[Despatch Abstract.]

Drainage

Communicating to the Munl. Council
Kumbakonam letter from the Sanitary
Engineer stating that the allotment of Rs 2,000
will all be required for the investigation of the
water supply scheme of Kumbakonam and for
the preparation of a drainage scheme
a further allotment of Rs 3,000 will be
required, but it cannot be proceeded with
until certain other schemes are investigated.

No. 234

GOVERNMENT OF MADRAS.

OFFICE OF SANITARY ENGINEER,

Fort St. George, 15th. February 1898.

Despatched 16. Feb 1898

From A.S. Russell Esq. ,
J. A. JONES, Esq., MEM. INST. C.E., F.R.S.E.,
As SANITARY ENGINEER TO GOVERNMENT,

To

The Secretary to Government,

Local and Municipal Department.

SIR,

With reference to G.O.No.122,M, Mis dated 18th. January 1898,I have the honor to state that the allotment of Rs 2000 will all be required for the investigation of the water-supply scheme of Kumbakonam,vide my letter No.593 of 24th.March 1897 embodied in G.O.No.828,M,Mis dated 7th/ April 1897. For the preparation of a drainage scheme,a further allotment of Rs 3,000 will be required .

2. Both the Kumbakonam Drainage Scheme as well as the Water Supply Scheme are ordered by G.O.No.122,M,Mis of 18th. January,1898,to be set about at once,but I beg to point out that the following schemes already ordered by Government at various times to be investigated now stand on the programme of this Department -

- (1) Vizianagram Water Supply
- (2) Bezwada do (new scheme)
- (3) Guntur do
- (4) Dindigul do (extension of head works)
- (5) Chidambaram do
- (6) Tanjore do (extension of pipes)
- (7) Calicut do

- (8) Kumbakonam Water Supply
 (9) Periyakulam do
 (10) Parlakemedi do
 (11) Salem do (result of experiments by P.W.D.
 is awaited)
 (12) Bellary do (orders of the Government of India
 are awaited)

(1) and (2) are well in hand (3), (4) & (5) are under investigation and (6) will be taken up soon. Looking to the out-turn of work in the past years, and considering that urgent & unforeseen work is now cropping up, I do not think that the investigation of more than 4 or 5 of the above works can be completed before the end of 1898. This will leave sufficient schemes already ordered to be dealt with in 1899. I therefore see no prospect of being able to take up the drainage scheme for Kumbakonam before the year 1900.

3. I hardly think that the Kumbakonam drainage scheme should precede any of the schemes named above for the following reasons -

First - A drainage scheme for Kumbakonam, on the principles of the Mylapore Drainage Scheme, will cost about 17 lakhs of rupees. There will be this difference in the Mylapore & Kumbakonam schemes, that while the former is a gravitation scheme, and all the pipes are laid in dry soil, the latter will be a pumping scheme with many of the pipes laid below subsoil water level. Second - Until it has been shewn that the Council is in a position to bear the cost of a Drainage Scheme of such magnitude, in addition to the cost of a Water Supply Scheme (the latter being roughly estimated at Rs 5,00,000) it would seem waste of time & money to undertake the investigation of the Drainage Scheme now called for.

I have the honor to be,
 Sir,

Your most obedient servant,

A. Kinnell
