Special Death-rate Returns.

Recording Board's Proceedings submitting, with remarks, — for the affected districts received from the Sanitary Commissioner for the four months ending with September 1897.

Asy 2/98 3/2/98.

GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

Read—the following Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), No. 747, dated 18th December 1897 :—

W. J. H. LEFANU, Esq.

(Famine Commissioner).

Read—again the following Memorandum of the Board of Revenue (R.S., L.R. and Agri.), Mis. No. 6961, dated 27th August 1897 :—

Read—the following letter from Surgeon-Lieut.-Col. W. G. KING, M.B., C.M., D.P.H., Sanitary Commissioner for Madras, to the Famine Secretary to the Board of Revenue, dated Fort St. George, 16th August 1897, No. 1671-S. :—

With reference to the Proceedings of the Board of Revenue, Mis. No. 2402, dated 30th March 1897, I have the honour to forward herewith the special death-rate return called for by the Government of India for the month of June 1897. The return from Ganjām for the month under reference has not yet been received in this office. On receipt thereof a supplemental statement will be rendered.

2. The rates have already been communicated to the Government of India by wire.

ENCLOSURE.

SPECIAL death-rate return for the famine-affected districts for June 1897.

Districts.	Calculated on the Census population.	Calculated on the estimated population.			Deaths from starvation.
	Death-rate of the month per mille per annum.	Death-rate of the month per mille per annum.	Average death-rate of the month per mille per annum during ten previous years.	Average death-rate of the month per mille per annum during ten previous non-famine years.	
Vizagapatam	26.9	* 33.6	* 20.7	* 19.7	..
Bhadrachalam	68.1	61.1	30.8	30.0	..
Kurnool	22.0	19.5	22.0	21.0	..
Cuddapah	18.7	17.3	16.2	15.8	..
Bellary	27.3	23.3	25.5	24.4	..
Anantapur	19.9	18.5	20.0	18.5	..

* Vizagapatam.—The rates have not been calculated on the estimated population, as it has been found not possible to estimate population correctly owing to the fluctuations in the population for which returns were received from this district. Again the average death-rates are given for five years instead of ten years, as the populations for which returns were received are not available from 1892 to 1895.

Memorandum—Mis. No. 6961, dated 27th August 1897.

The Sanitary Commissioner is requested to state whether the figure 33.6 given in the statement forwarded with his letter, No. 1671-S., dated the 16th instant, as the death-rate of the month per mille per annum for the Vizagapatam district calculated on the estimated population is correct.

(Signed) L. E. BUCKLEY,
Famine Secretary.

To the Sanitary Commissioner.

Read—again the following Proceedings of the Board of Revenue (R.S., L.R. and Agri.), Mis. No. 7625, dated 15th September 1897 :—

Read—Memorandum of the Board of Revenue (R.S., L.R. and Agri.), Mis. No. 6961, dated 27th August 1897 :—

Read—the following letter from Surgeon-Lieut.-Col. W. G. KING, M.B., C.M., D.P.H., Sanitary Commissioner for Madras, to the Famine Secretary to the Board of Revenue, dated Fort St. George, 1st September 1897, No. 1784-S. :—

With reference to your Memorandum, Mis. No. 6961, dated 27th instant, I have the honour to state that the figure 33.6 under reference is correct. This figure was arrived at by calculating the death-rate of Vizagapatam district on the Census population for which return was received for June 1897.

Resolution—Mis. No. 7625, dated 15th September 1897.

Recorded.

2. It is understood that, in the case of the figures for the Vizagapatam district, column 3 of the mortality statement read in the first paper read above gives the actual death-rate of the month calculated on the Census population of the villages from which returns were received during the month, and that columns 4 and 5 give the average death-rates calculated on the Census population of the villages for which returns were received for the month in question in the year for which the averages are struck. If this be the case, the averages must be misleading, as the villages for which returns are received for any given month will, if incomplete, vary from year to year. The Sanitary Commissioner will be requested to state whether, under the circumstances, the comparison of the actual death-rates with the averages is of any value.

(True Copy and Extract.)

(Signed) L. E. BUCKLEY,
Famine Secretary.

To the Sanitary Commissioner.

Read—again the following Proceedings of the Board of Revenue (R.S., L.R. and Agri.), Mis. No. 8427, dated 15th October 1897 :—

Read—the following letter from Surgeon-Lieut.-Col. W. G. KING, M.B., C.M., D.P.H., Sanitary Commissioner for Madras, to the Famine Secretary to the Board of Revenue, dated Fort St. George, 8th September 1897, No. 1828-S. :—

With reference to the Proceedings of the Board of Revenue, Mis. No. 2402, dated 30th March 1897, I have the honour to forward herewith the special death-rate return

called for by the Government of India for the month of July 1897. The return from Ganjam for the month under reference has not yet been received in this office. On receipt thereof a supplemental statement will be rendered.

2. The rates have been communicated to the Government of India by wire.

ENCLOSURE.

SPECIAL death-rate return for the famine-affected districts for July 1897.

