GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT

Read—the following paper :—

No. 135-S.

Remarks by the Sanitary Commissioner, Madras, on the recorded vital statistics in the Districts and Municipalities of the Madras Presidency for the month of May 1897.

Districts.

During the month under review, 77,415 births and 54,877 deaths were registered in the districts, which, reckoned on the census population of 1891, yielded annual ratios of 28·7 and 20·4 per mille, respectively. Considered, however, in relation to the estimated population of the month, the rates obtained are 25·2 and 18·0. Of the children born, 39,494 were boys and 37,921 girls, and of those who died 28,242 were males and 26,635 were females or, in other words, 104·1 boys were born for every 100 girls, and 106·0 males died for every 100 females.

2. In the annexed table, the deaths registered under the several causes are compared with those of the preceding month and the corresponding month of the previous year :—

—	Deaths from							Ratio per mille of population per annum.						
	Cholera.	Small-pox.	Fevers.	Dysentery and Diarrhœa.	Injuries.	All other causes.	Total.	Cholera.	Small-pox.	Fevers.	Dysentery and Diarrhœa.	Injuries.	All other causes.	Total.
May 1896 ..	1,376	748	20,684	1,578	1,109	24,925	50,420	0·5	0·3	7·7	0·6	0·4	9·3	18·8
April 1897 ..	4,104	2,194	18,439	1,909	1,013	20,883	48,542	1·5	0·8	6·8	0·7	0·4	7·7	17·9
May „ ..	5,385	1,987	20,673	2,090	1,053	23,689	54,877	2·0	0·7	7·7	0·8	0·4	8·8	20·4

3. The deaths from cholera which were reported from all the districts in the Presidency, except Kistna, Nellore, Madras, Kurnool, Cuddapah, Bellary, Anantapur and South Canara, aggregated 5,385 against 4,104 in April last and 1,376 in May 1896. The death-rate from this cause was largest in Ganjám (16·6). In five other districts the rate of mortality was between 3·0 in Madura and 4·8 in Malabar. Small-pox proved fatal in 1,987 cases against 2,194 in the preceding month. The Nilgiris and Malabar excepted, small-pox was prevalent in all the districts of the Presidency, the highest death-rate being recorded in Ganjám (17·4). Fevers caused 20,673 deaths against 18,439 in the preceding month. The rate of mortality was large in The Nilgiris (19·5), Vizagapatam (19·1), Kurnool (16·7), Cuddapah (15·8) and Ganjám (15·3). In all other districts, except Madras and Bellary, the death-rate from this cause was below 10 per mille per annum. 2,090 persons succumbed to dysentery and diarrhœa in the month under reference against 1,909 in the preceding month.

4. The accompanying map of the Madras Presidency exhibits the districts where deaths from cholera were recorded. They are shaded according to the intensity of the epidemic.

MUNICIPALITIES.

5. The births registered in the municipal towns amounted to 6,004 (3,059 boys and 2,945 girls), and the deaths to 5,063 (2,595 males and 2,468 females), representing annual ratios of 33·4 and 28·2 per mille of the census population of 1891, and 31·0 and 26·1 per mille of the estimated population, respectively. The mortality among infants under one year of age was 209·0 per mille per annum of the population of that age in that month against 162·7 per mille in April last.

6. The following statement compares the mortality from the several causes with those of April last and May 1896 :—

—	Deaths from							Ratio per mille of population per annum.						
	Cholera	Small-pox.	Fevers.	Dysentery and Diarrhœa.	Injuries.	All other causes.	Total.	Cholera.	Small-pox.	Fevers.	Dysentery and Diarrhœa.	Injuries.	All other causes.	Total.
May 1896 ..	114	70	1,538	565	90	2,579	4,956	0·6	0·4	8·7	3·2	0·5	14·5	27·9

May " ..	296	47	1,442	519	75	2,684	5,063	1·6	0·3	8·0	2·9	0·4	15·0	28·2

7. Deaths from cholera were reported from nineteen municipalities, and they amounted to 296 or 1·6 per mille of the population. The death-rate from this cause was largest in Berhampur (31·8), Cochin (25·2) and Coimbatore (19·4). In six other towns it ranged from 5·3 in Tinnevelly to 8·1 in Tuticorin. Small-pox contributed 47 deaths, and these were reported from fifteen municipalities. The mortality from fevers was 1,442 against 1,294 in April last and 1,538 in May 1896. The rate of mortality from this cause was highest in Kurnool (24·6), Coonoor (17·9) and Adóni (16·0). It was also severe in thirteen other towns. 519 persons fell victims to dysentery and diarrhœa against 534 in the preceding month—Tinnevelly taking the lead with a death-rate of 9·7 per mille.
