SIR,

With reference to the Scale of diet for plague patients and suspects communicated with Plague Commi ssions No 981 of the 14th April last, the Chief Medical officer Jalarpet reports that the average cost of feeding a native detained on suspicion according to the new Scale will amount to 3 1/2 annas to 4 annas against 2 1/2 annas to 3 annas under the present Scale, that the increase is owing to the addition of meat and that it does not include for some ingredients viz shall, tamarind, onion, and fish oil which are necessary for a native's meals. I have the honor therefore to request orders as to whether the new Scale should be introduced in spite of the extra expense and whether

ingredients referred to may be added
to the scale. Pending receipt of reply
to this reference I have instructed
the Chief Medical Officer to continue
the old scale.

I have the honor to be
