FURTHER PAPERS.

No.	Date.	No.	Date.

1,000—4-10-98.

NOTE FOR THE P. C

Malapuram is spelt Melapuram in the map & is situated just above Hindupur. No detailed report has yet come.

2) Jollapalli cannot be traced on map. No detailed report come yet.

3.) Kethandapatti. Ammaji, his wife Annamal, & child came from Mysore to Tiruppur on 21-12-98 & went to Kettandapatti on 26-12-98. Ammaji died on 28-12-98. Mother & child ~~dr~~ went to [illegible] [illegible] on 2-1-99. Child died there on 4-1-99.

No report has yet come regarding the 2nd indigenous case on 13-1-99.

(4) Statement B attached to draft giving only indigenous cases. Should imported cases be also shown? The statement may stand as it is.

[illegible]
18/1/99

May stand [illegible]
[illegible]
[illegible]

[illegible] were for the fortnight [illegible]
[illegible] within [illegible] the 6th January.

~~Progress of the plague~~ : [illegible]

The following is an abstract of the cases reported during the fortnight* ; details are given in the appendix (~~Memorandum~~ Statement A.)

~~2 slight figures as a whole.~~ ~~There was considerable~~ some ~~improvement in the Anantapur~~ Dt. ~~In the Bellary~~ no cases ~~were reported from Guntakal but~~ By but it has ~~the disease appeared in an~~ ~~indigenous endemic form in no fewer than~~ 3 new ~~places~~ villages, viz. Gooty, Tolikeri, & ~~Kamma and Uddaru~~, but in none ~~of these places~~ does it seem ~~it seems to have~~ taken a firm hold.⊗ ~~There were~~ ~~also imported cases in Anantapur~~ ~~and Gullapalle~~. Both Chamalur & Hindupur do not show any improvement, while the plague ~~seem~~ is abating in Kunakundla.

B. ~~In the Bellary Dt.~~, no fresh cases have been reported from Molagavalli since the 2nd January, ~~& none occurred~~ ~~at all during the fortnight at Pedda Kotur~~. figures show a marked decline. At Hospet, there were 2 imported cases & 13 indigenous attacks with 8 deaths. Two imported cases

* ending 14th Jan: 1899.

The totals for the Anantapur D. District show ~~some~~ a slight improvement. In the northern infected area, Timmancherla remains ~~free~~ clear, & Guntakal reports no case, while the disease has nearly subsided in Kotala;

⊗ [illegible]-akonda, where indigenous plague was reported in the last narrative has suffered severely during the fortnight, there being no less than 22 c. & 13 d., but an improvement seems to have set in at the close of the fortnight. In the South the returns from Chaudur & Hindupur show a considerable ~~decrease~~, improvement

& it is trusted that the efforts made in this village may have ~~been~~ at last resulted in success. The prompt action taken at [illegible] requires to [illegible] in [illegible] has kept the [illegible] cases were for the first time reported from Admi town on the 6th January.

4. Kurnool Dt. ~~The disease continues~~ in Madhikera ~~Two new villages were attacked during the fortnight.~~

but makes little progress. The [illegible] of [illegible] in the same [illegible] became infected at the close of the year, but the disease seems to have been stamped out there & in 2 other villages where cases were found

5. ~~North Arcot Dt.~~ Plague has ~~been~~ appeared in an indigenous form in ~~[illegible] village~~ Kuppam place & Vellore of the N. Arcot district, in both cases ~~in this Dt. the chief of outbreak~~ being imported from Mysore. Vellore is ~~the large town of Vellore.~~ Vellore is a town of about 50,000 inhabitants; the ~~indigenous cases were reported~~ outbreak appears confined to one corner, & the steps taken ~~from this place during the fortnight~~ to deal with the plague disease appear to have been so far [illegible] successful. It is possible however that cases may be being concealed. ~~[illegible] and it is probable some cases have been concealed & not reported.~~

