Bubonic Plague.

Communicating to all Collectors, for information and guidance, letter from the Government of India stating that, when home segregation of a plague patient is permitted, the sick person and the other inhabitants of the infected house should be located under shelter in the compound and that the house itself should be immediately evacuated and disinfected.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—again the following paper :—

Letter from the Acting Secretary to the Government of Madras, Local and Municipal Department, to the Secretary to the Government of India, Home Department, No. 120-P., dated 2nd March 1898.

I am directed to acknowledge the receipt of your letter, No. 270, Sanitary, dated the 8th February 1898, and to forward a copy of Mufassal Regulations Nos. 20 and 20-A revised in accordance with the instructions contained in paragraph 3 of your letter.

2. In regard to the question of the segregation of a plague patient in his own house, I am to point out that the cases contemplated in Mufassal Regulation 3 (b) and Madras City Regulation 11 (b) were exactly the cases in respect of which an exception has been admitted in paragraph 6 of the Resolution of 3rd February of the Government of India. In this Presidency, both in mufassal stations and in Madras, it is common for well-to-do native gentlemen and for Europeans to inhabit detached houses in the midst of spacious compounds. It appears to His Excellency the Governor in Council that should an occupant of such a house be attacked with plague, thoroughly efficient segregation could be enforced. This would in no way interfere with the ultimate vacation of the house. Meanwhile, the usual disinfecting precautions would of course be taken, and in the case of persons inhabiting such houses, would no doubt be efficient as they would be under professional supervision. In these circumstances, I am to request that the Government of India may be moved to allow the Regulations in question to stand in their present form.

READ—also the following paper :—

From R. NATHAN, Esq., Under Secretary to the Government of India (Home Department—Sanitary), to the Secretary to the Government of Madras, Local and Municipal Department, dated Calcutta, 23rd March 1898, No. 626.

I am directed to state that under the circumstances explained in your letter, Mis. No. 120-P., dated the 2nd instant, the Government of India do not wish to urge the modification of the revised Plague Regulations issued by the Government of Madras for the mufassal and for the City of Madras in the manner suggested in my letter No. 270, dated the 8th February 1898.

2. I am, however, to state that the Government of India consider that when segregation on the large premises of European and native gentlemen is permitted, the sick person and the other inhabitants of the infected house should be located under shelter in the compound, and that the house itself should be immediately evacuated and disinfected in the manner indicated in paragraph 6 of the Resolution of the Government of India, No. 227—240, dated the 3rd February 1898.

ORDER—No. 303-P., dated 1st April 1898.

Communicated to all Collectors for information and guidance. The Government of India Resolution quoted in the papers read above will be separately communicated.
