No. 62

From

M. HAMMICK, Esq., I.C.S.,

PLAGUE COMMISSIONER,

Madras,

To

THE Collector of Bellary

SIR,

I have the honour to convey my sanction to the proposals contained in para 1 of your letter of 13th inst. Cms 1389 P. of 20-9-98.

2. I do not consider that a road frontier inspection station is required at present at Chippigiri. The village officers and the observation staff should be instructed to watch all routes and to strictly enforce the passport system.

NOTE FOR THE P. C.

The proposed observation circles in Billag round Guntahat may be accepted. It is however doubtful if a road inspection station at Chippigini will be of practical use. Sick people from Guntahat if aware of it will avoid it. It seems safer to trust to patrol by village officers and other staff, and to passport system.

Ag COLLECTOR OF
BELLARY.

TO

THE Plague Commissioner
Botacamand.

SIR,

With reference to the following extract from a telegram despatched to me by Government on 10-9-98:- "Cooperate with Anantapur in establishing observation staff 20 miles round Guntakal under additional regulation 22", I have the honour to state that the portion of the above 20 mile radius that falls within this district being very little smaller in area than the observation groups formed 6 months ago, which are roughly 20 miles square, I have after consulting the Collector of Anantapur formed a new group, to be known as Badapalli, with head quarters temporarily at Chippargiri, comprising 4 circles, to be

cc
Superintendent
District

Known as circles nos 33, 34, 35 and 36, with headquarters at Moluganalli, Rema-durgam, Virapur, and Halahalli respectively. Mr Quinn, Plague Supervisor, Group No I, who has several months experience of precautionary measures, has been transferred from Yemmiganur to the charge of the new group, his place being filled by an assistant inspector of the Salt and Abkari Department, whose services have been lent to me by the Board. The Sanitary Commissioner is supplying sanitary inspectors to be placed in charge of the new circles as plague inspectors. The above arrangements entail the employment of 6 persons, 2 for the supervisor, and 1 for each inspector, as allowed in other groups.

2. In this connection, I venture to suggest the advisability of establishing a road frontier inspection station with the usual staff, at Chippagiri, which occupies an important position as being the first village from Guntakal on the Alur road

and the meeting place of the roads leading from Alur, Bantahal station (Southern Mahratta Railway), Guntakal junction, and Mancharla station (Madras Railway).

I have the honour to be

Sir,

Your most obt. servant

Acting Collector

R.B.
