessed on the new taluk cutcherry buildings, the payment of which was delayed by the Revenue Department pending the consideration of a claim for a proportionate reduction in the tax on account of the buildings having been completed and occupied only in December 1897. Excluding this sum, which has since been realised, the balance that remained uncollected for the year was Rs. 51–4–0. Of the arrears of the previous years, Rs. 45–9–0 were collected and Rs. 14–10–0 were written off as irrecoverable, leaving a balance of Rs. 14–2–6 relating to the last two previous years.

5. *Land Tax—Collections.*—Rs. 485–5–3 against Rs. 484–4–0. The demand for the year as finally settled was Rs. 472–12–3, being less than in the previous year by Rs. 3–8–9 owing to a few vacant sites having been utilized for new houses. The amount that remained uncollected in the current demand was Rs. 4–13–6 and under arrears of previous years Rs. 4–0–6. The amounts written off as irrecoverable both in the current and in the arrears demands were Rs. 6–8–0.

6. Coercive processes for the collection of taxes were issued in 204 cases, but property was actually distrained only in five instances; three persons were prosecuted under section 103 for non-payment.

7. The taxes on carts and animals showed improvement, the former from Rupees 826 to Rs. 842 and the latter from Rs. 477 to Rs. 489–4–0. The increase under animals is due to enhanced rates for horses under the amended Act. The tax on vehicles has fallen by Rs. 4, which calls for no remark.

8. *Tolls Collections.*—Rs. 4,197–11–0 against Rs. 4,037–9–3. The toll-gates were leased out for the unusually high sum of Rs. 6,205 against Rs. 5,899 in 1896–97, and the entire amount was collected within the year. A sum of Rs. 2,076–1–8 was paid to the district board as their share. The request made to Government for the reduction of the contribution from one third to a fourth of the receipts was not sanctioned (*vide* G.O., Mis. No. 1155 M., dated 10th May 1897).

9. *Ferry Rents.*—Ferry rents rose from Rs. 584–14–0 to Rs. 676–13–4. The revenue from this source is fluctuating from year to year, the gains in a year on account of floods during the festive seasons inducing the contractors to bid for larger sums and the losses resulting in a fall in the succeeding year. Under Act II of 1888 a sum of Rs. 65 was collected from a circus party and a theatrical proprietor.

10. *Produce of Lands and Gardens.*—Rs. 82–12–6 against Rs. 41–6–4. The cocoanut trees in the Dindigul, Nicholsonpet and Ambalagara streets were leased out for a larger sum which accounts for the increase.

11. *The sale-proceeds of street-refuse, night-soil, &c.*—Rs. 136–7–6 against Rupees 165–8–3. The fall of nearly Rs. 30 is due to the experiment of selling the rubbish in lots and by cart-loads as suggested in G.O., No. 1404 M., dated 20th August 1896, instead of letting it to a farmer for a fixed amount as in previous years. The rubbish is in great demand only in wet villages, where plantain gardens exist, and I find from the sales effected that nearly all the purchasers came from the villages of Vangal and Nerúr, which are at a distance of seven miles from the town. As nearly a third part of the sweepings remained unsold at the close of the year, I expect an increase in the year 1898–99. The night-soil depot fetched a small sum of Rs. 10 against Rs. 5 in the previous year. Its advantages as manure are beginning to be understood, but as yet only one or two ryots have come forward to purchase it. I expect that in course of time this item will improve and the objections which ryots generally feel to its use will gradually disappear.

12. *Fees from Educational Institutions.*—Rs. 2,857–5–9 against Rs. 2,520–5–3. There has been a steady increase under this head from year to year since 1894–95. The high and primary schools have been making satisfactory advance in their strength. The opening of the fifth form in the high school last January has contributed to the increase to the extent of Rs. 102.

13. *Income from Markets.*—Rs. 811–10–5 against Rs. 845–11–6. The fall is due to the butchers' stalls having been let out for Rs. 152 instead of Rs. 260 in the previous year. The establishment of a meat-shop beyond the municipal limits close to the town brought down the rent for want of competition.

14. *Income from Slaughter-house.*—Rs. 259–1–6 against Rs. 362–5–0. The fall is due to the practice of a few butchers slaughtering animals outside the town limits for the meat-shop mentioned above. The recent extension of the municipal limits is calculated to put down this evil.

15. *Distraint and Warrant Fees.*—Rs. 25–6–0 against Rs. 4–4–0. The provision in the amended Act that separate fees should be levied for distraints and warrants has resulted in the increase.

16. *Cart-stand Fees.*—Rs. 506–15–7 against Rs. 402–1–1. The municipal cart-stand was leased out for a larger sum than in the previous year owing to a keen competition among bidders.

17. *Fines under Municipal and other Acts.*—Rs. 297 against Rs. 218–12–0. The advance shows that the Bench Magistrates have paid attention to my remarks in the last administration report about the inadequacy of the fines imposed.

18. *Contributions from Government.*—Rs. 560-15-6 against Rs. 282-6-3. The increase is accounted for by the rise in the grants paid by Government on account of the schools owing to the appointment of a drawing master and the supply of furniture to his class and to the school generally, which has improved in strength. A sum of Rs. 32 was received from Government on account of a latrine built for the schools. The nomination of an L.T. as headmaster resulted in an increase in the salary grant from a fourth to a third of the salary of the appointment.

19. *Contributions from Local Boards on account of Hospitals.*—Rs. 1,249-6-3 against Rs. 1,061-4-9. The rise is due to the higher salary to which the civil apothecary became entitled during the year and to certain improvements to the hospital buildings.

20. *Private Scavenging Fees.*—Rs. 327-2-0 against Rs. 255-8-0. The demand under this head rose from Rs. 255-11-0 to Rs. 328-4-0 as the number of houses brought under the system advanced from 210 to 242. Of the total number of houses in the town, 420 are shops attached to dwelling houses, 150 are huts belonging to the Paracheri and to the Pallars and 1,176 houses have no privies, the occupants resorting to public latrines. Only 480 houses have private latrines capable of being brought under the system, and of these as many as 315 are now served by the municipality.

21. Under other items appears a sum of Rs. 500 forming a portion of the amount of a decree obtained in respect of misappropriated sums.

22. The demand under all heads except conservancy receipts and market rents showed an improvement and except under house and land taxes, more than 97 per cent. of which was collected, there remained no arrears to be collected. The arrears shown in statement IV-B submitted with the administration report for 1896-97 against tolls, market rents, &c., have been removed from the statement as they form the subject of claims under a decree obtained against a former Chairman and are also recoverable from the security furnished by the late manager. They have been included under assets in a note to statement II.

III.—Charges.

23. The total expenditure for the year was Rs. 22,391-13-11 against Rupees 17,152-5-3; the major portion of the increase was under Grant 1 on account of the construction of an iron latrine of the type design, additional sheds to the weekly and daily markets and a building to the high school.

24. *Grant 1, Public Works.*—Rs. 6,326-11-2 against Rs. 2,687-12-1. The amount expended on Communications—New and Repairs—was Rs. 2,251-15-6, being more than 53 per cent. of the revenue from tolls. The construction of stone revetments on road sides in Sreenivasapuram-Dindigul road and other streets form the new works which cost Rs. 995-12-1. Twelve streets underwent repairs at an expenditure of Rs. 1,256-3-5. The outlay on new buildings was Rs. 3,087-13-1. The growing strength of the high school, the opening of the fifth form and the establishment of a drawing class rendered it absolutely necessary to construct an additional building at an expenditure of Rs. 1,234-7-10. Some of the forms are accommodated yet in thatched sheds and a further extension has become necessary. The other new buildings were a tiled shed floored with Cuddapah slabs in the weekly market—hitherto a mere open enclosure—and an extension to the daily vegetable market costing Rupees 686-3-0 and an iron-covered latrine with eighteen seats of the type design at a cost of Rs. 903-14-5 in Melvaduga street. Three additional latrines for public use have also been provided. They are simple mud-wall enclosures and will be converted into pucka constructions as soon as funds permit. The sanction of the Sanitary Board has been obtained for works costing more than Rs. 200. The hospital buildings were repaired at a cost of Rs. 139-9-8.

The construction of the Car street drain so as to carry away the sewage from the Bazaar street into a garden which has been turned into a small sewage farm and the Melvaduga street minor drains involved an expenditure of Rs. 426-4-3. Improvements to the night-soil depot under instructions from the Sanitary Commissioner were made at a cost of Rs. 53-9-0. The acquisition of a place for the Ambalagara street latrine on payment of Rs. 136-4-0 and a slight increase of expenditure over the estimate in building the Melvaduga street latrine account for the excess of expenditure over the sanctioned allotments by Rs. 166-11-2.

25. *Grant 2, Education.*—Rs. 4,562-12-10 against Rs. 3,679-14-10. The total expenditure on account of education exceeded the outlay in the previous year by Rs. 882-14-0. The establishment of a drawing class with a master on Rs. 20, the appointment of two additional teachers to the municipal primary school on Rs. 10 each, an increase in the salary paid to the headmaster of the high school from Rs. 50 to Rs. 60, the opening of the fifth form with a teacher on Rs. 50 and a rise in the results grants paid by the municipality from Rs. 258-4-0 in 1896-97 to Rs. 348-12-0 account for the increase in the total outlay.

The strength of the high school has continued to advance, the number of boys having risen from 103 to 132. The opening of the fifth form is calculated to improve it still further. The average attendance improved from 77 to 111. Of 14 boys sent up for the Lower Secondary examination, 8 passed, 6 obtaining complete certificates and 2 of them in the first class. The tone and discipline of the school were reported to be satisfactory by the Inspector of Schools, Western Circle, in his last tabular inspection report. The financial condition was sound, the receipts having exceeded the expenditure by Rs. 164-11-4.

The municipal primary school showed an improvement in strength from 260 to 280. Two additional hands were entertained as the number of boys both in the first and in the second standards was found too large for a single teacher. The number of aided primary schools rose from 7 to 9 and the number of trained teachers has increased by two, while that of the unpassed teachers has fallen from 14 to 8. The results of the examination in all the standards except the infant are reported to be satisfactory. The net expenditure on education was Rs. 1,144-7-7 against Rs. 961-3-4 in the previous year, the whole of which amount was spent on primary education. The total number of boys under instruction in the town rose from 660 to 771. Provision has been made in the budget for the year 1898-99 for training two teachers of the aided primary schools. The municipality continued to pay two scholarships to Non-Christian boys in the Wesleyan Mission Industrial school.

26. *Grant 3, Sanitation and Medical Services.*—Rs. 8,255-14-7 against Rupees 7,829-13-5.

27. *The Hospital and Dispensary.*—The charges under the establishment have risen from Rs. 2,014-12-10 to Rs. 2,192-8-2, owing mainly to the increase in the salary paid to the civil apothecary in charge of the main hospital. The number of patients shows a decline from 11,887 to 10,529 in the main hospital and from 14,207 to 11,344 in the female dispensary. The decline is explained in the reports herewith submitted by the apothecaries concerned, but the explanation is not admitted to be satisfactory by the District Medical Officer. The suggestion to erect a shed for contagious diseases outside the town has not been carried out as the council has not been able to find a suitable place within an easy distance from the town owing to the lands in the vicinity of Karúr being under irrigation and any site chosen close to the town will remain damp during the greater part of the year. The best available ground will be selected after consultation with the District Medical and Sanitary Officer when he next visits the town. The suggestions of the apothecaries in regard to an additional servant, &c., will be considered when the next budget is prepared. It would be useful if they are made in December in separate communications instead of being mentioned in the annual reports. The midwife has shown better work; the number of cases of labour attended by her was 102 against 80 in the previous year, being a fourth of the number of births in the town. The female apothecary attended 14 cases, of which 12 were difficult. The dispensary for women and children is now located in a portion of the Government chattram. As the old taluk cutcherry building has since been transferred by the Government to the municipality for use as a rest-house, arrangement will be made to make the whole of the chattram available for the use of the dispensary. The total charges on account of medical aid have amounted to Rs. 3,546-14-8 against Rs. 3,475-7-9 in the year 1896-97.

