No. 474. 2. 31.12.97
Ellora

From
Civil Surgeon T. Shanbharam Pillay
in charge Municipal Hospital
Ellora

To
The Chairman
Municipal Council
Ellora

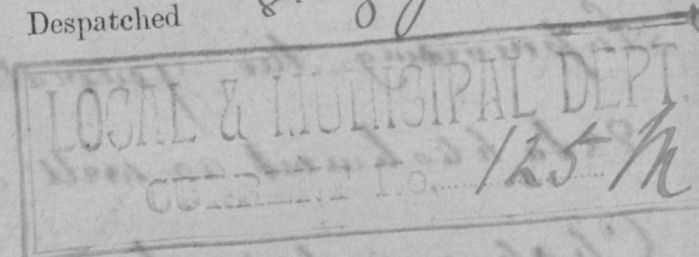

Sir

With reference to prevalence of cholera in the
Ellora Municipality from 24.7.97 to 9.11.97
I have the honour to state that all the persons
who suffered from the disease from 24.7.97
to 9.9.97, were those that came from villages
adjoining Ellora, where cholera was prevalent.
These people showed symptoms of the disease
soon after their arrival here. There was rain
from the latter part of August till September 97
when the disease broke out amongst country people.
A special staff was employed to combat the
disease and the system of patrolling through the
streets and attending to the disinfection and disposal
of choleraic vomit and excreta as well as the
sanitation of the place was attended to. The disease
lasted from 24.7.97 to 9.11.97. The chart annexed
will show the daily attacks, progress and decline of
the disease.

I have the honour to be
Your most obedient servant
T. Shanbharam Pillay
Civil Surgeon

Ellore Municipal Office.

Ellore
Dated the 6th }
Despatched 8th } January 98

FROM,

M-R-Ry.

C. SITARAMAYYA PANTULU GARU;

CHAIRMAN,

MUNICIPAL COUNCIL, ELLORE.

To,

The Secretary to Government
Local and Municipal Department

Sir, (Through the Collector, Godavari)

In Submitting herewith letter no 474
dated 31-12-97 from the Civil Apothecary,
Ellore. I have the honor to report as
follows on the recent outbreak of Cholera.

2. On receipt of intimation from the
Civil Apothecary of some stray cases of
purging and vomiting, I have divided
the town into 4 circles and appointed
observation staff in each of the circles.
The Civil Apothecary was appointed Divisional
Inspector with an order.

25 Nov 1898

3. Care was taken to secure better Sanitation of the town by strictly Supervising the general Conservancy establishment as well as the special Cholera establishment. The Civil Apothecary was also requested to Haucinize all wells. The medical officers and the Sanitary Staff were directed to watch all the trains and boat stands.

4. The establishment was dispensed with from 1st September 1897.

5. Again when there were certain stray cases in the town, an observation staff consisting of one Inspector, two peons and two to six was appointed on 17-9-97 and one extra toky was appointed subsequently.

6. The use of the Krishna Canal water was prohibited from drinking and from cooking purposes and the Inspector

of Police was addressed to place two or three Constables on the bank of the Canal to prohibit people from taking its water for the above purposes.

7. The medical officers and the Sanitary Inspectors were directed to watch daily all the trains that pass through this station and also the boat stands. Medicines were freely distributed and Councilors were also requested to attend to sanitation in their respective wards.

8. The staff was dispensed with 21 days after the last attack. I may also mention that as Cholera rules do not apply to this town, only necessary staff was entertained and the same was duly communicated to the Collector in time.

I have the honor to be
Your most ^{Dr} obedient servant

Chavara
