ORDER.

Letter No 1026 Dated 5-7-98

To the Resident in Mysore

Li

MSA
29.6.99

Information has reached this Government that the ^{Mysore} village of Menishanapalli on the Salem frontier is infected with plague, and ~~that~~ ^{when} Capt French, the Special Plague officer of the Salem & visited the village on the 9th June, he found the whole ^{village} evacuated, & saw two cases of plague in the fields. As this village is not included in the weekly return of plague statistics published by the Mysore Govt, I am directed to request that the omission may be brought to the notice of the Director.

D.O.

Dear Class,

C No 1528.!

As suggested in your
d.o. of the 18th instant, The
Resident in Mysore has been
addressed regarding the
omission to include Man-
shamapalli in the plague
statistics published by the
Mysore Govt. As regards
the detention at Jalarpet
of persons who come and go
from the Kolar mines, I
am to tell you that
you may continue to
detain such of them as
are likely, in your opinion
to evade the passport
rules. I am request
further that all persons
from Kolar should be
very carefully examined
and detained, if there is
any suspicion whatsoever
of plague symptoms.

Yours Sincerely

LOCAL AND MUNICIPAL DEPARTMENT.

NOTE FOR THE

H. M.

bein submitted the draft to
Resident Inspector may issue,
we rely on the Resident
Inspector's statement for declaring
an area infected or
otherwise, under limited file,
and it is therefore important
they shd be accurate. The
letter will probably have
the effect of stirring up
the Inspector officials,
Mr Blegg may be told. d.o.
that he may continue to
detain those persons who
come up from Kolar mines
who are likely in his opinion
to under passport Rules.
He brings to notice that
19 persons detained at
Jalarpett developed plague
between 1st & 4th day of their
detention. Kolar is very
close to Jalarpett, and he
may be at the same time
told to see that all persons
from Kolar are very carefully

his discretion under the S.O.
to detain them.

b.s.b.
21.6.99

When S.O. No 692 was
passed. Had Govt before it
the facts how stated by Mr
Clegg, viz about 19 cases of
plague at Salarpatti were
discovered between 1st & 4th
day of detention. It seems
worth considering whether
Salarpatti shd have been exempted
from S.O.

NOTE FOR THE Secretary

Submitted for information & order.

(1.) Munsamapalli reported
by the Special Plague Officer
to have had cases of plague
is not to be found in the weekly
statement of seizures & deaths
received from the Resident
in Mysore. The latest state
report that has been received
that for the week ending
14th June which is put up
C. No 1530. (P.)

(2.) G.O. Nos 692 & 764
of 15/6/99 & 22/6/99
in the subject of detention of
suspicious persons are
put up.

from
15/6/99

and
15/6/99

A. This information was not before
Govt when G.O. No 692 P/99 was passed.
As this Govt authority detention, for observation,
of persons who cannot be relied upon to
observe the passport rules & as the Collr
states that the people from the mines know to
evade the rules, he is right in ordering their
detention. No formal instruction seen therefore
necessary. The Collr may be informed to
direct officials to continue the present procedure
until the mines are free from plague.

BACK PAPERS.

G.O.	No.	Department.	Date.

FURTHER PAPERS.

G.O.	No.	Department.	Date.

P. C. June 19 1909
 Dr. W. C. Clegg

I have several
 points of importance
 to discuss with you
 this time.

I. I received a petition
 from the villagers of
 Ullanapala (Ullan),
 in between Kimpala
 & Jm-n-lapondam &
 right on the frontier,
 that since the last
 plows & Constables
 had been ^{partly} with them
 from the above two
 stations & patrolling
 had been stopped
 about this part of the
 frontier, please

kindly in a very sore

2. B.

broken out of
encampment (a
myson village, but
a further from
Uluangapali & right
opposite it) & that the
inhabitants of that
village were continually
coming across the
border frontier &
travelling from
mat & back where
- with to build their
field huts.

