ORDER. No. 486 P. mis-dt 17-5-98.

The Collr is requested to submit a plan on the scale of 1 inch = 8 miles showing the proposed Observation Circles, the road frontier Inspection Stations, and the ranges of the Inspectors, and the head quarters of the Inspectors and Supervisors. He will report whether besides the main roads entering his district at Pondyela and Garikipad, there are not other trade-routes of sufficient importance to be watched should plague break out; also how many ferries are there are across the Kistna and what is the supply of boats on the river.

No. — of 189

COLLECTOR & MAGISTRATE,

MASULIPATAM,

KISTNA DISTRICT.

8th May 1898

FROM,

R. Morris Esquire,
Acting Collector, Kistna District.

TO,

The ~~Chief~~ Secretary to Government,

Local and Municipal Department,

Fort St. George.

SIR,

Referring to G.O. No 361^P of 19th April 1898, I have the honor to submit herewith a list of Observation circles into which the whole length of the District bordering on the Haiderabad territory (about 145 miles including or 95 excluding bends) is divided. It will be seen from the list that the whole tract is divided into 22 circles and that the breadth of the tract selected for observation is about 20 miles in Palnad, Sattenapalli and Nandigama Taluqs, but only 10 miles in the rest of the frontier, which there consists principally of hills and forests, and the traffic is very small. Each circle is about ten miles broad and where the tract to be watch is 20 miles broad there are two circles one behind the other.

2 The outlying zamindaris of Munagala and Guvagiri have not been

included in this distribution, as if the Nalgonda District is once infected with plague, the establishment of observation circles within those Zamindaris cannot in any way affect the spread of the epidemic to the main frontier.

2. I propose to constitute all the 22 circles into 4 plague supervisor's ranges.

3. In regard to the Road frontier observation Stations, only two stations are necessary, one at Pondugula in Palnad and the other at Garikipad in Nandigama, the only places where roads enter the District from Haiderabad. It is impossible to select any other places, as entrance to the District is elsewhere obtained by foot paths and these cannot be watched. In the rains, the Krishna river which forms the frontier of Palnad and Sattenapalli is unfordable. The Head Assistant Collector has proposed to establish a station at Tiruvuru, I have called for further information from him as to the amount of traffic that is going on there. If necessary an observation station will be established there too on a small scale.

4. In regard to the Railway Observation Station, there is already one at Kondapalli and no other is necessary.

5. With reference to your telegram of

of the 7th, I beg to state that these circles were decided upon long ago, but I did not understand from G.O. No 361 D Ins. dated 19th April 1898 that the Government desired the submission of the scheme for information.

Sir,
Your most obedient Servant,
R. L. N. S.
Acting Collector.