28. *Vaccination.*—The total number of operations was 501, of which 417 were successful. The large number of failures was due to the inferior quality of the glycerine vaccine paste supplied from the district depot. The use of the lanoline paste in the current year is expected to show better results. Under infantile vaccination the number successfully vaccinated was 282 against 342 in the previous year.

18. *Contributions from Government.*—Rs. 560-15-6 against Rs. 282-6-3. The increase is accounted for by the rise in the grants paid by Government on account of the schools owing to the appointment of a drawing master and the supply of furniture to his class and to the school generally, which has improved in strength. A sum of Rs. 32 was received from Government on account of a latrine built for the schools. The nomination of an L.T. as headmaster resulted in an increase in the salary grant from a fourth to a third of the salary of the appointment.

19. *Contributions from Local Boards on account of Hospitals.*—Rs. 1,249-6-3 against Rs. 1,061-4-9. The rise is due to the higher salary to which the civil apothecary became entitled during the year and to certain improvements to the hospital buildings.

20. *Private Scavenging Fees.*—Rs. 327-2-0 against Rs. 255-8-0. The demand under this head rose from Rs. 255-11-0 to Rs. 328-4-0 as the number of houses brought under the system advanced from 210 to 242. Of the total number of houses in the town, 420 are shops attached to dwelling houses, 150 are huts belonging to the Paracheri and to the Pallars and 1,176 houses have no privies, the occupants resorting to public latrines. Only 480 houses have private latrines capable of being brought under the system, and of these as many as 315 are now served by the municipality.

21. Under other items appears a sum of Rs. 500 forming a portion of the amount of a decree obtained in respect of misappropriated sums.

22. The demand under all heads except conservancy receipts and market rents showed an improvement and except under house and land taxes, more than 97 per cent. of which was collected, there remained no arrears to be collected. The arrears shown in statement IV-B submitted with the administration report for 1896-97 against tolls, market rents, &c., have been removed from the statement as they form the subject of claims under a decree obtained against a former Chairman and are also recoverable from the security furnished by the late manager. They have been included under assets in a note to statement II.

III.—Charges.

23. The total expenditure for the year was Rs. 22,391-13-11 against Rupees 17,152-5-3; the major portion of the increase was under Grant 1 on account of the construction of an iron latrine of the type design, additional sheds to the weekly and daily markets and a building to the high school.

24. *Grant 1, Public Works.*—Rs. 6,326-11-2 against Rs. 2,687-12-1. The amount expended on Communications—New and Repairs—was Rs. 2,251-15-6, being more than 53 per cent. of the revenue from tolls. The construction of stone revetments on road sides in Sreenivasapuram-Dindigul road and other streets form the new works which cost Rs. 995-12-1. Twelve streets underwent repairs at an expenditure of Rs. 1,256-3-5. The outlay on new buildings was Rs. 3,087-13-1. The growing strength of the high school, the opening of the fifth form and the establishment of a drawing class rendered it absolutely necessary to construct an additional building at an expenditure of Rs. 1,234-7-10. Some of the forms are accommodated yet in thatched sheds and a further extension has become necessary. The other new buildings were a tiled shed floored with Cuddapah slabs in the weekly market—hitherto a mere open enclosure—and an extension to the daily vegetable market costing Rupees 686-3-0 and an iron-covered latrine with eighteen seats of the type design at a cost of Rs. 903-14-5 in Melvaduga street. Three additional latrines for public use have also been provided. They are simple mud-wall enclosures and will be converted into pucka constructions as soon as funds permit. The sanction of the Sanitary Board has been obtained for works costing more than Rs. 200. The hospital buildings were repaired at a cost of Rs. 139-9-8.

The construction of the Car street drain so as to carry away the sewage from the Bazaar street into a garden which has been turned into a small sewage farm and the Melvaduga street minor drains involved an expenditure of Rs. 426-4-3. Improvements to the night-soil depot under instructions from the Sanitary Commissioner were made at a cost of Rs. 53-9-0. The acquisition of a place for the Ambalagara street latrine on payment of Rs. 136-4-0 and a slight increase of expenditure over the estimate in building the Melvaduga street latrine account for the excess of expenditure over the sanctioned allotments by Rs. 166-11-2.

25. *Grant 2, Education.*—Rs. 4,562-12-10 against Rs. 3,679-14-10. The total expenditure on account of education exceeded the outlay in the previous year by Rs. 882-14-0. The establishment of a drawing class with a master on Rs. 20, the appointment of two additional teachers to the municipal primary school on Rs. 10 each, an increase in the salary paid to the headmaster of the high school from Rs. 50 to Rs. 60, the opening of the fifth form with a teacher on Rs. 50 and a rise in the results grants paid by the municipality from Rs. 258-4-0 in 1896-97 to Rs. 348-12-0 account for the increase in the total outlay.

The strength of the high school has continued to advance, the number of boys having risen from 103 to 132. The opening of the fifth form is calculated to improve it still further. The average attendance improved from 77 to 111. Of 14 boys sent up for the Lower Secondary examination, 8 passed, 6 obtaining complete certificates and 2 of them in the first class. The tone and discipline of the school were reported to be satisfactory by the Inspector of Schools, Western Circle, in his last tabular inspection report. The financial condition was sound, the receipts having exceeded the expenditure by Rs. 164-11-4.

The municipal primary school showed an improvement in strength from 260 to 280. Two additional hands were entertained as the number of boys both in the first and in the second standards was found too large for a single teacher. The number of aided primary schools rose from 7 to 9 and the number of trained teachers has increased by two, while that of the unpassed teachers has fallen from 14 to 8. The results of the examination in all the standards except the infant are reported to be satisfactory. The net expenditure on education was Rs. 1,144-7-7 against Rs. 961-3-4 in the previous year, the whole of which amount was spent on primary education The total number of boys under instruction in the town rose from 660 to 771. Provision has been made in the budget for the year 1898-99 for training two teachers of the aided primary schools. The municipality continued to pay two scholarships to Non-Christian boys in the Wesleyan Mission Industrial school.

26. *Grant 3, Sanitation and Medical Services.*—Rs. 8,255-14-7 against Rupees 7,829-13-5.

27. *The Hospital and Dispensary.*—The charges under the establishment have risen from Rs. 2,014-12-10 to Rs. 2,192-8-2 owing mainly to the increase in the salary paid to the civil apothecary in charge of the main hospital. The number of patients shows a decline from 11,887 to 10,529 in the main hospital and from 14,207 to 11,344 in the female dispensary. The decline is explained in the reports herewith submitted by the apothecaries concerned, but the explanation is not admitted to be satisfactory by the District Medical Officer. Three additional latrines for public use have also been provided. They are simple mud-wall enclosures and will be converted into pucka constructions as soon as funds permit. The sanction of the Sanitary Board has been obtained for works costing more than Rs. 200. The hospital buildings were repaired at a cost of Rs. 139–9–8.

The construction of the Car street drain so as to carry away the sewage from the Bazaar street into a garden which has been turned into a small sewage farm and the Melvaduga street minor drains involved an expenditure of Rs. 426–4–3. Improvements to the night-soil depot under instructions from the Sanitary Commissioner were made at a cost of Rs. 53–9–0. The acquisition of a place for the Ambalagara street latrine on payment of Rs. 136–4–0 and a slight increase of expenditure over the estimate in building the Melvaduga street latrine account for the excess of expenditure over the sanctioned allotments by Rs. 166–11–2.

25. *Grant 2, Education.*—Rs. 4,562–12–10 against Rs. 3,679–14–10. The total expenditure on account of education exceeded the outlay in the previous year by Rs. 882–14–0. The establishment of a drawing class with a master on Rs. 20, the appointment of two additional teachers to the municipal primary school on Rs. 10 each, an increase in the salary paid to the headmaster of the high school from Rs. 50 to Rs. 60, the opening of the fifth form with a teacher on Rs. 50 and a rise in the results grants paid by the municipality from Rs. 258–4–0 in 1896–97 to Rs. 348–12–0 account for the increase in the total outlay.

The strength of the high school has continued to advance, the number of boys having risen from 103 to 132. The opening of the fifth form is calculated to improve it still further. The average attendance improved from 77 to 111. Of 14 boys sent up for the Lower Secondary examination, 8 passed, 6 obtaining complete certificates and 2 of them in the first class. The tone and discipline of the school were reported to be satisfactory by the Inspector of Schools, Western Circle, in his last tabular inspection report. The financial condition was sound, the receipts having exceeded the expenditure by Rs. 164–11–4.

The municipal primary school showed an improvement in strength from 260 to 280. Two additional hands were entertained as the number of boys both in the first and in the second standards was found too large for a single teacher. The number of aided primary schools rose from 7 to 9 and the number of trained teachers has increased by two, while that of the unpassed teachers has fallen from 14 to 8. The results of the examination in all the standards except the infant are reported to be satisfactory. The net expenditure on education was Rs. 1,144–7–7 against Rs. 961–3–4 in the previous year, the whole of which amount was spent on primary education. The total number of boys under instruction in the town rose from 660 to 771. Provision has been made in the budget for the year 1898–99 for training two teachers of the aided primary schools. The municipality continued to pay two scholarships to Non-Christian boys in the Wesleyan Mission Industrial school.

26. *Grant 3, Sanitation and Medical Services.*—Rs. 8,255–14–7 against Rupees 7,829–13–5.

27. *The Hospital and Dispensary.*—The charges under the establishment have risen from Rs. 2,014–12–10 to Rs. 2,192–8–2, owing mainly to the increase in the salary paid to the civil apothecary in charge of the main hospital. The number of patients shows a decline from 11,887 to 10,529 in the main hospital and from 14,207 to 11,344 in the female dispensary. The decline is explained in the reports herewith submitted by the apothecaries concerned, but the explanation is not admitted to be satisfactory by the District Medical Officer. The suggestion to erect a shed for contagious diseases outside the town has not been carried out as the council has not been able to find a suitable place within an easy distance from the town owing to the lands in the vicinity of Karur being under irrigation and any site chosen close to the town will remain damp during the greater part of the year. The best available ground will be selected after consultation with the District Medical and Sanitary Officer when he next visits the town. The suggestions of the apothecaries in regard to an additional servant, &c., will be considered when the next budget is prepared. It would be useful if they are made in December in separate communications instead of being mentioned in the annual reports. The midwife has shown better work; the number of cases of labour attended by her was 102 against 80 in the previous year, being a fourth of the number of births in the town. The female apothecary attended 14 cases, of which 12 were difficult. The dispensary for women and children is now located in a portion of the Government chattram. As the old taluk cutcherry building has since been transferred by the Government to the municipality for use as a rest-house, arrangement will be made to make the whole of the chattram available for the use of the dispensary. The total charges on account of medical aid have amounted to Rs. 3,546–14–8 against Rs. 3,475–7–9 in the year 1896–97.

28. *Vaccination.*—The total number of operations was 501, of which 417 were successful. The large number of failures was due to the inferior quality of the glycerine vaccine paste supplied from the district depot. The use of the lanoline paste in the current year is expected to show better results. Under infantile vaccination the number successfully vaccinated was 282 against 342 in the previous year.

18. *Contributions from Government.*—Rs. 560-15-6 against Rs. 282-6-3. The increase is accounted for by the rise in the grants paid by Government on account of the schools owing to the appointment of a drawing master and the supply of furniture to his class and to the school generally, which has improved in strength. A sum of Rs. 32 was received from Government on account of a latrine built for the schools. The nomination of an L.T. as headmaster resulted in an increase in the salary grant from a fourth to a third of the salary of the appointment.

19. *Contributions from Local Boards on account of Hospitals.*—Rs. 1,249-6-3 against Rs. 1,061-4-9. The rise is due to the higher salary to which the civil apothecary became entitled during the year and to certain improvements to the hospital buildings.