I went down there
on the 1st inst -
having previously
sent three police constables
from my reserve line
to keep guard along
the path of the frontier.
I found that the

Villagers of the
had ceased to
arrive since the
had been sent.
I also went once
Manshangapali to try
to discover the state of
things - met three
constables of the Mysore
Police in the village
who told me that
four deaths from
plague had occurred
since the 1st inst - &
I also personally saw
two cases in field
huts! the whole village
had been evacuated.
As regards the people
coming over to our territory
I questioned the "Karaide"
& he said that several
of the inhabitants had
gone down in our
territory, similarly that

our village
land in Mysore
there I that the
inhabitants on either
side were in the habit
of going across to their
fields but that since
our Police had been sent
there had been stopped -
Now I should like to
know what is to be done
about this?

It is strange that the
Mysore authorities
have not included this
village in their weekly
reports of infected cases.
Your insight perhaps
be brought to the notice
of the Mysore authorities.
Since receipt of your
letter N^o. 2.

I have sent four
constables to Kumbhagiri
& two to Kumbhagiri.

P. C. June 19
19 JUN 1909
Dr. Mr. Clegg

I have received
points of importance
to discuss with you
this time -

I. I received a petition
from the villagers of
Mellamagal (which
is between Kumbhagiri
& Kumbhagiri) on the frontier,
that since the last
plague & constables
had been with them
from the above two
stations & patrolling
had been stopped
about this part of the
frontier, please

patrol first to do
so - Could you not
send me some of the
from Lalum or then
they would be away
from their families.
(This is what makes
them live in houses)
If I can get 15
of such men, I
could divide into 15
of the own Plasmas
to refuse to live in
the health camp.

It would be a good
thing if you could
make them sign an
agreement before they
start to consent to live
altogether in one place
& not in any town or
village to be always
ready for work then

from my Reserve
make up for the loss
lost to Kumbhagiri.
II. For the last week
while disinfection has
been going on in
"Mellamagal" nineteen
dead rats & cat-bones
have been found in the old
trails of houses! This
shows that there is
still infection here &
more than in any
village we have inspected
yet. I am having
therefore the trails of
every house pulled
down & examined &
if any dead animals
are found in any one
roof that roof is burnt.
Of course then has
been an outbreak & a
disinfection has come

kindly in a very sore

all headed to the
escape. I am sorry for
trying against the
destruction of the wall,
but I don't really
see much else can
be done in this case.
Of course there people
expect compensation
which I hope you
will consider.

In the house alien
the last case (the
little boy who is now
in Jajivadi T. S. (Boope).
Lined, two dead rats
were found in the
kitchen; this boy is
the son of the first
case the T. S. (Boope).
Keepe - but he did not
live in his father's house
but in his mother's
(the one mentioned above)

When the father died
the house was not the
infected as the time but
and safe after the boy
for plague.

III. Therea disinfectants
coolies have been
exercising my mind
a fast deal - I don't
think it is safe for
to live in Room 10
after they have been
working in infected
after being per case
is taken about the
clothes etc being dis-
infecting when the
known off work.

I have been trying
to get them all to
together in the great
camp which is now
empty but to find
have only some

The inhabitants
of Matifiori have
determined to leave a
second locality as before
I have told the two
Collectors that I do
not think it safe
the Matifiori is
occupied, as it is so
close to Matifiori & it
would be impossible
keep people out from
there.

IV. The Constables
sent to Pajivadi
Camp in the Matifiori
have no shelter of any
description & place to
live in when off duty.
I think I am doing
them except to the point
up for them.

I am going down there
some time next week
to inspect a well kept

Further.
V. Some people
rained about Jajivadi
- I am have taken to
setting fire to grass in
the frontier station!
It was reported to me
that about a week ago
a light was seen there
on the front of the
& before it could be
extinguished the whole
field caught fire &
was burnt to the ground
and not long before
the fire was out.
on the last occasion
two men were seen
running away & I could
not be caught - I have
placed the water in
the hands of the police
but with no success as
yet. Could not a fire
again with gun blast
ammunition be sanctioned
for this station & Jajivadi

He decided to try
escape through the
forest against the
destruction of the road,
but I don't really
see much else can
be done in this case.
Of course there people
expect compensation
which I hope you
will consider.

