23rd July 9

Secretary to Government
Local & Municipal Department

I have the honor to report for your information that no inoculations against plague were performed in this Presidency, during the week ending 22nd July 1897, except in the Vellore Municipality where only one person was operated on.

I have the honor to be,
Sir,
Your Most Obedient Servant,

Honorary Assistant
for Sanitary Commissioner

From the Additional Medical Offr.
Salem Dist.

To the Secretary
Local and Municipal Departmt.
Madras.

Sir.

I have the honor to submit an Abstract Report on State of Plague in Salem Observation Area for week ending July 22nd.

A fresh village Settipalli – not previously infected has been attacked. Popln about 300. No. of houses 68. This village is situated in an outlying portion of Hosur Taluk – lying in Mysore (in which from which latter infection was brought.

In Hosur taluk during the week there have been notified

	Attacks	Deaths.
Mukondapalli	2.	2
only one at. accrg to the Collr's report. Nchanapalli	1.*	1
Kanaranapalli*	3.	1.
Settipalli	12.	3.
Total	18 attacks	7 deaths*

*occurred 15th. Not included in last weeks report. but received too late for return (statistics) D Collectors office

*All among attacks notified this week.

These are all "indigenous"
None of these cases have been inoculated.

Cases remaining from previous week.

Thorapalli + 1 Case (attacked 18.7.99) a Pariah located in the fields. Convalescent.

+ As this was the last case that occurred in this village - and disinfection was carried out at once - the Collector has been addressed for permission to allow rest of the Pariahs to reoccupy their evacuated quarters.

Guzuradi Frontier Inspect^n St^n 1 Case admitted 27.4.99. from Mukkondahalli - Convalescent.

Nekanapalli 2 Cases attacked 23.6.99 + 28.6.99.

Kanavanapalli 1 Case attacked 15.7.99.

Total 23 Cases - all indigenous. In addition there are 2 Cases of fever at Nekanapalli under observation.

Disinfection of the village of Kanavanapalli was commenced during the week - & will be completed early this week.

Settipalli village has been completely evacuated in the course of the week.

In all these infected villages the people are now encamped in the fields.

I have the honor to be
Sir
Your most Obedient Servant

DESPATCHED
25 JUL 1899

Submitted to Government in Local and Municipal Department and the Sanitary Commissioner for Madras.

For Ag Collector

25/7

To The Secretary to Govt. Local & Municipal Depts
Madras

No 2238 P

From the Addl. Medical Officer
Salem Dist.

To The Secretary
Local and Municipal Department
Madras.

Sir

I have the honour to submit an Abstract report on State of Plague in the Salem Observation area for the week ending July 29th.

Fresh attacks from the 4 undermentioned infected villages show a marked diminution during the week, and the effect of complete evacuation at the 2 last infected making itself apparent. One fresh attack only from each has actually occurred in the past week, but cases show no diminution in severity. The remaining figures - among those notified during the week - relating to "old" deaths or cases which had been isolated under observation - & in whom definite signs of Plague had appeared.

The following is the record of cases notified during the week - all indigenous -

Over

Notified during week – ending July 29th –

	Attacks ✓	Deaths ✓
at Mukondahalli	1. ✓	1. ✓
Uchanapalli	2.	1
Kanaranahalli	3. ✓	0.
Settipalli	5. ✓	3. ✓
Total	11* attacks	5 deaths

* None has been inoculated.

Cases remaining at end of previous week under observation or treatment.

Thorapalli	1.	attacked 18.6.99 Convalescent
Juguradi Dist. Disp. Stn.	1.	admitted 27.4.99 Convalescent Ulcer healing –
Uchanapalli	2.	convalescent.
Kanaranahalli	3	doing well
Settipalli	9	2 of whom died during week.
Total	16	. at commencement of week

at Uchanapalli 2 cases were discharged – well during the week.

Cases remaining at end of week. July 29th.

Thorapalli	1.
Juguradi	1.
Uchanapalli	1.
Kanaranahalli	6.
Settipalli	11.
Total	20 – in Salem Observn area.

The recurrence of plague in the sheds in the fields at Mukondahalli, (3 cases all fatal – in previous week and week under review) after an interval of 7 weeks since last attack – has been due to infection derived from grass of one of the thatches removed from village – for preservation & re-use. The 2 last cases are both contacts of case attacked 15.7.99.

At Settipalli the infection is ascertained to have been imported from Myasandram in Mysore territory – where I understand cases occurred a few days previous to the outbreak at Settipalli.

The disinfection of Kanaranahalli was completed the previous week, and the disinfecting staff are now proceeding with that at Settipalli.

– On Saturday evening 29th since preparation of weekly returns – information reached me of an attack of plague at the Kottagondapalli Frontier Inspectn & purifying station – (a niece of the Hospital Asst there). Dead rats were found at this station on 16th inst. and directions given for the evacuation & disinfection of these sheds. This however was delayed. The outbreak there will be included in the current week's returns –

I have the honour to be.

Your most obedient Servant

L Vilue Webb Amd.