20. *Private Scavenging Fees.*—Rs. 327-2-0 against Rs. 255-8-0. The demand under this head rose from Rs. 255-11-0 to Rs. 328-4-0 as the number of houses brought under the system advanced from 210 to 242. Of the total number of houses in the town, 420 are shops attached to dwelling houses, 150 are huts belonging to the Paracheri and to the Pallars and 1,176 houses have no privies, the occupants resorting to public latrines. Only 480 houses have private latrines capable of being brought under the system, and of these as many as 315 are now served by the municipality.

21. Under other items appears a sum of Rs. 500 forming a portion of the amount of a decree obtained in respect of misappropriated sums.

22. The demand under all heads except conservancy receipts and market rents showed an improvement and except under house and land taxes, more than 97 per cent. of which was collected, there remained no arrears to be collected. The arrears shown in statement IV-B submitted with the administration report for 1896-97 against tolls, market rents, &c., have been removed from the statement as they form the subject of claims under a decree obtained against a former Chairman and are also recoverable from the security furnished by the late manager. They have been included under assets in a note to statement II.

III.—Charges.

23. The total expenditure for the year was Rs. 22,391-13-11 against Rupees 17,152-5-3; the major portion of the increase was under Grant 1 on account of the construction of an iron latrine of the type design, additional sheds to the weekly and daily markets and a building to the high school.

24. *Grant 1, Public Works.*—Rs. 6,326-11-2 against Rs. 2,687-12-1. The amount expended on Communications—New and Repairs—was Rs. 2,251-15-6, being more than 53 per cent. of the revenue from tolls. The construction of stone revetments on road sides in Sreenivasapuram-Dindigul road and other streets form the new works which cost Rs. 995-12-1. Twelve streets underwent repairs at an expenditure of Rs. 1,256-3-5. The outlay on new buildings was Rs. 3,087-13-1. The growing strength of the high school, the opening of the fifth form and the establishment of a drawing class rendered it absolutely necessary to construct an additional building at an expenditure of Rs. 1,234-7-10. Some of the forms are accommodated yet in thatched sheds and a further extension has become necessary. The other new buildings were a tiled shed floored with Cuddapah slabs in the weekly market—hitherto a mere open enclosure—and an extension to the daily vegetable market costing Rupees 686-3-0 and an iron-covered latrine with eighteen seats of the type design at a cost of Rs. 903-14-5 in Melvaduga street. Three additional latrines for public use have also been provided. They are simple mud-wall enclosures and will be converted into pucka constructions as soon as funds permit. The sanction of the Sanitary Board has been obtained for works costing more than Rs. 200. The hospital buildings were repaired at a cost of Rs. 139-9-8.

The construction of the Car street drain so as to carry away the sewage from the Bazaar street into a garden which has been turned into a small sewage farm and the Melvaduga street minor drains involved an expenditure of Rs. 426-4-3. Improvements to the night-soil depot under instructions from the Sanitary Commissioner were made at a cost of Rs. 53-9-0. The acquisition of a place for the Ambalagara street latrine on payment of Rs. 136-4-0 and a slight increase of expenditure over the estimate in building the Melvaduga street latrine account for the excess of expenditure over the sanctioned allotments by Rs. 166-11-2.

25. *Grant 2, Education.*—Rs. 4,562-12-10 against Rs. 3,679-14-10. The total expenditure on account of education exceeded the outlay in the previous year by Rs. 882-14-0. The establishment of a drawing class with a master on Rs. 20, the appointment of two additional teachers to the municipal primary school on Rs. 10 each, an increase in the salary paid to the headmaster of the high school from Rs. 50 to Rs. 60, the opening of the fifth form with a teacher on Rs. 50 and a rise in the results grants paid by the municipality from Rs. 258-4-0 in 1896-97 to Rs. 348-12-0 account for the increase in the total outlay.

The strength of the high school has continued to advance, the number of boys having risen from 103 to 132. The opening of the fifth form is calculated to improve it still further. The average attendance improved from 77 to 111. Of 14 boys sent up for the Lower Secondary examination, 8 passed, 6 obtaining complete certificates and 2 of them in the first class. The tone and discipline of the school were reported to be satisfactory by the Inspector of Schools, Western Circle, in his last tabular inspection report. The financial condition was sound, the receipts having exceeded the expenditure by Rs. 164-11-4.

The municipal primary school showed an improvement in strength from 260 to 280. Two additional hands were entertained as the number of boys both in the first and in the second standards was found too large for a single teacher. The number of aided primary schools rose from 7 to 9 and the number of trained teachers has increased by two, while that of the unpassed teachers has fallen from 14 to 8. The results of the examination in all the standards except the infant are reported to be satisfactory. The net expenditure on education was Rs. 1,144-7-7 against Rs. 961-3-4 in the previous year, the whole of which amount was spent on primary education The total number of boys under instruction in the town rose from 660 to 771. Provision has been made in the budget for the year 1898-99 for training two teachers of the aided primary schools. The municipality continued to pay two scholarships to Non-Christian boys in the Wesleyan Mission Industrial school.

26. *Grant 3, Sanitation and Medical Services.*—Rs. 8,255-14-7 against Rupees 7,829-13-5.

27. *The Hospital and Dispensary.*—The charges under the establishment have risen from Rs. 2,014-12-10 to Rs. 2,192-8-2 owing mainly to the increase in the salary paid to the civil apothecary in charge of the main hospital. The number of patients shows a decline from 11,887 to 10,529 in the main hospital and from 14,207 to 11,344 in the female dispensary. The decline is explained in the reports herewith submitted by the apothecaries concerned, but the explanation is not admitted to be satisfactory by the District Medical Officer. The suggestion to erect a shed for contagious diseases outside the town has not been carried out as the council has not been able to find a suitable place within an easy distance from the town owing to the lands in the vicinity of Karur being under irrigation and any site chosen close to the town will remain damp during the greater part of the year. The best available ground will be selected after consultation with the District Medical and Sanitary Officer when he next visits the town. The suggestions of the apothecaries in regard to an additional servant, &c., will be considered when the next budget is prepared. It would be useful if they are made in December in separate communications instead of being mentioned in the annual reports. The midwife has shown better work; the number of cases of labour attended by her was 102 against 80 in the previous year, being a fourth of the number of births in the town. The female apothecary attended 14 cases, of which 12 were difficult. The dispensary for women and children is now located in a portion of the Government chattram. As the old taluk cutcherry building has since been transferred by the Government to the municipality for use as a rest-house, arrangement will be made to make the whole of the chattram available for the use of the dispensary. The total charges on account of medical aid have amounted to Rs. 3,546-14-8 against Rs. 3,475-7-9 in the year 1896-97.

28. *Vaccination.*—The total number of operations was 501, of which 417 were successful. The large number of failures was due to the inferior quality of the glycerine vaccine paste supplied from the district depot. The use of the lanoline paste in the current year is expected to show better results. Under infantile vaccination the number successfully vaccinated was 282 against 342 in the previous year.

The vaccinator attributes this fall chiefly to the quality of the vaccine paste. There were 78 cases of re-vaccination. As usual a thorough search was made from house to house and an enumeration taken of all unprotected children which resulted in the vaccination of 98 children in two days. The municipal council has fixed a minimum of 38 for the vaccinator for each month seeing that the total births in a year come to about 400 and has ruled that for every case falling short of the minimum a fine of one anna should be imposed. The number of persons prosecuted for failure to have their children vaccinated was 8. The average cost of vaccination per case rose to As. 7-6 from As. 6-2 in the previous year owing to a large number of operations having proved unsuccessful.

29. *Vital Statistics.*—The number of births was 404 against 386 and was 37·6 per mille of the population. The number of deaths was 320 against 515 in 1896–97 when cholera of a virulent type carried away 146 persons. The putting up of notice boards in important parts of the town, warning people that failure to give information will result in prosecutions has had some good effect. The number of persons prosecuted and convicted for omitting to give information of births was 8 and of deaths 4. To improve the registration of deaths, it is proposed to have sheds erected near the burial and burning grounds for licensed Vettians to live in and to have the deaths noted at the time of the burial or cremation.

30. *Sanitation.*—The total expenditure on conservancy and sanitation was Rs. 4,255-4-4 against Rs. 3,911-0-11 in the previous year and represents 21·85 per cent. of the total revenue. Except under establishment charges, where difficulty of securing scavengers explains the savings, the allotments were fully utilized. Three additional public latrines were constructed for the use of the people in places where they were most required, bringing up their number to 14 for a town with a population of 10,750. The number of cess-pits or well latrines has been considerably reduced and only fifty remain yet to be closed. Periodical inspection of backyards and prosecution under section 221 have improved the sanitary condition of houses. Notices were issued to 25 persons to keep their premises clean and 20 were prosecuted. The construction of a drain to carry off the sewage from the bazaar and Car streets and the formation of a sewage farm on a small scale have resulted in keeping a very insanitary part of the town clean. Cholera in a sporadic form appeared in the months of February and March 1898 and is responsible for 28 deaths. The objectionable burial grounds on the river banks have been closed under the orders of Government, Mis. No. 1900 M., dated 30th August 1897, and the site chosen by the council for cremation purposes has been approved of by the District Medical and Sanitary Officer, and an application for its acquisition has been made. Measures will be taken to prevent the burning of dead bodies in the river bed after the land is acquired. The several suggestions made by the Sanitary Commissioner in his notes of the inspection of the town embodied in G.O., No. 2036 M., dated 27th November 1896, have nearly all of them been carried out. The closure of the Muhammadan burial grounds after a selection of a proper place outside the town for the purpose and the erection of a shed for contagious diseases alone remain to be done.

31. *Private Scavenging.*—The number of houses brought under this system has advanced to 240 and there has been a steady improvement in it from year to year. The number of houses now served is 315 forming more than 65 per cent. of the houses which have accommodation for privies. The system was worked at a profit of Rs 42-6-5. The residents of as many as 1,176 houses resort to public latrines in view of which three more of them were built during the year.

32. *Grant 4.*—The increase of Rs. 98-8-5 under lighting contingencies is due to 14 additional stone lamp-posts and lanterns having been provided during the year, which brings up the total number of lamps to 140.

33. *Grant 5.*— Rs. 1,544-10-1 against Rs. 1,214-8-3. The supply of furniture to the office and the costs incurred in re-numbering houses in the town and putting up boards containing names of streets account for the increase under this grant.

34. The municipal limits have been extended so as to include the Pallar's village of Balambapuram, the insanitary condition of which was a source of danger to public health in times of epidemics. There has also been an extension to the west in which direction the town is progressing.

IV—Closing Balance.

35. The year closed with a balance of Rs. 1,639-9-4 excluding the deposit balance.

36. A copy of the resolution of the municipal council approving the report is submitted.

Enclosure.

Proceedings of a Special Meeting of the Municipal Council, Karúr, held on Saturday the 4th June 1898.

* * * * *

I.—The draft administration report of the Karúr Municipality for the year 1897–98. The draft report is approved.

* * * * *

Dis. No. 1799, Rev.

Forwarded.

2. The average attendance of councillors during the year 1897–98 slightly improved, and G.O., No. 859 M., dated 10th April 1897, appears to have had some effect. It may be pointed out that the Sub-Collector is an absentee member and can attend only occasionally. There was a slight decline in the number of meetings held by the council as compared with that in the preceding year.

3. Almost all the items of receipts showed increases over the preceding year. The collections under tax on buildings and lands up to 31st March 1898 were 97 and 98 per cent., respectively, of the current demand and are excellent. Although the arrear balances of these taxes outstanding on the 31st March 1898 were only Rupees 14-2-6 and Rs. 4-0-6, still these sums form 19 and 14 per cent. of the arrear demands and relate to the year before 1896–97. They should be realized in full without delay or written off the accounts, if irrecoverable.

4. Tolls fetched a larger sum than 1896–97, and it is satisfactory to note that there was no outstanding balance under that item as well as the items "Produce of cocoanut topes and lands," "Sale of street refuse, &c.," "Market rents," "Slaughter house," "Cart-stand fees" and "Private scavenging fees."

