ENCLOSURES. Nil

From,

R. FISCHER, ESQUIRE,

Chairman, Municipal Council,

Madura.

To,

The Secretary to Government

Local and Municipal Department

Thru'

The Collector of Madras

Sir,

I have the honour to request that the Government will be pleased to state the circumstances under which the Town of Madras was ordered to be re-surveyed, when no boundary stones of the first survey and demarcation were missing, and consequently no resurvey was necessary. This information is required by the Council before ordering payment of the sum of Rs 587.8.3 being the cost and carriage of — demarcation stones supplied by the Survey Department in the resurvey that took place during 1878-78

I have the honour to be

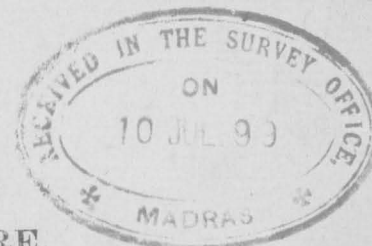

Sir

Your most obedient servant

Tunquahipahelle
Chairman

Local and Municipal Revenue Department.

REFERENCE.

Endorsement by Government
Local and Municipal ^{Dept.} No. 727 dated 8 July 1899,
referring to the Superintendent of Survey,
letter from the Chairman, Municipal
Council, Madura No. 23 dated
29 May 1899, requesting to be informed
of the circumstances under which
the Town of Madura was ordered
to be resurveyed.

Sir,

I have the honour to report
that the following villages are comprised

within the municipal limits of the
Madura Town.

Village		Part or whole
No.	Name	
<u>Government Villages</u>		
27	Vilangudi	Part
146	Anuppanadi	Part
149	Ponneri	Part
147	Madura	whole
109	Tallakulam	Part
111	Managiri 1 st Bit	Part
28	Tattaneri	Part
29	Sellur	Part
150	Arappalaiyam	Part
110	Madichiyam	whole
<u>Inam Villages</u>		
58	Sattimangalam	Part
98	Minakshipuram	Part
97	Airavadanallur	Part
100	Kuvakuli	whole
99	Villapuram	Part
57	Koorippalaiyam	Part
101	Kanapathiendal.	whole

2. During the ordinary course of
Survey of the Madura Taluk, the

Government Villages noted above were
surveyed cadastrally and mapped on
the 16 inch scale, and the non Government
Villages were surveyed topographically
and mapped on the 4 inch scale
between the years 1881 and 1883.

3. In 1884, Mr. Cardozo, then Deputy
Superintendent Madras Survey No. III
Party, reported to the Superintendent
that a map of the Madura Municipality
was much required by the District
and Municipal authorities, and
asked for orders to prepare one.

4. After considerable correspondence
with the municipality about the scale
of the map (which the municipality
at first wished to be 8 inches = 1 mile,
then 200 feet = 1 Inch, and afterwards
32 inches = 1 mile) it was finally
decided by the Superintendent that
if the municipality consider a map on
the 16 inch scale will suffice for the

"purposes for which it is required, it
"can be compiled from the original Surveys"

5. The map was compiled in December 1885 and published in April 1886, and one copy was sent to the Chairman, Municipal Council.

6. Excepting the municipal boundary which was demarcated and surveyed, no demarcation or survey preliminary to the compilation of the map was made other than that referred to in para 2 above.

In the crowded parts of the town, no stones were fixed to mark the limits of streets or house properties and the houses were not even measured.

The map prepared was a topographical map. Except this lithographed map, no records were furnished to the Municipality and it can be of very little use in identifying and putting a stop to small encroachments.

7. The special cadastral survey recently made and during which

encroachments on roads and channels were detected is not a resurvey as supposed by the Chairman, Municipal Council in his letter to Government, but an original survey. The survey was ordered in G. O. No. 909 Financial, dated 29 October 1894. The object of the survey was to prepare maps and records "on a scale sufficient to make them available for checking encroachments and defining the limits of private and public properties." G. O. No. 131 Local and Municipal, dated 6 February 1894.

8. As a result of this survey, the following records have been prepared.

(1) A manuscript map for each survey block on which are recorded all the measurements.

The scale of these maps is either -

1st. 160 inches = 1 mile or 1 inch = 66 feet for the more crowded localities.

2nd. 80 inches = 1 mile or 1 inch = 66 feet for the more open portions, such as compounds, gardens &c.

(2). A printed Revenue map, scale 40 or 80 inches = 1 mile or 1 inch = 132 or 66 feet, showing the boundaries of survey blocks and of properties or holdings each of which forms a separate survey field numbered to agree with a register or record of rights.

(3). A field register or record of rights giving full particulars regarding ownership, area & of each holding or survey field number.

(4). A record of area computation showing how the area of each survey field was ascertained. The measurements are recorded in feet and the areas in acres and square feet.

The following additional maps are under preparation.

Printed topographical map of each ward scale 20 inches = 1 mile.

Printed topographical map of the whole town, scale 10 inches = 1 mile.

Records 3 and 4 mentioned above were sent to the Collector with Superintendent's letter N^o 2024 dated 27 July 1899 and the Chairman informed of the same in letter N^o 2023 dated 27 July 1899.

Record N^o 2 will be supplied shortly to the Collector and to the Chairman.

9. The letter from the Municipal Chairman, Madurai received with the endorsement under reply is returned.

I have the honour to be

Sir

Your most obedient servant

A. L. Reeve
Superintendent,
Madras Survey

Recd.
