Note for Dr. M. S. S. S. S.

The G.O. is I presume still in force - but it will be seen that in the N. W. P. the d' Govt. distinctly said that he did not object to experiments being undertaken which are necessary for the purpose of determining what a case is one of Bubonic plague or not -

Does the G.O. forbid such experiments? I should think it would be better if diagnosis is required, to send the stuff down to Staff House - but this would mean delay of course.

I am very doubtful whether this will at this stage be authorized and treatment of plague virus in Madras City even for experiments in diagnosis

Quite unnecessary

The G.O. is in force and no cultivation for any purpose can be permitted

MA 14.11.98

I deprecate allowing cultivation for practical purposes diagnosis without cult - answers well enough.

Nov 11, 1916

The 1st of November is a
very important day in the
history of the world. It is
the day when the first
atomic bomb was exploded
in the city of Nagasaki.
This event marked the
beginning of the end of
the war in the Pacific.
The bomb was dropped by
the USS Enterprise on the
city of Nagasaki at 11:02
a.m. on November 9, 1945.
The explosion killed about
40,000 people and destroyed
the city almost completely.
This was the only atomic
bomb used in warfare.

The 1st of November is also
a day of remembrance for
the fallen soldiers of the
World War. It is a day
when we remember the
sacrifices that were made
for our freedom. We should
always remember the brave
men and women who fought
and died for our country.
Their sacrifices were not in
vain. We are free today
because of their bravery.

The 1st of November is a
day of thanksgiving. It is
a day when we give thanks
for all the blessings that
we have received. We should
always be grateful for what
we have. We should never
take anything for granted.
We should always be
thankful for the people who
love us and for the things
that we have. We should
always be grateful for the
life that we have been
given. We should always
be thankful for the love
that we have received.

The 1st of November is a
day of reflection. It is a
day when we think about
the things that we have
done and the things that
we have not done. We
should always be honest
with ourselves. We should
always be aware of our
strengths and our weaknesses.
We should always be
open to change. We should
always be willing to learn
from our mistakes. We
should always be striving
to be the best that we can
be. We should always be
pursuing our dreams. We
should always be following
our hearts. We should always
be living our lives to the
full. We should always be
making the most of every
day. We should always be
grateful for the life that we
have been given. We should
always be thankful for the
love that we have received.

Municipality & with
Saul any Comm.
have sent it to
t. 17 months

No: 841

URGENT

Madras,

11th November 1898.

My dear Hammick,

G.O.No.649 M. 22nd March 1897.

It may be necessary to cultivate
for the purpose of diagnosis.

Is the G.O. to be still in force?

Yours sincerely,

W. H. Moore

M. Hammick Esq.

Plague Commissioner.

D.O. to Sanitary
Commissions

Dear Colonel

Your D.O. 8441

8/11-11-98. So at

Considers it inadvisable
to permit Cultivation
of plague virus in
Madras for any purpose
whatever at present.

So at Considers that
Diagnosis without
Cultivation must suffice
at present in view
of the risk attaching
to Cultivation of
any character

Yours sincerely
M. H.
