Plague Commissioner's Office,
FORT ST. GEORGE,

No. 1128

Dated 24. 4. 1899

From
L. E. BUCKLEY, Esq., I.C.S.,
Plague Commissioner,

To
The Secretary to Government
Local and Municipal Depart.

Sir,

I have the honour to submit, for the information of Government, my fortnightly narrative of the progress of plague from the 9th to 22nd April 1899.

I have &c

[illegible] for P.C. 24/4

× Send ten spare copies to D.O.S. with letter

Despd 27/4/99

× only 9 sent no more copies being available.

24.4

To
Secretary to Government
Local and Municipal Deptt

have the honour to submit
the information of Government
rtnightly narrative of the
ress of plague from the 9th
22 April 1899.

I have

Fortnightly Narrative for the period ending 22nd *April* 1899.

During the fortnight the disease again exhibited a marked decrease. Practically it exists now only in the North Arcot district in the neighbourhood of Vellore and Ránipéttai. The decrease has been most noticeable during the latter week of the fortnight, and this is a promising sign. It is satisfactory to be able to report that no cases have occurred in the villages which have been re-occupied after evacuation and disinfection. At first sight Berikai appears an exception, but it is not; for the hamlet in which the case reported has occurred is quite separate from the main village. The heavy rain which has been recently experienced in parts has fortunately not been followed, up to date, by any recrudescence of the disease. The following table gives the attacks and deaths, district by district, during the previous and current fortnight. It is to be noted that Kurnool district is now clean.

District.	Cases reported during fortnight ending 8th April 1899.		Cases reported during fortnight ending 22nd April 1899.	
	Seizures.	Deaths.	Seizures.	Deaths.
Anantapur	21	15	1	1
Bellary	12	10	5	6
Kurnool	1	2	..	..
Madras	..	1	2	..
North Arcot	67	46	41	28
Salem	27	20	9	10
Total ..	128	94	58	45

2. In *Anantapur district* there has been one death of a patient attacked at Srirangarayapalli in the previous fortnight. There has been one attack in Narasápuram, a hamlet of Srikantapuram. No direct connection with infection can be discovered in this case. From the information available the disease appears to have been carried by rats.

In *Bellary district* the disease has been confined to the Alur and Hospet Unions. The infected area in Alur has been evacuated and a party of sepoys has been despatched to disinfect the place. Since evacuation at the very commencement of the fortnight there have been no attacks. In Hospet too there have been no attacks for many days.

Madras City reports two imported cases, one from Arcot and one from Mysore, the latter doubtful.

In *North Arcot* the disease appears to have been stamped out in Kuppam, where there has been only one attack during the fortnight and the same may be said of Arcot and Walajah, in each of which there have been only two seizures. At Ránipéttai the number of seizures rose considerably but still no cases have been discovered among Muhammadans who form a large proportion of the population. It is to be noted that the number of seizures far exceeds the number of deaths. This may denote that the disease is losing virulence, but it means also that our information is good, so many cases being discovered before death. Vellore shows a decided decrease in attacks and this has been most marked during the latter half of the fortnight. The people have now lost their fear of plague operations and the segregation camp is popular.

In *Salem district* there has been only one undoubted indigenous case during the fortnight. This was at Hosur early in the period. It is extremely satisfactory to find that the insistence on the complete evacuation of Hosur has been attended with such favourable results. The case reported from Berikai was, there is every reason to believe, imported from Mysore and occurred in a hamlet quite separate from the main body of the village, which was previously infected and evacuated. The only other case which is reported as indigenous (that from Mukondahalli) is of a doubtful nature.

3. The temper of the people has been good. The change in Vellore is indeed encouraging.

4. Inoculation is nowhere popular.

5. The usual statements are appended.

MADRAS.
24th April 1899.

L. E. BUCKLEY,
Plague Commissioner.

[Statement.

STATEMENT showing the progress of Plague in the villages of the Madras Presidency.

	Total ..	[illegible]	

completely evacuated.

3	Treated in the pl hospital.

Fortnightly Narrative for the period ending 22nd April 1899.

