Observation Scheme for South Canara.

Approving the —.

PROCEEDINGS OF THE PLAGUE COMMISSIONER.

READ—the following paper:—

From A. F. PINHEY, Esq., Acting Collector of South Canara, to the Plague Commissioner of Madras, dated Mangalore, 12th November 1898, Ref. on C. No. 1652-Eng.

With reference to Government Notification No. 860, published at page 299 of the Fort St. George Gazette, dated 25th October 1898, Part I-A, applying Regulation 29 of the Original Mufassal Regulations to this district, I have the honour to report, for your information and approval, the measures I am going to adopt for carrying out the said regulation.

2. I propose to establish stations at the following places for the observation of road passengers from Mysore:—

Road.	Station.	Taluk.
1. Coondapoor to Bednore or Naggur in Mysore	Hosangudi	Coondapoor.
2. Udipi to Agumba in Mysore	Someshwar (Nadpal village). Charamdi	Udipi.
3. Mangalore to Chickmagalur in Mysore	Gun-dia (included in Shiradi village in the enclosed survey map)	Uppinangadi.
4. Mangalore to Manjirabad in Mysore.	Sampaji	Do.
5. Mangalore to Mercara		Do.

The aforesaid stations being close to the frontier will serve the purpose of road frontier inspection stations also when the district is placed under observation. There are two other roads communicating with Mysore, viz., one leading from Coondapoor to Mysore *via* Kollur and the other from Uppinangadi to Mysore *via* Bisleghat. But the majority of the officers consulted agree in thinking that it is not necessary to make special arrangements for these two roads as there is not much traffic on these roads, and that a careful working of Regulation 17 is sufficient. I may also add that though the enclosed survey map shows a road leading from Udipi taluk to Sringeri in Mysore, there is really no cart-road there but only a foot-track. A station on this road is therefore considered unnecessary.

3. It is proposed to move the Local Fund dispensaries at Beltangady, Hebri, Shankranaraina and Sullia to Charamdi, Someshwar, Hosangadi and Sampaji, respectively. As for Gundia station it is proposed to send a separate medical officer thither.

4. At each station I propose to provide accommodation as follows:—

One plague shed with three compartments for three patients	36' x 12'
Two segregation sheds, each with four compartments, for eight males	48' x 10' each.
Two segregation sheds, each with two compartments, for four females	24' x 10' each.
Hospital assistants' quarters including office, dispensary and store-room and verandah as per District Board Engineer's plan enclosed	46' x 22'
One guard-room	12' x 10'
Three cook-rooms for segregation and plague sheds and hospital assistant, respectively	12' x 6' each.
Three latrines for male and female segregation sheds and the plague shed, respectively.	

The verandahs of the hospital assistants' quarters will be used as quarters for servants. The District Board Engineer's estimates for the sheds at each station amount to Rs. 983. But he has provided for separate huts for servants and allotted more accommodation for police lines than that shown above. His rates also appear high. I therefore propose to get the work executed through Revenue agency and hope that the whole block of sheds at each station will not cost much more than Rs. 230, especially as I have asked for Government sanction to give junglewood and bamboos, &c., free from the adjoining Government jungles. Estimates for these sheds will be submitted as soon as possible.

5. I propose to entertain at each of the five stations referred to above, besides an hospital assistant, the marginally-noted establishment, which is the same as that sanctioned for road frontier inspection stations in other districts, though I do not propose to appoint a gumasta just now, but will entertain one later on when traffic increases.

6. I also beg to submit, for sanction of Government, my scheme for observation circles to be introduced, if circumstances should render it necessary to place this district under observation. The circles and supervisors' divisions which I propose are shown below together with the head-quarters of supervisors, the head-quarters of circle inspectors being the same as the names of the circles which are named after the inspectors' head-quarters:—

Taluk.	Names of circles.	Head-quarters of supervisors.
Coondapoor	1. Yeljiita	I. Vandse.
Do.	2. Hosar	
Do.	3. Rattadi	
Do.	4. Hemmadi	
Coondapoor and Udipi	5. Kakkunji	II. Perdur.
Do.	6. Hebri	
Udipi	7. Cherkadi	
Do.	8. Manipura	
Udipi	9. Marne	III. Karkala.
Udipi and Mangalore	10. Miyar	
Do.	11. Belmannu	
Mangalore	12. Perodi	
Uppinangadi	13. Indibette	IV. Dharmastala.
Do.	14. Kaniyur	
Do.	15. Dharmastala	
Do.	16. Nujibaltala	
Uppinangadi	17. Yandakal	V. Aivathokla.
Do.	18. Kaniyur	
Do.	19. Jalsur	
Do.	20. Aranthoda	

The circles are laid generally to a depth of 20 miles from the frontier (excluding a narrow belt close to the Mysore frontier covered with dense forest); and the prescribed limit of 5 miles radius has been kept in view as far as possible in forming them. Only one circle to a depth of 10 miles from the frontier is provided for Mangalore taluk for the reason that it has no cart roads directly communicating with Mysore. No circles are also proposed for the Kasaragod taluk as no part of it adjoins Mysore and as there is no cart road directly between it and Coorg even. A survey map of the district in which the circles, &c., are denoted is herewith submitted.

7. I request that your approval of the proposals detailed in paragraphs 2 to 5 *supra* for carrying out Regulation 29 may be intimated to me by wire, as I have directed the Divisional-officers to arrange for the erection of the sheds at the several stations being taken in hand at once.

4

No. 692, 16TH NOVEMBER 1898.

PROCEEDINGS—No. 692, dated 16th November 1898.

The observation arrangements are approved and the Collector will be advised by wire accordingly.

for Plague Commissioner.

To the Collector of South Canara (A—L).
 " Sanitary Commissioner.
 " Surgeon-General.
 " Secretary to Government, Local and Municipal Department.