5. The income from the sale of street refuse, &c., fell below the actuals of the previous year, the reason for which is explained by the Chairman. It is encouraging to find that the use of night-soil as manure is beginning to be understood, and I hope with the Chairman that this source of revenue will develop in course of time.

6. A steady and progressive improvement is observed in the income from educational institutions and private scavenging system. The demand under the latter head rose to Rs. 328 and the system yielded a profit of Rs. 42.

7. The total expenditure for the year under report was Rs. 5,240 more than in 1896–97, and the greater portion of the increse was under Grant 1. The items of works on which the charges were incurred are detailed by the Chairman.

8. Although the outlay on the Town Roads—New Works and Repairs—formed 53 per cent. of the net toll receipts, the percentage thereof spent on the *maintenance* of road was about 30 only; nevertheless the roads are stated by the Revenue Division officer to be in good order and this is my recollection also. I do not think mud-wall latrines are a good investment. It is preferable to use corrugated iron.

9. The increase in the expenditure under Grant 2 is explained by the Chairman. The opening of the fifth form in the high school, the addition of two schools to the number aided under primary schools and the improvement in the strength of the schools show that a good deal of attention is paid to education.

10. There was a decrease in the number of patients treated at the main hospital and at the female dispensary as compared with the preceding year, and the explanation of the apothecaries concerned is considered by the District Medical and Sanitary Officer as unsatisfactory.

11. Under vaccination the results did not compare favourably with 1896–97, the total number of operations performed being 501 against 558 in the previous year and

the number of successful cases being 417 against 521. The number of cases of successful infantile vaccination was also only 282 or 69 per cent. of the total births registered against 342 in 1896–97. Consequently vaccination per case rose by Annas 1–4. The Chairman states that the fall in the number of successful cases is attributed by the vaccinator to the inferior quality of the vaccine paste. This is a matter which is occupying the attention of the District Medical and Sanitary Officer.

12. The ratios of births and deaths registered were 37 and 29 per mille of the town population against 36 and 48, respectively. The fall in the death ratio is accounted for by the absence of cholera in an epidemic form during the year of report, the deaths from this disease amounting to only 28 as against 146 in 1896–97. The proposal to erect sheds near the burial and burning grounds in order to improve the registration of deaths is a good one and is likely to be attended with better results than have been obtained hitherto.

13. Attention seems to have been paid to improving the sanitation of the town and to the removal of the defects pointed out to the council from time to time by inspecting officers of the Sanitary department. Still a suitable burning ground has not yet been provided, though the necessary steps to this end have been taken by the Chairman and the Government has in its order Mis. No. 879 (L. and M.), dated 6th May 1898, sanctioned the acquisition of land for the purpose.

14. In checking the accounts in this office, the following mistakes have been discovered, viz. :—

(*a*) *Page* 14 *of the Accounts.*— Particulars as to the total mileage of roads in the municipality and as to that under maintenance are not given in column 5 of Statement-II A, Part II, as required.

(*b*) *Page* 18.—The totals of columns 2 and 3 of Statement II-B are not entered.

(*c*) *Page* 21.—It is not understood how the salaries of the medical subordinate and the compounder came to be entered as Rs. 1,456 and Rs. 132, respectively, even if calculated at different rates, *i.e.*, at a lower rate up to and at higher rate from August and July 1897.

(*d*) *Pages* 36 *and* 37.—The average cost per pupil is not given in column 23 of Statement V-A, nor is the net cost to the municipality entered in column 22 of the statement opposite "Grand total of Colleges and Schools" appearing on page 39. The total expenditure given in column 21 of the same statement does not agree with the amounts shown in Statements II and II-A, Parts I and II.

(*e*) The number of houses served by the private scavenging agency is only 242 as per paragraph 20 of the Chairman's report and Statement XI, and not 315 as stated in the penultimate line of the same paragraph, nor 240 as entered in paragraph 31 of the report.

(*f*) The items which show a falling off are not only conservancy receipts and market income, as stated in paragraph 22 of the report, but also the income from slaughter-houses. There is still an uncollected arrear balance of Rs. 5 under "Ferry rent" relating presumably to 1895–96 and of Rs. 175 or almost 25 per cent. of the current demand of Rs. 702 under the same item for 1897–98.

(*g*) Sanctioned allotments were exceeded in certain instances under Grant 1.

(*h*) The net expenditure on education appears to have been Rs. 1,228–7–7, not Rs. 1,144–7–7 as stated in paragraph 25 of the Chairman's report.

(*i*) The increase under lighting contingencies is found to be Rs. 98–14–5 and not Rs. 98–8–5 as entered in paragraph 32 of the report.

COIMBATORE,
28*th June* 1898.

(Signed) P. DEENADAYALU,
for *Acting Collector.*

Submitted to the Collector of Coimbatore. The report shows good work in most branches of administration; the roads are in good order.

16*th June* 1898.

Deputy Collector.

Cur 2194

Karur municipal administration Report 1897-

1402/ 11 August

No. M., JULY 1898.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From M.R.Ry. V. SUBBA RAO Avargal, B.A., Chairman, Municipal Council, Karúr, to the Secretary to Government, Local and Municipal Department (through the Revenue Officer of the Division, Coimbatore), dated 10th June 1898, No. 8.

I have the honour to submit the annual report on the working of the Karúr Municipality for the year 1897–98. The usual statements accompany.

I.—CONSTITUTION OF THE COUNCIL.

2. The council held 28 meetings as against 31 in the previous year and no meeting was adjourned for want of a quorum. The average attendance of the councillors shows an improvement, having been 6·14 against 5·51 in 1896–97. The terms of four councillors expired during the year, of whom three were re-nominated, including the Chairman. From the 9th January to 1st February 1898, the date of my re-appointment, the Division officer was the Chairman. By the transfer of the Tahsildar, an official seat was vacated, which was filled up by his successor in office. All the councillors are nominated. Under G.O., No. 2260 M., dated 15th October 1897, the town has been granted the privilege of electing four councillors, but the system has yet to be brought into force.

II.—REPAIRS.

3. Excluding the opening balance of Rs. 4,559–9–11, the total receipts amounted to Rs. 19,471–13–4, showing an advance of Rs. 1,624–4–6 over the previous year. The incidence of taxation per head of the population was with tolls Re. 1–0–1 and without tolls As. 9–10.

4. *Tax on Buildings—Collections.*—Rs. 4,509–1–0 as against Rs. 4,466–12–6. The net current demand was Rs. 4,592–15–0, or Rs. 140–4–6 more than in the previous year—an improvement which is due to a few new buildings including the taluk cutcherry. The town has extended to the west and the number of houses has risen from 2,071 to 2,226, including bazaars attached to houses which have been numbered separately for purposes of taxation. As much as 97·19 per cent. of the current year's demand was collected. The balance of Rs. 128–9–6 in statement IV-A includes the sum of Rs. 77–5–6 assessed on the new taluk cutcherry buildings, the payment of which was delayed by the Revenue Department pending the consideration of a claim for a proportionate reduction in the tax on account of the buildings having been completed and occupied only in December 1897. Excluding this sum, which has since been realised, the balance that remained uncollected for the year was Rs. 51–4–0. Of the arrears of the previous years, Rs. 45–9–0 were collected and Rs. 14–10–0 were written off as irrecoverable, leaving a balance of Rs. 14–2–6 relating to the last two previous years.

5. *Land Tax—Collections.*—Rs. 485–5–3 against Rs. 484–4–0. The demand for the year as finally settled was Rs. 472–12–3, being less than in the previous year by Rs. 3–8–9 owing to a few vacant sites having been utilized for new houses. The amount that remained uncollected in the current demand was Rs. 4–13–6 and under arrears of previous years Rs. 4–0–6. The amounts written off as irrecoverable both in the current and in the arrears demands were Rs. 6–8–0.

6. Coercive processes for the collection of taxes were issued in 204 cases, but property was actually distrained only in five instances; three persons were prosecuted under section 103 for non-payment.

7. The taxes on carts and animals showed improvement, the former from Rupees 826 to Rs. 842 and the latter from Rs. 477 to Rs. 489–4–0. The increase under animals is due to enhanced rates for horses under the amended Act. The tax on vehicles has fallen by Rs. 4, which calls for no remark.

8. *Tolls Collections.*—Rs. 4,197–11–0 against Rs. 4,037–9–3. The toll-gates were leased out for the unusually high sum of Rs. 6,205 against Rs. 5,899 in 1896–97, and the entire amount was collected within the year. A sum of Rs. 2,076–1–8 was paid to the district board as their share. The request made to Government for the reduction of the contribution from one third to a fourth of the receipts was not sanctioned (*vide* G.O., Mis. No. 1155 M., dated 10th May 1897).

9. *Ferry Rents.*—Ferry rents rose from Rs. 584–14–0 to Rs. 676–13–4. The revenue from this source is fluctuating from year to year, the gains in a year on account of floods during the festive seasons inducing the contractors to bid for larger sums and the losses resulting in a fall in the succeeding year. Under Act II of 1888 a sum of Rs. 65 was collected from a circus party and a theatrical proprietor.

10. *Produce of Lands and Gardens.*—Rs. 82–12–6 against Rs. 41–6–4. The cocoanut trees in the Dindigul, Nicholsonpet and Ambalagara streets were leased out for a larger sum which accounts for the increase.

11. *The sale-proceeds of street-refuse, night-soil, &c.*—Rs. 136–7–6 against Rupees 165–8–3. The fall of nearly Rs. 30 is due to the experiment of selling the rubbish in lots and by cart-loads as suggested in G.O., No. 1404 M., dated 20th August 1896, instead of letting it to a farmer for a fixed amount as in previous years. The rubbish is in great demand only in wet villages, where plantain gardens exist, and I find from the sales effected that nearly all the purchasers came from the villages of Vangal and Nerúr, which are at a distance of seven miles from the town. As nearly a third part of the sweepings remained unsold at the close of the year, I expect an increase in the year 1898–99. The night-soil depot fetched a small sum of Rs. 10 against Rs. 5 in the previous year. Its advantages as manure are beginning to be understood, but as yet only one or two ryots have come forward to purchase it. I expect that in course of time this item will improve and the objections which ryots generally feel to its use will gradually disappear.

12. *Fees from Educational Institutions.*—Rs. 2,857–5–9 against Rs. 2,520–5–3. There has been a steady increase under this head from year to year since 1894–95. The high and primary schools have been making satisfactory advance in their strength. The opening of the fifth form in the high school last January has contributed to the increase to the extent of Rs. 102.

13. *Income from Markets.*—Rs. 811–10–5 against Rs. 845–11–6. The fall is due to the butchers' stalls having been let out for Rs. 152 instead of Rs. 260 in the previous year. The establishment of a meat-shop beyond the municipal limits close to the town brought down the rent for want of competition.

14. *Income from Slaughter-house.*—Rs. 250–1–6 against Rs. 362–5–0. The fall is due to the practice of a few butchers slaughtering animals outside the town limits for the meat-shop mentioned above. The recent extension of the municipal limits is calculated to put down this evil.

15. *Distraint and Warrant Fees.*—Rs. 25–6–0 against Rs. 4–4–0. The provision in the amended Act that separate fees should be levied for distraints and warrants has resulted in the increase.

16. *Cart-stand Fees.*—Rs. 506–15–7 against Rs. 402–1–1. The municipal cart-stand was leased out for a larger sum than in the previous year owing to a keen competition among bidders.

17. *Fines under Municipal and other Acts.*—Rs. 297 against Rs. 218–12–0. The advance shows that the Bench Magistrates have paid attention to my remarks in the last administration report about the inadequacy of the fines imposed.

1402/ 11 August

No. M., July 1898.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper:—

From M.R.Ry. V. SUBBA RAO Avargal, B.A., Chairman, Municipal Council, Karúr, to the Secretary to Government, Local and Municipal Department (through the Revenue Officer of the Division, Coimbatore), dated 10th June 1898, No. 8.

