From

Lieut -Colonel W. G. King, M.B., C.M., D.P.H.,

Sanitary Commissioner for Madras,

To

The Plague Commissioner, Madras.

Sir,

With reference to your Proceedings NO.793 dated 24th November 1898 sanctioning the opening of 11 observation circles along the Mysore frontier of the Bellary District, I have the honour to advise that instead of a series of circles guarding 10 miles area, two such circles be formed guarding 20 miles. I consider these circles will secure the minimum requisite observation along the frontier. To cross the river at any point and not halt at any village until outside the first line of ten mile circles, would be a very ordinary march for pedestrians, but, to double the distance, with the object of getting beyond the specially guarded area, would demand a special effort. On consulting the Collector on this point he informed me that to complete the double line he would but require that three more circles be formed. I advise that this be sanctioned.

I have the honour to be,

Sir,

Your Most Obedient Servant,

W. G. King

Lieut-Colonel, I.M.S

Sanitary Commissioner for Madras.