6. ~~Salem Dt.~~ Kistna taluk, Dist [illegible] & — Shulakopai is badly infected & Nattipari ~~does not show any improvement. Two new places were attacked with indigenous plague during the fortnight.~~

Continue to suffer severely in spite of the strenuous exertions of the [illegible] assistants, & from a neighbouring village Jigni, ~~two~~ indigenous cases have also been reported

2. Segregation &c.

~~Evacuation has been carried out with voluntarily, except in Vellore, & some of the newly attacked villages in N. Arct.~~

Segregation has been possible in many ~~most~~ of the imported cases, but where difficulties have arisen, contacts have been confined to their own houses. ~~In the case~~

~~of the~~ Towns & villages in which plague is indigenous have been voluntarily evacuated with the exception of Vellore, & the early attacked villages in North Arcot. Evacuation on a large scale is impossible in Vellore, ~~as~~ all the surrounding country being occupied by rocks, tanks, & wet cultivation. Segregation in Vellore has been attended with difficulties in Vellore, but the contacts have been confined to their own houses.

3. The attitude of the people.

No active hostility has been reported in the fortnight.

transfer of contacts to segregation camps has been strongly objected to in Vellore, & home segregation has generally been substituted. The people are also reported to be taking to inoculation to escape segregation. Similar difficulties are said to be experienced in ~~most~~ some of the adjacent villages. There is a tendency to conceal cases in Vellore, & ~~the~~ people of the surrounding villages do not seem to have realised ~~that~~ they incur danger by taking in refugees from Vellore. Elsewhere they are generally fully alive to this danger.

4. Inoculation. Inoculation is not popular, except at Vellore, where people are undergoing it to ~~escape the plague~~ ~~repeat~~ obtain the privileges it confers. At Vellore, 212 cases were recently done by the Dep. S.C. but these ~~were not~~ can scarcely be said to have been voluntary subjects; they are all cattle drivers & were operated upon under the orders of their master a big cattle-dealer, who wished them to be free from restriction in the [illegible]

furnished are believed to be ~~far~~ below actuals in most cases.

18/1.

No. 143 of 18-1-99
Covering letter to Litho

Sir,
I have the honour to submit for the information of Govt. a fortnightly narrative of the progress of plague from 1st ~~Jan~~ to 14th Jan 1899.

19/1

No: 1 of 1899. A No 383

Diary of Plague Operations at Alardinne Village Patti Konda Taluq for the week ending 7th January 1899.

Jany 1st. On the Evening of this date the Tashildar of Patti Konda received at Maddikera reports from the Police S. H. O of Devana Konda and the Village Head of Alardinne that there had been 6 suspicious deaths among the Malas of Alardinne between the 26th & 30th December & that dead ~~supos~~ rats were alleged to have been found in some of their houses.

Jany 2nd - The Tashildar proceeded to Alardinne and made inquiries about the deaths reported. From his inquiries he elicited the following:- On the 24th or 25th December one Sunkamma came from Kuntalapad of Adoni Taluq Bellary district, to her brother at Allardinne. On her way she halted at Pedda-hotur, a plague infected village of Adur Taluq - Bellary District - After her arrival, from the 26 Decr, the following deaths among the Malas took place in the village

1. Sanjamma an old woman of 60 on 26/12/98
2. Sankamma, a girl of 6 on 27.12.98
3. Nagamma, a girl of 8 on 28.12.98.
4. Ramakka, a woman of 17 on 29.12.98
5. Hussein Appa, a man of 50 on 29.12.98

On the 30th Sankamma herself died.

All the above were reported to have been quite healthy up to within a few days of their death when they suddenly took ill with fever & died ~~within 2 d~~

Of the above the 1st & 4th belonged to one house - the 2nd & 6th to another & the 3rd & 5th to a third.

On these 6 deaths occurring the Malas moved into the fields, as also did most of the other villagers of the village. It is stated that none of the 6 who died had buboes but before death their lungs were affected so that in all probability they had pneumonic plague.

