In Gó dávari Central "	...	...	134.25	"
In Gó dávari Western "	...	...	65.5	"

3. If the whole of each branch of the Gó dávari is to be in the hands of one Conservator, the following arrangement is proposed :—

No. 299 I.

Note by the Chief Engineer for Irrigation.

In his letter, No. 595 G.L., dated 26th October 1897, the Superintending Engineer, I Circle, suggested the advisability of forming a separate sub-division to work directly under the Superintending Engineer's orders for regulating the conservancy operations of the Gó dávari river in accordance with Act VI of 1884.

The Superintending Engineer was thereupon informed that the undersigned considered it impossible for a Superintending Engineer to supervise the conservancy work and that this must be left to Executive Engineers, care being taken that opposite banks of the river are not in different divisions. As the limits of jurisdiction fixed in G.O., No. 810 I., dated 7th October 1896, do not accord with the above view, he was requested to propose the necessary transfers, so that the whole of each branch of the Gó dávari may be in charge of one Conservator.

In his letter, No. 1605 G.D., dated 5th December 1897, the Superintending Engineer accordingly proposes a revised arrangement which is approved and recommended for adoption.

17th December 1897.

(Signed) W. HUGHES,
Chief Engineer for Irrigation.

No. 19 I., 6TH JANUARY 1898.
