16 4 98

FOR ORDERS.

The existing Hospital and
Observation Camp accommodation
is as follows

Hospital

- 1 Shed for 2 European males (15x15)
- 1 Shed for 2 European females (15x15)
- 1 Shed for 4 native males (30x15)
- 1 Shed for 4 native females (30x15)

Observation Camp

- 1 Shed for 2 European males (15x15)
- 1 Shed for 2 European females (15x15)
- 1 Shed for 4 ^{native} European males (30x15)
- 1 Shed for 4 ^{native} European females (30x15)

x inside measurement

2. As it is proposed to put into
force Reg 29, it is necessary
to increase the accommodation
for natives in the Observation Camp. Each
native shed at Jungabhadra measures
12x10

8'10" or 12'0" feet & is supposed
to be enough for 5 persons. On this
scale, the existing shed at Kondapalle
might be supposed to suffice for 18 persons. If
a more shed of the same dimensions
for each shed, there will be accommodation
for 22 persons, and this seems
enough. At Hospet Observation
Camp, accommodation has been
provided for 3 Europeans & 50 natives.

may stand over for 1^x
present. If the present
improvement does not
continue, we can well
to erect a Bombay tent
shed for 50 persons

 APR 1901

My dear Mr. [unclear]
 I send herewith plans of
 the Kundapalle camp and hospital
 as asked for in your D.O. of the 17
 March, No 61, with a memo descri-
 the accommodation.

I have only just received by
 W. day's post these plans and memo
 from the local and Engineer Vellur.
 I wrote immediately in receipt of your
 D.O.

Yours sincerely
 Vellur

The camp is about quarter of a mile from the
 station. Vell

Notes to accompany the plans for the Sheds in a
Bubonic plague at Kondapalli.

Reference number on plans.	Number of sheds	Name and description of sheds.
1 and 2	2	<u>Hospital Block.</u> <u>European male and female wards.</u> Each ward is to accommodate 2 patient Each shed is enclosed with bamboo lattice plastered with mud and cow-dung and whitewashed. The roof is supported on wooden posts and country wood scantling and is covered with palm-leaf leaves. The flooring of the main room as well as the Verandah is of concrete plastered with cement. Doors and windows made split bamboos are provided.
3 and 4.	2	<u>Native male and female wards.</u> Each ward is to accommodate 4 patients The sheds are exactly of the same description as sheds Nos 1 and 2, only dimensions vary as per plan.
5 and 6	2	<u>Cook Sheds.</u> No 5 Shed is for Europeans and No 6 for natives. They are alike in dimension and description. The description of the Sheds are exactly the same as that of

of sheds shown above except that the flooring is made of gravel and the walls sunburnt brick in mud.

7 and 8

2 Menial Servants Sheds. These sheds are enclosed with lattis and the roof is made up of palmgrah thatch and is supported on wooden posts. The floor is of gravel.

9

1 Shed for Sweepers. The description of the shed is exactly similar to No 7 and 8.

10 and 11

2 Latrines. One is for European patients and the other for natives. These are covered latrines with their description similar to that of No 9 Shed except that the floor is of sand.

12 and 13

2 Observation Camp. European male and female wards. Each shed is to accommodate 2 patients. The dimension and description are exactly the same as Nos 1 and 2.

14 and 15

2 Apothecary's Quarters. One is occupied by the medical Subordinate and the other by the lady apothecary. Each shed contains a main room and 2 small rooms (one used as bath room and the other as a store room) with an open verandah in front and rear. The rooms are enclosed with wattle and daub walls and the roof is as Sheds No 12 and 13. The floor of the bath room alone is of concrete plastered with cement and the rest is of gravel.

16

1 Cook Shed. This shed is attached to the European male and female wards

17

No 12 and 13 and is exactly similar to No 5 and 6 in dimension and description. 1 Latrine for Natives. This is a covered latrine consisting of a masonry wall plastered with cement and fitted with corrugated galvanized iron gutters for the passage of urine, with 2 cisterns. The description of the shed in other respects is exactly similar to No 16 shed with the exception of mud walling instead of which lattis are provided.

18

1 Cook Shed. This is attached to native male and female wards Nos 2 and 23. The dimensions and description are same as No 16 shed.

19 and 20.

2 Servants Quarters. These are similar to No 7 and 8 sheds, but the roof is covered with palmgrah leaves.

21

1 Scavengers Shed. This is similar in description and dimensions to the shed No 9 except that the walls are of brick in mud.

22 and 23

2 Native male and female wards.

These are exactly same as Nos 3 and 4 sheds, and each is to accommodate 4 patients.

24

1 Quarters for Medical officer. The front or main room is enclosed with lattis plastered with cow dung and white washed, while the rear room which contains a bathing place is enclosed with wattle and daub walls. All around.

around the front room, there is a pandal. The floor of the building is made up of gravel except the bath room which is of concrete plastered with cement. The roof is covered with palm-yrak leaves. Both the rooms are provided with bamboo matting.

25 1 Office and Store room for Medical officer

The whole of the building is enclosed with bamboo latties and the floor is made up of gravel and the roof of palm-yrak thatch. Rooms are provided with bamboo matting.

26 1 Cook Shed for Medical officer. The Shed is similar to Shed No 16 except that the roof is covered with palm-yrak leaves.

27 1 Latrine for Medical officer. Similar to Sheds Nos 10 and 11

28 1 Shed for European Head Constable

This shed is similar to Sheds Nos 14 and 15 except that the bath room is floored with concrete without cement plastering, and enclosed with wattle and daub walls. The roof is covered with palm-yrak thatch.

29 1 Cook Shed for European Head Constable. Similar to No 26.

30 1 Latrine for European Head Constable.

This is an open latrine enclosed with latties and floored with sand.

31 1 Latrine for Medical Subordinate. Similar to No 30 Shed.

32 1 Shed for Police. This shed is enclosed with

with latties. The roof is covered with palm-yrak leaves and the floor is of gravel. Latrine for Lady apothecary. Similar to No 27

33 1 Fresh water well. There was a well 10½ feet in diameter, already in existence and that has been repaired and fitted with a rotary deep well pump, capable of lifting 270 gallons per hour. An iron tank of a capacity of 6 cubic feet with taps etc complete has been provided.

General remarks. All the sheds are built on earthen platforms 2 feet above ground level and projecting 3 feet on all sides beyond the walls and then sloping off to form ramps for giving easy access to the sheds.