The Tasildar then got 2 small thatched huts in which deaths were alleged to have taken place burnt down & as also two others also adjoining - agreeing to grant compensation of Rs 19-2 for the 4. ~~Telegraphic~~ Intimation was then sent by him that night to the Collector by post as he was not quite certain of the deaths having taken place from plague.

Jany 3rd. - This morning the Tasildar with the Pattikonda Hospital Assistant visited the several camps in the fields and discovered in the Malas camp 3 cases of bubonic plague, two of which proved fatal the same day. Their bodies were cremated & all contacts were segregated in separate huts in the fields. On going through the fields near this camp two fresh graves were discovered which on inquiring were ascertained to be those of two Malas who died after camping in the fields. One of these was alleged to be the wife of the man (No 5) who died on the 29th & the other the mother of a girl who died later on. These deaths although said to be from fever only were doubtless cases of plague.

So that in all from the 26th Decr there have been 11 attacks and 10 deaths

up

Jany 4th - The 3rd patient found by the Tasildar & H.A. in the Malas Camp yesterday died today and a fresh attack - a young woman - in the same Camp was discovered - She is isolated in a small hut, apart from the rest of the Camp, with her husband

Jany 5th - A Sanitary Inspector ordered to proceed from Maddikera arrived to disinfect the suspected evacuated houses. Also a police guard of 6 Constables to watch these houses & the Malas Camp. I started from Kurnool - whither I had come in from Maddikera for a few days - accompanied by Dr. Power the Additional Medical Officer. On reaching Maddikera 1 Head & 6 more Constables were ordered to proceed to Allardinne with the Ambulance Staff.

Jany 6th. Dr. Power & myself started from Maddikera for Alardinne reaching it after journeying 25 miles in the evening we found that 4 of the infected houses had already been burnt down & the Sanitary Inspector had disinfected two others. The Malas Camp was visited & they all were found healthy except the female reported on the 4th to be suspected to have plague. She is in a separate hut some distance from the rest of the Camp & is attended by her husband. A Police guard has been placed over this Camp -
The Tasildar reported that another suspicious death took place this morning in this Camp - The H. A. found no buboes - the Corpse was Cremated.

Jany 7th. Visited the Malas Camp with Dr. Power - The female patient is still in the same state - fever of about 102° but no buboes. The rest of the Malas were found well - Arranged for the disinfection of the whole block of houses which the Malas occupied in a Corner of the Village - The roofs were opened up

Owing to difficulty in getting Coolies much could not be done this day – The whole Village almost is Evacuated, the Villagers having Camped in 5 or 6 different places in the fields about a mile off.

Since the 26th December including Concealed Cases there have been 13 attacks & 12 deaths. one of these being imported & the rest indigenous

Diary of Plague Operations
at Maddikera
Kurnool District
for the week Ending 7th Jany 1899

Jany 1st - There are 3 patients suffering from plague still - One of a girl in the Village & two others, Brahmins, in a Camp in the fields - The girl is segregated in her own house with two female attendants and is on a fair way to recovery The Brahmins in the fields are considered to be in a Critical State

Jany 2nd. Both the Brahmin patients in the fields died one in the morning & one at night

Reported on 3rd.

The huts occupied by them were burnt as also all Soiled linen &c & their bodies Cremated A woman who was attending on them was disinfected and segregated in her own house ~~in the Village~~ - an isolated one - in the Village where she is under observation.

Only one patient now remains at Maddikera - Those in the Village & out in the fields are all reported well -

Jany 3rd to Jany 7th — No attacks or deaths reported. All Contacts of old Cases reported to be well -

Plague

Weekly diary commencing from 1st January 99 and ending 7th idem shewing the progress of the disease, and the measures taken to deal with it, submitted with reference to Plague Commissioner's letter no 1026 d/ 27th Dec 98

(Through Collector North Arcot Dt.)