Districts.	Calculated on the Census population.		Calculated on the estimated population.			Deaths from starvation.
	Death-rate of the month per mille per annum.	Death-rate of the month per mille per annum.	Average death-rate of the month per mille per annum during ten previous years.	Average death-rate of the month per mille per annum during ten previous non-famine years.		
Vizagapatam	34.9	48.0	23.2	22.6	..	..
Bhadrachalam	40.4	36.2	28.0	27.4	..	..
Kurnool	34.6	30.7	27.3	23.3	..	..
Cuddapah	20.6	19.0	20.1	17.8	..	..
Bellary	41.7	35.5	28.6	25.6	..	..
Anantapur	24.7	22.9	24.1	20.6	..	..

* The rates have been calculated on the census population for which returns were received, as it has not been found possible to estimate the population correctly owing to the fluctuations in the populations for which returns were received from this district. Again the average rate of five years instead of ten is given, as the populations for which returns were received are not available from 1892 to 1895.

Resolution—Mis. No. 8427, dated 15th October 1897.

Recorded, pending receipt of reply to Board's Proceedings, Mis. No. 7625, dated 15th September 1897.

Resolution—Mis. No. 8861, dated 3rd November 1897.

Recorded.

2. The Sanitary Commissioner is requested to send an early reply to Board's Proceedings, Mis. No. 7625, dated the 15th September 1897.

(True Copy and Extract.)

(Signed) L. E. BUCKLEY,
Famine Secretary.

To the Sanitary Commissioner.

Read—the following letter from Surgeon-Lieut.-Col. W. G. KING, M.B., C.M., D.P.H., Sanitary Commissioner for Madras, to the Secretary to the Board of Revenue (Revenue Settlement, Land Records and Agriculture), dated Fort St. George, 26th November 1897, No. 2417-S. :—

With reference to the Proceedings of the Board of Revenue, Mis. No. 2402, dated 30th March 1897, I have the honour to forward herewith the death-rates for the famine-affected districts for the month of September 1897 as compared with the average of the ten previous non-famine years. To enable an estimate to be formed as to the causation of mortality, I attach statements giving the necessary details in the case of those districts which have shown a large increase over the average.

2. The rates have been communicated to the Government of India.

ENCLOSURES.

SPECIAL death-rate return for the famine-affected districts for September 1897.

Districts.	Calculated on the Census population.	Calculated on the estimated population.			Deaths from starvation.
		Death-rate of the month per mille per annum.	Death-rate of the month per mille per annum.	Average death-rate of the month per mille per annum during ten previous years.	
Ganjām	42.1	..	21.6	20.6	..
Vizagapatam	40.0	23.7	22.6	22.3	..
Bladrachalam	26.5	52.4	36.4	35.4	..
Kurnool	59.2	33.1	25.1	23.0	..
Cuddapah	36.0	41.2	22.8	20.9	..
Bellary	48.6	45.1	23.2	20.8	..
Anantapur	48.8	..	19.9	18.4	..

* The rates have been calculated on the Census population for which returns were received as it has not been found possible to estimate the populations correctly owing to the fluctuations in the populations for which returns were received from this district. Again the average death-rate of five years instead of ten is given, as the populations for which returns were received are not available from 1892-95.

CAUSATION statement of Ganjām district for September 1897.

Years.	Population for which returns were received.	Total deaths.	Death-rate per mille of population.	Actual number of deaths under each of the principal causes.					Percentage of total deaths.

Read—also the following letter from Surgeon-Lieutenant-Colonel W. G. KING, M.B., C.M., D.P.H., Sanitary Commissioner for Madras, to the Famine Secretary, Board of Revenue, dated Fort St. George, 13th December 1897, No. 2575-S. :—

With reference to B.P., Mis. No. 7625, dated 15th September 1897, I have the honour to state that in dealing with statistics relating to a population, especially when that population is subject to fluctuation, comparison by rates would be more accurate than by actuals. It may be that the method followed is not all that can be desired, but in the absence of complete information for a district as a whole it is considered the best obtainable in the circumstances.

Resolution—No. 747, dated 18th December 1897.

The papers read above, which contain statistics showing the rate of mortality in each of the affected districts of the Presidency for the four months ending with September last, will be submitted for the information of Government. The delay in their submission is mainly due to the non receipt, until the 14th instant, of the Sanitary Commissioner's reply to a reference made to him in B.P., Mis. No. 7625, dated 15th September 1897.

2. The death-rates for all districts except Ganjam and Vizagapatam have been calculated by the Sanitary Commissioner on their population according to the last Census, as well as on their annual population estimated with reference to the normal rate of increase. In the case of Ganjam and Vizagapatam, however, it has not been possible to estimate the population in the latter manner, as the tracts for which returns were received were never identical, but varied from month to month; and for these districts, the Census population of the area concerned has alone been adopted. This constant fluctuation in the reporting area, and consequently in the population, is likely to vitiate all comparison between the death-rate for any particular month of the current year, and the rate for the corresponding month based on the average of preceding years. Regarding the utility of this method of comparison, the Sanitary Commissioner observes, in his last letter read at the head of these Proceedings, that it is not all that could be desired, but in the absence of complete information for a district as a whole, it is the best that can be obtained.

No. 36, REVENUE, 17TH JANUARY 1898.

3. The statistics show that the death-rate was at its highest, in the Deccan districts, in August and September. This was chiefly due to the prevalence of cholera in a virulent form, the mortality from this cause in September being two-fifths of the total mortality in Kurnool and over one-half in Anantapur.