During the fortnight the disease again exhibited a marked decrease. Practically it exists now only in the North Arcot district in the neighbourhood of Vellore and Ránipéttai. The decrease has been most noticeable during the latter week of the fortnight and this is a promising sign. It is satisfactory to be able to report that no cases have occurred in the villages which have been re-occupied after evacuation and disinfection. At first sight Berikai appears an exception, but it is not, for the hamlet in which the case reported has occurred is quite separate from the main village. The heavy rain which has been recently experienced in parts has fortunately not been followed, up to date, by any recrudescense of the disease. The following table gives the attacks and deaths, district by district, during the previous and current fortnight. It is to be noted that Kurnool district is now clean.

District.	Cases reported during Fortnight ending 8th April 1899.		Cases reported during Fortnight ending 22nd April 1899.	
	Seizures.	Deaths.	Seizures.	Deaths.
Anantapur	21	15	1	1
Bellary	12	10	5	6
Kurnool	1	2	..	..
Madras	..	1	2	..
North Arcot	67	46	41	28
Salem	27	20	9	10
Total ..	128	94	58	45

2. In *Anantapur district* there has been one death of a patient attacked at Srirangarayapalle in the previous fortnight. There has been one attack in Narasápuram, a hamlet of Srikantapuram. No direct connection with infection can be discovered in this case. From the information available the disease appears to have been carried by rats.

In *Bellary district* the disease has been confined to the Alur and Hospet Unions. The infected area in Alur has been evacuated and a party of sepoys has been despatched to disinfect the place. Since evacuation at the very commencement of the fortnight there have been no attacks. In Hospet too there have been no attacks for many days.

Madras City reports two imported cases, one from Arcot and one from Mysore, the latter doubtful.

In *North Arcot* the disease appears to have been stamped out in Kuppam where there has been only one attack during the fortnight and the same may be said of Arcot and Walajah, in each of which there have been only two seizures. At Ránipéttai the number of seizures rose considerably but still no cases have been discovered among Muhammadans who form a large proportion of the population. It is to be noted that the number of seizures far exceeds the number of deaths. This may denote that the disease is losing virulence, but it means also that our information is good, so many cases being discovered before death. Vellore shows a decided decrease in attacks and this has been most marked during the latter half of the fortnight. The people have now lost their fear of plague operations and the segregation camp is popular.

In *Salem district* here has been only one undoubted indigenous case during the fortnight. This was at Hosur early in the period. It is extremely satisfactory to find that the insistence on the complete evacuation of Hosur has been attended with such favourable results. The case reported from Berikai was, there is every reason to believe, imported from Mysore and occurred in a hamlet quite separate from the main body of the village, which was previously infected and evacuated. The only other case which is reported as indigenous (that from Mukondahalli) is of a doubtful nature.

3. The temper of the people has been good. The change in Vellore is indeed encouraging.

4. Inoculation is nowhere popular.

5. The usual statements are appended.

~~(True Extract.)~~

L. E. BUCKLEY,
Plague Commissioner.

Madras
April 24, 1899.

3

BLC (Statements) ~~to be printed~~ as appendix

~~NOTE FOR THE~~

Fortnightly narrative for the ~~week~~ period ending 22nd April 1899

During the fortnight the disease again exhibited a marked decrease. Practically it exists now only in the N. Arcot District in the neighbourhood of Vellore & Ranipet. The decrease has been most noticeable during the latter week of the fortnight & this is a promising sign. It is satisfactory to be able to report that no cases have occurred in the villages which have been re-occupied after evacuation & disinfection. At the first sight Berikai appears an exception, but it is not, for the hamlet in which the case reported has occurred is quite ~~a~~ miles separate from the village. The heavy rain which has been recent experienced in past has fortunately not been followed up to date by any recrudescence of the disease. The following table gives the attacks & deaths district by district during the previous & current fortnight. It is to be noted that Kurnool District is now clean.

(Here enter statement) (marked A)

2. In Anantapur District there has been one death of a patient attacked at Srinayaragapalle in the previous fortnight. There has been one attack in Narasapuram a hamlet of (Srikantapuram ~~the same village~~) No direct connection with infection can be discovered in the case. Srikantapuram?

From the information available the disease appears to have been carried by rats.

In Bellary District, the disease has been confined to the Alur & Hospet Unions. The infected

Statement showing the progress of plague in the [illegible] Presidency.