5th Jany 1899 — The disease first manifested itself in this town in an indigenous form on the night of the 5th Jany 99 in Peria kanan kuttees Annay-chetty street. One Angalappan a lad aged eleven years was attacked with fever @ 8 P. M. and suffered from glandular swellings of right groin and right side of neck. The house and contacts were disinfected and the contacts were segregated in their own houses. The body was crimated

6th Jany 99. In the vicinity of the above locality another case occurred on the 6th instant. Girl Rajammah aged about 14 years was attacked at 8 A. M. of the 6th instant and died about 12 midnight. She had glandular swelling on the right of neck. No history of importation. The body was buried house and contacts were disinfected and the contacts were segregated in their own houses

7th jan 99.

7th Jan 99. Again on the 7th Instant another case was discovered superintended by Contact. One Singaram chetty a Cousin of the boy Angalappan was attacked at 7. P.M on the 7th Instant and died at 9. 30 A. M on 8th Instant. He was suffering from fever and bubo on right groin. No history of importation. The house and Contacts were disinfected and the contacts were segregated in their own houses.

Diary of Plague Operations
in Maddikera Village
Pattikonda Taluq
for week Ending 14th Jany 99

P.C.
16 JAN 1899

Jany 8th. All Contacts of old Cases reported to be doing well.

Jany 9th. Information received this day of the death of a man in the fields on the 7th he having taken ill it is suspected with plague on the 6th. The hut he occupied was burnt & the grave he was buried in out in the fields was fenced in & lime thrown over. His Contacts wife & 3 children who wanted to return to the village were disinfected & segregated in their own house, an isolated one. A Police guard has been placed over them.

Jany 10th. Information was received of the death of a woman in the village. She is said to have taken ill on the 6th. Her Corpse was cremated. The two Contacts were disinfected & removed to another house where they will be kept under observation. The house will be disinfected tomorrow. Three other cases were discovered in the village

The first of these patients was removed to the fields & is being attended upon there by her brother.

The second was found to be suffering from bubonic plague. He has only one contact - his mother - who is attending on him. Both are isolated in their own house. Medical treatment refused.

The 3rd is an old man who also has bubonic plague. He is isolated in his own house & is attended on by his wife.

Jany 11th. Two of the houses of the cases reported on yesterday were disinfected today - also two other houses in the same block -

A suspicious death last night, was reported - The patient was a ~~woman~~ girl who took ill in the Village on the 10th & was removed at once to the fields where she died - The hut she occupied in the fields was burnt. Her house in the Village was found evacuated & locked & will be disinfected - The brother of this girl was also this day found suffering from bubonic plague in the fields & is being isolated in a separate hut. His father is in attendance on him. The other relatives are in a Chavady in the fields -

Jany 12th. This day it was reported that the Union Chairman's son a boy of about 8 years was ill - He was found on examination to have bubonic plague. He is isolated in his own house & is being attended on by his mother - Other relatives - the father & sister - were segregated in another house adjoining, after disinfection -

Two suspicious deaths were also reported in the Village; the corpses were buried, in the one case & burnt in the other, before information was given. The contacts of the first case - two in number - Mahomedans - left for the fields - In the other case the contacts (5) were removed next day to another house after disinfection. The houses where the deaths took place are kept locked. They will be disinfected.

Jany 13. No fresh cases either in fields or Village - 4 houses were disinfected this day being houses in an infected block. There are now 3 cases in the Village & two in the fields. The patients all being about the same condition -

Jany 14 - The old man who took ill on the 10th died early this morning. His Corpse was buried, as relations objecting to cremation, after being wrapped in a cloth saturated with perchloride solution in a 6 foot grave. The Contact his Mother was removed after disinfection to another house & is under observation.

The plague Sheds are under Construction & will be shortly Completed. As most of the Villagers are in Scattered Camps in the fields a Police patrol has been organized to visit these Camps & frequent visits are made to them by the Plague Supervisor Sanitary Inspector, Ambulance Staff Hospital Assistants & the Nurse.

