Office of Sanitary
Madras, 16-10-1918.

Dear Mr. Hammett,

The attack rate
of the inoculated varies
from 2 to 24 p.c. accord-
ing to degree of immu-
nization of contact with
infectious matter. That
is to say, as an inoculation
against small-pox, the
operation confers much
protection but not
immunity. This being
so, it is obvious that
"inoculation" must be
continued. The ad-

NY

damage caused by the
holder of the certificate.
is that fact. has consid-
ered - against my ad-
vice - it may accept
the risk of a "contact"
holding. The "contact"
gives the priority of
Smith Reservation
as if he were a healthy
and not a suspicious
person - with the history
of recent arrival from
an infected area.

I would advise
that no concern as
to Smith Reservation -
that is difficult

3
Observations on the
ERS.

The doctor. I
advocate a larger
of requirements. We must
not lose the three months
containing expert knowledge
North and South
the indigenous and infected.
He must not be safe to
estimate less than eight
between them three; there
are less than two districts
in addition to them and
so claims may be put
under "Arsenal" un-
plying two more; accepting
the Surgeon General's estimate
a slender one if really
attacked of three - a total
of thirteen is required. To
them must be added

in a review for comparison
 but I think a man-
 ual of 15 should be
 added for.

The surplus - as you
 do not give to the number
 the Sur. general has
 in his list, I can
 form no correct estimate;
 but I would advise the
 estimate be framed on the
 supposition that the 1st
 ambulance staffs in each
 District are under observation
 for correct & proper for
 (2) that the 2nd ambulance
 staff be organized in four
 districts (3) that in North
 Arch, Salem, Andover
 in addition to the two ambulance
 staffs employed a total

of eight places to be
 ed in like of 6 to
 in dependent inspection
 over the other 6 to be
 up at least that number
 of nurses.

Lady Doctors and
 nurses must figure large-
 ly in arrangements where
 every consideration is
 intended to be paid to
 the feelings of the people.
 Taking into consideration
 the fact that the people
 part of the population
 I feel that a very modest
 estimate would be in
 addition to the 15 male
 doctors, at least 10 female

at least three 7 female
over holding in morning
it being possible to catch
female that. As to
female. See. Superfluous
from these present posts.

As to the Long female
recommendation as to
the. Master and the same
staffs, I think the
same. As a fact, how-
ever, the requirement
has already been met
in my holding & use
of the work of the
Veterans - Sanitary
Inspection and other.

3
With as far as the
clear the use of ^{ERS.}
and the experience
I think that the
absolute efforts
can alone be made in
the absence of reliable
manpower, I think
if you will sanction my
late request to keep 36
men for discipline, the
staff would be sufficiently
complete. I have ascertained
that such men would pro-
ceed out of the station in
Rs 10 each with Rs 12
for each man's exchange
of twelve men. I think
I will my inspection, the
to be for dissenting
staff would be kept up

strength at all
 I can probably
 have at some arrange-
 ment as to retaining
 fee in the case of the
 WTS, but as it would
 be difficult to train the
 disinfecting staff in
 fairly liberal arrange-
 ment I would have to
 be under them, I might
 keep 18 embryos per-
 manent in R 7 (subject
 to the increase of the
 sent outside the house)
 more for the retaining
 fee of R 1/8 for the other
 half per individual.
 I agree with the fee
 given in handling the
~~complete~~ complete equip-
 ment

In two staffs in p.
p. 107 Marine Regt.
thence he kept ready
for dispatch complete
with, however, a number
the staff (not for the S.O. quoted)

Bannerman in the
space to a unit for
staffs have been used
the statement that
out of India as to
in preference to starting
remain on his, prefer
to enlarge on men
staffs in the laboratory.
This seems to me to be
with.

I have inspected
various places the more.

Each manuscript -
The Commission still
has advice as to how
to act. Do you suppose
I may propose such?
This may help them.
The Divisional Com.
with the arrangement
is a hopeful matter.

Yours and
Wm. H. H.

1,000-4-10-98.

NOTE FOR THE ~~P.A~~ P.C.

~~Donna~~

The do to which
C. No 754 is reply
is not in office.

NAR
26 to 98.

This may be recorded, as necessary
action appears to have been taken
by the D.C.