2

~~NOTE FOR THE~~

2

area in Alur has been evacuated & a party of sepoys has been despatched to disinfect the place. Since evacuation at the very commencement of the fortnight there have been no attacks. In Hospet too there have been no attacks for many days.

Madras City reports two imported cases, one from Arcot & one from Mysore the latter doubtful.

In N. Arcot the disease appears to have been stamped out in Kuppam where there has been only one attack during the fortnight & the same number may be said of Arcot & Walaja, in each of each there have been only two seizures. At Ranipet the number of seizures rose considerably but still no cases have been discovered among Muhammadans who form a large portion of the population. It is to be noted that the number of seizures far exceeds the number of deaths. This may denote that the disease is loosing virulence, but it means also that our information is good, so many cases being discovered before death. Vellore shows a decided decrease in attacks & this has been most marked during the latter half of the fortnight. The people have now lost their fear of plague operations & the segregation camp is popular.

In Salem District. There have been only one ~~&~~ doubtful indigenous cases during the fortnight. ~~It~~ This was at Hosur early in the period. It is extremely satisfactory to find that the insistence on complete evacuation of Hosur has been attended with such favourable results. The case reported from Berikai was, there is every reason to believe, imported from Mysore & occurred in a hamlet quite separate from the main

3P

~~NOTE FOR THE~~

body of the village, which was previously infected & evacuated. The only other cases which is reported as indigenous (that from ~~Hosanandahalli~~ Mukondahalli) is of a doubtful nature.

(3). The temper of the people has been good. The change in Vellore is indeed encouraging.

4. Inoculation is nowhere popular

5. The usual statements are appended.

note please check the statement showing the progress of plague in villages carefully, especially the last column giving remarks.

24/4

Statement showing the progress of plague in the villages of the Madras Presidency.

Report of the Deputy Collector on Plague Duty at Hindupur for the week ending Thursday the 13th April 1898.

Besides the case reported from Pothakuthacheruvu of Gooty taluq on the 7th, there has been no plague reported in this District during the week.

The people of Kolakunta & Hindupur have been permitted to reoccupy their houses and a few of them have come into Hindupur, but I think it will take some time before they all have courage enough to enter.

Twelve out of the twenty-four

2

houses at Nemakalla have been disinfected; and after the remaining ten have also been finished the coolies will be sent on to finish Sennyahalli.

Report of the Deputy Collector on Plague Duty at Hindupur for the week ending 20th April 1899.

7. N.
W

This week there has been only one fresh case reported from Mudapuram a hamlet of Sericutapuram. The hamlet consists of 12 houses in all. The story told is that on the evening of the 17th instant a rat died in the house of one Peer Saib and on the 18th his wife Hussana Bee, aged 40 years, took bad with fever. The woman also on being examined by me said she had a bubo, but she was at the time sitting up and did not appear to me to be suffering from a very bad type of plague. She as well as her people deny that they visited any infected place and they state also that they received no visitors. Under these circumstances it is hard to say how she took plague. The whole of the hamlet has been evacuated &

2

the woman Hussana Bee is kept separately in the fields from the others. The hamlet is 3½ miles from Hindupur and about 1½ miles from Kaggalu and Sricanthapuram which were once infected.

W. S. Marshall
D Collector on Plague duty.

No 1531 Office of the Addl Medl Officer
Hindupur 20 April 99

From
J. Hunter Esquire M.B.
Addl Medl Officer
Hindupur

To
The Plague Commissioner
Madras.

Sir I have the honor to report the death of one old case at Srirangapatty fields and one fresh attack at Narasapuram which is a hamlet of Srikantapuram & consists of about fifteen houses in all.

Dead rats had been found in some of the houses & shortly afterwards a woman was attacked with Plague.

23/4/

As it is a small hamlet & the infection has apparently in this case been carried by rats most probably from Kaggallu I think it safe to disinfect the whole hamlet completely doing so

I have the honor to be
Sir

P. C.
15 APR 1899

Weekly progress report of Alur Taluk for the week ending 13.4.99

During the week under report there were three attacks and deaths from plague in Alur. One of them was the breast child of the attack already reported. It imbibed the poison through the mother's milk. It died of toxic form. They took place in the fields.