16 JAN. 1899

Diary of Plague Operations
at Togalagula hamlet of
" Dadadadi Konda
Pattikonda Taluq
for the week Ending 14th Janr. 99

Janr. 8th. The Tashildar reported that on the 6th he received intimation from the Village Head that there were 4 suspicious deaths at Togalagula among the Madigas. The Tashildar proceeded to the Village with the Pattikonda Hospital Assistant and found the Madigas had Evacuated their houses & were Camping in the fields about 1/4 mile from the Village. Two more of the Madigas were found in the fields ill with fever. The Hospital Assistant Examined them & found they had no Symptoms of plague but their Cases were Considered suspicious. It would appear the father of the first Madiga + a Girl who died was in the habit of going to Moluguvalli she must have therefore Carried the infection in from that Village. This Girl died after 2 days illness on the

Her death was followed up by 3 others all within a few days, On which the Madigas vacated their houses - 7 in number - The Tasildar had the hut where the last suspicious death occurred burnt & got the others opened up burning all rubbish &c found in them.

Jany 9

This day the Additional Medical Officer & myself visited the Village - The two Madigas found on the 6th by the Tasildar ailing in the fields died Yesterday - Their bodies & clothing were burnt as also the huts they occupied in the fields - Contacts are out in the fields each in their own huts - A Police Guard has been placed over the Camp - A Census was taken today of those Camping out -

Jany 10th

Report was received today that a girl & a boy were taken ill with fever. The Ambulance Staff at Alardinum was ordered to proceed to the

Village by the District Surgeon Dr O'Hara who arrived Yesterday to relieve Dr Power

Jany 11th. Accompanied the District Surgeon to the Village - The girl & boy reported on Yesterday were found suffering from fever & were isolated in separate huts in the fields - All the 6 houses occupied by the Madigas were disinfected this day -

Jany 12 - The Madiga girl & boy were reported to have distinct symptoms of plague - The houses disinfected yesterday were whitewashed & will be kept evacuated for a fortnight if there are no more attacks among the Madigas.

Jany 13 & 14 } All contacts reported to be well & no fresh attacks

C. No 199 P of 99
Dt 15.1.99

Kuppam
14th January 1899
No 1/Dy. 29

Through Collector
North Arcot

To The Plague Commissioner
Madras.

Extracts from the Diary of Lieutenant C. R. Scott Elliot 4th M. Pioneers, on plague duty, Kuppam, N. Arcot, forwarded to the Plague Commissioner, Madras in accordance with his letter No 1026 of 27.12.98 for the week ending 7th January 1899.

Sunday 1st. Nil.

Monday 2.1.99 Woman attacked on 2.1.99 at Robinsonspett. Niece of one Velayudam. Segregated the same evening in fields belonging to them which they selected in preference to the segregation camp. A hut was erected for their accommodation & a Policeman placed in charge & they were disinfected before going

Tuesday 3.1.99 The woman died this evening. Sub Collector arrived & assumed charge of operations. House in Kuppam thoroughly disinfected.

Wednesday 4.1.99. Body was buried 6 ft deep and the persons who came in contact with the body and their clothes were also disinfected. In the afternoon wife of one Chennapayan died. She was living in a house close to Velayudams. The contacts were at once disinfected & moved into the segregation camp. Their house which was a thatched one, as well as two adjoining houses, also thatched, was burnt and the houses thoroughly disinfected.

Thursday 5.1.99. Boy Chenchu died last night in a house situated in a street next to the street where the niece of Velayudam died.

This boy had visited Vilayaram's house. The body was burnt. and the carriers of the corpse and their clothes disinfected. The contacts were disinfected & moved into segregation at once. and the tiles of the house and the house ~~and~~ ~~the street~~ itself thoroughly disinfected. The roofs of two adjoining thatched houses were also burnt. A rat was reported to have died in a thatched house close by. The roof of this house was also burnt with full consent of the owner.