In the house where
the last case (the
little boy who is now
in Jajivadi T. S. House)
lived, two dead rats
were found in the
kitchen. This boy is
the son of the first
case the road shop
keeper - but he did not
live in his father's house
but in his mother's
(the one mentioned above)

When the father died
the house was not the
infected at the time but
was later after the boy
saw plague.

III. These disinfections
coolies have been
exercising my mind
a great deal - I don't
think it is safe for them
to live in Home Town
after they have been
working in infected houses
although every precaution
is taken about their
clothing etc being disinfected
every evening when they
return off work.

I have been trying to get
to get them all to live
together in the Health
Camps which is now
empty but so far I
have not succeeded

The inhabitants
of Matufiri have
determined to have a
sanitary watch as before
I have told the two
Collectors that I do
not think it safe
for Matufiri is
so occupied, as it is so
close to Matufiri & it
would be impossible to
keep people out from
there.

IV. The Constables
sent to Pappanagalli
Camp with the
house to shelter of any
description & place to
live in when off duty -
I think I can do
good work to the point
up for them -
I am going down there
some time next week
to inspect & work with

mainly in a very sore

Further.
V. Some people
around about Jajivadi
- for am have taken to
setting fire to grass in
the frontier station.
It was reported to me
that about a week ago
a light was seen there
on the frontier road.
I before it could be
examined the whole
area caught fire &
was burnt to the ground.
I arrived not long before
that the fire was out.
on the last occasion
two men were seen
running away & I could
not be caught - I have
placed the matter in
the hands of the police
but with no success as
yet. Could it be a fire
set by some one
ammunition be sanctioned
for this station & be used

are the most
spond if only to
frighten people who
hang about the place
with malicious intentions

Yours sincerely
T. T. Francis

required & to be in
the order of the Sanitary Inspector.
I find it impossible to
keep them in hand as
they very often allow
themselves to return to
it is very hard to get
them together.
IV. It is now six weeks
since that case at
Pedda Bialah and again
case occurred in the
fields & there has been
none since - all the
houses have been re-
inspected by our coolies
could not the inhabitants
now be allowed to
re-occupy.

Inspected and recommended
re-occupation of the houses
- fallen & unoccupied
yet.

Plague close to our
quarters have not - as far
as I am aware, appeared
in the Mysore statistics
and I would suggest this
being brought to their
notice. I am afraid
we cannot rely on those
statistics.

Nothing of any moment
has happened anywhere
else. Cases from the
Kolar gold mines are
still occasionally being
detained at - Jolarpet.

Regarding the recent 5.0
relaxing the detention
rules, I find that out
of 73 cases of plague
detained at - Jolarpet -
46 were discovered on
the platform, 19 after

the first to fourth day
detention and eight
unknown. If this
had been followed
hitherto 19 of them can
would not probably
therefore have been
allowed to proceed.

It has been the practice
at - Jolarpet - to detain
nearly all the people
coming from the mines
and the results have been
good seeing that none

Cases of plague have
been detained recently
than before. There

people go and come
and know the way to
evade the rules.

I have mentioned the
medicinal opinion - at -

get - for the present -
retain such
passengers coming
to the mines in the
future such as before
I do not consider
it safe to allow them
to proceed merely
after disinfection. If
the mines become free
from plague the rules
may be relaxed, but
as it is such passengers
I think must for
safety be detained.

Yours faithfully
Ramesh Babu

D. O.

P. C. 1876/99

19 JUL 1900

Dear Hammick,

I enclose Capt. French's
D.O. and regret that I have
received it late. I
have authorized the reoccupation
of Pedda Belagondapalli,
so now there only remain
Markondapalli and
Nagondapalli evacuated.
Some constables were removed
from the frontier for the
Kerapuralli side, but will
now be replaced and
the patrol of the Mysore
frontier kept up as before.
The cases reported and
seen by Capt. French
himself in a Mysore
