Plague

Urgent No. 216 P

No 2159 A P
Ootacamund

27 July 89.

I

The Hospital assistant on
Plague duty will go at once to Easton
where Dr. Badcock lives, and
ascertain from what cause or causes
the child of Muniappan, Waterman
in the Doctor's employ, which came
from Vellore three or four days ago, died
this evening. It is stated that the
child had a swelling or sore in the
left groin.

(signed) Geo. Hammett
to the Hospital assistant on Plague duty. Chairman.

I.

Ootacamund
27-7-1899

From the Hospital assistant-
on Plague duty
Ootacamund

to

The Chairman
Municipal Council
Ootacamund

Sir, In obedience to your order
of this evening marked urgent
and

and received at 6.5 Pm, I
hastened to Eastbourne House and
examined the body of the child
referred to.

It is reported that this
child (aged about 1 1/2 years) along
with the mother arrived here from
the North Arcot District on 25.7.99
after a stay of two days at Leemore.
No passports have been given them
at any of the Inspection stations
and the parties could not definitely
say from what railway station
they travelled.

The child has been
ailing from all sorts of complaints
since it was weaned. There could
not be detected glandular enlarge-
ments anywhere in the body. Below
the left groin a small superficial
ulcer about the size of a pea exists,
which has been apparently the cause

of the unfounded report.

I have therefore given
orders for the disposal of the
corpse.

I beg to:

(Sd) S. Balasubramanyam
Hosp. asst. in Charge
duty.

(True copy)

(signed) Geo. Hammett
Chairman

(True copy)

98 P.

To the Secretary & Government
Local and Municipal Department
(Plague Branch).

2. I have consulted the civil
Surgeon who informs me that this
Hospital assistant can be trusted
to give a true report and that the
information given by him gives no
cause for the slightest suspicion
of

of plague. As personally remarked
by the secretary this morning, North
Arist is no longer an infected area.