I have the honour to submit the annual report on the working of the Karúr Municipality for the year 1897–98. The usual statements accompany.

I.—CONSTITUTION OF THE COUNCIL.

2. The council held 28 meetings as against 31 in the previous year and no meeting was adjourned for want of a quorum. The average attendance of the councillors shows an improvement, having been 6·14 against 5·51 in 1896–97. The terms of four councillors expired during the year, of whom three were re-nominated, including the Chairman. From the 9th January to 1st February 1898, the date of my re-appointment, the Division officer was the Chairman. By the transfer of the Tahsildar, an official seat was vacated, which was filled up by his successor in office. All the councillors are nominated. Under G.O., No. 2260 M., dated 15th October 1897, the town has been granted the privilege of electing four councillors, but the system has yet to be brought into force.

II.—REPAIRS.

3. Excluding the opening balance of Rs. 4,559–9–11, the total receipts amounted to Rs. 19,471–13–4, showing an advance of Rs. 1,624–4–6 over the previous year. The incidence of taxation per head of the population was with tolls Re. 1–0–1 and without tolls As. 9–10.

4. *Tax on Buildings—Collections.*—Rs. 4,509–1–0 as against Rs. 4,466–12–6. The net current demand was Rs. 4,592–15–0, or Rs. 140–4–6 more than in the previous year—an improvement which is due to a few new buildings including the taluk cutcherry. The town has extended to the west and the number of houses has risen from 2,071 to 2,226, including bazaars attached to houses which have been numbered separately for purposes of taxation. As much as 97·19 per cent. of the current year's demand was collected. The balance of Rs. 128–9–6 in statement IV-A includes the sum of Rs. 77–5–6 assessed on the new taluk cutcherry buildings, the payment of which was delayed by the Revenue Department pending the consideration of a claim for a proportionate reduction in the tax on account of the buildings having been completed and occupied only in December 1897. Excluding this sum, which has since been realised, the balance that remained uncollected for the year was Rs. 51–4–0. Of the arrears of the previous years, Rs. 45–9–0 were collected and Rs. 14–10–0 were written off as irrecoverable, leaving a balance of Rs. 14–2–6 relating to the last two previous years.

5. *Land Tax—Collections.*—Rs. 485–5–3 against Rs. 484–4–0. The demand for the year as finally settled was Rs. 472–12–3, being less than in the previous year by Rs. 3–8–9 owing to a few vacant sites having been utilized for new houses. The amount that remained uncollected in the current demand was Rs. 4–13–6 and under arrears of previous years Rs. 4–0–6. The amounts written off as irrecoverable both in the current and in the arrears demands were Rs. 6–8–0.

6. Coercive processes for the collection of taxes were issued in 204 cases, but property was actually distrained only in five instances; three persons were prosecuted under section 103 for non-payment.

7. The taxes on carts and animals showed improvement, the former from Rupees 826 to Rs. 842 and the latter from Rs. 477 to Rs. 489–4–0. The increase under animals is due to enhanced rates for horses under the amended Act. The tax on vehicles has fallen by Rs. 4, which calls for no remark.

8. *Tolls Collections.*—Rs. 4,197–11–0 against Rs. 4,037–9–3. The toll-gates were leased out for the unusually high sum of Rs. 6,205 against Rs. 5,899 in 1896–97, and the entire amount was collected within the year. A sum of Rs. 2,076–1–8 was paid to the district board as their share. The request made to Government for the reduction of the contribution from one third to a fourth of the receipts was not sanctioned (*vide* G.O., Mis. No. 1155 M., dated 10th May 1897).

9. *Ferry Rents.*—Ferry rents rose from Rs. 584–14–0 to Rs. 676–13–4. The revenue from this source is fluctuating from year to year, the gains in a year on account of floods during the festive seasons inducing the contractors to bid for larger sums and the losses resulting in a fall in the succeeding year. Under Act II of 1888 a sum of Rs. 65 was collected from a circus party and a theatrical proprietor.

10. *Produce of Lands and Gardens.*—Rs. 82–12–6 against Rs. 41–6–4. The cocoanut trees in the Dindigul, Nicholsonpet and Ambalagara streets were leased out for a larger sum which accounts for the increase.

11. *The sale-proceeds of street-refuse, night-soil, &c.*—Rs. 136–7–6 against Rupees 165–8–3. The fall of nearly Rs. 30 is due to the experiment of selling the rubbish in lots and by cart-loads as suggested in G.O., No. 1404 M., dated 20th August 1896, instead of letting it to a farmer for a fixed amount as in previous years. The rubbish is in great demand only in wet villages, where plantain gardens exist, and I find from the sales effected that nearly all the purchasers came from the villages of Vangal and Nerúr, which are at a distance of seven miles from the town. As nearly a third part of the sweepings remained unsold at the close of the year, I expect an increase in the year 1898–99. The night-soil depot fetched a small sum of Rs. 10 against Rs. 5 in the previous year. Its advantages as manure are beginning to be understood, but as yet only one or two ryots have come forward to purchase it. I expect that in course of time this item will improve and the objections which ryots generally feel to its use will gradually disappear.

12. *Fees from Educational Institutions.*—Rs. 2,857–5–9 against Rs. 2,520–5–3. There has been a steady increase under this head from year to year since 1894–95. The high and primary schools have been making satisfactory advance in their strength. The opening of the fifth form in the high school last January has contributed to the increase to the extent of Rs. 102.

13. *Income from Markets.*—Rs. 811–10–5 against Rs. 845–11–6. The fall is due to the butchers' stalls having been let out for Rs. 152 instead of Rs. 260 in the previous year. The establishment of a meat-shop beyond the municipal limits close to the town brought down the rent for want of competition.

14. *Income from Slaughter-house.*—Rs. 250–1–6 against Rs. 362–5–0. The fall is due to the practice of a few butchers slaughtering animals outside the town limits for the meat-shop mentioned above. The recent extension of the municipal limits is calculated to put down this evil.

15. *Distraint and Warrant Fees.*—Rs. 25–6–0 against Rs. 4–4–0. The provision in the amended Act that separate fees should be levied for distraints and warrants has resulted in the increase.

16. *Cart-stand Fees.*—Rs. 506–15–7 against Rs. 402–1–1. The municipal cart-stand was leased out for a larger sum than in the previous year owing to a keen competition among bidders.

17. *Fines under Municipal and other Acts.*—Rs. 297 against Rs. 218–12–0. The advance shows that the Bench Magistrates have paid attention to my remarks in the last administration report about the inadequacy of the fines imposed.

1402 / 11 August

No. M., July 1898.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From M.R.Ry. V. SUBBA RAO Avargal, B.A., Chairman, Municipal Council, Karúr, to the Secretary to Government, Local and Municipal Department (through the Revenue Officer of the Division, Coimbatore), dated 10th June 1898, No. 8.

I have the honour to submit the annual report on the working of the Karúr Municipality for the year 1897–98. The usual statements accompany.

I.—CONSTITUTION OF THE COUNCIL.

2. The council held 28 meetings as against 31 in the previous year and no meeting was adjourned for want of a quorum. The average attendance of the councillors shows an improvement, having been 6·14 against 5·51 in 1896–97. The terms of four councillors expired during the year, of whom three were re-nominated, including the Chairman. From the 9th January to 1st February 1898, the date of my re-appointment, the Division officer was the Chairman. By the transfer of the Tahsildar, an official seat was vacated, which was filled up by his successor in office. All the councillors are nominated. Under G.O., No. 2260 M., dated 15th October 1897, the town has been granted the privilege of electing four councillors, but the system has yet to be brought into force.

II.—REPAIRS.

3. Excluding the opening balance of Rs. 4,559–9–11, the total receipts amounted to Rs. 19,471–13–4, showing an advance of Rs. 1,624–4–6 over the previous year. The incidence of taxation per head of the population was with tolls Re. 1–0–1 and without tolls As. 9–10.

4. *Tax on Buildings—Collections.*—Rs. 4,509–1–0 as against Rs. 4,466–12–6. The net current demand was Rs. 4,592–15–0, or Rs. 140–4–6 more than in the previous year—an improvement which is due to a few new buildings including the taluk cutcherry. The town has extended to the west and the number of houses has risen from 2,071 to 2,226, including bazaars attached to houses which have been numbered separately for purposes of taxation. As much as 97·19 per cent. of the current year's demand was collected. The balance of Rs. 128–9–6 in statement IV-A includes the sum of Rs. 77–5–6 assessed on the new taluk cutcherry buildings, the payment of which was delayed by the Revenue Department pending the consideration of a claim for a proportionate reduction in the tax on account of the buildings having been completed and occupied only in December 1897. Excluding this sum, which has since been realised, the balance that remained uncollected for the year was Rs. 51–4–0. Of the arrears of the previous years, Rs. 45–9–0 were collected and Rs. 14–10–0 were written off as irrecoverable, leaving a balance of Rs. 14–2–6 relating to the last two previous years.

5. *Land Tax—Collections.*—Rs. 485–5–3 against Rs. 484–4–0. The demand for the year as finally settled was Rs. 472–12–3, being less than in the previous year by Rs. 3–8–9 owing to a few vacant sites having been utilized for new houses. The amount that remained uncollected in the current demand was Rs. 4–13–6 and under arrears of previous years Rs. 4–0–6. The amounts written off as irrecoverable both in the current and in the arrears demands were Rs. 6–8–0.

6. Coercive processes for the collection of taxes were issued in 204 cases, but property was actually distrained only in five instances; three persons were prosecuted under section 103 for non-payment.

7. The taxes on carts and animals showed improvement, the former from Rupees 826 to Rs. 842 and the latter from Rs. 477 to Rs. 489–4–0. The increase under animals is due to enhanced rates for horses under the amended Act. The tax on vehicles has fallen by Rs. 4, which calls for no remark.

8. *Tolls Collections.*—Rs. 4,197–11–0 against Rs. 4,037–9–3. The toll-gates were leased out for the unusually high sum of Rs. 6,205 against Rs. 5,899 in 1896–97, and the entire amount was collected within the year. A sum of Rs. 2,076–1–8 was paid to the district board as their share. The request made to Government for the reduction of the contribution from one third to a fourth of the receipts was not sanctioned (*vide* G.O., Mis. No. 1155 M., dated 10th May 1897).

9. *Ferry Rents.*—Ferry rents rose from Rs. 584–14–0 to Rs. 676–13–4. The revenue from this source is fluctuating from year to year, the gains in a year on account of floods during the festive seasons inducing the contractors to bid for larger sums and the losses resulting in a fall in the succeeding year. Under Act II of 1888 a sum of Rs. 65 was collected from a circus party and a theatrical proprietor.

10. *Produce of Lands and Gardens.*—Rs. 82–12–6 against Rs. 41–6–4. The cocoanut trees in the Dindigul, Nicholsonpet and Ambalagara streets were leased out for a larger sum which accounts for the increase.

11. *The sale-proceeds of street-refuse, night-soil, &c.*—Rs. 136–7–6 against Rupees 165–8–3. The fall of nearly Rs. 30 is due to the experiment of selling the rubbish in lots and by cart-loads as suggested in G.O., No. 1404 M., dated 20th August 1896, instead of letting it to a farmer for a fixed amount as in previous years. The rubbish is in great demand only in wet villages, where plantain gardens exist, and I find from the sales effected that nearly all the purchasers came from the villages of Vangal and Nerúr, which are at a distance of seven miles from the town. As nearly a third part of the sweepings remained unsold at the close of the year, I expect an increase in the year 1898–99. The night-soil depot fetched a small sum of Rs. 10 against Rs. 5 in the previous year. Its advantages as manure are beginning to be understood, but as yet only one or two ryots have come forward to purchase it. I expect that in course of time this item will improve and the objections which ryots generally feel to its use will gradually disappear.

12. *Fees from Educational Institutions.*—Rs. 2,857–5–9 against Rs. 2,520–5–3. There has been a steady increase under this head from year to year since 1894–95. The high and primary schools have been making satisfactory advance in their strength. The opening of the fifth form in the high school last January has contributed to the increase to the extent of Rs. 102.