Friday 6-1-99

All in segregation doing well. No further cases reported. Hospital assistant making informal house to house visitation.

Saturday 7-1-99.

Gungadaran, cooly engaged disinfecting and living opposite where boy Chenchu died reported with high fever. this evening. He is being daily observed in his own house. which is a tiled one as there is no room for him in the camp. A Constable has been placed over the house. Materials for erecting sheds not available here. A wire has been sent to Tirupatur for them.

In all cases the floors have been ~~thoroughly~~ burnt by the kiln method and the earth thus burnt removed to the fields for manure.

No 1026 14 27/1/99

This diary was not sent before as your letter directing weekly diaries to be sent to you was not received by me till the 10th instant. I therefore only presumed that diaries would only be required from the date of receipt of the order. The Collector, however, wrote to me that this diary was also necessary. His telegram was received to-day.

C No 598

P. C.
16 JAN 1899

Diary of the District Medical and Sanitary officer, Shulagiri.

2d January 1899. Arrived at Shulagiri in evening.

3d January 1899. Visited the Plague Hospital located in the L. F. Chuttram and found 4 men and a boy and two women and a girl under treatment and receiving proper attention from part of the 2d ambulance staff consisting of 1st class Hospital assistant Chellamiah, nurse Mrs. Gore, 2 male and 1 female attendants, 2 bearers, 1 cook and 1 dhobie who arrived here from Salem on the 29th December — there are also 3d class Hospital assistant Andrew Pillay, 2 bearers, and 1 male attendant belonging to the 1st Ambulance Hosur but as the Hospital assistant has been suffering from ague since the 31st December and is weak therefrom I allowed him to return to Hosur L. F. Hospital for treatment together with the male attendant -

5 male & 1 female totees arrived from Salem on the 1st instant and are attached to the 2d ambulance staff, one male and 1 female for the Plague Hospital, 3 to work in the Village and 1 in the Comati Camp under 2d ambulance sanitary Inspector Vencataramiah -

At present the Chuttram affords sufficient accommodation for the sick but two 24' x 12' sheds are needed -

about ½ a mile from the Village on the western side is an encampment of 27 sheds occupied by a party of about 150 Comaties who vacated their houses in the Chetty street on the 24th December – I visited this camp and found that these people have brought much of their grain and household property with them and that 10 cases of plague and 4 deaths have occurred since they have been in camp – the sick (6) remaining 3 men, 1 woman & 2 children, are isolated in small sheds closebye and are attended by their relations who refuse to have them removed to the Plague Hospital – arranged with Captain Ffrench to have tents pitched for the sick and the contacts and directed the ambulance Sanitary Inspector to disinfect the clothing of these people who belonged to 5 of the sheds which are to be vacated as soon as possible.

At present infection has been limited to the Eastern half of the Village including the bazaar street & with a few exceptions the houses in these parts have been vacated dead rats having been found in many of them, and the inhabitants gone to other distant villages or are scattered about in small camps in the fields around Shulagiri – nothing has yet been done to disinfect these houses.

As far as I have been able to ascertain there have been 52 attacks since the 13th December up to date and 36 deaths: of the 16 remaining 8 are in the Plague Hospital, 6 in the Comati camp and two in their houses in the Village.

4th January 1899.

No fresh case was reported today but the sick boy died in the Comati Camp and his body was burnt by his relations – Estate Revenue Inspector Vencatasiah died in his house in the Agraharam, his body was burnt, his house closed & his wife and 3 children removed to the Segregation camp and clothes disinfected – the sick girl Subbammal also died in the Comati Camp last night, the body burnt and the contacts disinfected –

There are 10 sappers here who are engaged at present in pitching tents and today 2 tents for sick, one for attendants & 4 for contacts were put up during the day.

