(*d*) WATER-SUPPLY.

Red Hills Lake.

The level of the lake on the 31st January 1899 was 44·66, and on the 31st March 1899 was 43·43.

Delivery Channel.

The valves at the tower and tumbling bays along the channel have been kept in good working order, and the channel slopes in good repair, and the water-way of the channel free of weeds.

Walkmen's Bungalows.

The Walkmen's bungalows had slight repairs done to them.

Fountains.

The fountains have been kept in good working order.

Pipes and Valves.

The pipes and valves have been kept in good working order; the smaller sizes of pipes (9" downwards) were taken up and cleaned; this work was begun on the 20th of October 1898. During February and March 1899, 48,240 feet were so removed, cleaned and relaid, making a total of 157,240 feet. The cleaning of the pipes has had a most beneficial effect on the localities in which the work was done. But until the whole of the pipes in the city are cleaned, there will be defective supply in some places We have still about 300,000 feet of small pipes, which require cleaning badly and it would be well if the balance of estimate were sanctioned for doing this work.

House Services.

The licensed plumbers in February and March 1899 applied and obtained permission to lay the following number of house services:—