13. *Income from Markets.*—Rs. 811–10–5 against Rs. 845–11–6. The fall is due to the butchers' stalls having been let out for Rs. 152 instead of Rs. 260 in the previous year. The establishment of a meat-shop beyond the municipal limits close to the town brought down the rent for want of competition.

14. *Income from Slaughter-house.*—Rs. 250–1–6 against Rs. 362–5–0. The fall is due to the practice of a few butchers slaughtering animals outside the town limits for the meat-shop mentioned above. The recent extension of the municipal limits is calculated to put down this evil.

15. *Distraint and Warrant Fees.*—Rs. 25–6–0 against Rs. 4–4–0. The [illegible] in the amended Act that separate fees should be levied for distraints and [illegible] resulted in the increase.

16. *Cart-stand Fees.*—Rs. 506–15–7 against Rs. 402–1–1. [illegible] stand was leased out for a larger sum than in the previous year owing competition among bidders.

17. *Fines under Municipal and other Acts.*—Rs. 297 against Rs. 218–12–0. The advance shows that the Bench Magistrates have paid attention to my remarks in the last administration report about the inadequacy of the fines imposed.

18. *Contributions from Government.*—Rs. 560-15-6 against Rs. 282-6-3. The increase is accounted for by the rise in the grants paid by Government on account of the schools owing to the appointment of a drawing master and the supply of furniture to his class and to the school generally, which has improved in strength. A sum of Rs. 32 was received from Government on account of a latrine built for the schools. The nomination of an L.T. as headmaster resulted in an increase in the salary grant from a fourth to a third of the salary of the appointment.

19. *Contributions from Local Boards on account of Hospitals.*—Rs. 1,249-6-3 against Rs. 1,061-4-9. The rise is due to the higher salary to which the civil apothecary became entitled during the year and to certain improvements to the hospital buildings.

20. *Private Scavenging Fees.*—Rs. 327-2-0 against Rs. 255-8-0. The demand under this head rose from Rs. 255-11-0 to Rs. 328-4-0 as the number of houses brought under the system advanced from 210 to 242. Of the total number of houses in the town, 420 are shops attached to dwelling houses, 150 are huts belonging to the Paracheri and to the Pallars and 1,176 houses have no privies, the occupants resorting to public latrines. Only 480 houses have private latrines capable of being brought under the system, and of these as many as 315 are now served by the municipality.

21. Under other items appears a sum of Rs. 500 forming a portion of the amount of a decree obtained in respect of misappropriated sums.

22. The demand under all heads except conservancy receipts and market rents showed an improvement and except under house and land taxes, more than 97 per cent. of which was collected, there remained no arrears to be collected. The arrears shown in statement IV-B submitted with the administration report for 1896-97 against tolls, market rents, &c., have been removed from the statement as they form the subject of claims under a decree obtained against a former Chairman and are also recoverable from the security furnished by the late manager. They have been included under assets in the note to statement II.

III.—Charges.

23. The total expenditure for the year was Rs. 22,391-13-11 against Rupees 17,152-5-3; the major portion of the increase was under Grant 1 on account of the construction of an iron latrine of the type design, additional sheds to the weekly and daily markets and a building to the high school.

24. *Grant 1, Public Works.*—Rs. 6,326-11-2 against Rs. 2,687-12-1. The amount expended on Communications—New and Repairs—was Rs. 2,251-15-6, being more than 53 per cent. of the revenue from tolls. The construction of stone revetments on road sides in Sreenivasapuram-Dindigul road and other streets form the new works which cost Rs. 995-12-1. Twelve streets underwent repairs at an expenditure of Rs. 1,256-3-5. The outlay on new buildings was Rs. 3,087-13-1. The growing strength of the high school, the opening of the fifth form and the establishment of a drawing class rendered it absolutely necessary to construct an additional building at an expenditure of Rs. 1,234-7-10. Some of the forms are accommodated yet in thatched sheds and a further extension has become necessary. The other new buildings were a tiled shed floored with Cuddapah slabs in the weekly market—hitherto a mere open enclosure—and an extension to the daily vegetable market costing Rupees 686-3-0 and an iron-covered latrine with eighteen seats of the type design at a cost of Rs. 903-14-5 in Melvaduga street. Three additional latrines for public use have also been provided. They are simple mud-wall enclosures and will be converted into pucka constructions as soon as funds permit. The sanction of the Sanitary Board has been obtained for works costing more than Rs. 200. The hospital buildings were repaired at a cost of Rs. 139-9-8.

The construction of the Car street drain so as to carry away the sewage from the Ambalagaar street into a garden which has been turned into a small sewage farm and the Melvaduga street minor drains involved an expenditure of Rs. 426-4-3. Improvements to the night-soil depot under instructions from the Sanitary Commissioner were made at a cost of Rs. 53-9-0. The acquisition of a place for the Ambalagara street latrine on payment of Rs. 136-4-0 and a slight increase of expenditure over the estimate in building the Melvaduga street latrine account for the excess of expenditure over the sanctioned allotments by Rs. 166-11-2.

25. *Grant 2, Education.*—Rs. 4,562-12-10 against Rs. 3,679-14-10. The total expenditure on account of education exceeded the outlay in the previous year by Rs. 882-14-0. The establishment of a drawing class with a master on Rs. 20, the appointment of two additional teachers to the municipal primary school on Rs. 10 each, an increase in the salary paid to the headmaster of the high school from Rs. 50 to Rs. 60, the opening of the fifth form with a teacher on Rs. 50 and a rise in the result grants paid by the municipality from Rs. 258-4-0 in 1896-97 to Rs. 348-12-0 account for the increase in the total outlay.

The strength of the high school has continued to advance, the number of boys having risen from 103 to 132. The opening of the fifth form is calculated to improve it still further. The average attendance improved from 77 to 111. Of 14 boys sent up for the Lower Secondary examination, 8 passed, 6 obtaining complete certificates and 2 of them in the first class. The tone and discipline of the school were reported to be satisfactory by the Inspector of Schools, Western Circle, in his last tabular inspection report. The financial condition was sound, the receipts having exceeded the expenditure by Rs. 164-11-4.

The municipal primary school showed an improvement in strength from 260 to 280. Two additional hands were entertained as the number of boys both in the first and in the second standards was found too large for a single teacher. The number of aided primary schools rose from 7 to 9 and the number of trained teachers has increased by two, while that of the unpassed teachers has fallen from 14 to 8. The results of the examination in all the standards except the infant are reported to be satisfactory. The net expenditure on education was Rs. 1,144-7-7 against Rs. 961-3-4 in the previous year, the whole of which amount was spent on primary education The total number of boys under instruction in the town rose from 660 to 771. Provision has been made in the budget for the year 1898-99 for training two teachers of the aided primary schools. The municipality continued to pay two scholarships to Non-Christian boys in the Wesleyan Mission Industrial school.

26. *Grant 3, Sanitation and Medical Services.*—Rs. 8,255-14-7 against Rupees 7,829-13-5.

27. *The Hospital and Dispensary.*—The charges under the establishment have risen from Rs. 2,014-12-10 to Rs. 2,192-8-2, owing mainly to the increase in the salary paid to the civil apothecary in charge of the main hospital. The number of patients shows a decline from 11,887 to 10,529 in the main hospital and from 14,207 to 11,344 in the female dispensary. The decline is explained in the reports herewith submitted by the apothecaries concerned, but the explanation is not admitted to be satisfactory by the District Medical Officer. The suggestion to erect a shed for contagious diseases outside the town has not been carried out as the council has not been able to find a suitable place within an easy distance from the town owing to the lands in the vicinity of Karúr being under irrigation and any site chosen close to the town will remain damp during the greater part of the year. The best available ground will be selected after consultation with the District Medical and Sanitary Officer when he next visits the town. The suggestions of the apothecaries in regard to an additional servant, &c., will be considered when the next budget is prepared. It would be useful if they are made in December in separate communications instead of being mentioned in the annual reports. The midwife has shown better work; the number of cases of labour attended by her was 102 against 80 in the previous year, being a fourth of the number of births in the town. The female apothecary attended 14 cases, of which 12 were difficult. The dispensary for women and children is now located in a portion of the Government chattram. As the old taluk cutcherry building has since been transferred by the Government to the municipality for use as a rest-house, arrangement will be made to make the whole of the chattram available for the use of the dispensary. The total charges on account of medical aid have amounted to Rs. 3,546-14-8 against Rs. 3,475-7-9 in the year 1896-97.

28. *Vaccination.*—The total number of operations was 501, of which 417 were successful. The large number of failures was due to the inferior quality of the glycerine vaccine paste supplied from the district depot. The use of the lanoline paste in the current year is expected to show better results. Under infantile vaccination the number successfully vaccinated was 282 against 342 in the previous year.

18. *Contributions from Government.*—Rs. 560-15-6 against Rs. 282-6-3. The increase is accounted for by the rise in the grants paid by Government on account of the schools owing to the appointment of a drawing master and the supply of furniture to his class and to the school generally, which has improved in strength. A sum of Rs. 32 was received from Government on account of a latrine built for the schools. The nomination of an L.T. as headmaster resulted in an increase in the salary grant from a fourth to a third of the salary of the appointment.

19. *Contributions from Local Boards on account of Hospitals.*—Rs. 1,249-6-3 against Rs. 1,061-4-9. The rise is due to the higher salary to which the civil apothecary became entitled during the year and to certain improvements to the hospital buildings.

20. *Private Scavenging Fees.*—Rs. 327-2-0 against Rs. 255-8-0. The demand under this head rose from Rs. 255-11-0 to Rs. 328-4-0 as the number of houses brought under the system advanced from 210 to 242. Of the total number of houses in the town, 420 are shops attached to dwelling houses, 150 are huts belonging to the Paracheri and to the Pallars and 1,176 houses have no privies, the occupants resorting to public latrines. Only 480 houses have private latrines capable of being brought under the system, and of these as many as 315 are now served by the municipality.

21. Under other items appears a sum of Rs. 500 forming a portion of the amount of a decree obtained in respect of misappropriated sums.

22. The demand under all heads except conservancy receipts and market rents showed an improvement and except under house and land taxes, more than 97 per cent. of which was collected, there remained no arrears to be collected. The arrears shown in statement IV-B submitted with the administration report for 1896-97 against tolls, market rents, &c., have been removed from the statement as they form the subject of claims under a decree obtained against a former Chairman and are also recoverable from the security furnished by the late manager. They have been included under assets in the note to statement II.

III.—Charges.

23. The total expenditure for the year was Rs. 22,391-13-11 against Rupees 17,152-5-3; the major portion of the increase was under Grant 1 on account of the construction of an iron latrine of the type design, additional sheds to the weekly and daily markets and a building to the high school.

24. *Grant 1, Public Works.*—Rs. 6,326-11-2 against Rs. 2,687-12-1. The amount expended on Communications—New and Repairs—was Rs. 2,251-15-6, being more than 53 per cent. of the revenue from tolls. The construction of stone revetments on road sides in Sreenivasapuram-Dindigul road and other streets form the new works which cost Rs. 995-12-1. Twelve streets underwent repairs at an expenditure of Rs. 1,256-3-5. The outlay on new buildings was Rs. 3,087-13-1. The growing strength of the high school, the opening of the fifth form and the establishment of a drawing class rendered it absolutely necessary to construct an additional building at an expenditure of Rs. 1,234-7-10. Some of the forms are accommodated yet in thatched sheds and a further extension has become necessary. The other new buildings were a tiled shed floored with Cuddapah slabs in the weekly market—hitherto a mere open enclosure—and an extension to the daily vegetable market costing Rupees 686-3-0 and an iron-covered latrine with eighteen seats of the type design at a cost of Rs. 903-14-5 in Melvaduga street. Three additional latrines for public use have also been provided. They are simple mud-wall enclosures and will be converted into pucca constructions as soon as funds permit. The sanction of the Sanitary Board has arrear obtained for works costing more than Rs. 200. The hospital buildings were extended at a cost of Rs. 139-9-8.

previous construction of the Car street drain so as to carry away the sewage from the

5. Street into a garden which has been turned into a small sewage farm and the in the year street minor drains involved an expenditure of Rs. 426-4-3. Improvements 3-8 the night-soil depot under instructions from the Sanitary Commissioner were made at a cost of Rs. 53-9-0. The acquisition of a place for the Ambalagara street latrine on payment of Rs. 136-4-0 and a slight increase of expenditure over the estimate in building the Melvaduga street latrine account for the excess of expenditure over the sanctioned allotments by Rs. 166-11-2.

