Enclosure No. 1 to Letter No. 93 d 10/9/98
 Copy of a letter from the Swil Apothecary in
charge Municipal Hospl Grade to the District Med
and Sanitary Officer, Sanitation
 No. 28, dated 25th August 1898.

In obedience to your letter C.No. 3360 dated 20th August 1898, in reference to No. 9471 dated 17th August 1898 from the Secretary to the Surgeon General calling on me for explanation for the decrease in the number of out patients treated during the official year 1897-98, I beg respectfully to submit the following:

1. In the report for the official year, there were only 11,512 out patients against 15,065 of the previous year, there being 3553 less admissions. For the official year 1897-98, the number of admissions in Eye diseases was only 1303 against 5020 of the previous year, the difference being 3717, which almost corresponds for the decreased number of admissions for the year. This marked fall in Eye diseases was specially pointed out by me in my hospital report for the Calendar year 1897, wherein it is stated: "There has been a considerable decrease in the number of admissions of out patients 11,639 against 15,201 of the previous year. The decrease is due to the less prevalence of Eye diseases which were only 11,682 against 14,869 of the previous year."

2. I attach the following from the Hospital statistics for the past five years:-

P.T.C.

Year	Total number of Admissions	Number of Eye Diseases	Total number of admissions deducting No of Admissions from Eye Diseases
1893	11410	817	10583
1894	12935	2447	10488
1895	11964	1803	10161
1896	15201	4849	10352
1897	11439	1481	9958

If the number of admissions from Eye Diseases is deducted from the total of admissions for every year, I beg to point out there is no marked increase or decrease in the number of admissions. In 1896, there was a considerable increase in the number of Eye Diseases and which also accounts for the swell in the No of total admissions. It was striking in the year 1897 there was a considerable decrease in Eye Diseases and hence the fall in the number of total admissions. In reference being made to the neighboring hospitals and dispensaries, the Medical Subordinate say that there was a marked decrease during the year 1897, owing to absence of high authorities.
