Order

The existing plague establishment in the D-
seems more than what is necessary. In some places
more than one officer has been deputed to the same
work eg. An Hospital Assistant and a Sanitary
Inspector are employed in the inspection of
passengers at the Calicut Railway Station.
While one of them should be able to perform this duty
and that the no of infected places has been considerable
reduced. Some reduction in the establishment at
the frontier stations & posts should also be possible
for the same reason. The Collector is requested to
examine the establishments and report on plague duty for
what reductions are feasible under the
existing circumstances. He will expedite
the report called for in f. no. 1004 P. dated
29.6.99.

 To the Secy. u.o. 1/17/99.

The Collector is requested to examine the list carefully & report what reduction can be made in the plague Establishment. He is requested to consider whether the employment of a large number of peons has resulted in any practical good & whether it is necessary to continue the present staff. The list of infected places has been greatly reduced and it appears to Government that some of the passport issuing officers may be either dispensed with or replaced by men of lower salary. The Secretary to Government
Local and Municipal Department.

Sir,

Sir,
I have the honor to reply to Ref on C. No. 1957 P and G.O.
No. 1164 dated 20" and 29" July 1899 respectively.

2. The Hospital Assistant at Olvacoode Railway Station may be replaced by a man on Rs. 15. I am sending orders to the Head Assistant Collector to arrange accordingly.

3. It may be possible to arrange for a reduction of the establishment employed at the Calicut Railway Station. I was corresponding with the District Medical and Sanitary Officer on the subject, and proposed to reply to this reference on receipt of his report. But as the Government is telegraphing for an immediate answer I send in this report at once.

4. But for the observation staff in Wynad wd should have had the plague in the District before now. One case in a very advanced stage was actually discovered at Bavali and the patient sent back into Mysore---which her relations preferred to the detention of the whole party in the segregation camp. If this one case had got ~~into~~ Manantody there is no knowing how far the infection might have spread. But, apart from this instance, there were many persons turned back who had fever and may have subsequently developed plague. The fact also that the inspection on the Wynad frontier was known to be strict, doubtless deterred refugees from plague stricken localities from endeavouring to escape in that direction.

5. The frontier inspection posts in Wynad were selected by me personally after I had ridden and walked over a great portion of the country and taken counsel with the local residents. It is impossible for any except jungle men to evade the posts. They have the effect of tying up all the arteries of communication with the Wynad. It is therefore difficult to overrate their importance.

6. I have directed the Wynad Deputy Collector to dispense with the services of one peon at Bavali, one at Kadavu, and two at Thorambur. I cannot recommend any further reductions. The establishments at these places will indeed have to be brought up to their former strength if there should be a recrudescence of plague in Mysore.

I have the honor to be

Sir

Your most obedient servant

Collector.