25. *Grant 2, Education.*—Rs. 4,562-12-10 against Rs. 3,679-14-10. The total expenditure on account of education exceeded the outlay in the previous year by Rs. 882-14-0. The establishment of a drawing class with a master on Rs. 20, the appointment of two additional teachers to the municipal primary school on Rs. 10 each, an increase in the salary paid to the headmaster of the high school from Rs. 50 to Rs. 60, the opening of the fifth form with a teacher on Rs. 50 and a rise in the result grants paid by the municipality from Rs. 258-4-0 in 1896-97 to Rs. 348-12-0 account for the increase in the total outlay.

The strength of the high school has continued to advance, the number of boys having risen from 103 to 132. The opening of the fifth form is calculated to improve it still further. The average attendance improved from 77 to 111. Of 14 boys sent up for the Lower Secondary examination, 8 passed, 6 obtaining complete certificates and 2 of them in the first class. The tone and discipline of the school were reported to be satisfactory by the Inspector of Schools, Western Circle, in his last tabular inspection report. The financial condition was sound, the receipts having exceeded the expenditure by Rs. 164-11-4.

The municipal primary school showed an improvement in strength from 260 to 280. Two additional hands were entertained as the number of boys both in the first and in the second standards was found too large for a single teacher. The number of aided primary schools rose from 7 to 9 and the number of trained teachers has increased by two, while that of the unpassed teachers has fallen from 14 to 8. The results of the examination in all the standards except the infant are reported to be satisfactory. The net expenditure on education was Rs. 1,144-7-7 against Rs. 961-3-4 in the previous year, the whole of which amount was spent on primary education The total number of boys under instruction in the town rose from 660 to 771. Provision has been made in the budget for the year 1898-99 for training two teachers of the aided primary schools. The municipality continued to pay two scholarships to Non-Christian boys in the Wesleyan Mission Industrial school.

26. *Grant 3, Sanitation and Medical Services.*—Rs. 8,255-14-7 against Rupees 7,829-13-5.

27. *The Hospital and Dispensary.*—The charges under the establishment have risen from Rs. 2,014-12-10 to Rs. 2,192-8-2, owing mainly to the increase in the salary paid to the civil apothecary in charge of the main hospital. The number of patients shows a decline from 11,887 to 10,529 in the main hospital and from 14,207 to 11,344 in the female dispensary. The decline is explained in the reports herewith submitted by the apothecaries concerned, but the explanation is not admitted to be satisfactory by the District Medical Officer. The suggestion to erect a shed for contagious diseases outside the town has not been carried out as the council has not been able to find a suitable place within an easy distance from the town owing to the lands in the vicinity of Karúr being under irrigation and any site chosen close to the town will remain damp during the greater part of the year. The best available ground will be selected after consultation with the District Medical and Sanitary Officer when he next visits the town. The suggestions of the apothecaries in regard to an additional servant, &c., will be considered when the next budget is prepared. It would be useful if they are made in December in separate communications instead of being mentioned in the annual reports. The midwife has shown better work; the number of cases of labour attended by her was 102 against 80 in the previous year, being a fourth of the number of births in the town. The female apothecary attended 14 cases, of which 12 were difficult. The dispensary for women and children is now located in a portion of the Government chattram. As the old taluk cutcherry building has since been transferred by the Government to the municipality for use as a rest-house, arrangement will be made to make the whole of the chattram available for the use of the dispensary. The total charges on account of medical aid have amounted to Rs. 3,546-14-8 against Rs. 3,475-7-9 in the year 1896-97.

28. *Vaccination.*—The total number of operations was 501, of which 417 were successful. The large number of failures was due to the inferior quality of the glycerine vaccine paste supplied from the district depot. The use of the lanoline paste in the current year is expected to show better results. Under infantile vaccination the number successfully vaccinated was 282 against 342 in the previous year.

The vaccinator attributes this fall chiefly to the quality of the vaccine paste. There were 78 cases of re-vaccination. As usual a thorough search was made from house to house and an enumeration taken of all unprotected children which resulted in the vaccination of 98 children in two days. The municipal council has fixed a minimum of 38 for the vaccinator for each month, seeing that the total births in a year come to about 400 and has ruled that for every case falling short of the minimum a fine of one anna should be imposed. The number of persons prosecuted for failure to have their children vaccinated was 8. The average cost of vaccination per case rose to As. 7–6 from As. 6–2 in the previous year owing to a large number of operations having proved unsuccessful.

29. *Vital Statistics.*—The number of births was 404 against 386 and was 37·6 per mille of the population. The number of deaths was 320 against 515 in 1896–97 when cholera of a virulent type carried away 146 persons. The putting up of notice boards in important parts of the town, warning people that failure to give information will result in prosecutions has had some good effect. The number of persons prosecuted and convicted for omitting to give information of births was 8 and of deaths 4. To improve the registration of deaths, it is proposed to have sheds erected near the burial and burning grounds for licensed Vettians to live in and to have the deaths noted at the time of the burial or cremation.

30. *Sanitation.*—The total expenditure on conservancy and sanitation was Rs. 4,255–4–4 against Rs. 3,911–0–11 in the previous year and represents 21·85 per cent. of the total revenue. Except under establishment charges, where difficulty of securing scavengers explains the savings, the allotments were fully utilized. Three additional public latrines were constructed for the use of the people in places where they were most required, bringing up their number to 14 for a town with a population of 10,750. The number of cess-pits or well latrines has been considerably reduced and only fifty remain yet to be closed. Periodical inspection of backyards and prosecution under section 221 have improved the sanitary condition of houses. Notices were issued to 25 persons to keep their premises clean and 20 were prosecuted. The construction of a drain to carry off the sewage from the bazaar and Car streets and the formation of a sewage farm on a small scale have resulted in keeping a very insanitary part of the town clean. Cholera in a sporadic form appeared in the months of February and March 1898 and is responsible for 28 deaths. The objectionable burial grounds on the river banks have been closed under the orders of Government, Mis. No. 1900 M., dated 30th August 1897, and the site chosen by the council for cremation purposes has been approved of by the District Medical and Sanitary Officer, and an application for its acquisition has been made. Measures will be taken to prevent the burning of dead bodies in the river bed after the land is acquired. The several suggestions made by the Sanitary Commissioner in his notes of the inspection of the town embodied in G.O., No. 2036 M., dated 27th November 1896, have nearly all of them been carried out. The closure of the Muhammadan burial grounds after a selection of a proper place outside the town for the purpose and the erection of a shed for contagious diseases alone remain to be done.

31. *Private Scavenging.*—The number of houses brought under this system has advanced to 240 and there has been a steady improvement in it from year to year. The number of houses now served is 315 forming more than 65 per cent. of the houses which have accommodation for privies. The system was worked at a profit of Rs. 42–6–5. The residents of as many as 1,176 houses resort to public latrines in view of which three more of them were built during the year.

32. *Grant 4.*—The increase of Rs. 98–8–5 under lighting contingencies is due to 14 additional stone lamp-posts and lanterns having been provided during the year, which brings up the total number of lamps to 140.

33. *Grant 5.*—Rs. 1,544–10–1 against Rs. 1,214–8–3. The supply of furniture to the office and the costs incurred in re-numbering houses in the town and putting up boards containing names of streets account for the increase under this grant.

34. The municipal limits have been extended so as to include the Pallar's village of Bayilubapuram, the insanitary condition of which was a source of danger to public health in times of epidemics. There has also been an extension to the west in which direction the town is progressing.

IV—Closing Balance.

35. The year closed with a balance of Rs. 1,639–9–4, excluding the deposit balance.

36. A copy of the resolution of the municipal council approving the report is submitted.

Submitted to the Collector of Coimbatore. The report shows good work in most branches of administration; the roads are in good order.

Dis. No. 1799, Rev.

Forwarded.

2. The average attendance of councillors during the year 1897–98 slightly improved, and G.O., No. 859 M., dated 10th April 1897, appears to have had some effect. It may be pointed out that the Sub-Collector is an absentee member and can attend only occasionally. There was a slight decline in the number of meetings held by the council as compared with that in the preceding year.

3. Almost all the items of receipts showed increases over the preceding year. The collections under tax on buildings and lands up to 31st March 1898 were 97 and 98 per cent., respectively, of the current demand and are excellent. Although the arrear balances of these taxes outstanding on the 31st March 1898 were only Rupees 14–2–6 and Rs. 4–0–6, still these sums form 19 and 14 per cent. of the arrear demands and relate to the year before 1896–97. They should be realized in full without delay or written off the accounts, if irrecoverable.

4. Tolls fetched a larger sum than 1896–97, and it is satisfactory to note that there was no outstanding balance under that item as well as the items "Produce of cocoanut topes and lands," "Sale of street refuse, &c.," "Market rents," "Slaughter house," "Cart-stand fees" and "Private scavenging fees."

5. The income from the sale of street refuse, &c., fell below the actuals of the previous year, the reason for which is explained by the Chairman. It is encouraging to find that the use of night-soil as manure is beginning to be understood, and I hope with the Chairman that this source of revenue will develop in course of time.

6. A steady and progressive improvement is observed in the income from educational institutions and private scavenging system. The demand under the latter head rose to Rs. 328 and the system yielded a profit of Rs. 42.

7. The total expenditure for the year under report was Rs. 5,240 more than in 1896–97, and the greater portion of the increse was under Grant 1. The items of works on which the charges were incurred are detailed by the Chairman.

8. Although the outlay on the Town Roads—New Works and Repairs—formed 53 per cent. of the net toll receipts, the percentage thereof spent on the *maintenance* of road was about 30 only; nevertheless the roads are stated by the Revenue Division officer to be in good order and this is my recollection also. I do not think mud-wall latrines are a good investment. It is preferable to use corrugated iron.

9. The increase in the expenditure under Grant 2 is explained by the Chairman. The opening of the fifth form in the high school, the addition of two schools to the number aided under primary schools and the improvement in the strength of the schools show that a good deal of attention is paid to education.

10. There was a decrease in the number of patients treated at the main hospital and at the female dispensary as compared with the preceding year, and the explanation of the apothecaries concerned is considered by the District Medical and Sanitary Officer as unsatisfactory.

The vaccinator attributes this fall chiefly to the quality of the vaccine paste. There were 78 cases of re-vaccination. As usual a thorough search was made from house to house and an enumeration taken of all unprotected children which resulted in the vaccination of 98 children in two days. The municipal council has fixed a minimum of 38 for the vaccinator for each month, seeing that the total births in a year come to about 400 and has ruled that for every case falling short of the minimum a fine of one anna should be imposed. The number of persons prosecuted for failure to have their children vaccinated was 8. The average cost of vaccination per case rose to As. 7–6 from As. 6–2 in the previous year owing to a large number of operations having proved unsuccessful.

29. *Vital Statistics.*—The number of births was 404 against 386 and was 37·6 per mille of the population. The number of deaths was 320 against 515 in 1896–97 when cholera of a virulent type carried away 146 persons. The putting up of notice boards in important parts of the town, warning people that failure to give information will result in prosecutions has had some good effect. The number of persons prosecuted and convicted for omitting to give information of births was 8 and of deaths 4. To improve the registration of deaths, it is proposed to have sheds erected near the burial and burning grounds for licensed Vettians to live in and to have the deaths noted at the time of the burial or cremation.