The other two cases occurred at the fort in the Boya quarters in which the first attack had occurred. These Boyas mix with each other freely. The disease is due to contact with the infected persons & their contacts. They are extreme fatalistic in their belief. They contend that what is to be will be and that everything is preordained. They have no faith in segregation & isolation.

have issued orders for the evacuation of the whole fort. Four days time is given for it.

Ranipett
20th April 1899

No.

P. C.
21 APR. 1899

From
The Special Plague Officer
Wallaja & Ranipett

To
The Plague Commissioner
Nungumbakam
Madras.

Sir,

I have the honor with reference to Plague Commissioners No. 457 D/21.2.99. to report as follows.

Wallaja

The total number of plague attacks from the 14th to 20th April both dates inclusive has been nil. the number of deaths 1. Total number of cases up to date has been 64. total number of deaths 45.

Ranipett

The total number of plague attacks from the 14th to 20th April both dates inclusive has been 1. number of deaths 1. Total number of Cases up to date 62. total number of deaths 42.—

The—

The measures taken are the same as those previously reported and appear to have been completely successful in Wallaja- as during the last week there have been no fresh cases. there is now 1 patient under observation and she is almost recovered.-

The measures have not been so successful in Ranipett where the number of cases has had a slight upward tendency during the past week. All the cases have occurred in the same locality and I think the cause of infection is a well, which is in close contact with a cesspool of a house in which a case of plague occurred in February last. The well was purified by the Medical Officer at the time with alum. but as cases continued to break out in the locality where people who used the water of this well reside. I have stopped people taking their supplies from it. Sufficient time has not yet elapsed to see if this measure will have a desireable effect- I think the very insanitary state of Ranipett has been the reason why the measures taken have not been so successful there as in Wallaja

The houses in Ranipett are as a rule very small- and very overcrowded.

The people appear to be getting confidence in disinfection, as many people in Ranipett have voluntarily had their houses disinfected.-

I have the honor to be
Sir
Your Most Obedient Servant.

22 APR. 1899

Weekly progress report of plague cases. Hospet Taluq for the weekending thursday the 20th April 99.

1. No. of attacks and deaths from Friday the 14th April 99
nil

2. Measures taken and the success they meet with.
The disinfection of houses is rapidly progressing. No fresh measures taken during the week. The disease appears to be disappearing.

3. The attitude of the people.
The people are allowed to take out things to their huts with special passes. No person is allowed to enter the town without a pass. The recent heavy rains have put people especially poorer classes to great difficulties owing to the leakage and high wind as their huts not being watertight. Thatch grass and jungle wood posts will be given to the poor free to make their huts watertight as soon as an advance for the purpose of materials asked for is sanctioned. The people are very eager to go back to their homes but it is ~~[illegible]~~ too early to allow them.

Special Plague Officer

To The Plague Commissioner
with the Government of Madras.

Kuppam.
13. 4. 99.

Sir,

In continuation of my No. 228 dated 6.4.99, I have the honour to report that during the week ending to-day, there have been in the encampments round Kuppam 4 attacks of and one death from Plague, and at Gundlapalli one ~~other~~ death, which was imported from Kuppam.

The Camp returns for the same period are as follows;

Patients

Remaining from last return.	8.
Admitted	Nil.
Discharged.	3.
Died.	Nil.
Remaining.	5.

Contacts.

Remaining from last return	11.
Admitted	Nil.
Discharged	5.
Remaining.	6.

2. The disease seems to be decreasing rapidly, a result which I attribute chiefly to the total evacuation of the village. Of the 4 attacks 3 were reported last week as suspicious, while the fourth is a very mild case.

3. The Collector of Salem informed me on the 5th instant, that a man who stated that he came from Gundlapalli had died under suspicious circumstances at Vanyambaddi and wished to know whether there was any previous history of Plague. There has been no plague at Gundlapalli, the case which occurred there (outside the village) on the 9th was that of a person who had only left Kuppam on the 6th. The man referred to by the Collector of Salem, is not known in Gundlapalli, though it is possible

that he meant Gudupalli, another village about 6 miles from here, where Plague broke out about a month ago, and which is still deserted.

