PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following papers—

Extract from the Diwan's Report on the Administration of the Cochin State for M.E.1071:—

299. During the year, 432 tubes of glycerine paste were obtained from Madras, against 424 in the previous year. Owing to the damaged condition of the tubes when received, and to the inefficacy of the lymph itself, vaccination was chiefly carried on from arm to arm.

Extract from the Resident's review thereon:—

51. Vaccination. - The number of vaccine operations performed during the year was almost the same as in 1070, being 24,664 against 24,642, but the percentage of successful operations was 91.1 against 85.8, and over 50 per cent. of the successful operations were verified by the inspecting officers against 38 per cent. in 1070, while the average work of a vaccinator remained at 137 per mensem. The number of successful operations was in the ratio of 31.1 per mille of the population against 29.2 per mille in 1070. If the work had been effectively done in a series of previous years, this would not be a bad proportion, but this is doubtful. Infantile vaccination, though slightly better than in the previous year, is still backward. The glycerine paste obtained from Madras having been found to be ineffectual, operations were chiefly carried on from arm to arm, but I think that a calf depot has now been established at Trichur and further improvement in quantity, as well as quality, may now be looked for. The cost of each

The attention of the Sanitary Commissioner will be invited to the remarks in paragraph 299 of the Diwan's Report as regards the lymph supplied from Madras. X X

From the Sanitary Commissioner for Madras, No. 2504/S, dated 6th December 1897:-

With reference to G.O. No. 615, dated 17th September 1897 paragraph 20 Political, I have the honour to state that the lymph mentioned was not supplied by any depot under the control of this office. Apparently the Cochin State has been in the habit of receiving Vaccine Glycerine paste as to which they complain, from the Municipality of Madras. Under G.O. No. 890 dated 4th September 1882, the Deputy Inspector of Vaccination of that Municipality is not under the control of this office.

ORDER :- No. 781 dated 14 December 1897.

MUNICIPALITY OF MADRAS,

Health Department,

Madras, 2nd February 1898

671 M
President, Municipal Commission.

From

LIEUT.-COL. SIR GEORGE MOORE, K.T., C. I. E.,

To

The Secretary to Government,
Local and Municipal Department,
Fort St. George.

SIR,

With reference to your endorsement No. 497 dated 15th January 1898 on current No. 4329 M (herewith returned),

Enclosure.

I have the honor to submit as follows:

2. Failure of preserved lymph is not necessarily due to the quality of the lymph.

3. There are many other factors- the length of time it was kept out of use after its despatch- the manner of its use- are some- but perhaps one of the most important is the skill of the Vaccinator. Success depends more upon the skillful operators than the lymph itself.

4. In the absence of any information on these points I am unable to assign any reason for the failure of the lymph supplied to Cochin.

5. I may add that the glycerinated lymph is sent throughout the Presidency and even to Burmah and Ceylon.

I have the honor to be,

Sir,

Your most obedient servant,

Geo. Moore Lieut.- Col.,

President, Munl. Commn.