30. *Sanitation.*—The total expenditure on conservancy and sanitation was Rs. 4,255–4–4 against Rs. 3,911–0–11 in the previous year and represents 21·85 per cent. of the total revenue. Except under establishment charges, where difficulty of securing scavengers explains the savings, the allotments were fully utilized. Three additional public latrines were constructed for the use of the people in places where they were most required, bringing up their number to 14 for a town with a population of 10,750. The number of cess-pits or well latrines has been considerably reduced and only fifty remain yet to be closed. Periodical inspection of backyards and prosecution under section 221 have improved the sanitary condition of houses. 10. There was a decrease in the number of patients treated at the main hospital and at the female dispensary as compared with the preceding year, and the explanation of the apothecaries concerned is considered by the District Medical and Sanitary Officer as unsatisfactory.

(*f*) There were five deaths among in-patients during the year—two died from injuries, one from malarial fever, one from anæmia and one from cholera.

(*g*) Seven hundred and twenty-seven operations were performed during the year with no deaths.

(*h*) The establishment is sufficient and efficient.

(*i*) No midwife is attached to the hospital, as a midwife is attached to the female dispensary in the town.

(*j*) The hospital compound is small. The contagious shed must be removed from the hospital compound to some convenient place.

KARÚR,
19*th April* 1898.

(Signed)
Civil Apothecary.

No. 2108.

Forwarded to the Chairman, Municipal Council, Karúr. No satisfactory reason is given for the decrease in the out-patients.

COIMBATORE,
23*rd May* 1898.

(Signed) D. SIMPSON, Surg.-Capt.,
Ag. Dist. Medl. and Sanitary Officer.

CONCISE Annual Report of the Female Dispensary, Karúr, for the year 1897–98.

Hospitals and Dispensaries.—(*a*) The dispensary is a portion of the municipal chattram and consists of three rooms. The accommodation is insufficient at present to make special arrangements for attending to gosha patients separately, but will be ample when the whole building is obtained for use as the dispensary.

(*b*) The portion of the building used as the dispensary is in fairly good order.

(*c*) The furniture is in good order except the small dispensary almirah, which requires some repairs and two shelves with separate locks.

(*d*) The District Surgeon at his last inspection has recommended that the whole chattram be given up to be used as dispensary, and this is expected to be done shortly.

(*e*) No money has been recovered from patients for medicines.

(*f*) The number of patients treated during the year 1897–98 was 11,344 (4,437 women and 6,907 children) with an average daily attendance of 75·28 against 14,207 treated in the previous year with an average daily attendance of 95·5.

(*g*) There are no in-patients maintained.

(*h*) The number of operations performed was 304. Of these, 269 were cured, 33 relieved and 2 died.

(*i*) The establishment consists of a compounder, midwife and water-woman. The midwife is often called away in the mornings to attend labour cases. It is then difficult for the only remaining female servant to manage all the surgical cases. It would be well if the services of another servant be obtained.

(*j*) The midwife attended to 102 cases of labour during the year (98 in the town and 4 in the surrounding villages). Fourteen cases of labour were conducted by the lady apothecary, twelve of these being difficult and two natural.

(*k*) There has been a marked fall in the attendance during the year under report. This must be attributed to better health amongst the people and less prevalence of eye-diseases in particular.

Respectable patients of all classes continue to attend the hospital as before, and I am certain the institution is appreciated in spite of the fall in the attendance.

KARÚR,

(*f*) There were five deaths among in-patients during the year—two died from injuries, one from malarial fever, one from anæmia and one from cholera.

(*g*) Seven hundred and twenty-seven operations were performed during the year with no deaths.

(*h*) The establishment is sufficient and efficient.

(*i*) No midwife is attached to the hospital, as a midwife is attached to the female dispensary in the town.

(*j*) The hospital compound is small. The contagious shed must be removed from the hospital compound to some convenient place.

KARÚR,
19*th April* 1898.

(Signed)
Civil Apothecary.

No. 2108.

Forwarded to the Chairman, Municipal Council, Karúr. No satisfactory reason is given for the decrease in the out-patients.

COIMBATORE,
23*rd May* 1898.

(Signed) D. SIMPSON, Surg.-Capt.,
Ag. Dist. Medl. and Sanitary Officer.

CONCISE Annual Report of the Female Dispensary, Karúr, for the year 1897–98.

Hospitals and Dispensaries.—(*a*) The dispensary is a portion of the municipal chattram and consists of three rooms. The accommodation is insufficient at present to make special arrangements for attending to gosha patients separately, but will be ample when the whole building is obtained for use as the dispensary.

(*b*) The portion of the building used as the dispensary is in fairly good order.

(*c*) The furniture is in good order except the small dispensary almirah, which requires some repairs and two shelves with separate locks.

(*d*) The District Surgeon at his last inspection has recommended that the whole chattram be given up to be used as dispensary, and this is expected to be done shortly.

(*e*) No money has been recovered from patients for medicines.

(*f*) The number of patients treated during the year 1897–98 was 11,344 (4,437 women and 6,907 children) with an average daily attendance of 75·28 against 14,207 treated in the previous year with an average daily attendance of 95·5.

(*g*) There are no in-patients maintained.

(*h*) The number of operations performed was 304. Of these, 269 were cured, 33 relieved and 2 died.

(*i*) The establishment consists of a compounder, midwife and water-woman. The midwife is often called away in the mornings to attend labour cases. It is then difficult for the only remaining female servant to manage all the surgical cases. It would be well if the services of another servant be obtained.

(*j*) The midwife attended to 102 cases of labour during the year (98 in the town and 4 in the surrounding villages). Fourteen cases of labour were conducted by the lady apothecary, twelve of these being difficult and two natural.

(*k*) There has been a marked fall in the attendance during the year under report. This must be attributed to better health amongst the people and less prevalence of eye-diseases in particular.

Respectable patients of all classes continue to attend the hospital as before, and I am certain the institution is appreciated in spite of the fall in the attendance.

Attention is however drawn to the Collector's remarks in para 3. of his address.

+31 Vide paras 20. of this report

extend this system will not be relaxed until all the private latrines in the town are brought under the control of the municipal agency.

4. Expenditure (1) Public works—

An additional building for the municipal High School was constructed at a cost of Rs 1,234, an iron latrine of the type design was erected ~~in Mettupalayam~~ at a cost for Rs 904 and a sum of Rs 532 was spent in putting up a tiled shed with Cuddapah slabs & stone pillars in the weekly market. The total expenditure on Communications amounted to Rs 2252 or 54·2 per cent of the net municipal revenue from tolls and the Revenue Divisional Officer reports that the town roads were maintained in good order. ~~In this connection~~ The attention of the municipal Council is however drawn to the remarks of the Collector in para 8 of his endorsement regarding the small proportion of the net municipal income from tolls spent on the maintenance of roads and the inexpediency of constructing mud wall latrines.

Statement II. A Part I. page 12. & para 24 of this report.

(2) Education. The net expenditure on primary education was Rs 1393 while secondary education was worked at a profit of Rs 184 to the municipal Council. Thus the total net expenditure on Education amounted to Rs 1229 or 11·4 per cent of the receipts from taxation As in the previous year, the municipal Council maintained a high school and a primary school on the salary system. The attendance at these institutions showed an improvement and the results of the public examinations continued to be fair. The municipal Council also aided nine primary schools with result grants against seven in 1896-97. Owing to the increase in the number of aided schools the attendance at these institutions also showed an improvement. The results of the grant examinations continued to be good and the allotment for result grants was fully utilized. It is satisfactory to note that the number of boys under instruction in the municipal and aided schools rose from 660 to 774 or nearly the whole of the male population of school going age in the town.

(3) Medical Relief. The number of in-patients treated in the municipal hospital fell from 65 to 53 and that of out-patients from 11,822

extend this system will not be relaxed until all the private latrines in the town are brought under the control of the Municipal agency.

4. Expenditure on Public works—

An additional building for the Mun! High School was constructed at a cost of Rs 1,234, an iron latrine of the type design was erected ~~in Mantargudi~~ at a cost for Rs 904 and a sum of Rs 532 was spent in putting up a tiled shed with Cuddapah slab floor in the weekly market. The total expenditure on Communications amounted to Rs 2252 or 54.2 per cent of the net municipal revenue from tolls and the Revenue Divisional Officer reports that the town roads were maintained in good order. ~~In this connection~~ The attention of the Municipal Council is however drawn to the remarks of the Collector in para 8 of his endorsement regarding the small proportion of the net municipal income from tolls spent on the maintenance of roads and the inexpediency of constructing mud wall latrines.

(2) Education. The net expenditure on primary education was

Statement II. of Part I. page 12. & para 24 of this report.

Rs 1393 while secondary education was worked at a profit of Rs 184 to the Municipal Council. Thus the total net expenditure on Education amounted to Rs 1229 or 11.4 per cent of the receipts from taxation As in the previous year, the Mun! Council maintained a high school and a primary school on the salary system. The attendance at these institutions showed an improvement and the results of the public examinations continued to be fair. The municipal Council also aided nine primary schools with result grants against seven in 1896-97. Owing to the increase in the number of aided schools the attendance at these institutions also showed an improvement. The results of the grant examinations continued to be good and the allotment for result grants was fully utilized. It is satisfactory to note that the number of boys under instruction in the Municipal and aided schools rose from 660 to 774 or nearly the whole of the male population of school going age in the town.

(3) Medical Relief. The number of in-patients treated in the Mun! hospital fell from 65 to 53 and that of out-patients from 11,822

to 10.476. The decline in the latter
case is attributed by the civil
apothecary to the less prevalence
of malarial fever and eye
diseases; but this explanation
is considered by the District
Medical and Sanitary Officer
as unsatisfactory. The number
of patients treated at the dispensary
for women and children also
fell by 2863 and the
explanation of this decline
furnished in the female apothecary's
report, viz: better health & less prevalence of eye diseases
cannot be considered as
adequate. The mid wife employed
by the Muni Council attended
102 cases of labours against
80 cases in the previous year.
a satisfactory advance. In addition to
this the female apothecary
attended fourteen cases of labours
or one more than in 1896-97.

(4) Vaccination and vital Statistics

The total numbers of vaccine
operations performed during
the year fell from 558 to 501
and owing to the inferior
lymph supplied from the
district depot, the quality
of the work, also the quality of
the work greatly deteriorated,
the percentage of reported
successful primary vaccin-
-ations being 83.2 against 93.4
in the previous year, and the cost
of each successful operation thus
rose from As 6-2 to As 7-8. Re-
-vaccination also
showed retrogression, the total
number of children under
one year successfully vaccinated
being 282 or 26.2 per mille of
the population against 31.8
per mille in 1896-97 and a
registered birth rate of 37.6
per mille. This subject therefore, de-
-mands the special attention of the Council. The number of births registered
rose from 386 to 404, but that of deaths
fell from 515 to 320, the decline
being attributed to the absence
of cholera in the town. The returns
in both cases cannot, however,
be regarded as accurate the
rates recorded being much
below the normal. The Council's

(5) Sanitation - More than
13 per cent of the allotment under
this head was allowed to lapse
for the reason stated in para 30.
of the Chairman's report, but
the total expenditure amounted
to Rs 4255 or 21.9 per cent of
the current receipts. The Govt is
glad to observe from para 30
of the Chairman's report and para 13

Para 5(a) of his Medical report

Para 29. of his report.

5. Supervision Attention is drawn to the
Paymen instructions issued on this
subject in the latter part
of para 2 of Govt No 926 M
dated 17th May 1898. regarding the
registration of vital statistics.

B.

4.

the Collector's Endorsement
that some attention was paid
to the sanitation of the town,
but para 3 of the Civil apothecary's
report shows that much ~~yet~~
remains to be done and the
Council should exert itself
to remedy the defects pointed
out by ~~that officer~~ him.

5. General Remarks. The
year closed with a balance
of Rs 1639 or 8.4 per cent of
the current receipts.

The administration of
the municipality during
the year under review
continued to be tolerably
efficient; but medical relief,
vaccination and registration
of vital statistics demand
increased attention