Mr. Clegg the Collector accompanied by the Sub Collector and Additional medical officer Dr. Virtue Tebbs visited the Village, hospital and neighbouring camps and returned to Hosur in evening: the occupants of the Comati camp were advised to have themselves inoculated but declined to do so for the present as it would cause fever and leave them uncertain whether it was due to inoculation or plague itself but they promised to consider the matter – those still remaining in the infected part of the Village were advised to vacate without further delay - arrangements for marking the infected houses were made.

A boy Vencatagadu in the segregation camp opposite the Plague Hospital was attacked by fever in the afternoon 100.2 & was placed under treatment: there are now 9 under treatment in Hospital.

5th January 1899. Selected site and gave instructions to the Sapper Naique for the construction of two 24' x 12' sheds in the Plague Hospital compound - got the Comaties to turn out the contents of their sheds for exposure to the sun, ordered the burning of some rotten jaggery bags and disinfected the sheds in which cases had occurred and placed the sick attendants and contacts in the tents provided for them and placed a Police constable to keep them there: instructed the Sanitary Inspector about digging latrine trenches for this camp and the totties working in the Village - the numbering and marking of 39 infected houses was completed and the untiling of these will commence when the sappers have finished the Hospital sheds.

Chinnan aged 28 contact of Yemannah who died in Plague Hospital on 30th Decr. was found sick in a shed a mile away from the Village and was removed to the Plague Hospital and his father mother and younger brother a boy of 16 years to the segregation camp and the field shed destroyed by fire.

Visited an encampment near Adagondapally ½ a mile on Hosur road of 11 Mahamedans & 40 Hindus who left Shulagiri about a fortnight ago and found them all well.

6th January 1899. Vencataramachary aged 60 died in Plague Hospital early this morning and was cremated - Surianarayana aged 2 years son of Revenue Inspector Vencatasiah who died on 4th instant, now in segregation camp had fever this morning and was placed under observation.

Police constable No. 317 Rajahswami Pillay age 35 living in Pillary street in infected part of town where evil smells abound, was found suffering with temperature 103.5 and a bubo in left groin and was at once removed to the Hospital and his wife Latchmakka the only other occupant of the house removed to the Segregation Camp and disinfected, the house locked up and marked, the people occupying several houses around were urged to vacate their houses and promised to do so.

Nursimmal wife of Govinda Chetty was found suffering from fever and concealed in a bandy in the Comati who died on 4th instant were found suffering from plague and removed to plague Hospital from the segregation camp, the sheds dismantled and the clothing of the 5 other members of this family in the segregation camp disinfected –

The sappers commenced building the sheds required for the additional accommodation of the Plague Hospital.

4 men, 2 boys, 3 women & 2 girls remain under treatment in plague Hospital and 14 contacts in the segregation Camp.

Vencataram chetty died in the sick tent in the Comaties Camp this morning and was buried and his sister Akkammal aged 40 was found in segregation tent suffering from fever 102·2 with weak pulse and dry furred tongue, & was removed to the sick tent – in this camp there are now 4 sick & 21 contacts segregated –

These Comaties are difficult to manage and will not carry out instructions. Police Constable Varadendra Row No. 754 in charge of these people was not on the alert when I visited the Camp and the segregated persons were found wandering about the Camp.

I have asked the Sanitary Commr to replace this man; I saw he was perfectly useless

Certificated Sanitary Inspector Vencataramiah attached to the 2d ambulance staff is very useless, and ignorant of sanitary work and I have had to fine him for carelessness and neglect of orders.

The body of a man Mooniappa, a Hindu beggar who apparently died yesterday was found in the jungle close to the Eastern side of the Village & I had his body burnt – his residence if any in the Village could not be ascertained.

I have directed the Sub Collector to see that the whole village is unroofed and cleaned

Yes

The Sappers untiled one house in the Village in the early morning and had to stop the work in order to get on with the sheds required for the Hospital – these 10 men have so much work to do in different directions in striking and pitching tents, dismantling and reconstructing sheds that they cannot make much progress in unroofing the infected houses in the Village which is an important measure to be done as soon as possible and more men are much needed as it is advisable that not only the houses known to be infected but all other vacated houses in the neighbourhood should also be untiled and the premises subsequently examined and disinfected if necessary.

