H.M. As seen in this instance, it is inconvenient to have Dragoes out in camp when Plague information comes. May I tell S/S to stop their touring except on Plague or other v. urgent duty - in Anantapur, Salem, N. Arcot & Cuddapah?

From

J. H. Ballen Esquire

Collector & District Magistrate,

North Arcot.

To

The Secretary to Government
Local and Municipal
Department
Fort St George.

Sir,

In continuation of my report,
Reference current No 1495 Eng of 98, dated
18th August 1898, I have the honor to
submit a very brief report in time
to catch to-day's post. A full report
will follow tomorrow.

2. On the evening of the 17th the
patient's temperature rose to 104° 8,
but the next day it fell considerably
and yesterday was under 101°. The
Sanitary Commissioner came to
Jangalapalli yesterday morning.
From his experience of plague
cases he was able to decide that
the woman was not suffering

from

from plague, but he considered that the treatment adopted in the case had been correct, and that the deaths of her husband and children had undoubtedly been due to plague. The woman will most probably recover.

3. I have found and disinfected the gutkahn in which the party went from Katpadi to Jangalapatti, and ordered the driver, the Kaph under observation. The party did not enter any house on the road even at Siruvallam. But the deceased Kullappa Arik obtained the help of a relative Araganan to bury the child and I have had Araganan's house disinfected and put him and the other persons with whom Kullappa Arik conversed at Siruvallam under observation (not segregation). I may add that the Sanitary Commissioner fully

approved

approved of the steps that had been taken. Details will follow.

4. I left Siruvallam yesterday. The District Medical and Sanitary officer has gone there to-day to relieve Dr. Thummar Singh.

I have the honor to be

Sir

Yours Most Obedient Servant

M. Bhatia

Ag Collector.
