SUBJECT.

Infection of water with malarial germs in the Cuddapah Municipality:— Informing that the Sanitary Commissioner who has been several times requested to investigate the matter has recommended that the subject be referred to a committee of the Council.

Note for Secretary

Submitted that when the Dy. A.S. was in Cuddapah the point was raised whether it was not possible that the abandonment of wells in the town as sources of drinking for house use sources of supply did not tend to keep the place more waterlogged than it was before the new water supply was introduced and thus for more feverish.

Resolution.

The Sanitary Board begs to inform Government that the Sanitary Commissioner was, on the receipt of G.O. No. 1919 M. Ind., dated 11th November 1896, requested to institute, as soon as practicable, a sanitary survey of the source of water supply to the town of Cuddalore in view to evidence being collected as to infection of the water with material germs. That officer has since been reminded of the matter several times, and has recently reported that the subject will receive his attention shortly.