4. Kuppam is now entirely evacuated with the exception of the licensed vendors of toddy and arrack; as these shops form a great attraction to the people living in the encampments I have asked the Collector to order their removal to temporary sites outside the village.

I have the honour to be

Sir

Your obedient servant

H. P. Ainslie Lieut.

Special Plague Officer.

Kuppam.
20. 4. '99.

Sir,

In continuation of my No 255 dated 13. 4. '99, I have the honour to report that for the week ending today there have been no attacks and no deaths from Plague in Kuppam or in the vicinity. The camp returns for the same period are as follows;-

Patients

Remaining since last return.	5.
Admitted since.	Nil.
Discharged.	1.
Died.	Nil.
Remaining.	4.

Contacts

Remaining since last return	6.
Admitted since.	Nil
Discharged	Nil
Remaining.	6.

2. There have now been no cases for 10 days, and though there may have been an odd case or two in outlying villages which I have been unable to get hold of, I am certain there have not been many, as the inhabitants would desert the village after the second or third case, as they did at Gudupalli, the day before I got there.

3. By the Collectors' orders the toddy and arrack shops have now been removed to temporary sites outside the village, and I have now given the police instructions to prevent people from entering Kuppam, except such as have urgent business to transact.

The Collector has also given notice that all houses in Kuppam must be disinfected, All the open houses in Kothapet and Robinsonpet have now been thoroughly disinfected and whitewashed. These comprise fully nine-tenths of the whole, as almost every house has been broken open and locked.

If the present state of things continues, I propose to visit the different Plague Circles in 5. the District, at the end of the month; the supervision of these outside Circles I have had to leave entirely to the Supervisors, and the work done I do not consider satisfactory.

I have the honour to be

Sir

Your obedient servant.

Plague Diary. For week ending Thursday 13th April 1899

To,

The Plague Commissioner,
Fort St George.
Madras.

Sir:-

I beg to submit the following:

Attacks 0, 3, 3, 2, 0, 1, 1 Total 10.

Deaths 0, 2, 1, 2, 1, 1, 2 Total 9

Course of Disease Attacks, as last week: increased by 2 deaths; and cases still scattered about the town.

Disinfection. Progressing satisfactorily and keeps pace with cases.

Sanitation

No improvement.

Camp Segregation

During this week there have been additionally six *: segregated. The camp becomes daily more popular and people are much pleased.

*: out of whom one is a patient, and six of the 7 cases reported last week are now convalescent in Camp.
A. F. S.P.O

Concealment of Cases

There were 4 more instances discovered in Vellapadi since last diary.

Attitude of the people

Generally satisfactory.

Arcot Special Pl.
Dy 14th Ap

The Special Plague officer
Arcot

The Plague Commissioner
Madras

Sir

I have the honor to report as follows upon plague operations in Arcot during the week ending the 13th Instant.

During this period the number attacks, deaths & houses disinfected has been

attack against 5 last week
deaths do. 4 "
Houses disinfected 8 [illegible]
(excluding [illegible] buildings)

Plague Measures

With reference to my ~~[illegible]~~ suggestion that houses which have been kept locked up for any length of time [illegible] might be advantageously [illegible] occupation

[illegible] completed a list showing the number of houses [illegible]

assistance in disinfecting a block of
houses 14 in number containing about 300
inhabitants in Velur, [illegible] so I went there
the 10th instant with 42 Sepoys and
disinfected the block; the following day
sent a party of sepoys there under a
native officer to disinfect one large house for
which our disinfectants had run short
the previous day & to disinfect two other
houses which the Tahsildar & I considered
ought to be disinfected owing to dead rats
having been found in them.

The Tahsildar tells me there have
been no attacks of plague at all in Velur
since the 10th instant.