1st Class Hospital assistant Chellamiah of the 2d ambulance staff has been very useless since he arrived here on the 29th December and this evening was laid up with a mild attack of ague so I have issued orders to 1st Class Hospital Assistant Paul to close the Sankerry Dispensary and proceed forthwith to Shulagiri for duty with the ambulance staff.

The village conservancy staff have run away and us work has been done by them since the middle of last month.

8th January 1899.

25 Sappers arrived from Bangalore this morning at 8 a.m. & the other 10 men are not working today.

Hospital assistant Chellamiah is better this morning

Suryappa aged 2 died in Plague Hospital this morning and was burnt: Subramanya Iyer infant of Vencata lachmi ammal attacked yesterday, was attacked this morning and removed to Hospital.

Nursiammal aged 20 died in the Comate Camp this morning and was buried - 5 attacks & 4 deaths have occurred in this family of 8 - 2 bags of jaggery found amongst their belongings being suspected were destroyed by fire in my presence and a certificate to that effect given to the owners.

Munisawmy aged 35 who left the Village three days ago was found sick in a bandy in the fields and was removed to the Plague Hospital.

Having handed over charge to Dr. Virtue Tebbs I return tomorrow morning to Hosur.

W. Roger Harrison
Lt Col. IMS.

Camp Shulagiri }
Dated 8. 1. 1899 }

	The Collector said he would send me more toties from Salem and as two had come to Hosur to be sent to Kurubarapalli - he said he would send them here instead. The Collector left Hosur Moses Pillai still in bed I have no hospital asstt. so that all the work depends upon Mr. Hodding, the Sanitary Inspector & myself (Sd) H. A. E. Noble A.M.O.	This H. A. is paralized by fear & arrangements have been made to transfer him to the Bagalur frontier station & 1st class Hospl. asstt. Swamidoss Nadar to the 1st ambulance Stn at Mattigiri - the other H. A. Andrew Pillai of this A.S. is at present under treatment in the Hosur L. F. Hospl for ague & will be discharged to duty in 2 or 3 days. (Sd) A. N. Rogers Harris D.M.&S.O. Hosur 10.1-99

Diary of H. A. E. Noble additional medical officer for January 6th 1899.

Month & date	Names of places visited	Duties performed and the results of inspections made each day	Remarks of the superior officer.
January 6th 1899	Mattigiri	At Mattigiri I found the sheds not yet completed. They were to be so by 8 P.M. but were not. A woman named Venkatamma was sent to this shed by Capt. Dodd & no room was available. She had to lie outside all night but I gave her as much covering as possible and she was looked after as carefully as we could arrange. I have still no hospital assistant. I asked Mr. Gibbons in how long Andrew Pillai would be well enough for duty - he said about a week There were four fresh cases in Mattigiri & 2 deaths. (Sd) H. A. E. Noble	They might have given her a tent K

Diary of H. a. E. Noble additional medical officer for January 7th 1899.

Month & date	Names of places visited	Duties performed & the results of inspections made each day	Remarks of the superior officer.
January 7th 1899	Mattigiri	At Mattigiri the sheds were not completed Mr Hodding set the sappers to complete the two already begun & to make the other two. These were finished in 6 hours and patients were in them. In the morning Captain Dodd sent word that he had a patient that he wished to send but I was compelled to refuse to take him in until these sheds were complete This done he was sent for. There is now a hospital assistant at the remount depot. There was one fresh attack & no deaths at Jegoor there was one attack and one death. (Sd) H. a. E. Noble A.M.O.	The superintendent may be asked to allow this Hospl. Asst. to look after the Hospl. till H. A. Moses Pillai is replaced & Andrew Pillai returns to duty. (Sd) A N R H DM&SO 10.1.99
