C No 2108
Office Note.
No 124

Guntakal, 5th October 1898.

I inspected Chipagiri this morning and met the Collector at the village. In health camp there are 19 sheds and tents containing 122 people. The sheds were put up by the Government. The people appear to be all contented and no remarks are necessary regarding it. In the segregation camp I found six persons in 2 huts and seven Comatties segregated in a separate hut. The Comatti family is feeding itself at its own expense, the other six are receiving food at the rate of 1 anna, six pies for adults and 9 pies for children. They supplement this with food at their own expense. The establishment at present employed consist of,

This is within accordance with the prescribed scale - But it may pass By

first, an ambulance staff containing 1 nurse, 2 hospital assistants 2 compounders 4 dhooly bearers, 4 male ward attendants, 3 female ward attendants, 2 cooks, 2 totties also a sanitary Inspector. - Besides this staff there is a camp Superintendent at Rs.45 a month and 1 water-man for the segregation camp paid daily 2 annas a day and peons on Rs.8 & Rs.6 a month. There are 200 sepoy in the village, with 4 Native officers and 1 European Officer. These men are chiefly engaged in disinfecting work. They also form a Cordon round the village. The Tahsildar asked that he might have a clerk on Rs.20 to keep books regarding the supplies for the shed construction, feeding.

the patients, and persons in the segregation camp and for correspondence in connection with the sepoys. This clerk I have sanctioned, also I have sanctioned 6 peons instead of 8 who are shown to have been already employed. Chipagiri being away from the Railway Station and from bazars there is considerable delay in the supplies, and peons appear to be very necessary. Disinfecting work in the village is being well done., the houses in this village are particularly dark and filthy and the work done has been very thorough. I told the Collector that he might maintain the Cordon which is now existing until the inhabitants go back to the village, but great care should be taken to give passes freely and allow the people as much liberty as possible. The disinfecting of the houses will probably be completed in about 14 days from now and I told Mr. Elwin that when this work is finished, the people might return to their village. Most of the houses especially those nearest the source of infection will then have been vacated for 4 or 5 weeks. Orders were asked regarding the white-washing the houses. I ordered that the walls should be white-washed up to 4 feet from the ground and that all the posts which hold up the roofs inside these houses should be carefully washed. Mr. Elwin asked for Police Guard to do duty now in the village to guard the empty houses at night. I should say that 1 Head & 6 constables will do for the purpose. The

Collector will no doubt apply ^{to} the Superintendent for these men.

There were several bales of cotton in the village which a merchant wished to be sent to Adoni. These had been 3 or 4 days in the Sun. I have ordered that they might be sent to Adoni after being exposed for 3 or 4 more days, but that the consignee's agent at Adoni should be warned to keep them if possible 10 days exposed to the Sun. The plague in this village appears to have been of a peculiarly virulent kind. There have been 9 attacks in the hospital, all the patients have died. The people are reported to be very anxious to be inoculated & if possible all the persons now in the camp should be inoculated before being allowed to return to the village.

*The S.O. should be able to
 arrange for this. R.S.*

I took the opportunity of asking Mr. Elwin to mark out as early as possible sites for private hospitals in Bellary Town and to give all assistance in power to any movement that may be there for the establishment of these hospitals.

separate orders will be passed on the other matters which Mr. Elwin brought to my notice.