Attitude of the people. This remains unchanged in
Arcot. At Velur I thought the Tahsildar
& Revenue assistant had treated the villagers
judiciously. They seemed quite willing
that the Sepoys should disinfect their houses.
As Velur is about 10 miles from Arcot &
the villagers have probably never seen sepoys
I was afraid they might be frightened & took
particular care that the disinfection should
be carried [illegible] with [illegible] tenderness
[illegible]

[illegible]

[illegible] other

[illegible] there [illegible] the Revenue assistants

[illegible] pump & disinfectants

I have the honour
Sir,
Your obedient servant
[illegible] Pearce Captain
Spl Plague Of[illegible]

Plague

attitude of the people

[illegible] of the people they meet [illegible]

[illegible] of Mahammedans by name Zafar Beg

stopped me in the street two three days ago &
asked me to help the people of Triot in
some way because robberies were becoming
so frequent that the people, who are poor enough
already, are losing such little property as
they do possess. There is no question as to the
great poverty prevailing amongst the
Mahammedans of Triot & I think the
robbery part of the man's story is true too.
The plague Camp was attacked by a party
of thieves on the 9th and a friend with whom
I exchanged a few words on the road the
following day told me his house had been
visited the same night. The matter of the
attack on the plague Camp is in the
hands of the Police authorities & of course
the whole question of robberies of this
concern is not that of a Plague officer
but I think it as well to mention it.
[illegible] heavy rain fell on the 14th 15th [illegible]
& 16th [illegible] showers on the 17th & 18th [illegible]
[illegible] produced a fresh [illegible]
[illegible] plague [illegible] I [illegible]
[illegible] the [illegible]

I have the honour to be
Sir,
Your most obedient servant

C No 4263

Additional Medical Officer
Hosur dated 15th April 1899

From
Dr. H. A. E. Noble.
Additional Medical Officer
Hosur

To
The Plague Commissioner
Madras.

Sir

I have the honour to submit my report for the week ending Thursday April 13th 1899.

Hosur There has been a very great diminution in the number of cases here, although 2 attacks were wired one has turned out not to be a case of plague. The total plague return in the sheds is therefore 1 attack and 1 death against 10 attacks 5 deaths in the previous week. There is also one old death in the hospital.

At Pettabialagondapalli there was one imported case the history of this case has been detailed in the report already submitted.

Doripally. Here a case was imported from Hosur on March 21st and is not included in this weeks report it only came to light now.

At Mugondapally 2½ miles from Hosur on Tuguwadi road there was a suspicious death on April 4th not reported to me and now the husband ~~is~~ suffering from pneumonia. He is the keeper of the toddy shop there. Those occurring previous to this week have not been entered in the statement as it would give a false impression of the actual state of affairs.

In making a resume of the history of the epidemic at Hosur from 24th February when it was at — height it shows a g

decrease vide statement attached. The cases at Alasamattana and Nerpet may be excluded as these villages are at a distance and mask the true condition of affairs amongst Hosur people.

Since the 9th there has been no attack and this one was a Muhammadan a contact of Perum Bee or Ismal Bee

I have the honour to be

C No 4222

Weekly Abstract Report to the
Plague Commissioner - Madras -
for week ending 13th ~~Mar~~ April /99
of Observation Groups III + IV
Salem Dt.

P. C.
5 APR. 1899

Berikai There has been a suspicious death
near Dasarapalli on 21. 3. 99. which ~~and~~
was found out only on 9. 4. 99. and
enquired into; — from among a batch
of Komaties that arrived from Hosur — and
were encamped out in the jungle, outside
and well away from the village. 1 died
& was burnt on 21. 3. 99, after which
the others left & their identity or whereabouts
have not yet been traced. The village Munsiff
though aware of it failed to notify —

Several Mohammedan families — Komaties from
Hosur have during the week settled near
Athimugam village in this area — they
are isolated outside the village & are under
observation.

The sick child removed from camp - as reported
last week, proved to be a case of Enteric fever
associated with pneumonia from exposure
- she is progressing well —

The inhabitants have been reoccupying their
houses during the week — the Semaan
of all families among whom cases of Plague
have occurred — is disinfected on being
brought into the town.

At Shulagiri the village has not been generally reoccupied – the rain has not been heavy there – and the caution instilled into the people makes them reluctant to avail themselves of the permission.

At Vepanapalli, on the 2 days spent by the Circle Inspector in watching the roads across the frontier – there were several arrivals from infected areas – who were turned back or transported –

In Krishnagiri area – Report not yet received –

The Subcollector Hosur has recommended the adoption of a frontier guard &c on his side – i.e. Vepanapalli & Bisharagadai for the protection of this border – against ~~crowds~~ crowds arrivals from the infected areas into Krishnagiri &c.
